

# How to download and use X-VPN for free on Android, iPhone, and PC.

X-VPN is a virtual private network (VPN) application designed to protect users by hiding their real IP address while browsing the web, making it extremely safe when using public Wi-Fi. You can now download and use X-VPN to bypass firewalls and access blocked websites completely free of charge and on multiple platforms.

Download and use X-VPN completely free on Android, iPhone, and PC platforms. The application allows users to use it without requiring an account, without annoying ads, and allows users to **fake their IP address** and browse the web without worrying about tracking or accessing blocked sites.

## Instructions for using X-VPN for free on PC, Android, and iPhone.

### *I. Key features of the X-VPN application software*

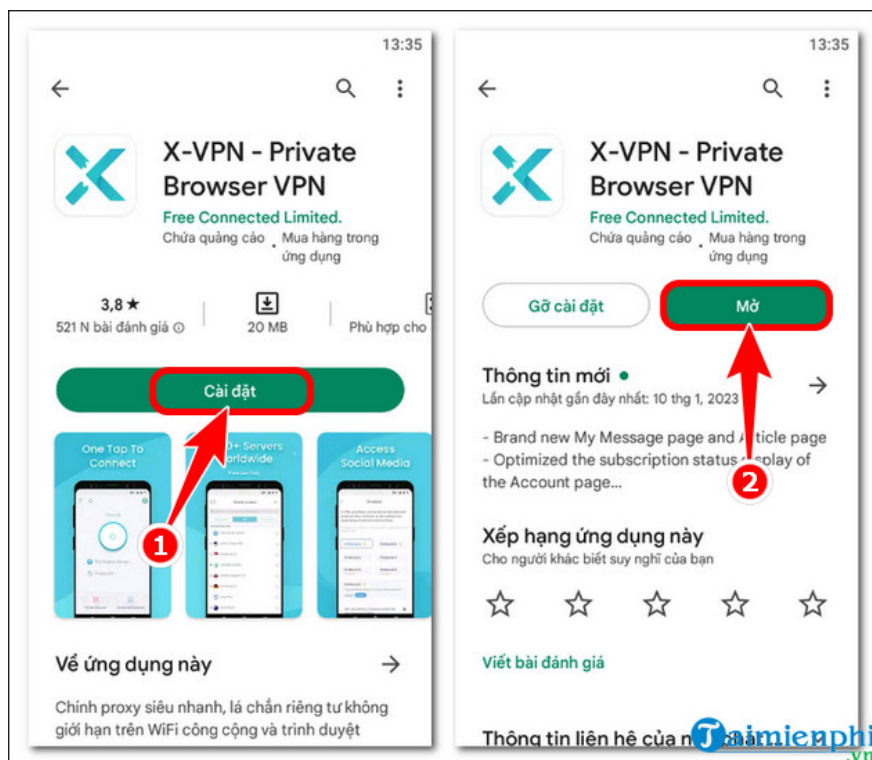

- X VPN is completely free on mobile and PC, requires no account, and is ad-free.
- Easy and fast connection process.
- Encrypts using AES 256-bit standard.
- Easily bypasses firewalls with a system of 7 selectable protocols.
- Supports many free servers, especially on Android and iOS.
- Supports many servers for streaming content such as Pandora, BBC, Netflix, etc.

## II. Instructions on downloading and using the X-VPN app on Android and iPhone

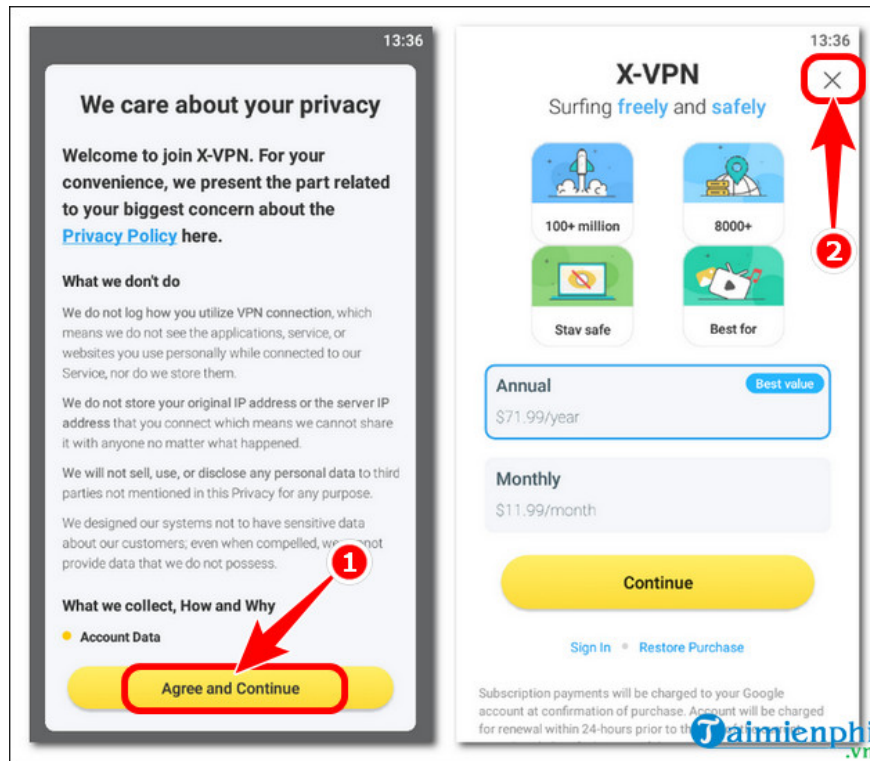

Step 1: Access the links below to download and install the **X-VPN** Mobile version.

- Download **X-VPN for Android** here.
- Download **X-VPN for iPhone** here.

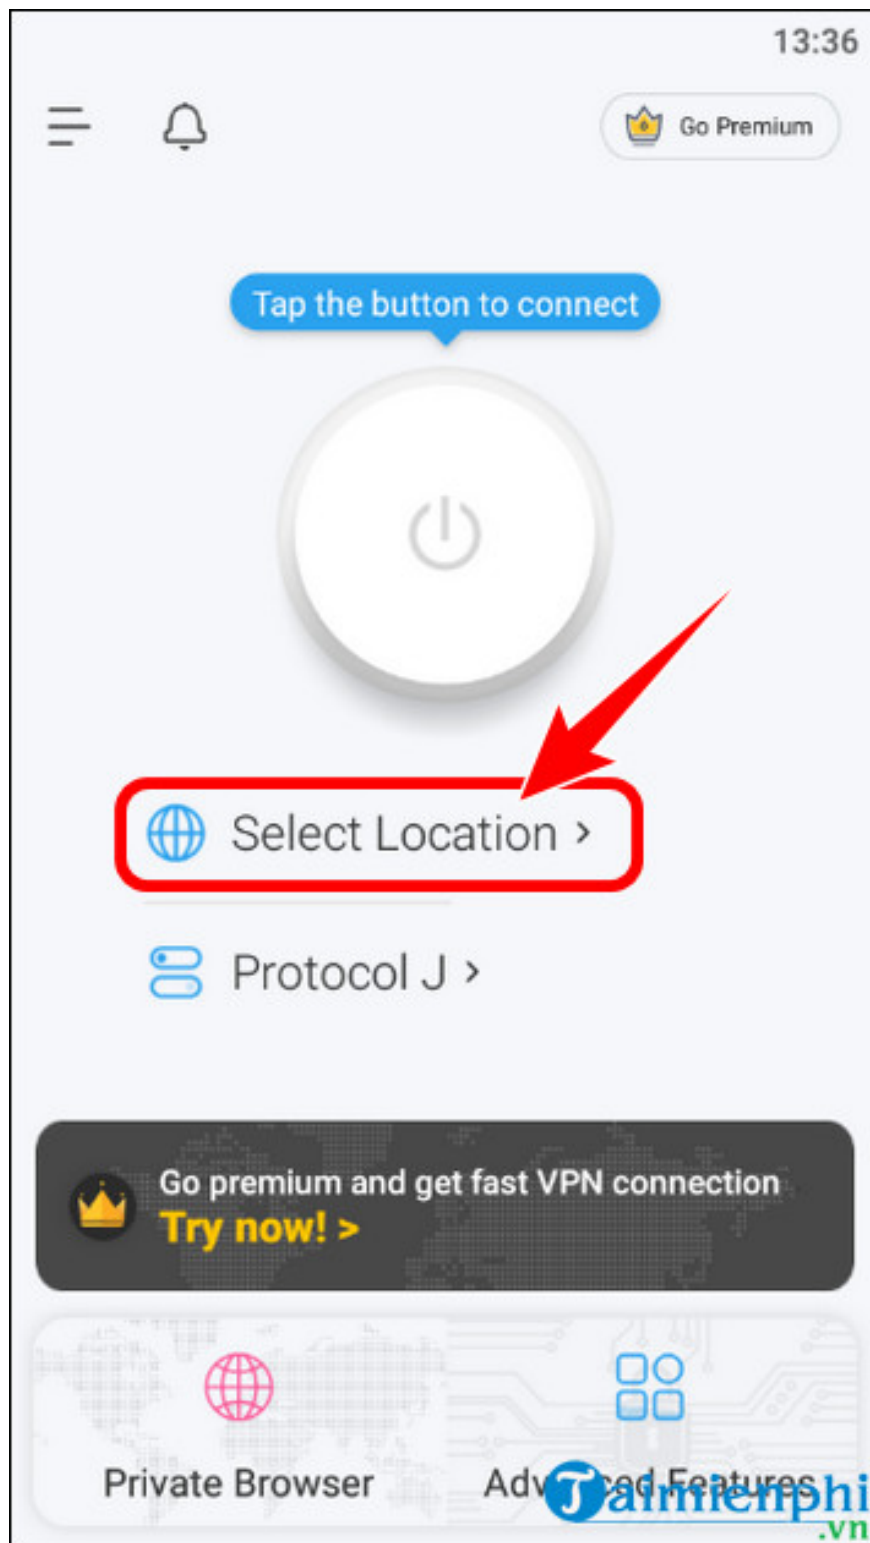

Step 2: Select **Settings** => click **Open**.

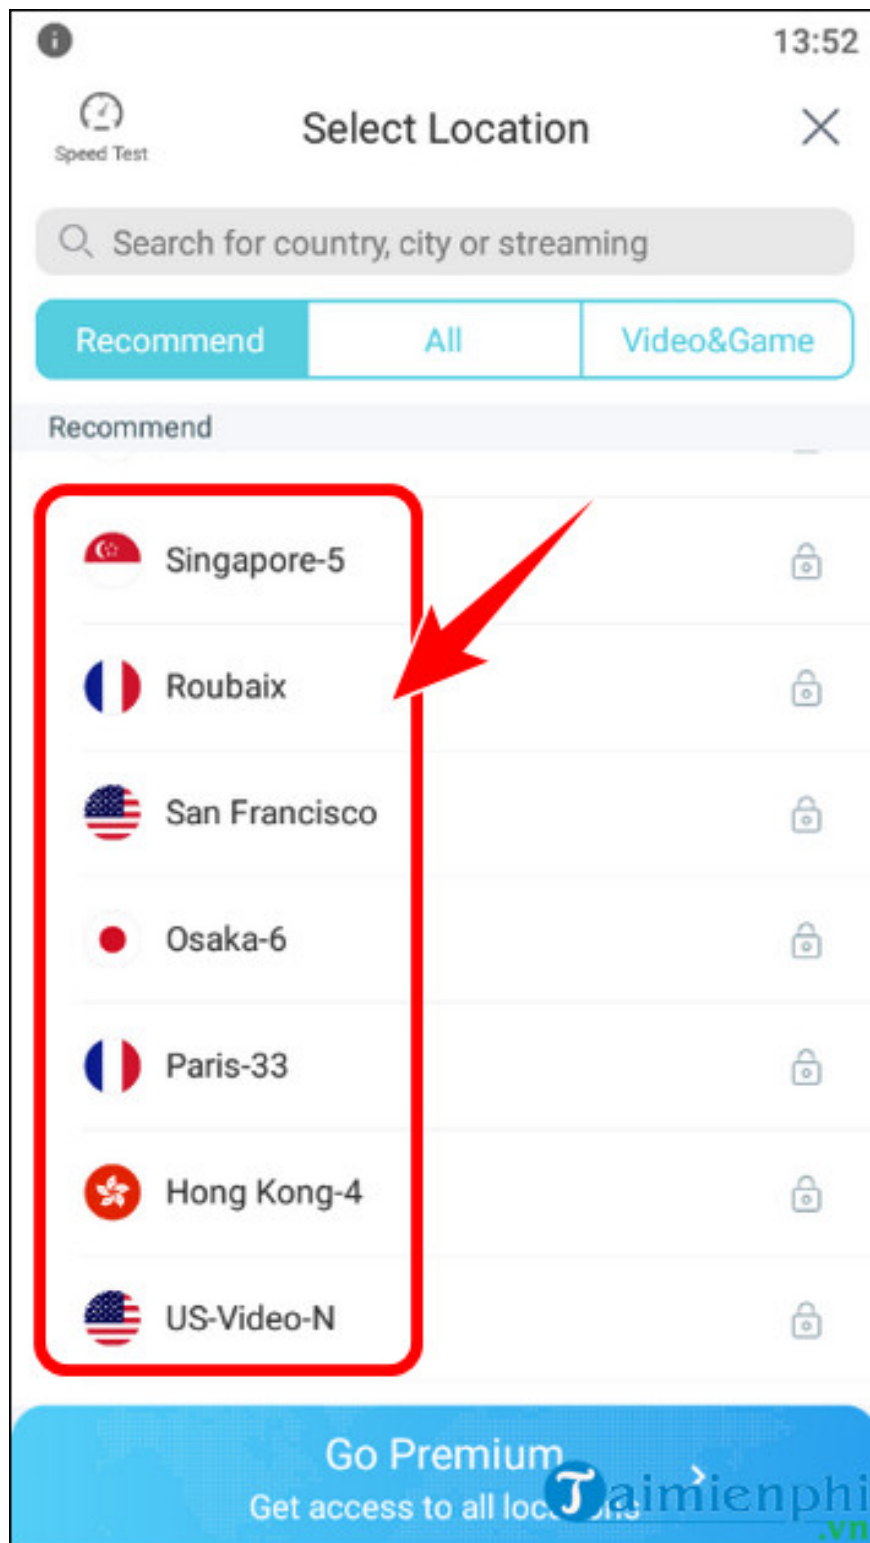

Step 3: Open the **X-VPN** app, tap **Agree and Continue**, agree to the publisher's terms and conditions => tap **X**, turn off payment notifications.

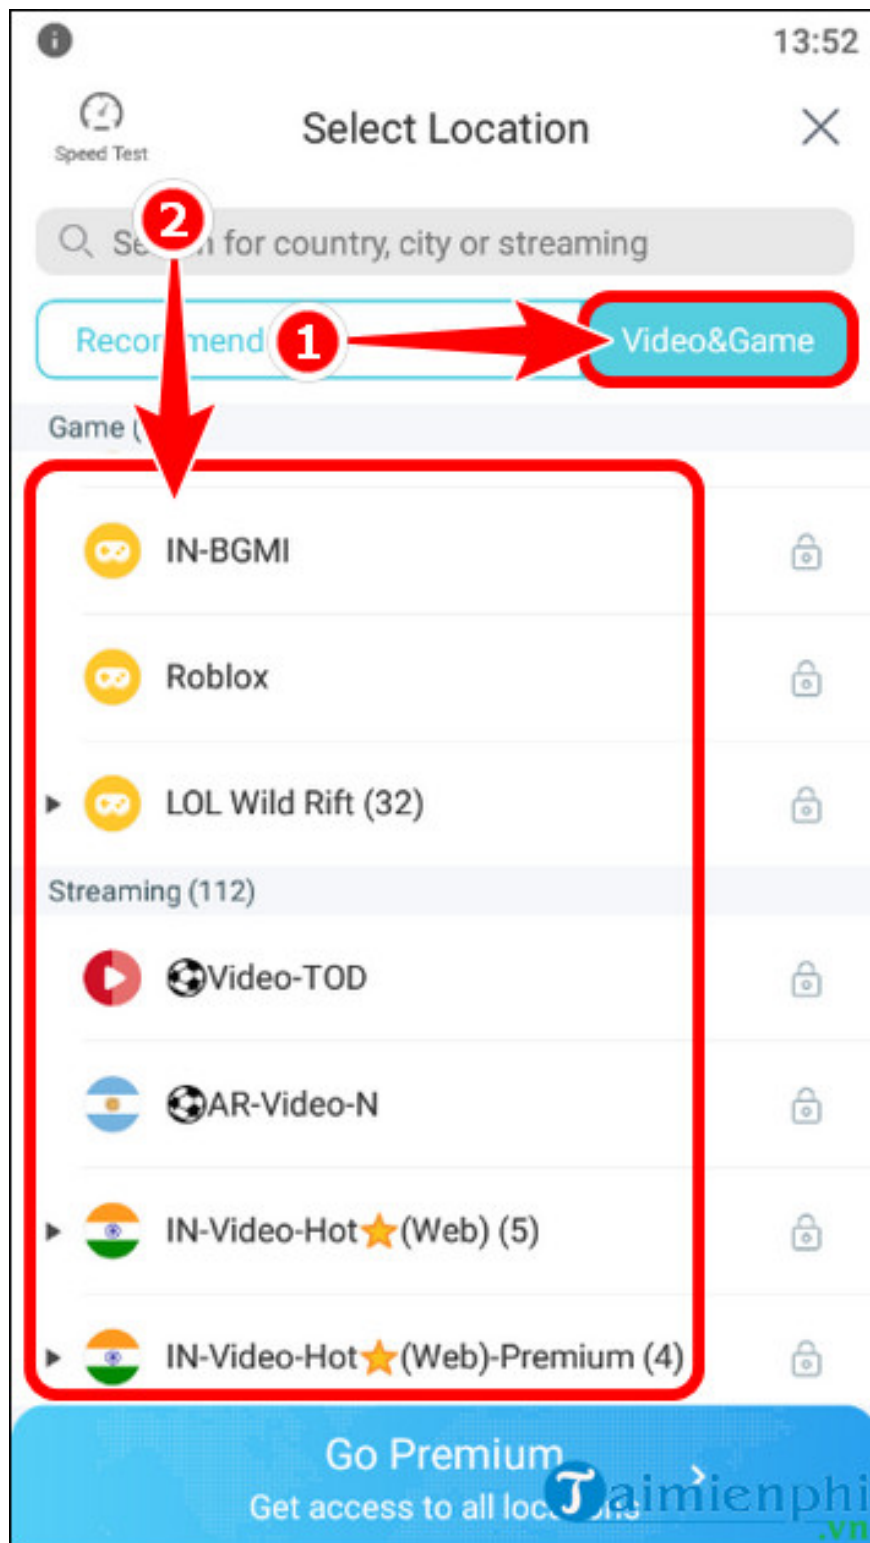

Step 4: The X-VPN interface will appear as shown below. To start using the application, click **Select Location**.

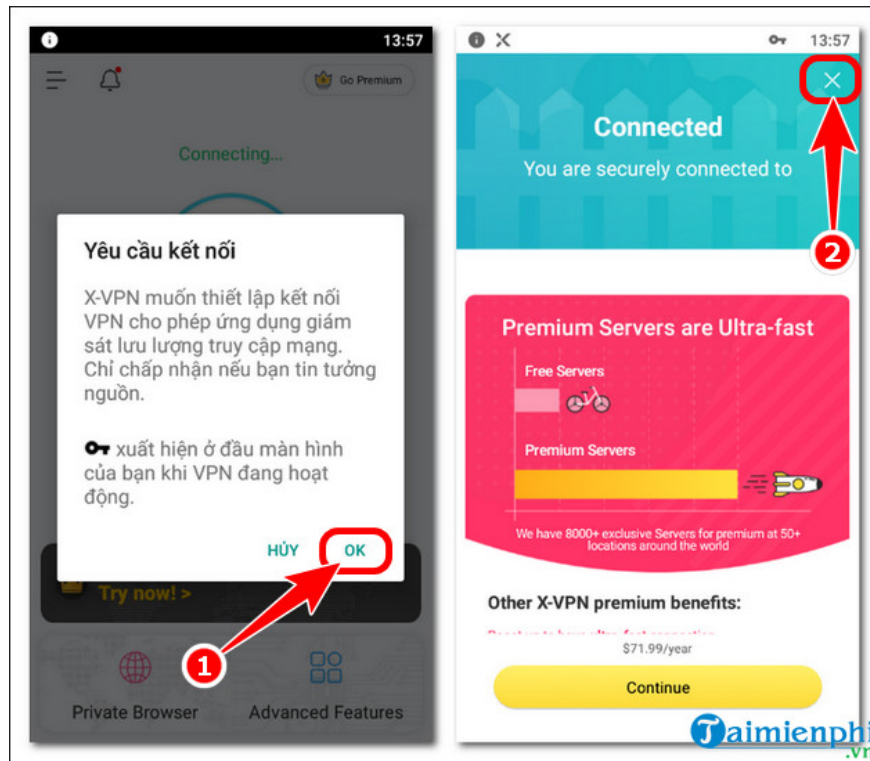

*Step 5:* In the server section, you can choose your preferred server to connect to, such as: India, Japan, Singapore, Netherlands, Norway, Poland, France, Germany, Hungary, Russia, Spain, Australia, Canada, United States, United Kingdom, etc.

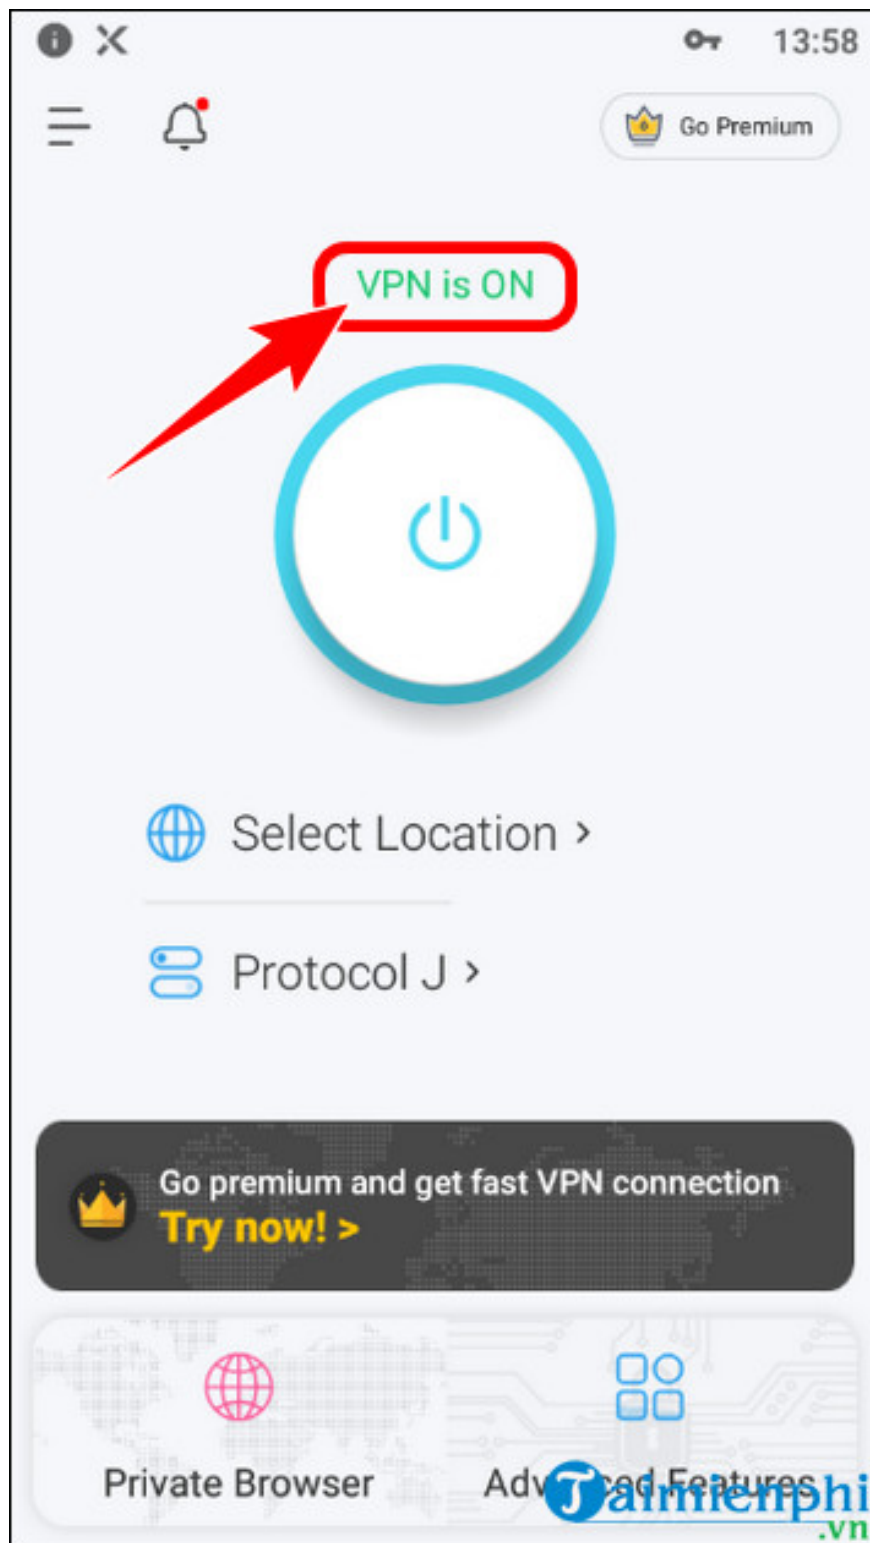

- Alternatively, you can also click **Video & Game** => select a **service to speed up gameplay** or **switch to a server specifically for streaming content**.

Step 6: After selecting the server to connect to, the system will display a " **Connection Request**" message. Click **OK** to agree => press **X** to close the connection notification.

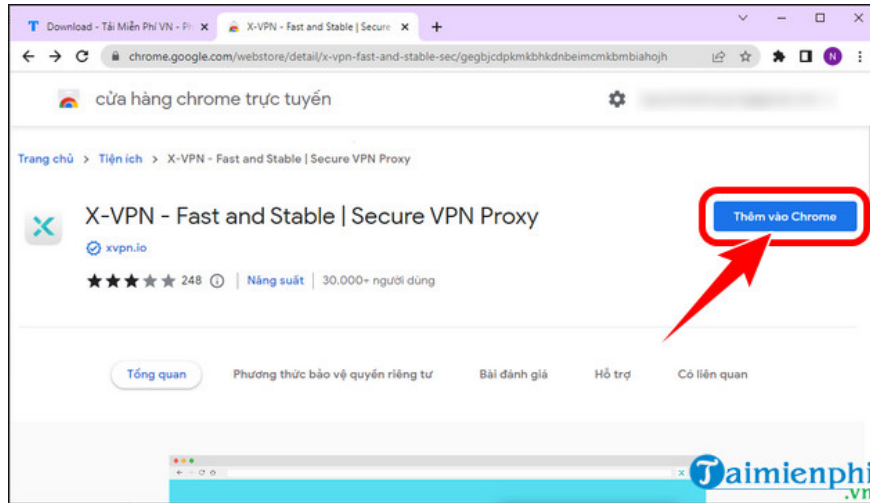

*Step 7: If the message "VPN is ON" appears on the interface, it means you have successfully connected to the server.*

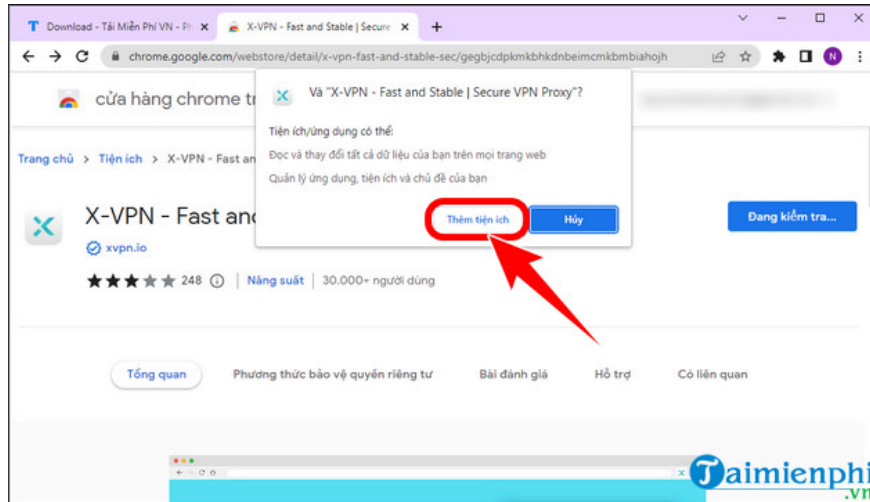

### *III. How to download and use X-VPN software on a PC*

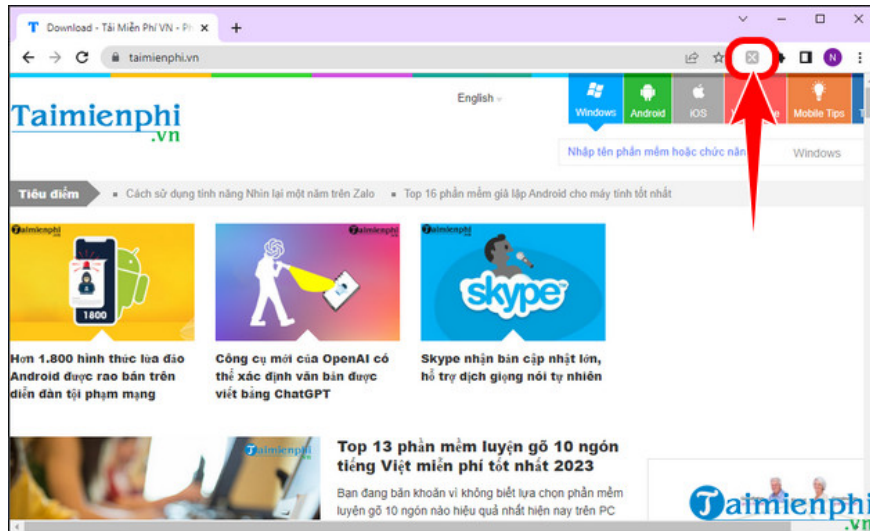

*Step 1: Open the **Google Chrome** browser , access the X-VPN installation link **HERE** => click **Add to Chrome**.*

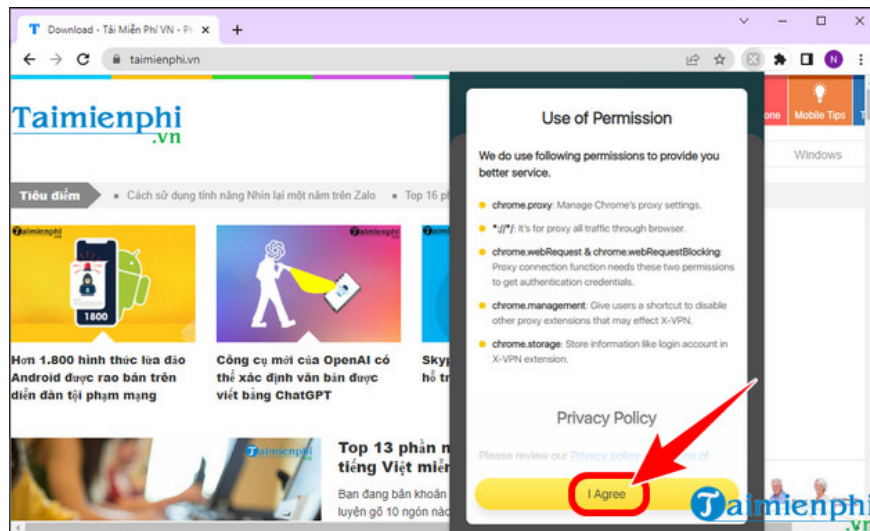

- Click **Add extension.**

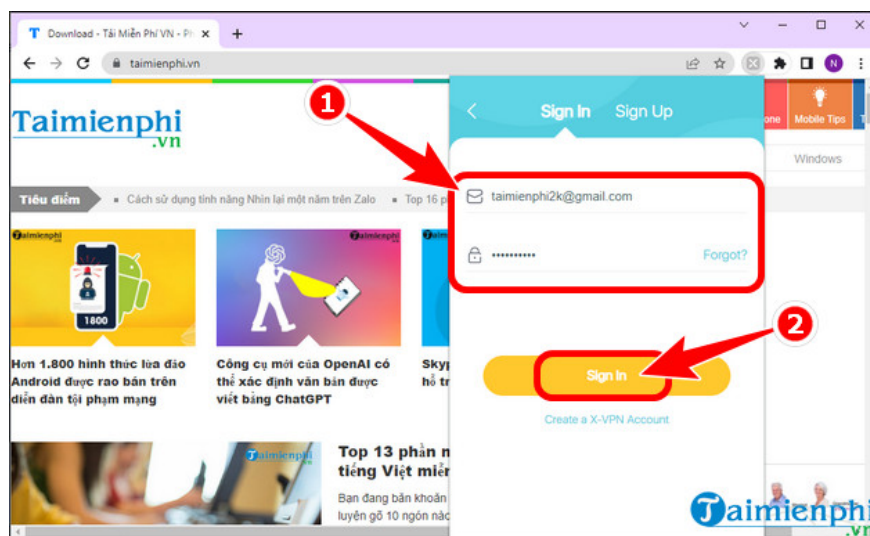

*Step 2:* Open the extension by tapping **the X-VPN logo.**

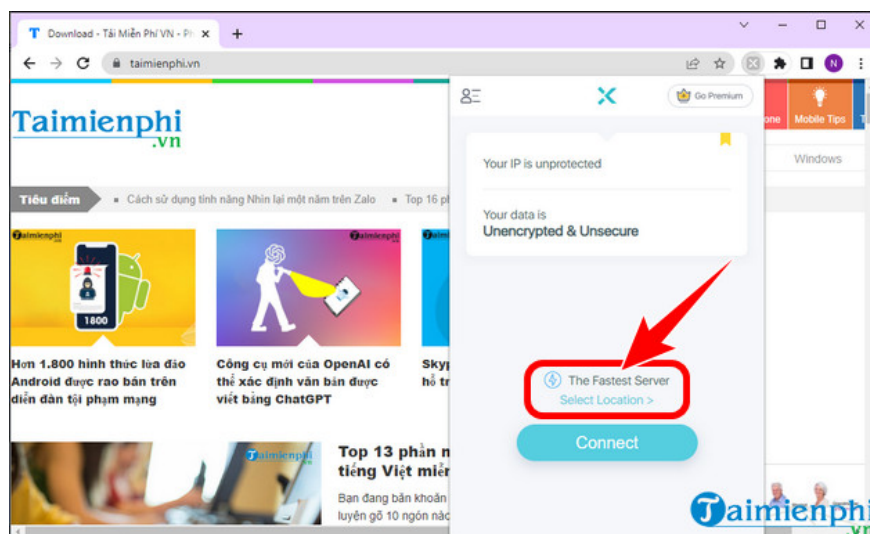

Step 3: Press "**I Agree**" to accept the publisher's terms and conditions.

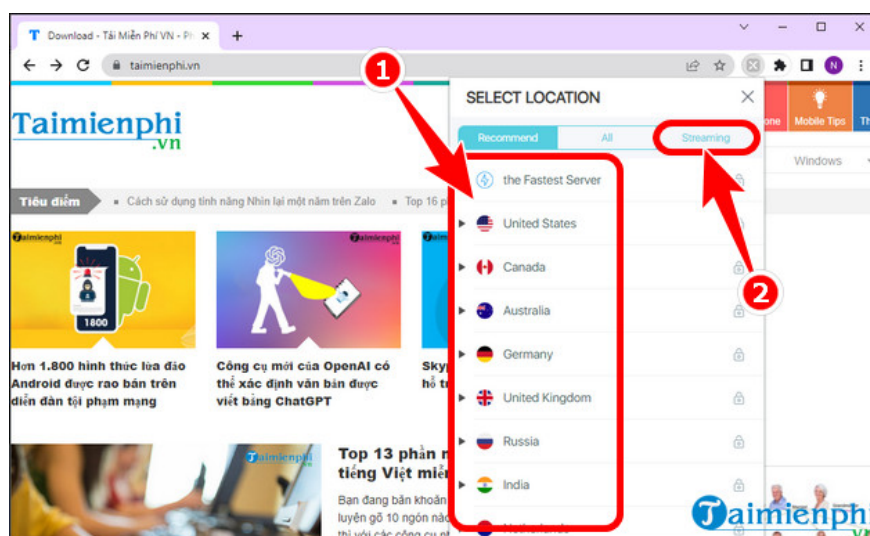

Step 4: Enter **your username** and **password** in the blank fields => select **Sign in**. If you don't have an account yet, you can click **Sign Up** to register.

Step 5: Using the PC version of X-VPN is the same as the mobile version; simply click **Select Location**.

- In the server section, you can connect to your favorite **server** or use **streaming services** to watch content specifically designed for streaming.

Thus, it only takes a few seconds to connect to X-VPN, allowing you to browse the web with peace of mind, without worrying about losing personal information, speeding up device loading times, and accessing blocked websites. Additionally, you can also install **Hotspot Shield** on your computer to access blocked websites; the software is lightweight and compatible with many computer operating systems.
