Currently, you cannot download SPSS on Android phones, iPhones/iPads because the software does not yet support it. Instead, users can download SPSS on a computer to use this data analysis software when needed.

Instructions on how to download SPSS FREE on your phone.

How to download SPSS for free on Android and iPhone

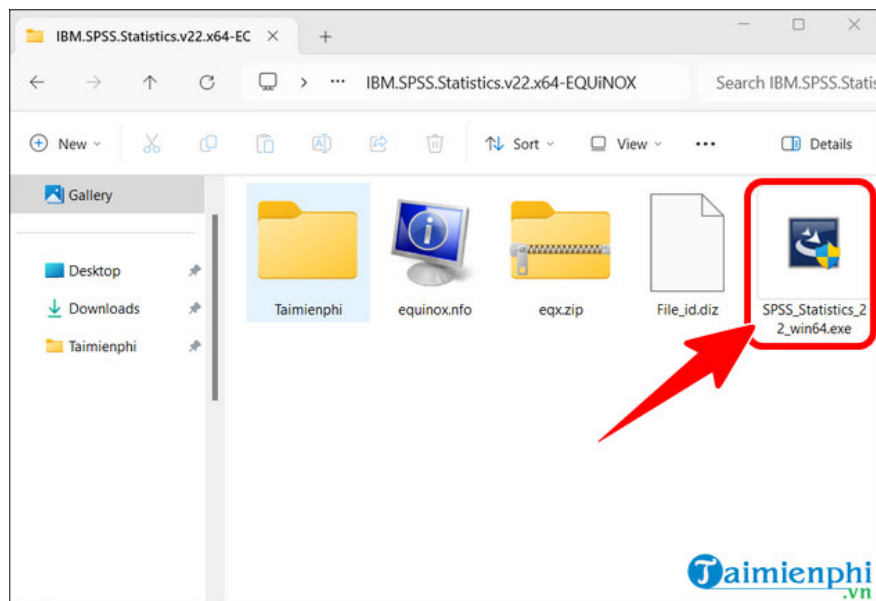

SPSS is not currently **supported on mobile devices** ; however, if you still wish to use this data analysis tool, you can download SPSS for PCs and laptops following our instructions below.

Step 1: Choose **the SPSS download link** that matches the version of Windows you are using on your PC.

- Download the latest **SPSS 32-bit** version here.
- Download the latest **SPSS 64-bit** version here.

Step 2: After completion, **extract the** downloaded file

- Open **the folder where you extracted the file** , double-click **the SPSS installation file** . (**Note:** Remember to disconnect from the internet before installation).

Step 3: Install **SPSS** on your computer following the instructions shared by Tai Mien Phi.

For users using macOS, you can easily **install SPSS for MacBook** and use this utility software for your data analysis and statistics work.

Why can't you download SPSS on your Android or iPhone?

- SPSS software requires high computing power and robust system resources to process large datasets and perform complex analyses. Most mobile devices lack the necessary RAM, CPU, and storage to efficiently run these demanding tasks. -
- SPSS has a complex user interface with numerous windows, menus, and options necessary for performing detailed statistical analyses. Displaying and interacting with this interface on the small screen of a mobile device can be difficult and inconvenient.
- The majority of SPSS users are professionals and researchers working in fields requiring in-depth data analysis. Therefore, the demand for using SPSS on mobile devices is low, which has not prompted IBM (the company that developed SPSS) to invest in developing a mobile version.

We hope that with the information shared above, readers can better understand this software and answer the question of why users cannot download SPSS on Android, iPhone/iPad mobile devices.
