

How to download Call Of Duty Mobile on a computer with Gameloop

With Call of Duty Mobile on Gameloop, you don't need to install controls because the Gameloop emulator is already set up and you just need to play like other FPS games.

You want to play Call Of Duty Mobile on PC, surely you will need the emulation software to support mobile gaming on the computer already. With CHPlay on all emulation software such as BlueStack, NoxPlayer, MEMUPlay . you can download and install Call Of Duty Mobile on your computer easily.

However, on Gameloop, it is not so, because this emulator will support the installation of games only in their Game Center. But the instructions below will help you install Call Of Duty Mobile on Gameloop easily.

1. How to download Call Of Duty Mobile without Fake IP
2. How to play Call Of Duty: Mobile Battle Royale mode
3. How to install Zing Speed ??Mobile on PC with Tencent Gaming Buddy - Game Loop

Instructions for installing and playing Call Of Duty Mobile on Gameloop

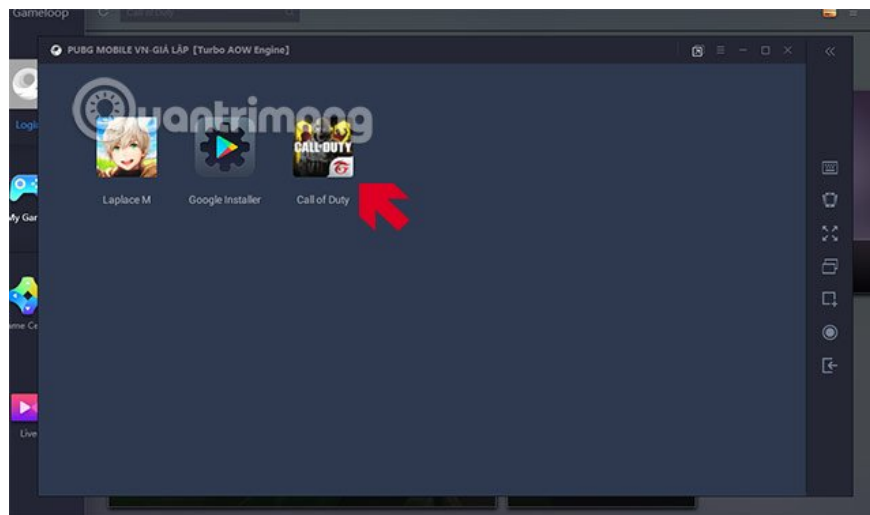

Step 1: First you install the Gameloop emulator on the computer, visit the link below to get the latest gameloop download link. And if your device already has Gameloop already. Note that you must install Google Installer on Gameloop before you can install Call Of Duty Mobile.

[Link to download Gameloop](#)

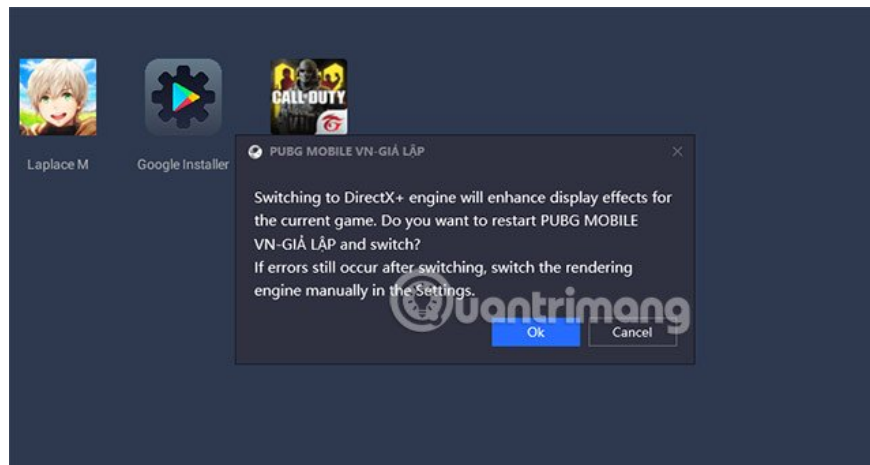

Then click on the link to download COD Mobile for Gameloop below. Click the yellow **Download** button to download the Call of Duty Mobile installation file for Gameloop.

The downloaded file is in .exe format and is only about 10mb in size. Click that and Call of Duty Mobile will automatically install on Gameloop.

If you see the message to change DirectX + as shown below, click OK.

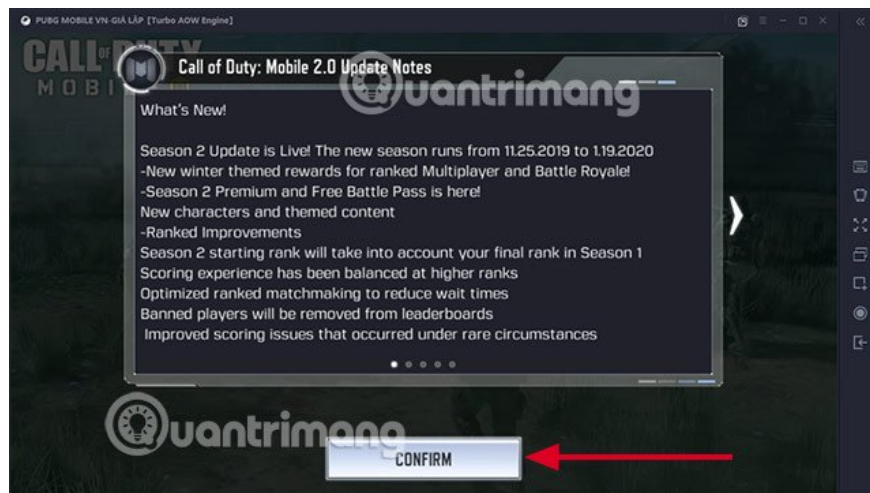

Then just wait a while for the game to complete the installation (15-20 minutes) depending on your network speed.

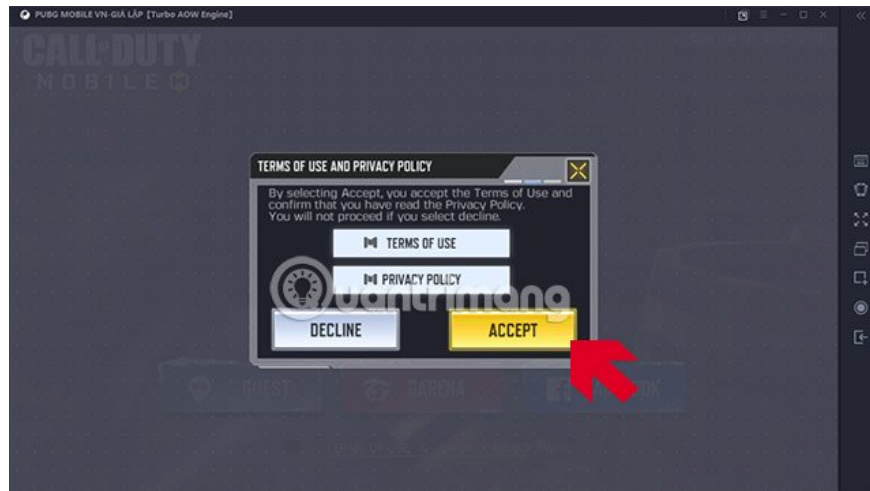

Step 2: Go to the game you just play because Gameloop has pre-installed character control keys for you. Click Next to continue.

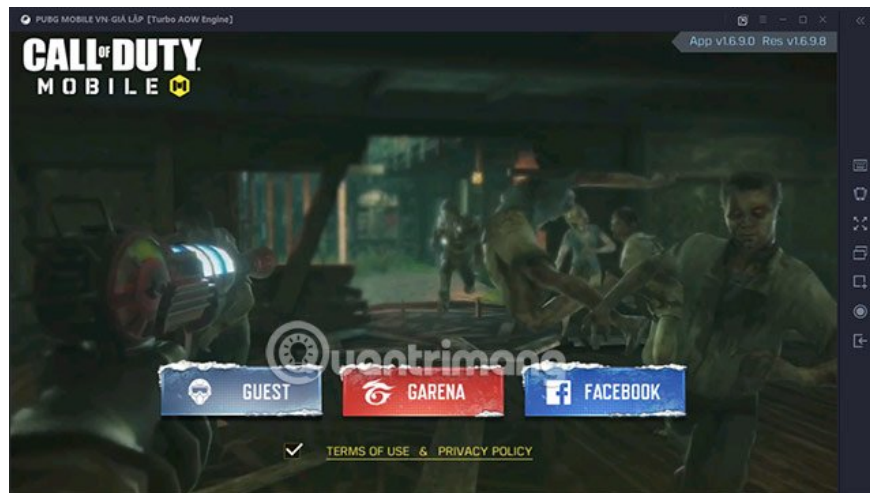

If you see an update, click **Confirm** .

Click **Accept** to agree with the terms of the publisher.

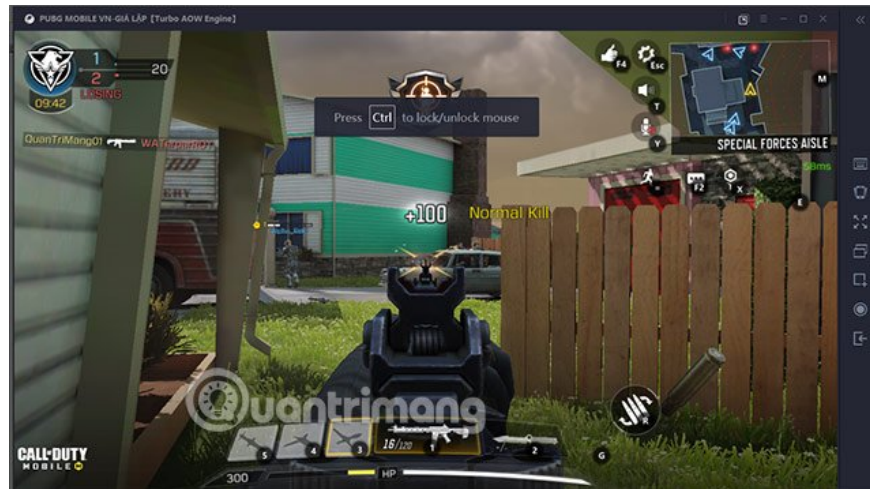

Step 3: Go to this step, use your Garena or Facebook account to log in to Call of Duty mobile. Or click Guest to play guest mode.

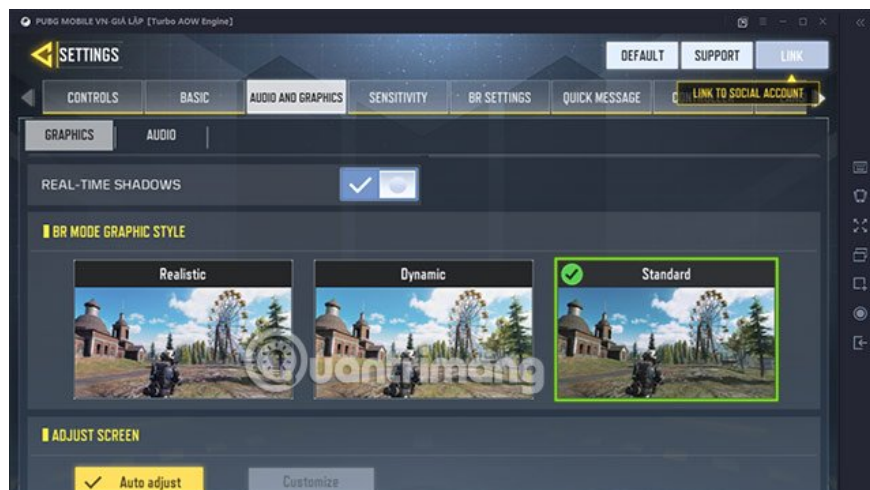

Step 4: Next, create a character name and click OK, if you're lazy to create a character name, you can click on the dice to select a random name.

Step 5: When playing, you will be trained on the initial control, just control the game like the FPS games you have played before.

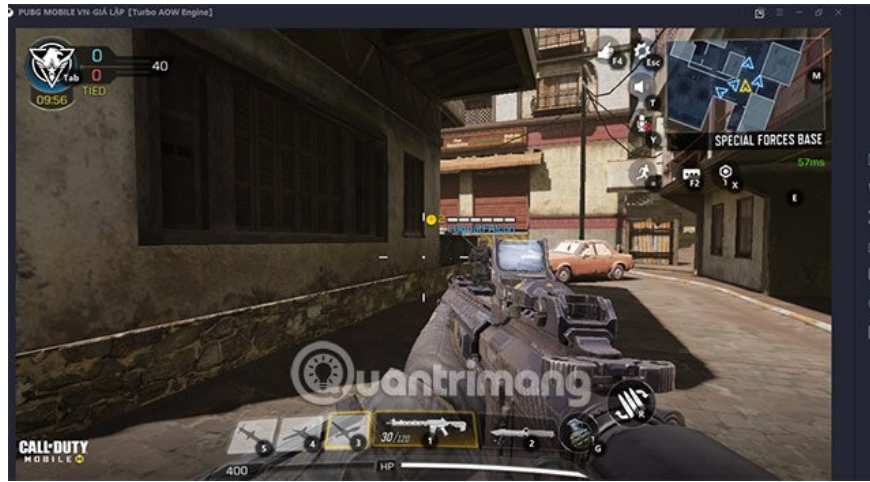

To increase the level of graphics for Call of Duty Mobile at the end of the first round, go to Settings > **Audio And Graphics** to adjust the game's graphics.

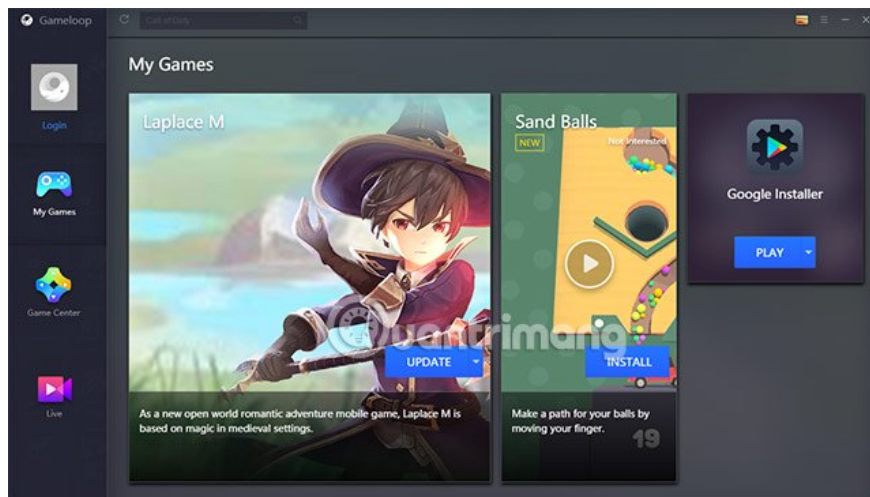

When playing Call of Duty Mobile on Gameloop, the function keys are attached to the icons for you to perform.

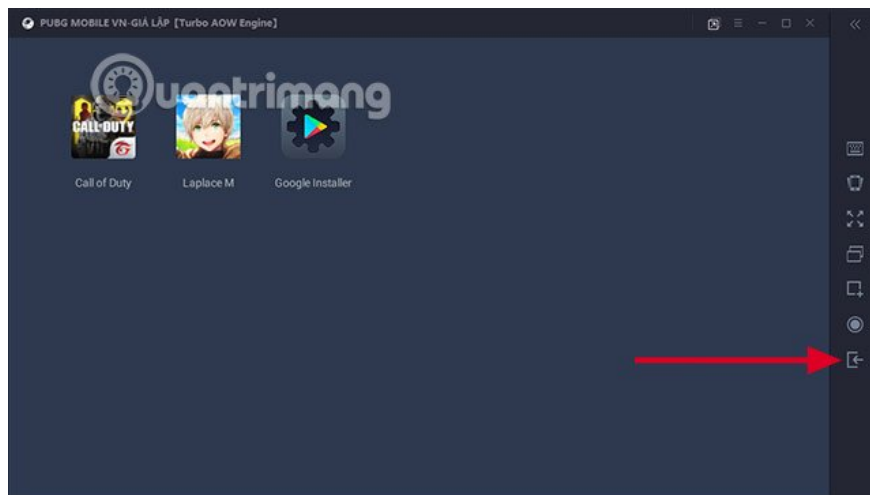

At first you may not be familiar and it will take some time to get used to it, but if you are familiar with the FPS game genre, it will be fast.

Because there is no Call Of Duty Mobile icon in the **My Game** menu in Gameloop. You click on the **Play** of Google Installer icon to open the gaming window of Gameloop.

When the game window of the emulator appears, **double-click** the back icon to return to the application list. Now you will see the Call Of Duty Mobile icon on this list window, click it to play Call Of Duty Mobile.

So how to install Call of Duty Mobile on Gameloop is quite simple, you just need to download the installation file available to install and play Call of Duty Mobile. The only inconvenience is that the game does not show an icon in the My Games menu for you to select from the beginning.
