4. How to use Desktop Dynamic Wallpapers to set Unsplash background

Instructions for downloading Unsplash images by size

Step 1:

Users download Unsplash image downloader utility by following the link below.

1. Download Unsplash image downloader utility

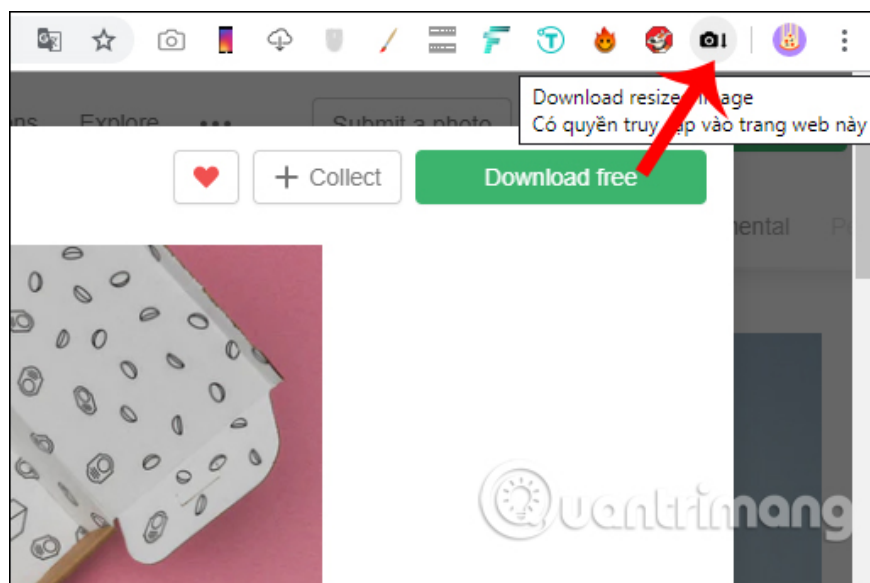

Step 2:

Next, the user accesses Unsplash by following link and then find the image to download. Unsplash owns a rich and diverse range of images for us to search.

<https://unsplash.com/>

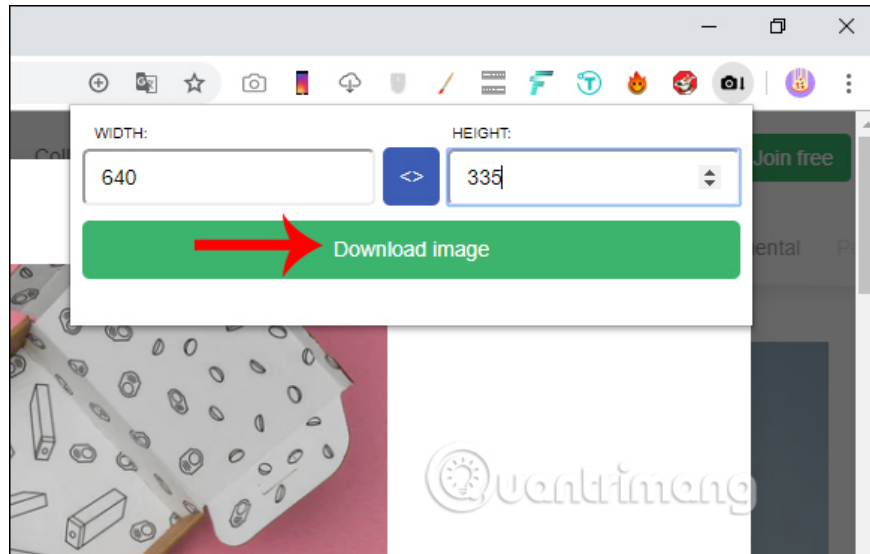

Step 3:

When we find the image we want to download, we **click on the icon of the extension** shown in the browser address bar.

Now display the **frame** so we **enter the width and height for the image** . You only need to enter the dimensions you want for the image. Note to you, the utility will not align the size so users need to fill in the correct size for the image, to avoid the case of distorted or skewed images, which do not fit together.

Finally click **Download Image** .

Step 4:

Then show the interface to save the image with the name of the image and the size we changed later. Click **Save** to download the image to your computer.

Thus with Unsplash image downloader utility on Chrome, downloading images on Unsplash is more economical and simple if users want to reduce the size of the image. Just enter the correct size for the image you want to download.

I wish you successful implementation!
