And the familiar interface appears with a new setting, if you want to select a map or game mode, click on the map selection icon under the **Start** button.

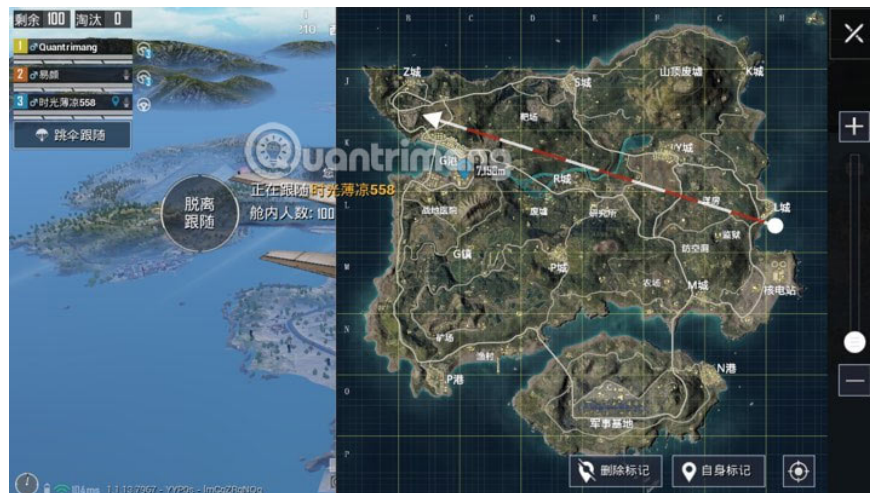

In PUBG Mobile 2 you will have a new mode of 4v4 mode, this mode only has 8 people in a small map and you must reach level 15 to unlock it, and it only has FPP mode .

This 3rd update will take longer, note that updates like this only appear when you install the PUBG Mobile 2 version earlier than the current version, or when there is a new version.

Unlike PUBG Mobile 2 on iPhone, PUBG Mobile 2 on Android will show you 2 options that use the WeChat and QQ accounts to log in. There is no Guest mode and there is no login with Game Center account like on iPhone

The above is a guide to installing the Action Island, or PUBG Mobile 2, on your phone for your reference. With PUBG Mobile 2 you will experience the game mode, the level of graphics is better than PUBG Mobile. Unfortunately, the game does not support English for gamers.
