How to install Vietnamese fonts for computers

After downloading the file, you in turn extract the large zip file, then all the small zip files (or extract the files you want to install).

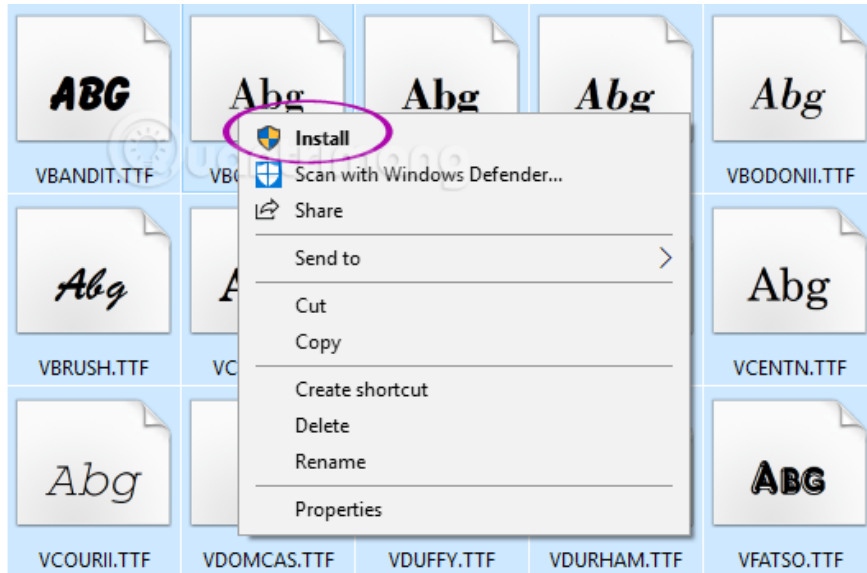

Open the folder containing the Vietnamese font and unzip it. If you want to see which font, double click on that font, here you can choose Install to install the font if you like.

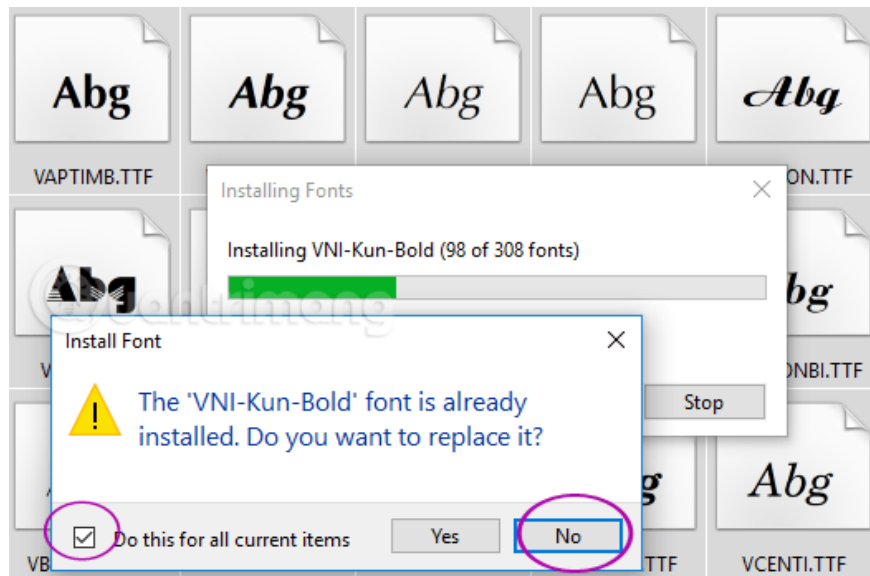

If you do not need to see, select the font you want to install> right mouse button> Install.

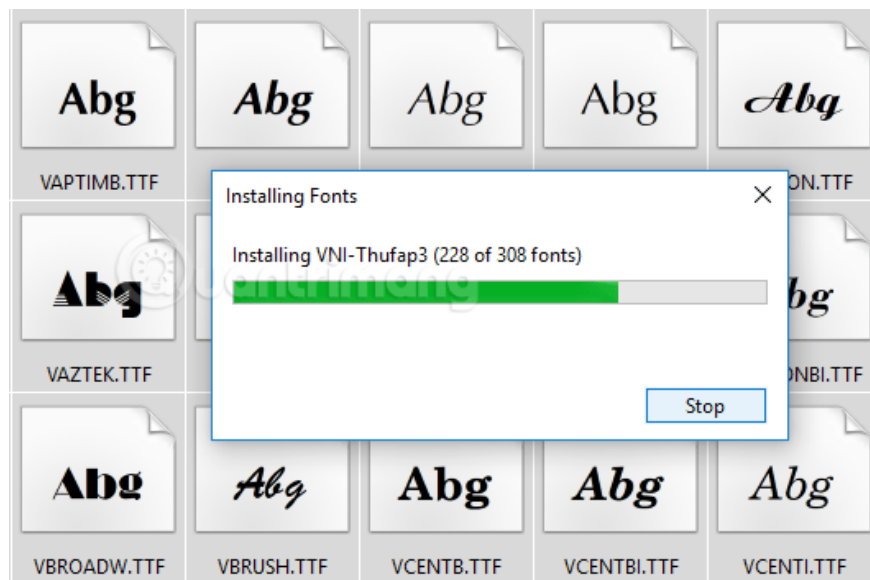

If you want to install all fonts in the folder, press **Ctrl + A** to select all fonts, right-click any font> **Install** . If you just want to install some fonts, choose the first font, then hold Ctrl and select the remaining fonts, then right-click on a font in the selected number> Install.

As mentioned above, in the computer may already have some fonts available in this full font set, so when you choose to install all will meet the message, the font already exists, do you want to overwrite it, you choose No and tick **Do this for all current items** so that Windows automatically applies the same action to the installed fonts.

Wait a moment for the font installation process to complete.

If you want to write calligraphy, you can download the calligraphy font set. Also, do not miss the free Google fonts, with very nice, modern fonts, Vietnamese language support.
