Instructions for downloading music on Spotify

Step 1:

First click on the link below to download and install Spotify Music Downloader on Google Chrome browser.

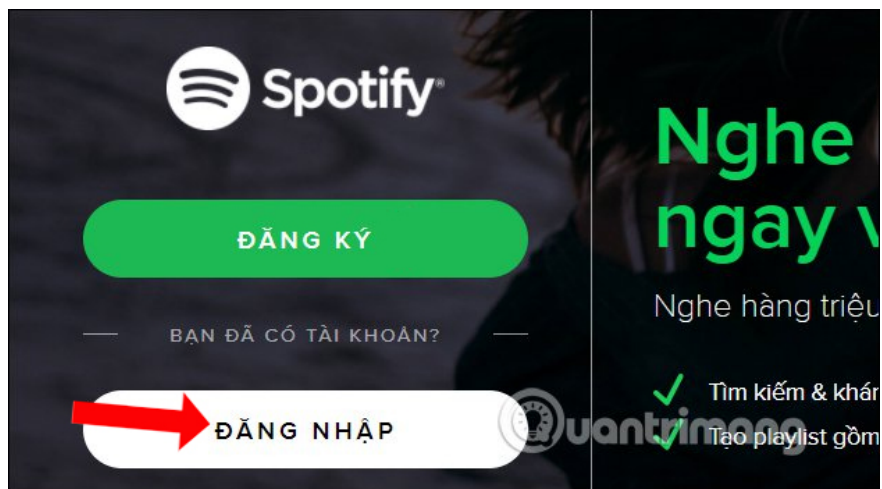

1. Download the Spotify Music Downloader Chrome utility

Step 2:

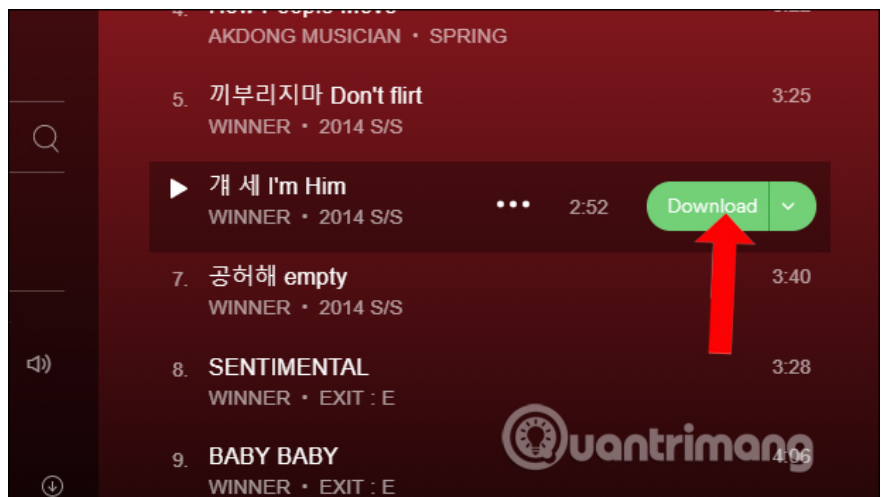

After installing, go to Spotify in the web according to the link below and log in to your personal account.

1. <https://open.spotify.com/browse/>

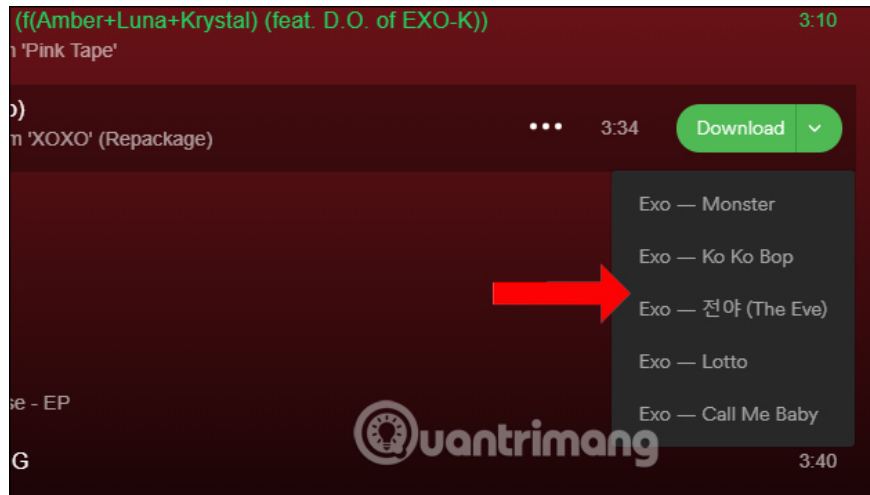

Step 3:

Open the playlist or song on Spotify you want to download. When you hover over the song, you will see **the Download button** appear to download the song to your computer.

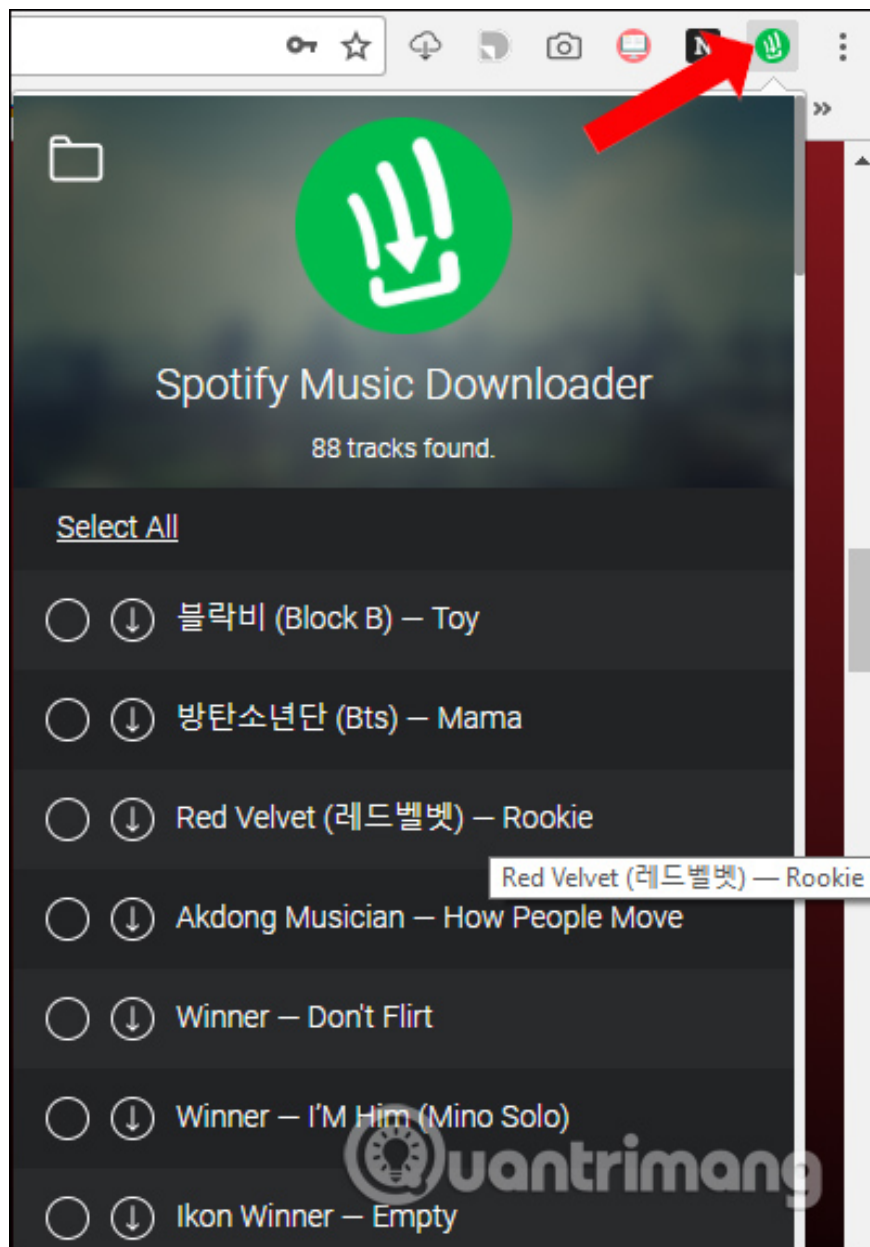

Also when clicking the arrow icon next to the Download button will be suggested to add some other songs, or versions of the song you want to download.

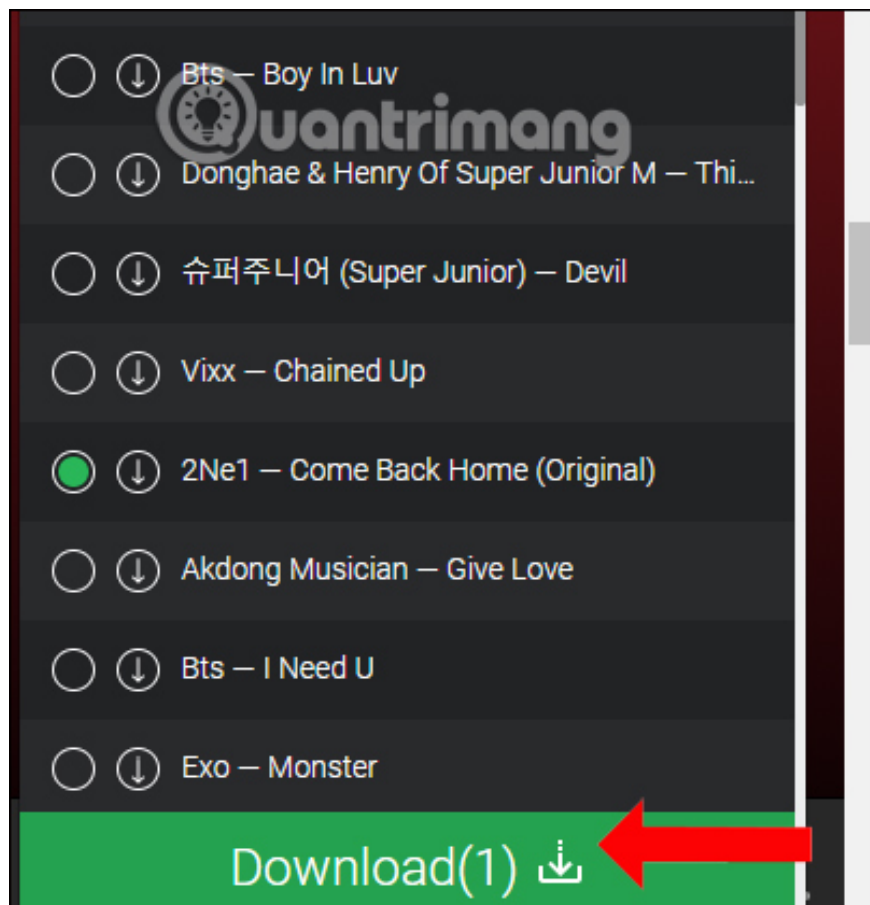

Step 4:

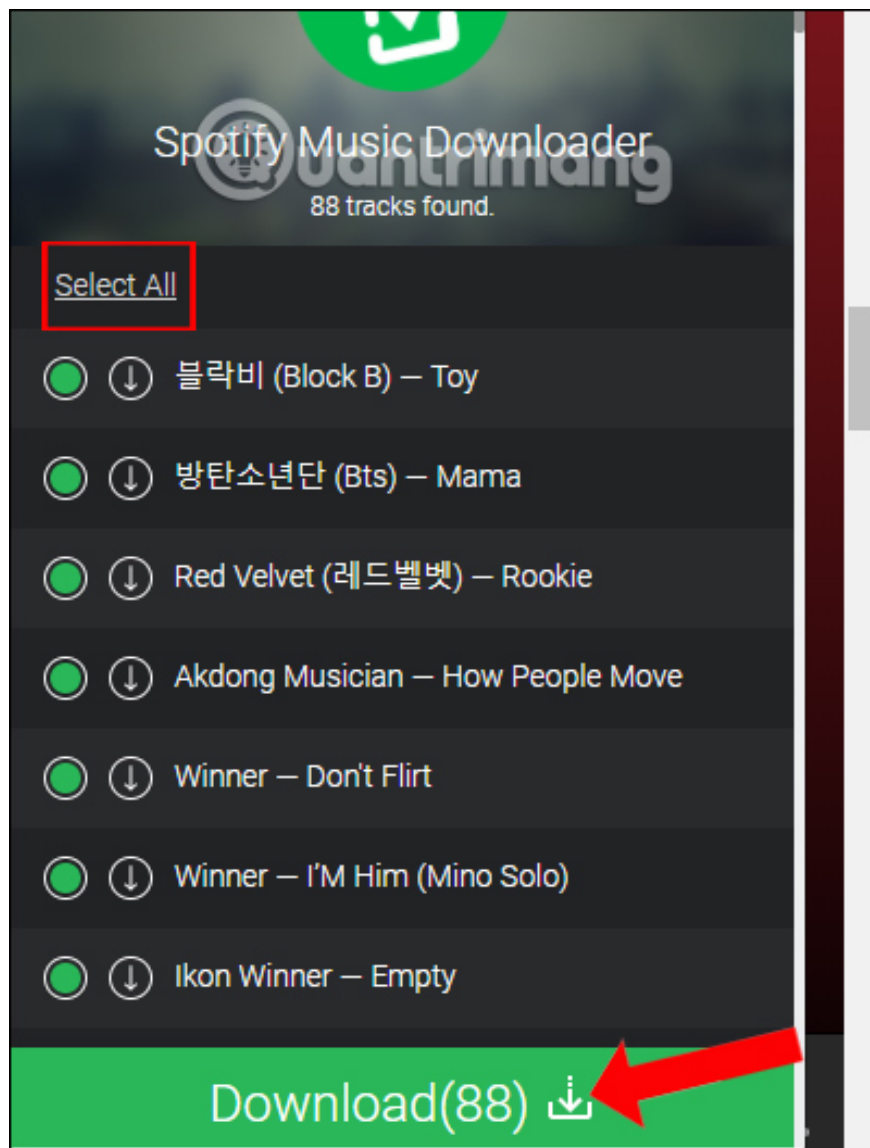

To download the **entire playlist of music on Spotify** , click on **the widget icon** at the end of the address bar. Wait a few seconds for the utility to scan the entire song included in the playlist and you will see the list below with the number of songs.

To download the song from this list, **select** it and click **the Download button** below.

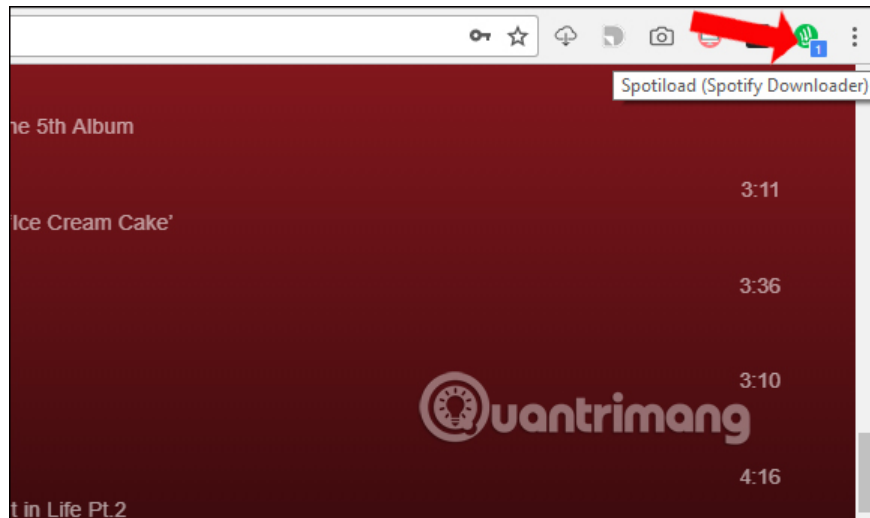

In case you want to **download playlist Spotify** , all the songs in the playlist and select **Select All** will see the songs marked. Click **the Download button** below to download

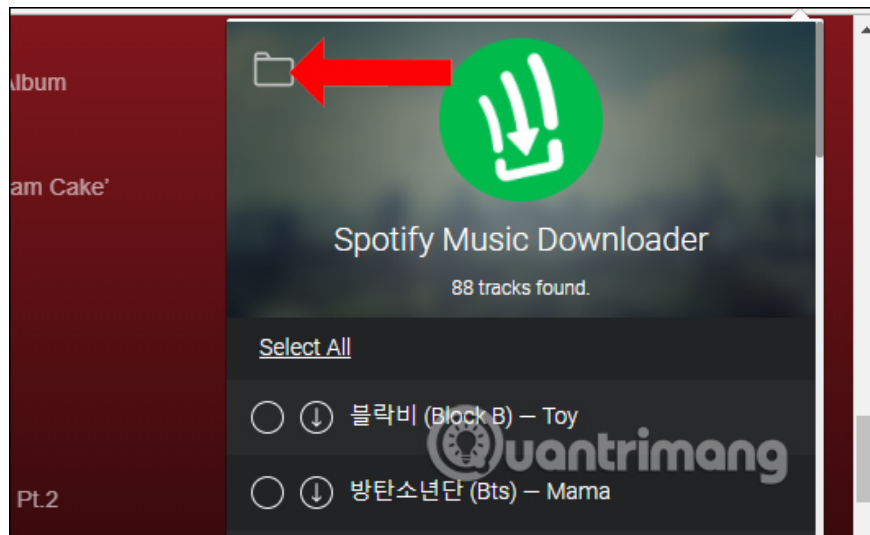

Step 5:

Wait for the downloading of Spotify songs to the computer. Then the Spotify Music Downloader icon will also show the number of songs that are downloading.

The downloaded song will be saved to the default Download folder on Chrome, or another folder that the user has set up. Or if you want to open it quickly, you can click **the folder icon** in the Spotify Music Downloader playlist list.

So you can download any song on Spotify or download the entire playlist using the Spotify Music Downloader utility on Chrome browser. However, users should note that we only download the same song, not the original music on Spotify.
