1. <http://www.phimmoi.net/>

## Step 2:

In the interface of the movie, users will see the basic information of the movie such as the actor, genre, director, movie duration, resolution of the movie. In the avatar of the movie, there will be 3 Download, Trailer and Watch movies.

If you want to see the content of the movie, click on the trailer, or you can always click **the Download button** .

## Step 3:

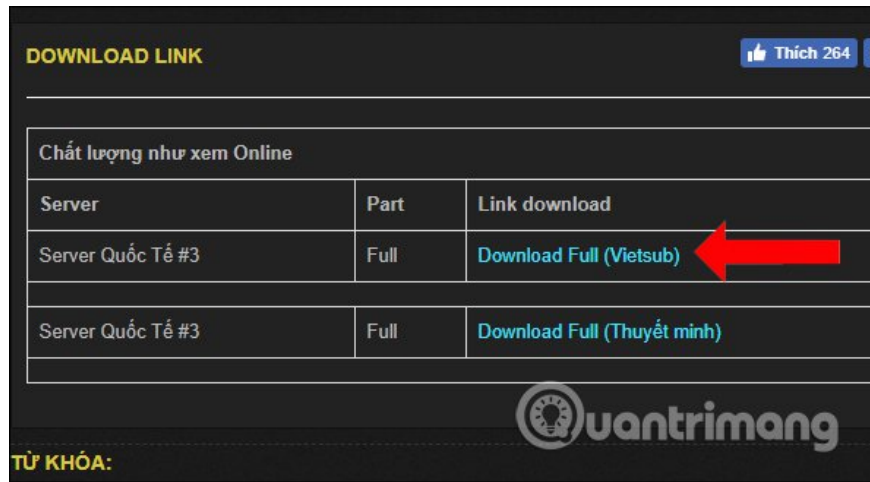

The system will ask the user to **enter the security code** right next to it and click **Get download link** .

## Step 4:

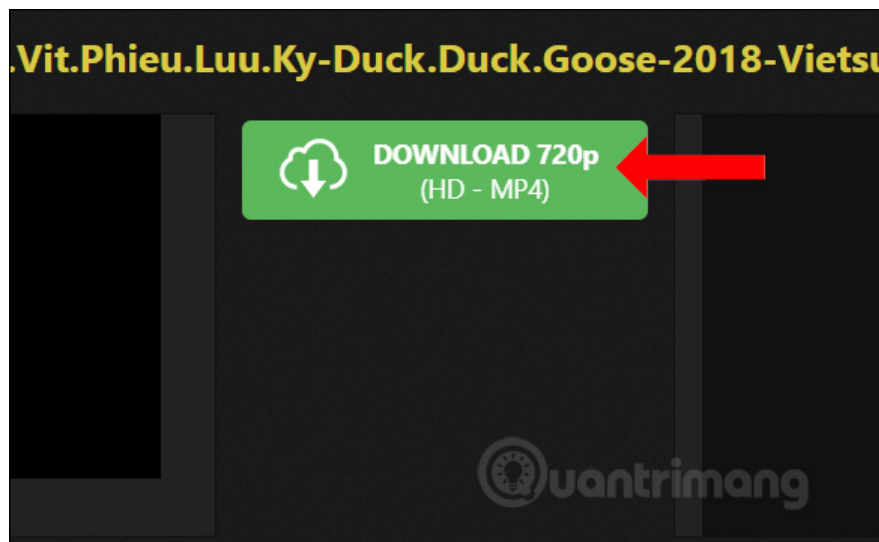

The system will display the download link with the voiceover server or subtitle server, if the movie provides both captions and subtitles. In case there is only 1 movie, the download link will only have 1 server.

Click on **Download Full** to download movies on Movies.

### Step 5:

Right after that the user will be transferred to the new interface, click the **Download 720p** button. Video quality will depend on each movie, the video format will default to mp4.

In the next interface with the movie playback screen, click **the 3 dot icon** next to the right side of the movie playback interface and select **Download** to download the movie.

Movies will be downloaded to the device shortly after. Movie download speed will depend on computer configuration, Internet connection speed and download movie size.

Thus movies on Movies are downloaded to the computer. The quality of downloaded movies will be the same as the quality when watching movies online, most of them will be HD movies.
