

# How to download and play Fortnite on Samsung devices

Currently Samsung devices like Galaxy S7, S8, S9, Note 8, Tab 3 and Tab 4 can download and experience Fortnite Android.

Fortnite Android version is officially available and those who own Samsung device or Samsung Galaxy tablet will experience the first game, such as Samsung Galaxy S7, S8, S9, Note 8, Tab 3 and Tab 4. Fortnite also released on the new Galaxy Note 9 product. And Samsung devices will download the game via Galaxy Apps instead of downloading it on Google Play Store like other common games. The following article will show you how to download Fortnite games on Galaxy Samsung devices.

## Instructions for downloading Fortnite games on Samsung

### Step 1:

Users access the **Galaxy Apps** application on the screen interface to search for games. Immediately we will see **Fortnite game banner** right on top. New interface appears and click **Install & Open** to open the game download interface.

At the interface you will also see system requirements to be able to download and install Fortnite play.

+ ADD APPS

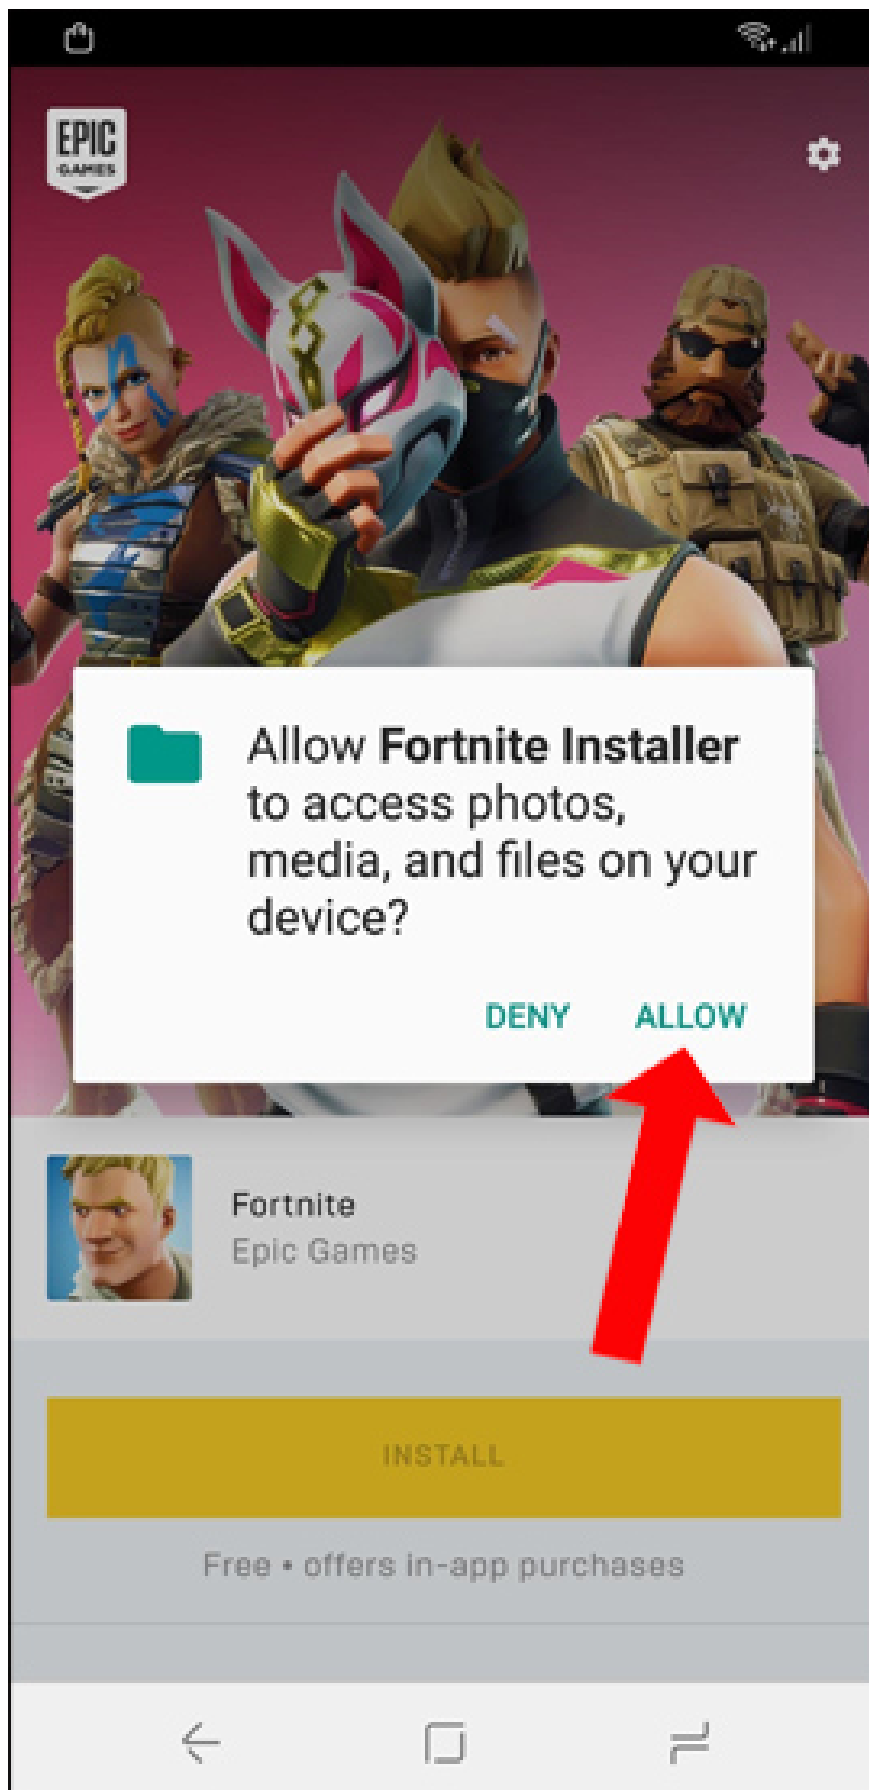

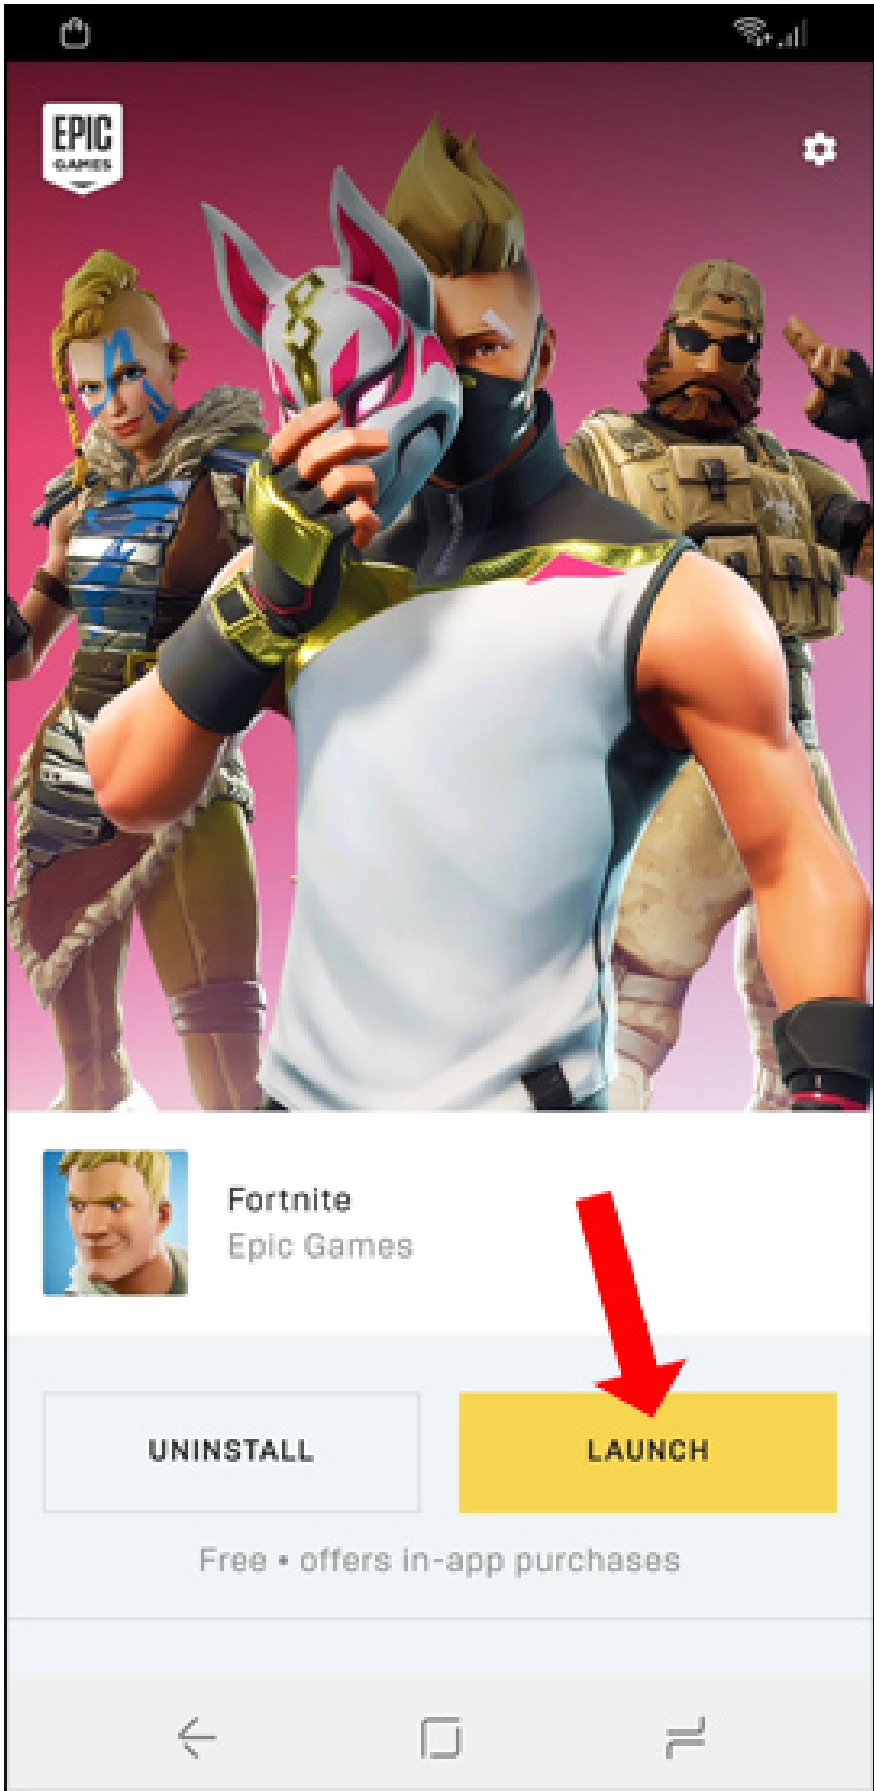

## Step 2:

We will proceed to download Fortnite Installer file with a capacity of more than 4MB on the device. The file will ask users to allow access to images, media files, data on the device, click **Allow** .

Then the main game version with 1.8GB capacity will download to the device. Wait for the download process to click **Launch** in the interface to play the game. Users can also delete Fortnite Installer application because it will

not affect Fortnite play on the computer.
