

How to download files on Firefox iPhone

On the iOS browser, there is a file download feature, which users do not need to support other applications.

Previously, to download files on iOS devices, users needed other applications to support. However, if the device is installing Firefox browser and updating to the latest version, we can download the file right from the browser. Users do not need to install another download application. File downloaded on Firefox will be saved to the Files (Files) application, file management application is available from iOS 11 and above. Or you can use other file management applications on your iPhone like the Documents app. The following article will guide how to download files on Firefox iPhone and iPad browsers.

Instead of having to use another application to download files on iPhone, you can now use Firefox to download the files. The compressed image files will be viewed and saved to the device album always, without having to proceed to extract as data file.
