- Click "**I don't have a product key**" and choose your **Windows 7** version .

- Accept **the publisher's terms and conditions** => **choose the installation location** and click "**Install**" to begin the installation process.

Reasons why you should download and install the Windows 7 ISO.

- **Familiarity:** Windows 7 has been on the personal computer operating system market for a long time, so many users feel familiar and comfortable using it.

- **Stable performance:** Windows 7 is considered one of the most stable and smooth versions of Windows. For users who don't need the latest features and prioritize stability, Windows 7 remains a top choice.

- **Software compatibility:** Some older software has not yet been updated to be fully compatible with the latest versions of Windows, such as Windows 10 and Windows 11. Therefore, some users still need to use Windows 7 to run older applications or games.

- **Low system requirements:** Windows 7 runs well on many types of computers, including those with low specifications. This makes it a popular choice for users who need computers with less powerful configurations.

- **Freedom and flexibility:** Although Microsoft has officially stopped supporting Windows 7, there are still ways to continue using this version and receive security updates from third parties. This creates freedom and flexibility for users who want to continue using Windows 7 without having to switch to a newer version.

Windows 7 is known for its user-friendly and easy-to-use interface. This makes getting acquainted with the operating system easy for everyone, including computer beginners. If you want a more advanced version, you can **upgrade from Windows 7 to Windows 10** instead of downloading and installing the Windows 10 ISO file.

System requirements for installing Windows 7 on a PC or laptop.

- *Minimum System Requirements:*

+ **CPU:** At least 1 GHz.

+ **RAM:** Over 1 GB and less than 3.5 GB (Windows 32-bit only recognizes a maximum of 3.5 GB).

+ **Graphics Card:** Supports 800x600 resolution and DirectX 9 or higher.

+ **Hard Drive:** At least 16 GB of free space.

- *Recommended configuration:*

+ **CPU:** At least 1.6 GHz and 64-bit support.

+ **RAM:** Over 2GB of RAM.

+ **Graphics card:** Supports 800x600 resolution and DirectX 9 or higher.

+ **Hard drive:** At least 20GB of free space.

When using Windows 7, users have a trick to speed up the operating system's startup. A long computer startup time is a frustrating problem for users. To avoid wasting time, simply **speed up Windows 7 startup** using the method we guide you through. Your computer's startup time will be significantly reduced.
