

How to download and create a Windows 10 October 2020 Update 20H2 installer by USB

So, after many trial versions, recently Microsoft has officially sent Windows 10 users the next big update. I will show you How to download and create Windows 10 October 2020 Update 20H2 installer using USB

Windows 10 version 20H2 (also known as **Windows 10 October 2020 Update**) is stated by Microsoft that it will provide a variety of features to improve performance and improve quality.

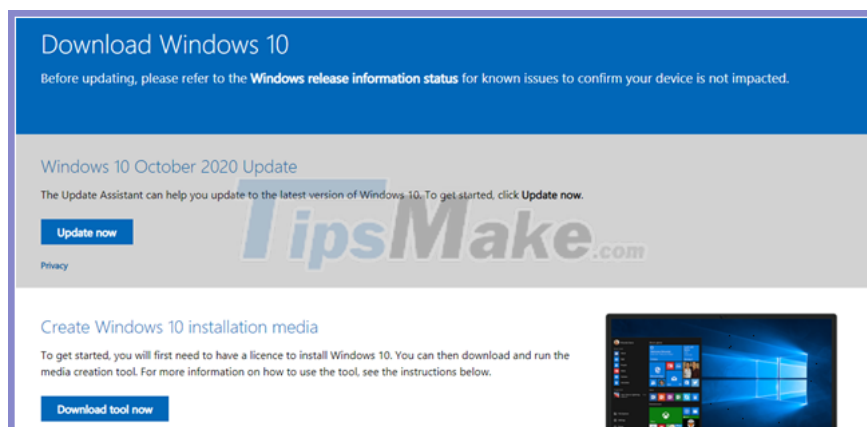

If you talk about the changes in Windows 10 October 2020, you can go through some details such as:

1. The "System" page in Control Panel has been deleted. When you try to open it, you'll be taken to the About page in the new Settings app.
2. Microsoft Edge is built-in.
3. The "Your Phone" app is adding more features, designed for select Samsung devices. If you have one of these brands, you can access your phone's Android apps directly on your Windows 10 PC. You will launch these apps, view and interact with them on the Windows desktop.
4. New Start Menu. The Start Menu has removed the tile color and unified the color scheme of Windows 10's light or dark theme. In the past, the Start Menu used the color of your choice.

How to download Windows 10 October 2020 Update 20H2

As usual, Microsoft will release this major update package via Windows Update. However, it's best to do a fresh install via the ISO package for a smoother experience.

There are many ways for you to own the installation ISO package of Windows 10 October 2020 Update 20H2 version. Which include the two most common ways are to use Windows 10 Media Creation Tool and Windows ISO Downloader.

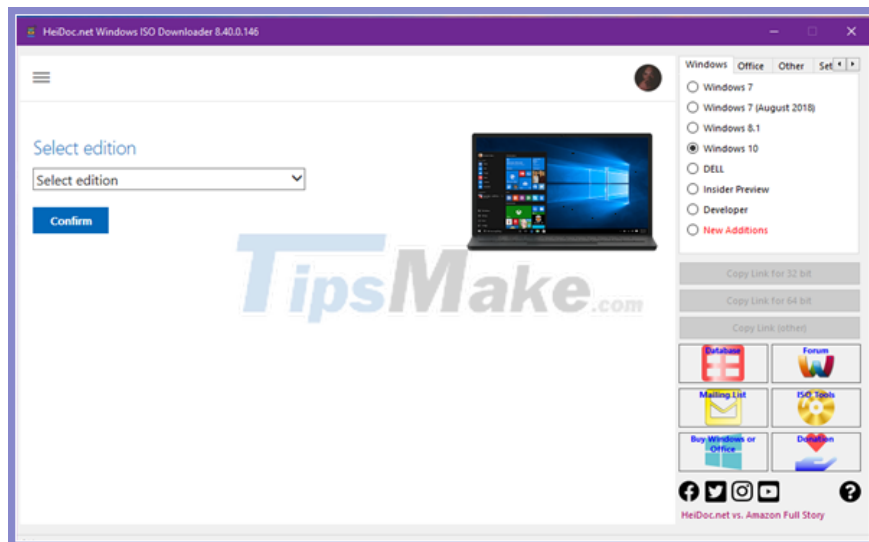

Windows 10 Media Creation Tool is quite good but download speed is quite slow, so Windows ISO Downloader is the best choice for you to use.

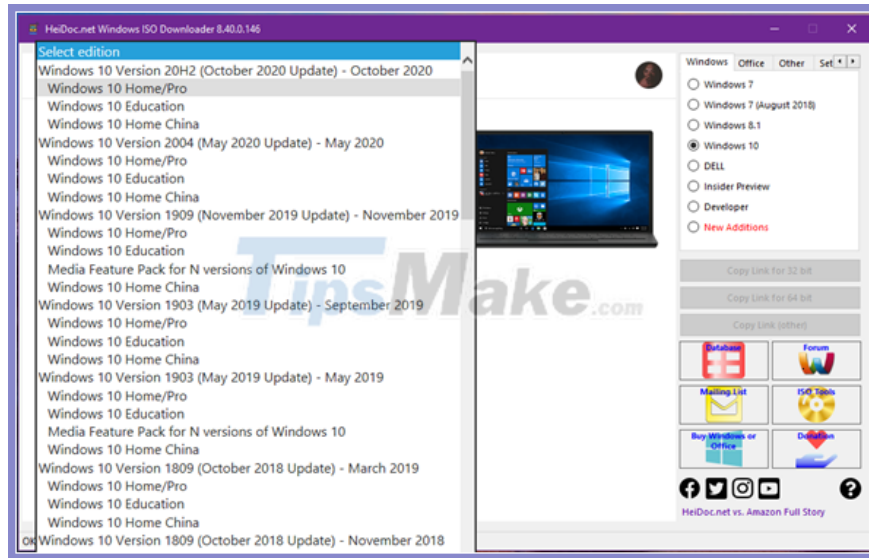

How to use Windows ISO Downloader to download ISO package to install Windows 10 October 2020 Update 20H2

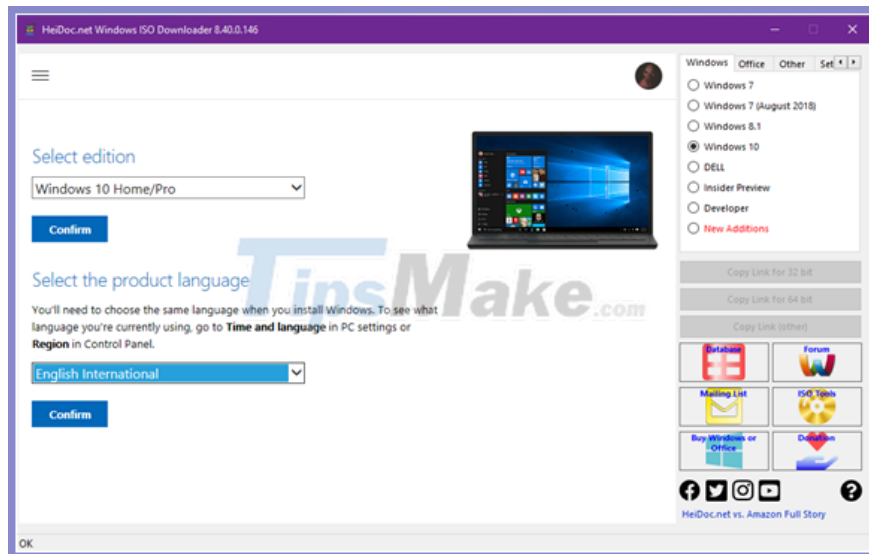

Step 1: Access this site [here](#) and download Windows ISO Downloader.

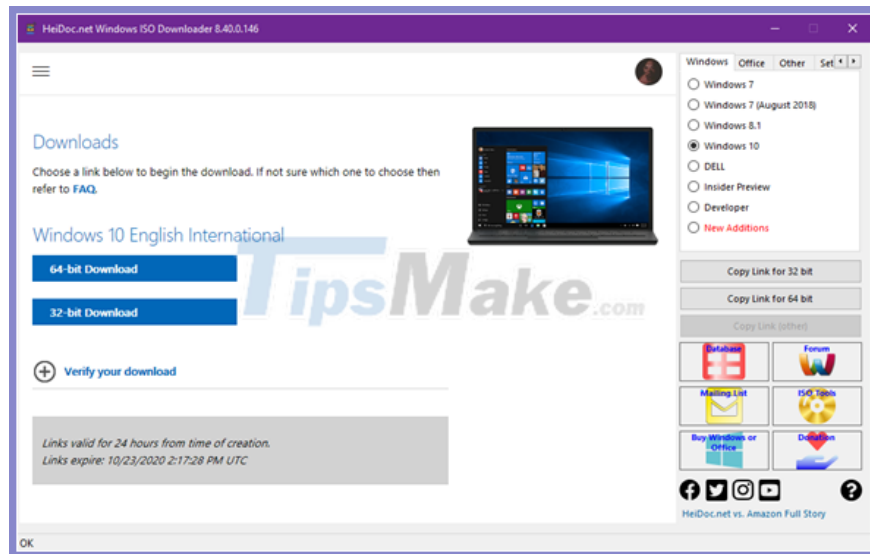

Step 2: Launch Windows ISO Downloader and check the option "Windows 10".

Step 3: Select the correct version of Windows 10 you want to download.

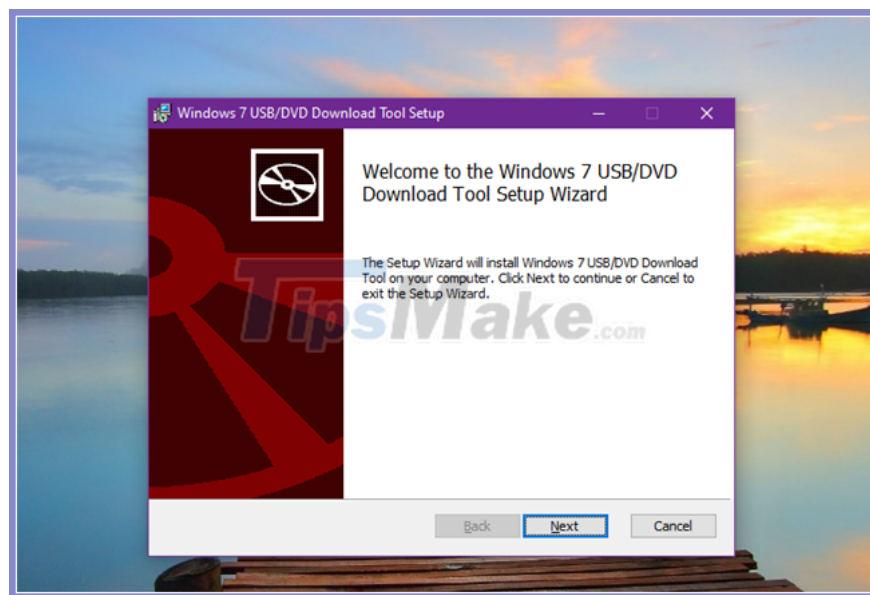

Step 4: Next is the language selection.

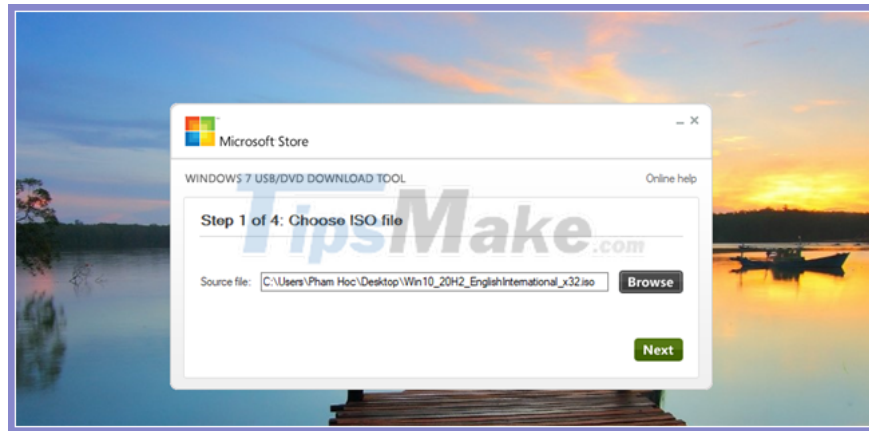

Step 5: Finally, choose the version of Windows 10 structure you need and download is complete.

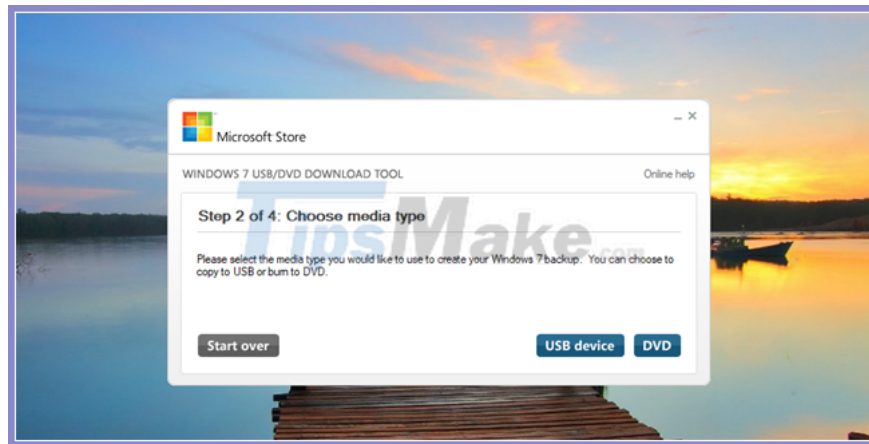

How to initialize Windows 10 October 2020 Update 20H2 installation USB

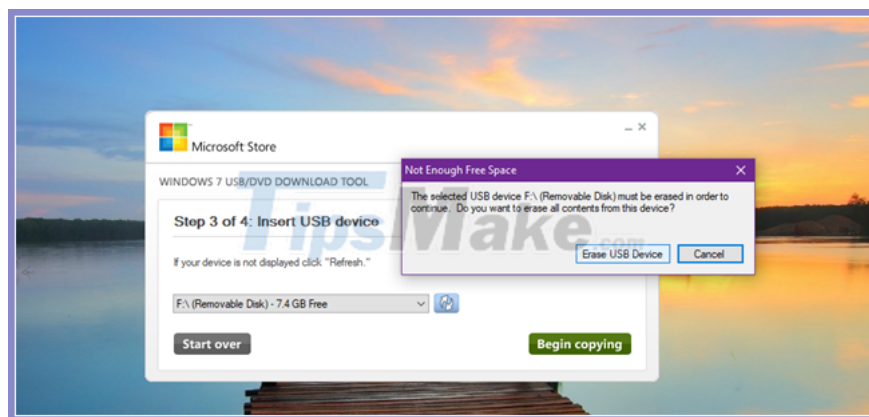

Step 1: Download and install Windows USB / DVD Download Tool released by Microsoft [here](#).

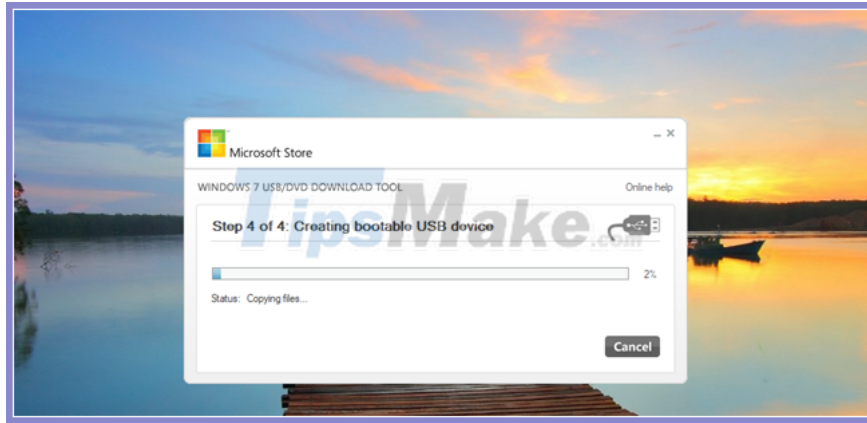

Step 2: Plug the USB into the computer and launch the Windows USB / DVD Download Tool. Click Browse and navigate to the Windows 10 October 2020 Update 20H2 installation ISO package you just downloaded above.

Step 3: Click on the USB option.

Step 4: Continue to click "Begin copying", "Erase USB Device" and "Yes" in the message window that appears.

That's it, now you just have to wait for the initialization to complete and you can use it.

Very simple, right? Good luck.
