

How to download, create an account and log into Discord

Discord can now be used on computers and smartphones, but this software does not yet support Vietnamese, so it is a barrier for gamers who are not good at English. Therefore, the following article will guide downloading, installing and creating an account and logging into Discord.

Although appearing after the voice chat services for gamers such as TeamSpeak, GameVox or Skype, but at the present time Discord has attracted many gamers. With Discord you can chat text and voice chat with your teammates completely free of charge, especially it can group chat easily and quickly, and put it all into modern interface.

Discord can now be used on computers and smartphones, but this software does not yet support Vietnamese, so it is a barrier for gamers who are not good at English. Therefore, the following article will guide downloading, installing and creating an account and logging into Discord.

Instructions for installing, creating an account and logging into Discord on your computer

In the framework of the article, Network Administrator will guide you how to download, install Discord, create an account and log into Discord on a Windows computer. For other devices, you only need to follow the same operation.

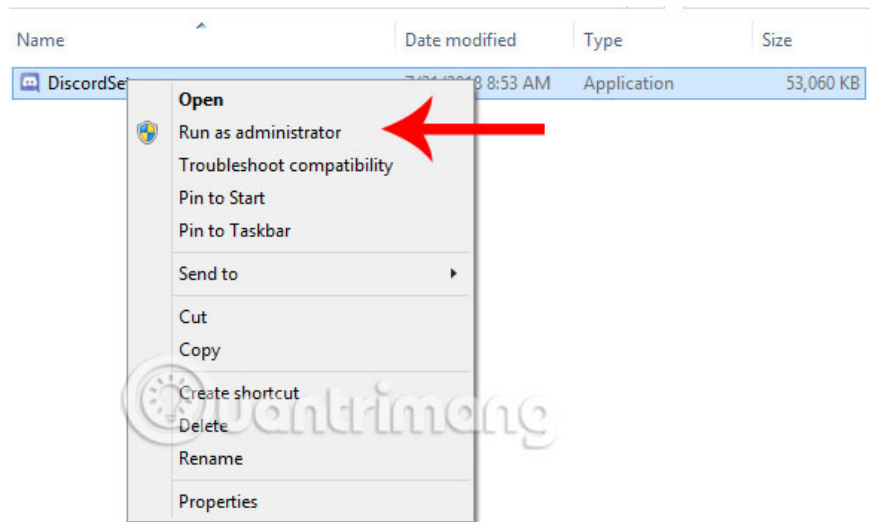

Step 1:

First, you must download Discord to your computer. Please select the version that is suitable for the device you are using via the link below.

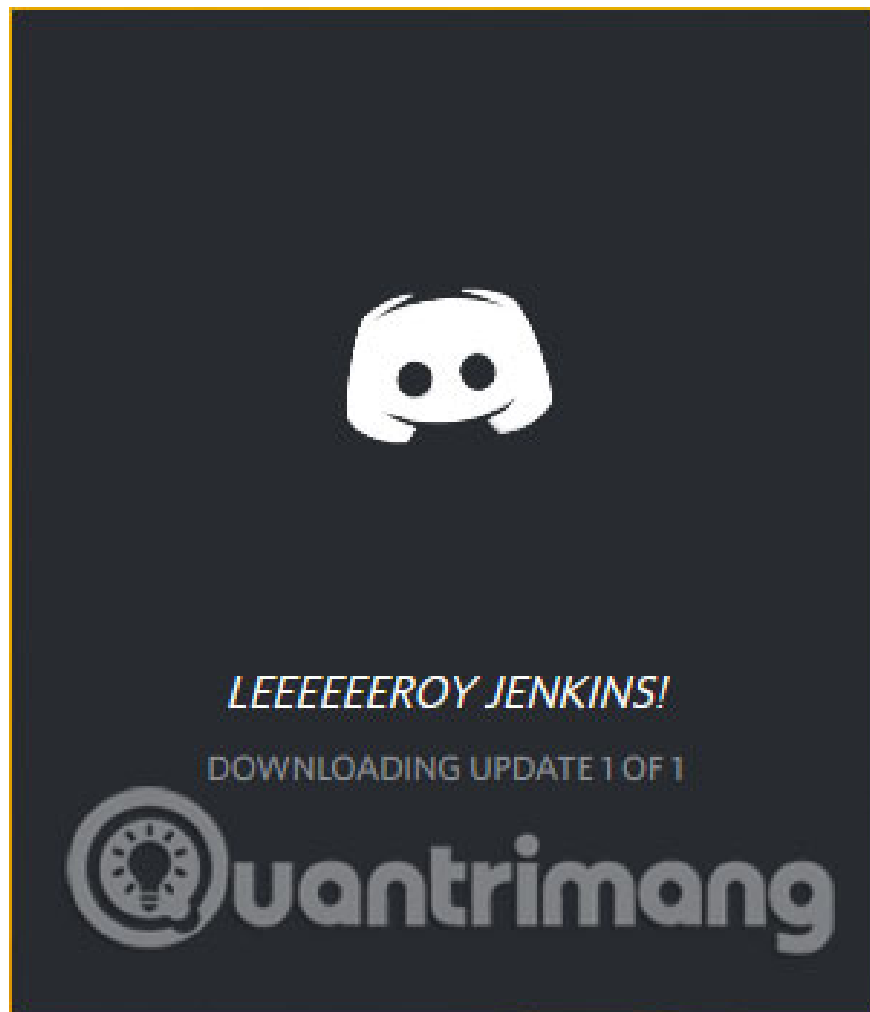

1. Download Discord for MAC
2. Download Discord for PC
3. Download Discord for iOS
4. Download Discord for Android

Step 2:

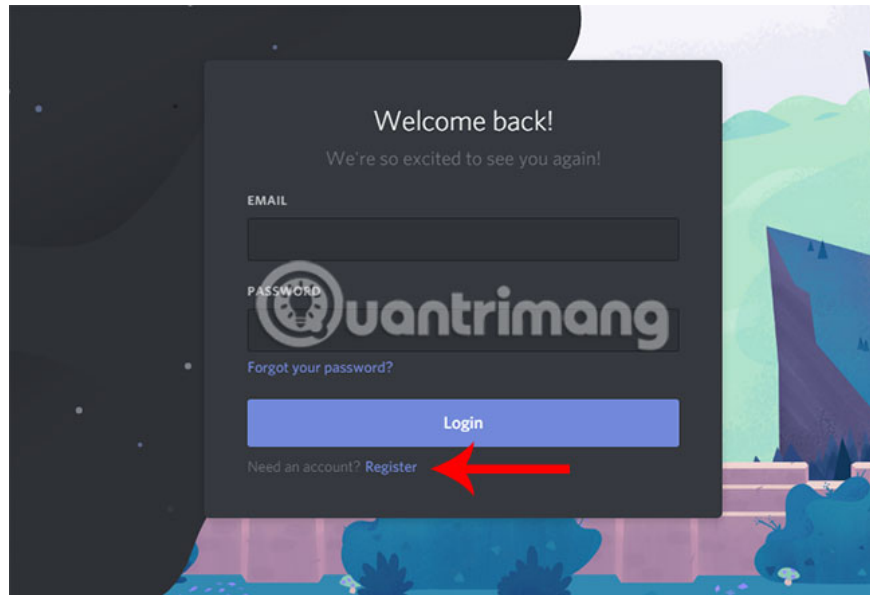

Once you've downloaded the file, run the installation file by right-clicking on the icon and selecting **Run Administrator** .

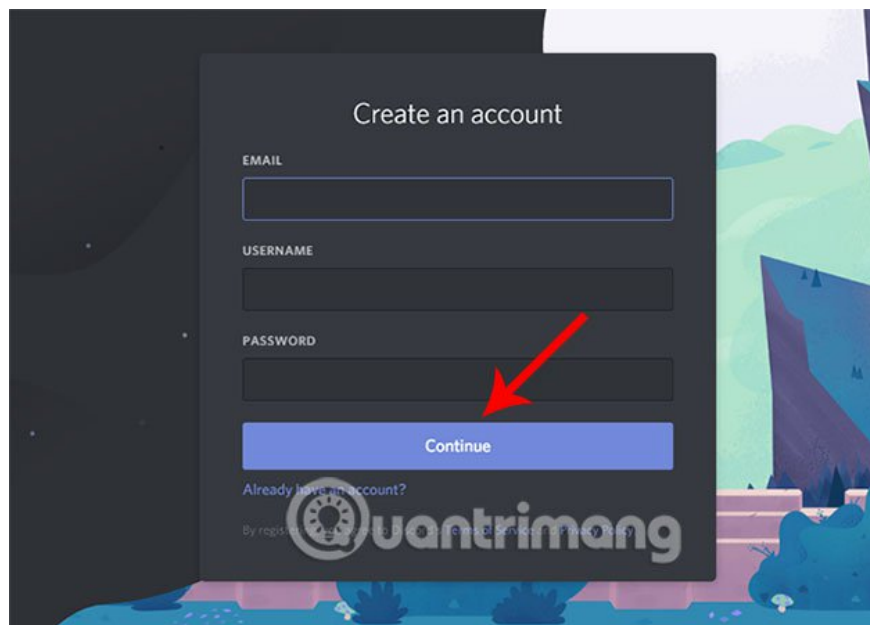

At this point, you will see a new interface indicating that you have to wait a few minutes for Discord to complete the installation process.

If the Discord panel appears as shown below, it means that the Discord installation process was successful. The next thing is to create a Discord account. If you already have a previous account, just enter your account information and click **Login** to login. Conversely, if not, then select **Register** to create an account. Here, we choose Register to create a new Discord account.

The registration process is very simple, just name the account, enter your email and password into the **Create An Account section** and click **Continue**.

As soon as the account is created, Discord will automatically log your account into the software.

Your remaining job is to create your own server, or join other servers on the screen waiting for Discord.

Note: The two main features of Discord are text chat, or voice chat, they are completely free, so you only need to set up an account and log in to be used immediately. Besides, you can also create multiple servers without any restrictions.

Thus, the Network Administrator has instructed you how to install, create an account and log into Discord on the computer in detail. Hopefully, through this article, you can easily use this application more, please discover for yourself after creating Discord account always, surely you will feel satisfied from what Discord brings.

Good luck!
