

How to download photos from Dropbox to iPhone, iPad or Mac

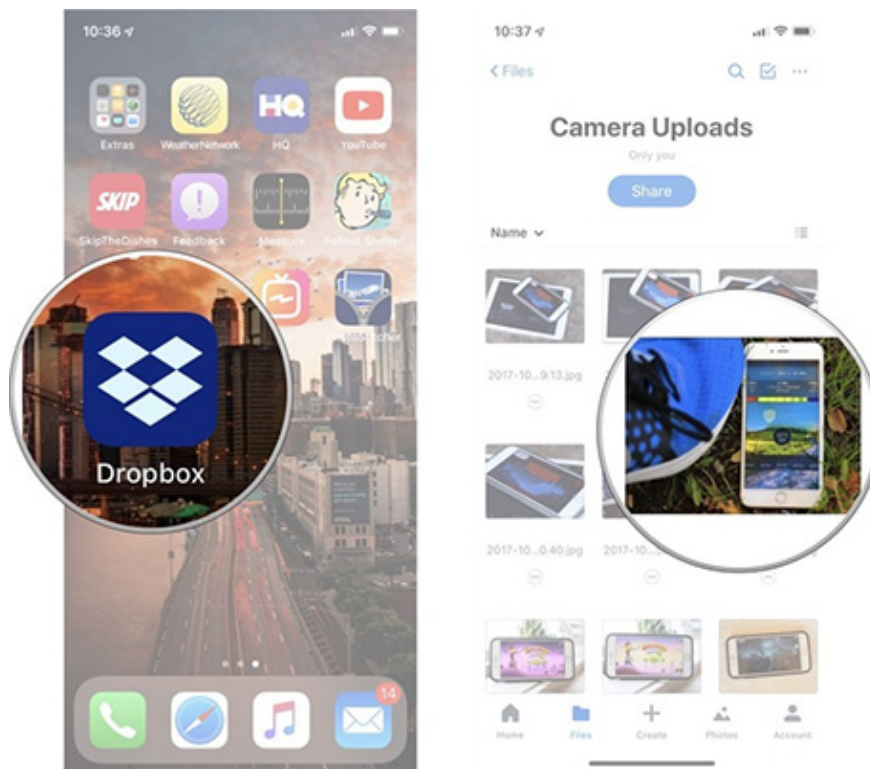

If you want to print, share or edit any image saved on Dropbox, you need to download it to your device. Follow these steps to download photos from Dropbox to iPhone, iPad or Mac.

Dropbox is one of the best cloud storage services available for Apple users today. You can use it to securely store files, documents, photos and other important data. With easy-to-use mobile apps and web platforms, Dropbox is a great way to keep things safe and free up your device.

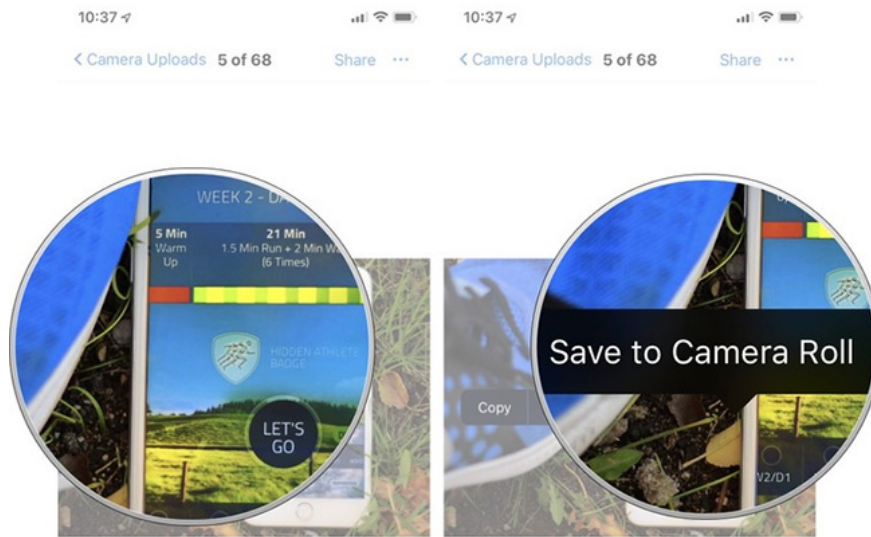

Of course, if you want to print, share or edit any image saved on Dropbox, you need to download it to your device. Follow these steps to download photos from Dropbox to iPhone, iPad or Mac.

How to download photos from Dropbox to iPhone and iPad

1. Open the Dropbox app from the main screen of the iPhone or iPad. Log in if you haven't already done so.
2. Touch the photo you want to save to the device.

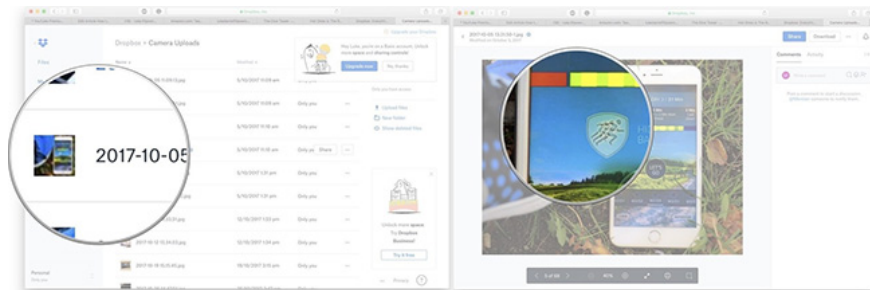

3. Touch and hold the picture until an option bar appears.
4. Click **Save to Camera Roll** .

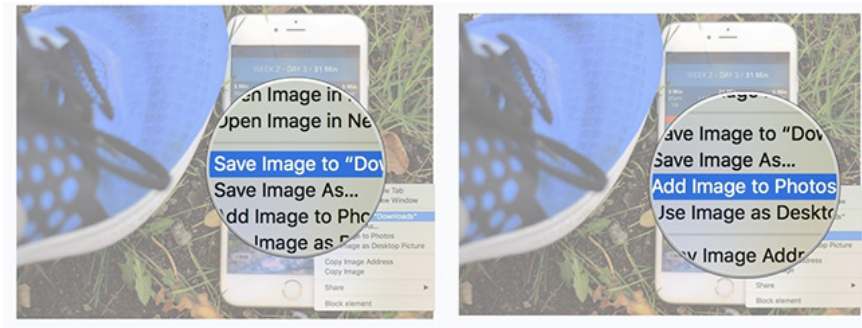

Once completed, you can immediately open the Photos app to edit or upload it to any service.

How to download photos from Dropbox to Mac

1. Visit dropbox.com, log in to your Dropbox account.
2. Click on the photo you want to download to Mac. Depending on the image storage location, you may have to open multiple folders before finding the photo.
3. Command + click or right click on the picture.

4. Click **Save Image to "Downloads"** to save the image to the download folder.
5. Click **Add Image to Photos** to save the photo directly to the Photos app.
