Google Photos is an online photo storage service from Google that allows us to store digital photos and sync them from devices running on different operating systems such as iPhone, Android .

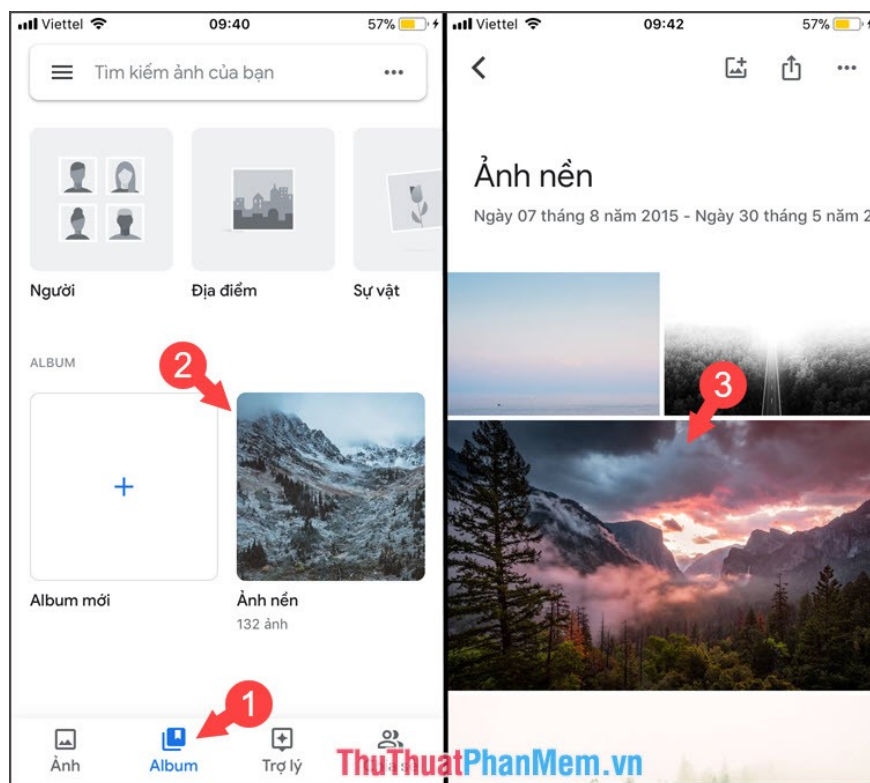

1. How to download photos from Google Photos to your iPhone device

Step 1: You download Google Photos at the following address: <https://itunes.apple.com/vn/app/google-photos/id962194608?l=en&mt=8>

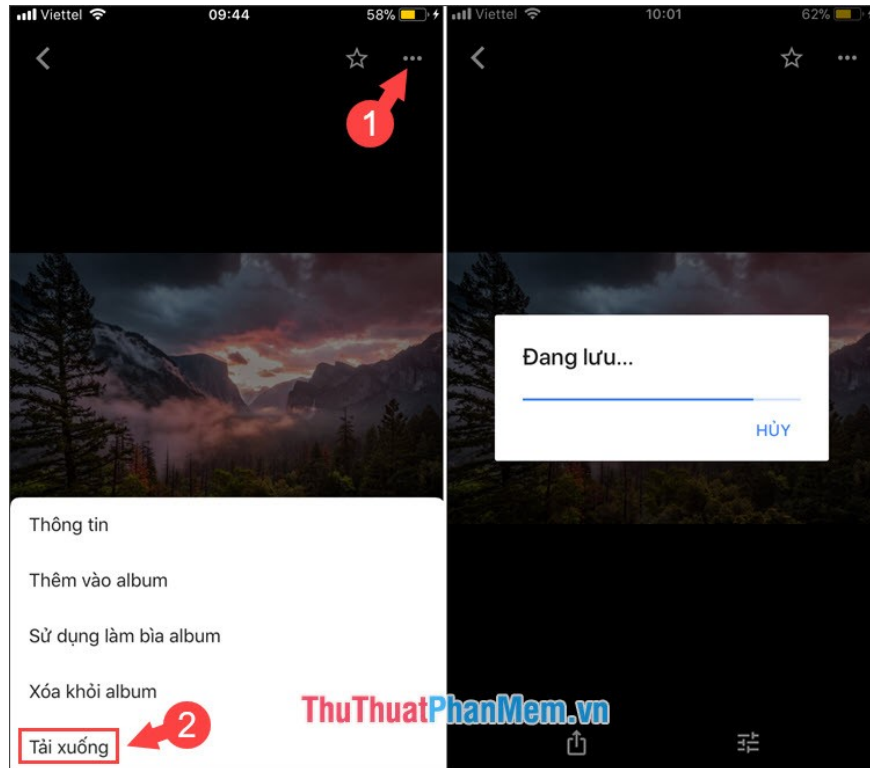

After downloading, open the application. We turn off the **Backup and sync feature** (1) so that the app doesn't automatically upload photos from your phone. Then you **Log in** with your Google account (2) .

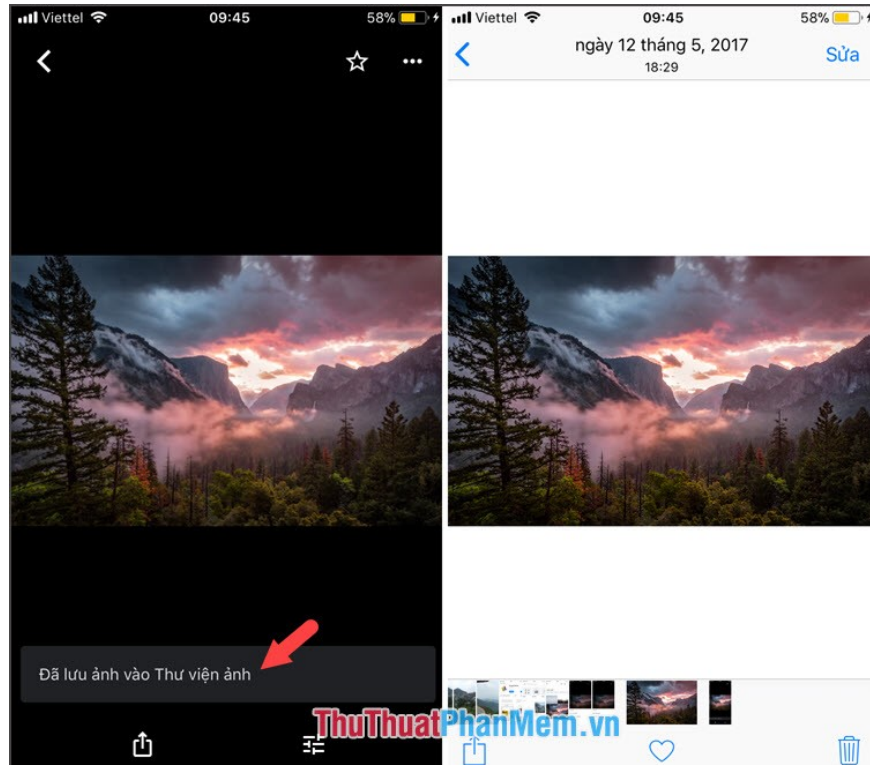

Step 2: After logging in, select **Album** (1) => Choose Album containing photos to download (2) => open photos to download on Google Photos (3) .

Step 3: Touch the 3 dots in the right corner of the screen (1) => **Download** (2) . The **Saving Notice** will display as shown below.

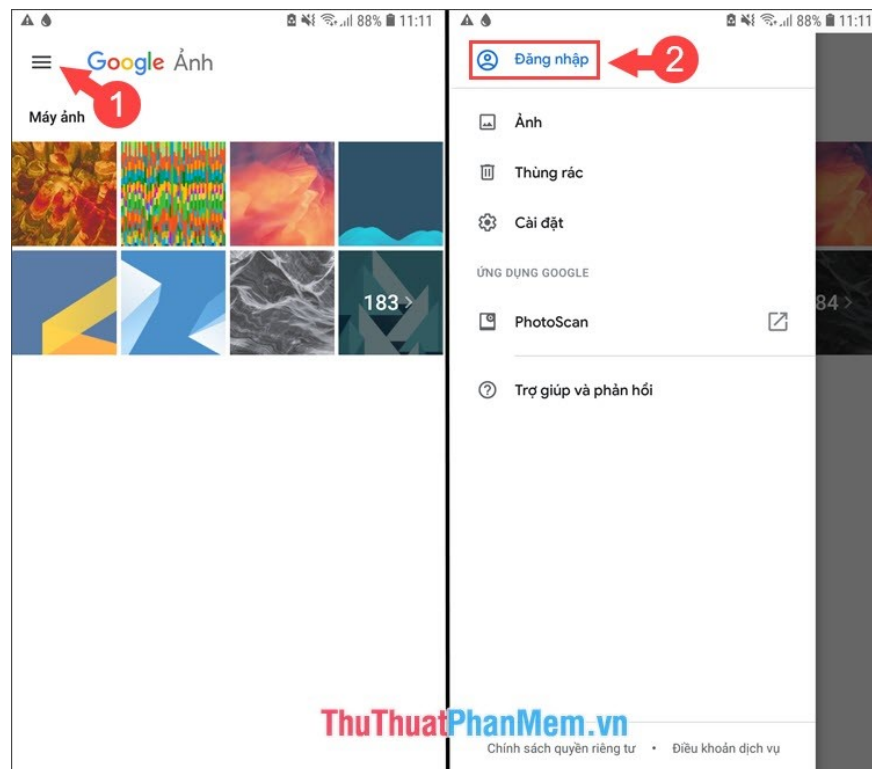

Step 4: After the notice that the Photo Library is saved is finished, we open the Photo Library on the phone and check the saved image.

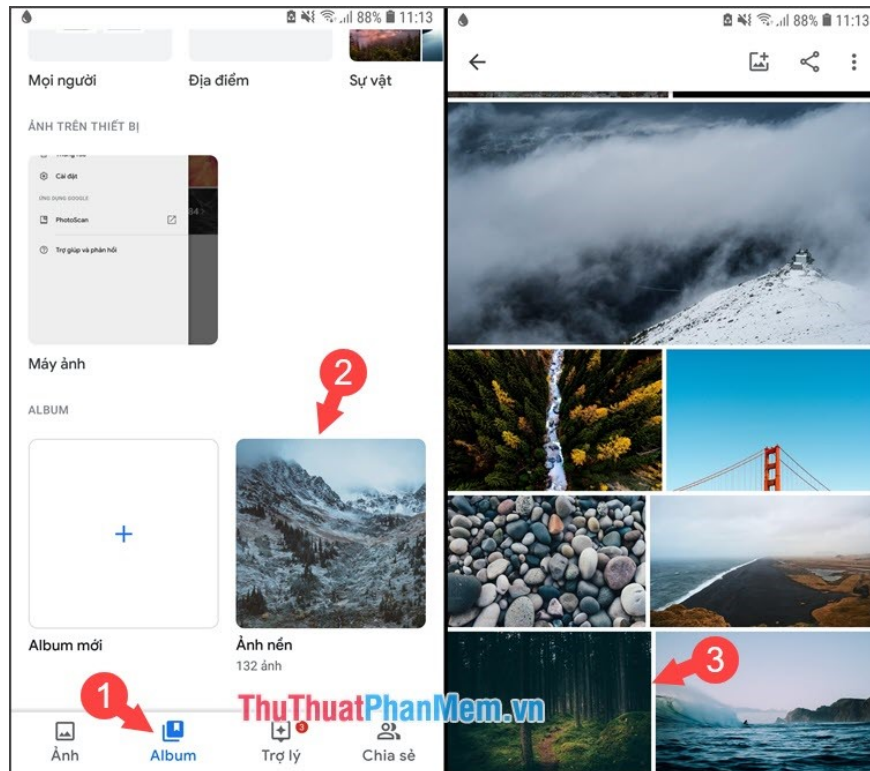

2. How to download photos from Google Photos to Android phones

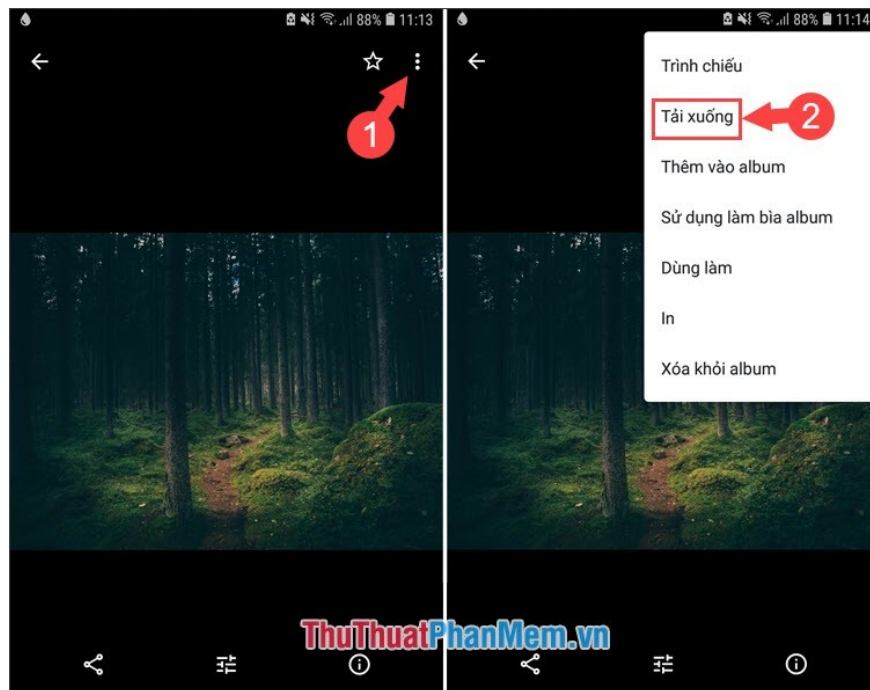

Step 1: Open the Google Photos app and touch the 3 dash icon => **Sign in** .

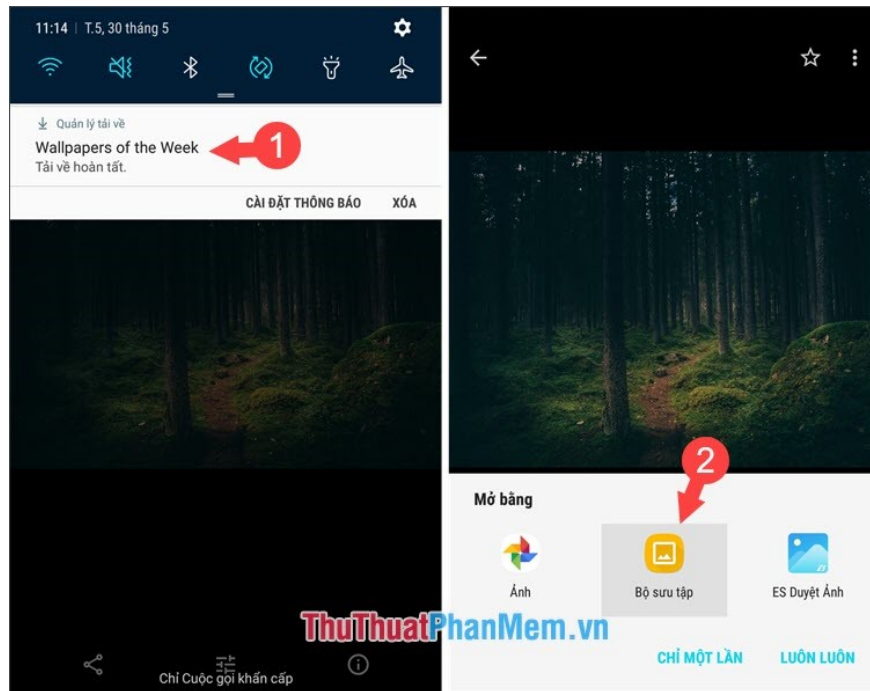

Step 2: Go to **Album** (1) => select the photo library to download (2) => open the image to download (3) .

Step 3: You touch the symbol 3 dots (1) => **Download** (2) .

Step 4: After the download is complete, you swipe in the direction from top to bottom to open the notification. We tap the downloaded image file (1) and open it in **Gallery** (2) .

Google Photos has unlimited storage so we can comfortably store photos without worrying about running out of space on our device. Please visit [TipsMake.com](https://tipsmake.com) daily to get the latest news and tips!
