

How to download applications larger than 150MB from the App Store using 3G, 4G without Wifi

When you try to download the app over 100MB (150MB with iOS 11 and above) on the Apple Store with 3G, 4G will announce to wait until the new Wifi connection is loaded. Today, Network Administrator will guide you to fix that to download applications using 3G or 4G very simple.

Using iPhone surely we all know that, when downloading applications larger than 150MB from AppStore, users are required to turn on Wi-Fi, if only turn on 3G, 4G then you will have no way to overcome get this limit. However, Wi-Fi networks are not always available and this makes many people uncomfortable. Today, Network Administrator will guide you to fix that to download applications using 3G or 4G very simple.

Download applications, large-capacity games on iPhone without Wi-Fi

Normally, when you try to download an app over 100MB (150MB with iOS 11 and above) on Apple Store with 3G, 4G will notify you to wait until the new Wifi connection is loaded.

If you receive the same message, click **OK** to turn off this window and follow the steps below to download a large application with 3G / 4G network.

1. Open the **Settings** app on your iPhone or iPad.
2. Scroll to **General settings - Date & Time** (*General - Date & Time*).

3. Turn off the **Auto setting** (*Automatically Set*) option.
4. Click on the blue date displayed below.
5. Change back before the current day about 2-3 days (For example, today on April 24, you will adjust the date to 27/4).
6. Click the **General setting** (*General*) in the upper left corner of the screen to save.

That's it, this way you can easily download large applications on the App store with mobile data without Wi-Fi. You note after downloading the application, make sure to adjust the date correctly to avoid affecting some applications in the device offline!

Good luck!
