How to download and use Kling AI to create videos from photos and text

Currently, Kling AI does not have an installed version, so users who want to create quality photos and videos need to register for an account and use the tool on the official website.

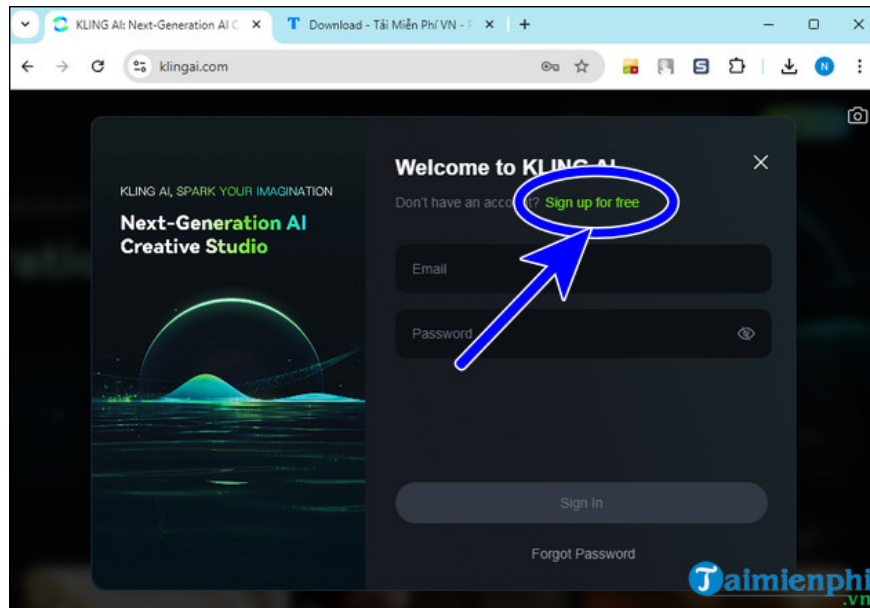

1. Instructions for registering to create a Kling AI account

Before you start using Kling AI, you need to create an account. The registration process is very simple and quick with the following steps:

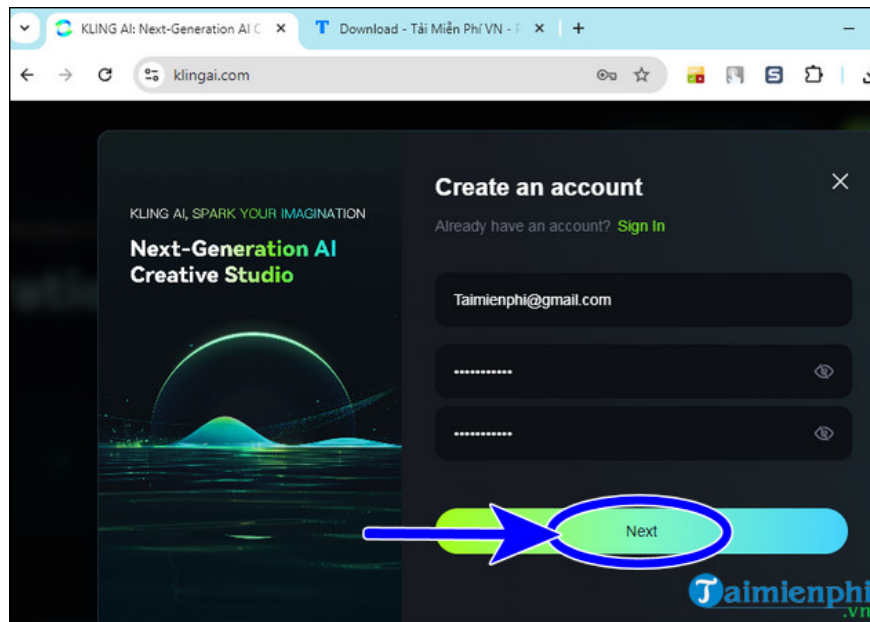

Step 1: Visit Kling AI's homepage **HERE** and select **Sign in for free credits** .

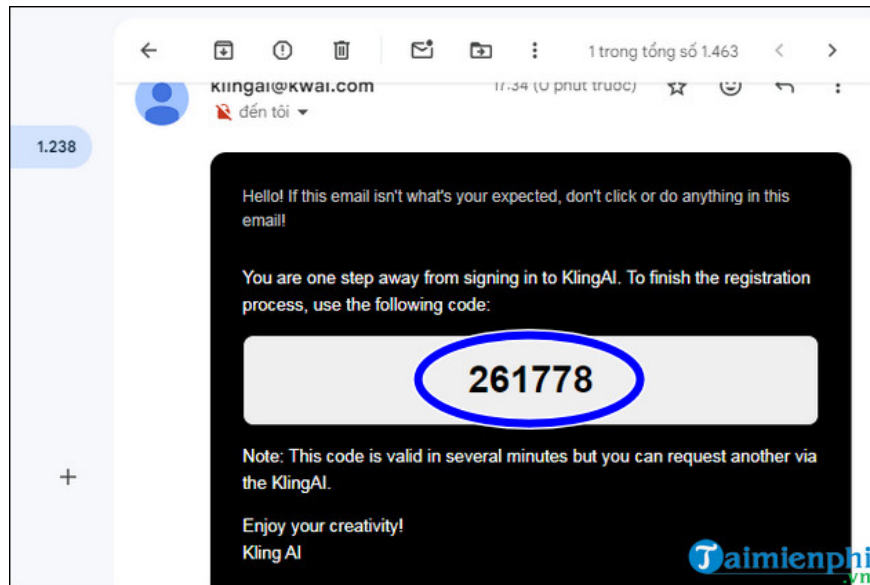

- Next, select **Sign up for free** .

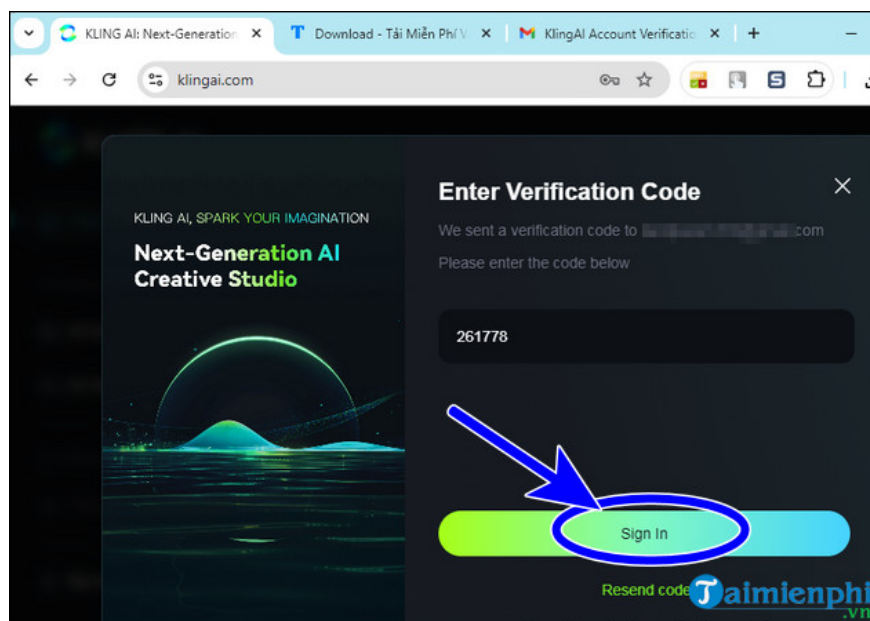

Step 2: Enter your Email address and account password into the system, select Next to register.

Step 3: Go to your inbox and get the authentication code sent from Kling AI.

- Enter this code on the authentication page, select **Sign In** to complete the registration process.

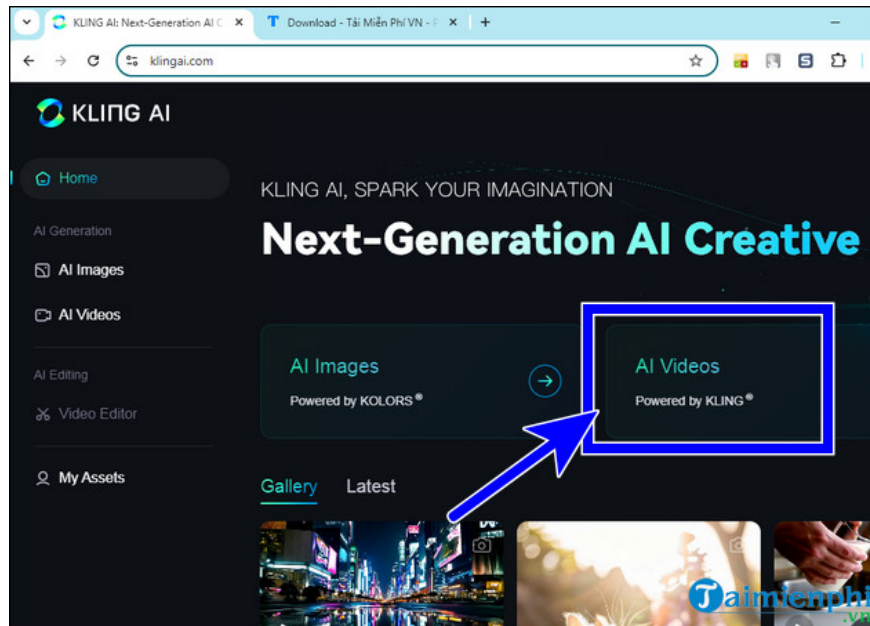

2. Instructions for using Kling AI to create photos and videos

Kling AI helps you easily create images and videos from text with these simple steps:

2.1. Create a video from description text

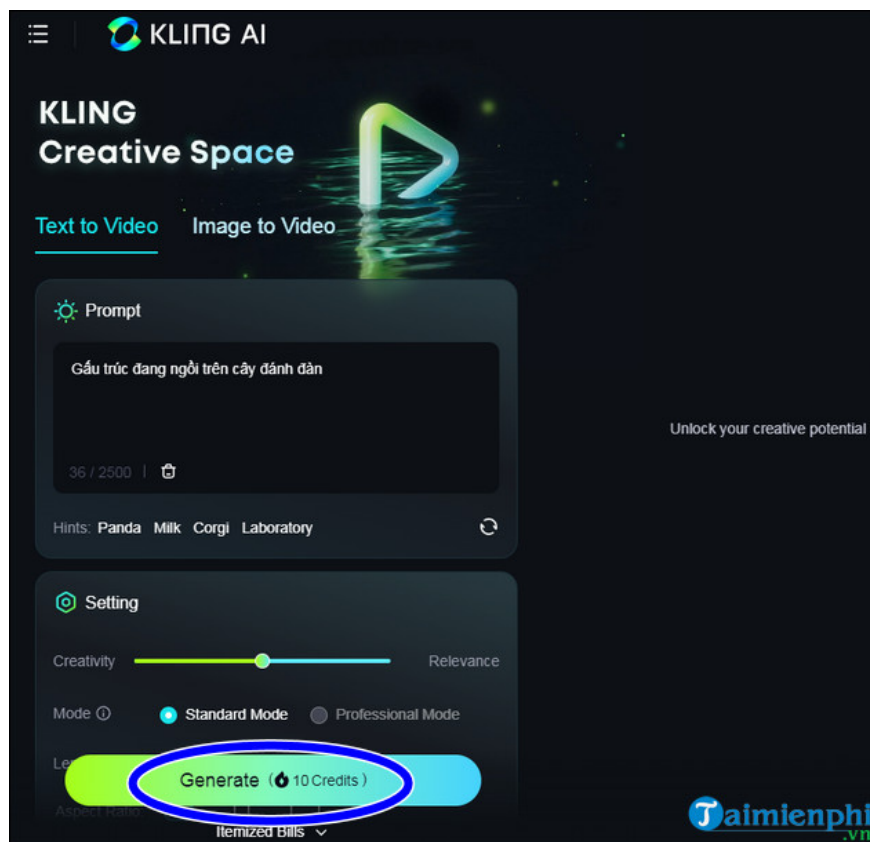

Step 1: On the home page, select **AI Videos** .

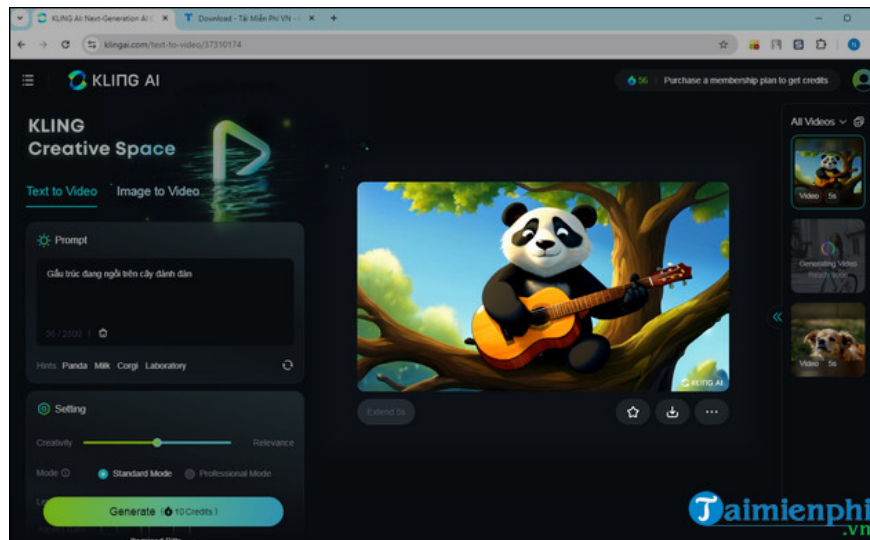

Step 2: In the **Text to Video** section , enter the **detailed descriptive text** you want to convert into a video in the **Prompt** box . For example, " **The panda is sitting on the piano** " and select the parameters in **Settings** , press **Generate** and wait 2 to 5 minutes for Kling AI to create the video.

- **Settings** : Allows users the option to create videos with creativity or close to the descriptive text content and frame rate of the created video.

- **Camera movement** : Set the camera angle type for the video, such as Zoom, Tilt, Horizontal, Vertical.

- As a result, after creating a video with AI from the description text, you can press the Download button (download below the video) to your device.

2.2. Create videos from available images

Step 1: On the home page, select **AI Videos** .

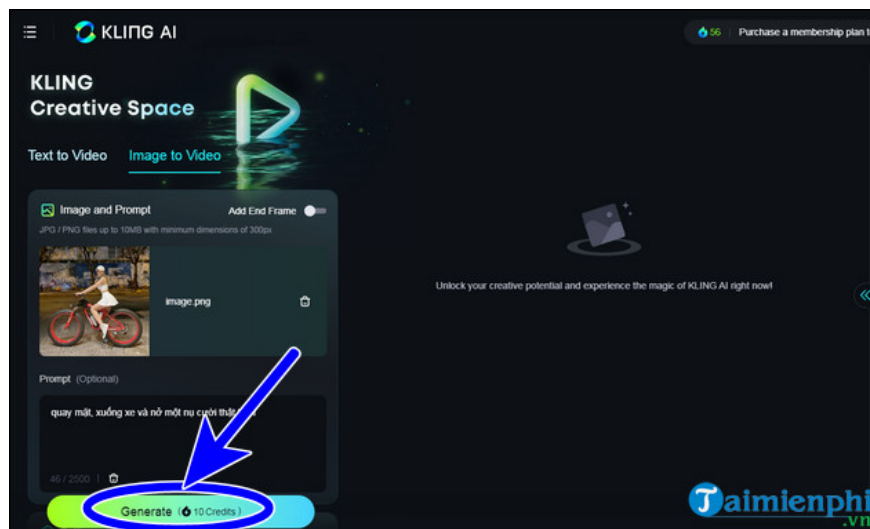

Step 2: In the **Text to Video**

- **Imager Android Prompt section:** Select the image or paste the image you want to create a video into, the JPG/PNG image has a capacity of no more than 10MB.

- **Prompt:** Enter text (script) for the video you want to create from the image.

- **Settings:** Set options for the video

==> Click the **Generate** button to let Kling AI create a video from available images.

If you feel satisfied with the created video, you can press the **Download** button to download this video to your device. With Kling AI, creating works of art from text is easier and more fun than ever. This tool not only saves you time but also opens up limitless creative possibilities.
