To download YouTube video subtitles or download YouTube videos sub we can use video subtitle download sites.

When you download YouTube videos or download videos on Facebook with subtitles but how to download individual subtitles to learn a foreign language? By default the subtitles will only be displayed when we click the button that displays subtitles when watching videos. If you want to watch YouTube subtitles or any other video site, you need to download the subtitle file. So how to download YouTube subtitles and some other video sites?

There are currently a number of websites that support users to download video captions on YouTube or some other video sites. The subtitle file will load separately from the video, in two popular formats, srt and txt. In addition, we can choose to switch to other languages ??in addition to the original language of the video subtitles, for the purpose of learning the language of users. The following article will guide you how to download subtitles on YouTube videos.

1. How to download subtitles automatically in VLC
2. 5 ways super easy to add subtitles, caption to video
3. 2 steps to help users view subtitles on YouTube

1. Download YouTube video subtitles on SaveSubs

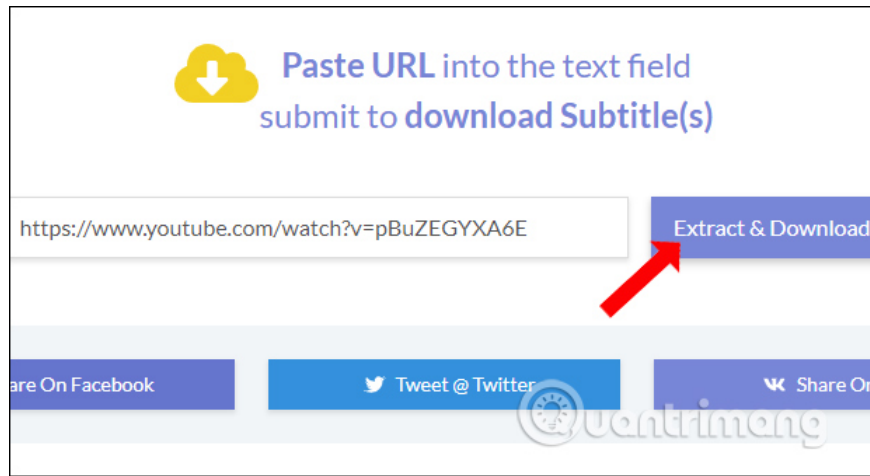

SaveSubs is a service to download video subtitles on YouTube and many other video sites, completely free and saved in many different formats and languages. SaveSubs supports downloading subtitles on YouTube, Facebook, Dailymotion, Vimeo, Kocowa, Downsub, Yousubtitles, Lilsubs, Viki.

Step 1:

Users click on the link below to access the home page of SaveSubs.

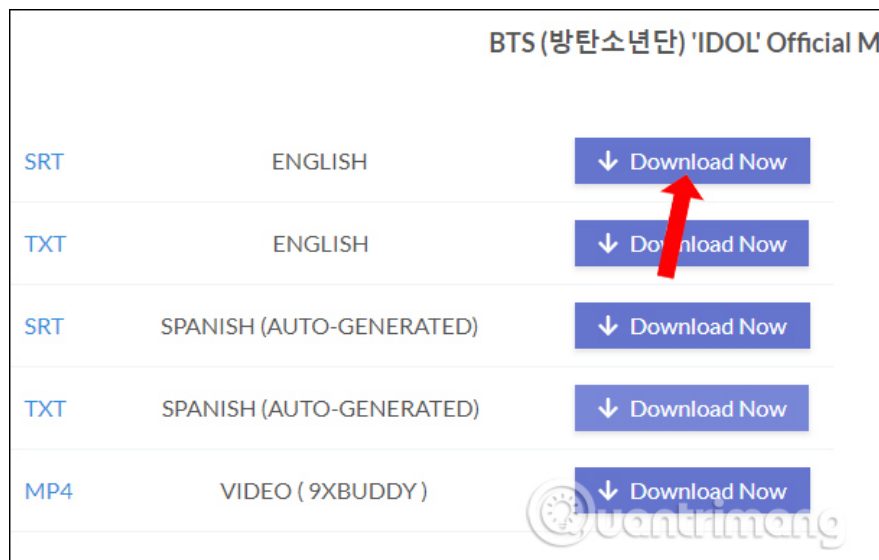

1. <https://savesubs.com/>

At the interface, **enter the video URL** with the supported website and click **Extract & Download button** .

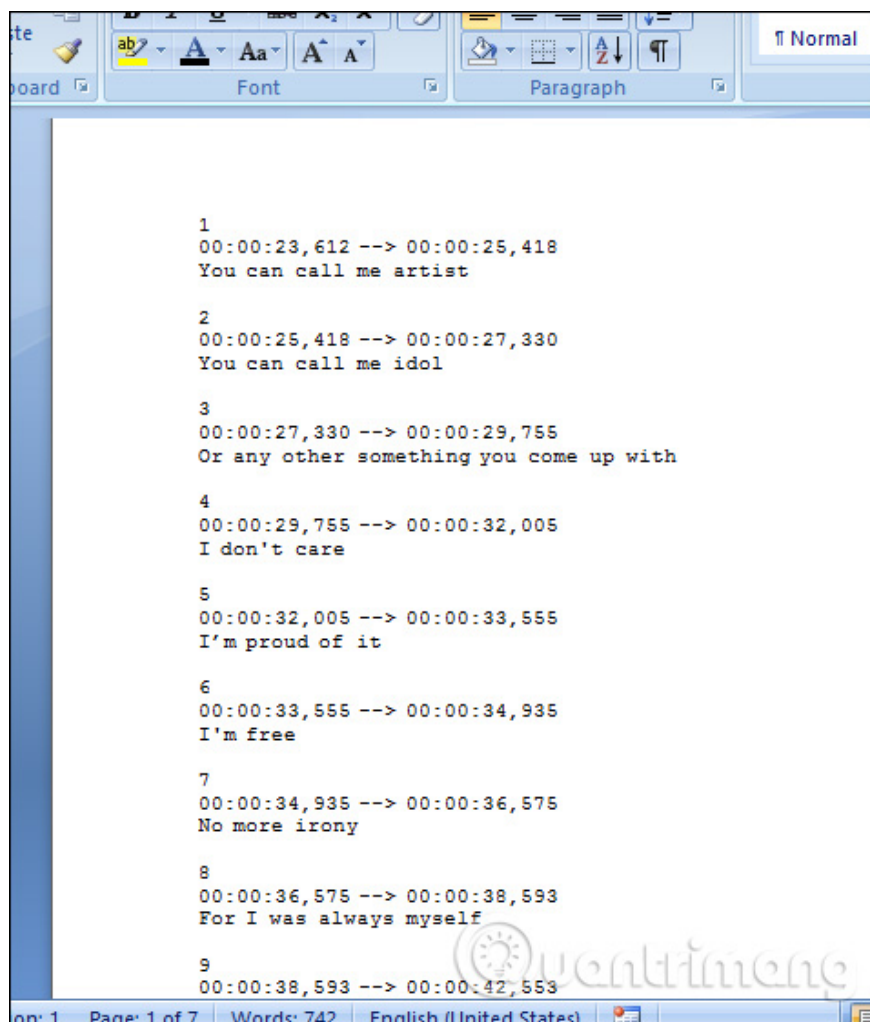

Step 2:

After downloading the video service you will see below the link list downloading each different format srt, txt, mp4, next to the subtitle language of the video. Click **Download Now button** to save the subtitle in txt or srt format.

Download subtitles with srt format will have additional time as below. **Note** separately for mp4 format to download YouTube videos, users will be transferred to another 9XBUFFY website.

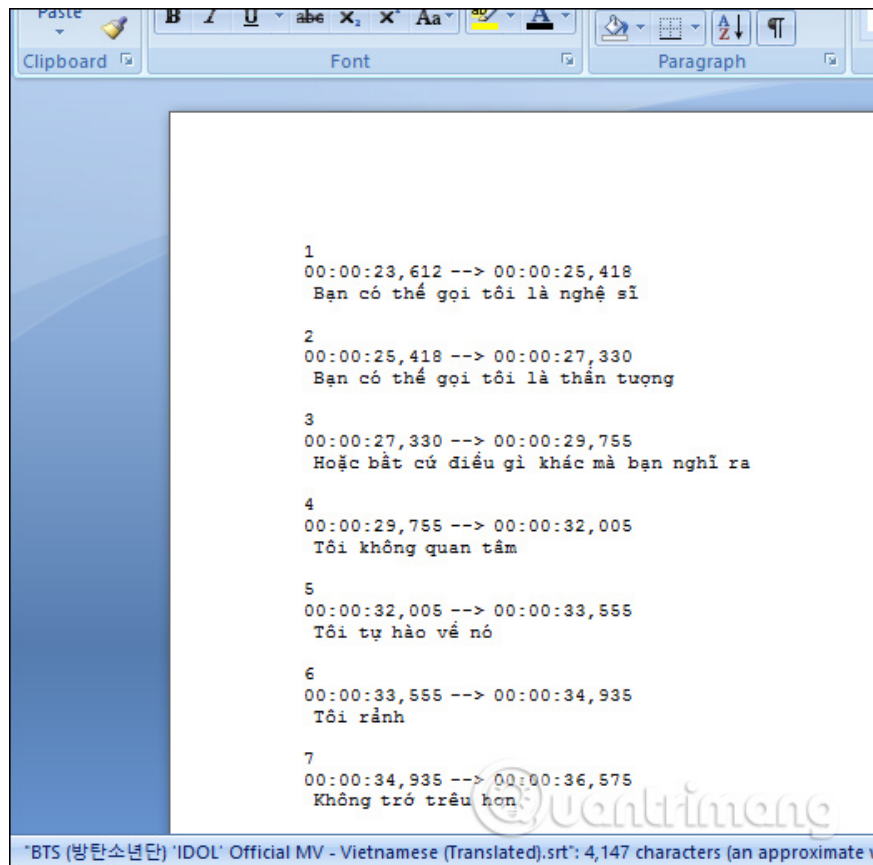

Step 3:

In case the video does not support the subtitles of the language that the user wants to download, it is possible to use the language switch feature on SaveSubs. Then the new subtitle with your new language will be created.

Click on **the Select Language** box below to select the language you want to translate, such as converting subtitles to Vietnamese. Finally, **click Translate & Download** to download the subtitles

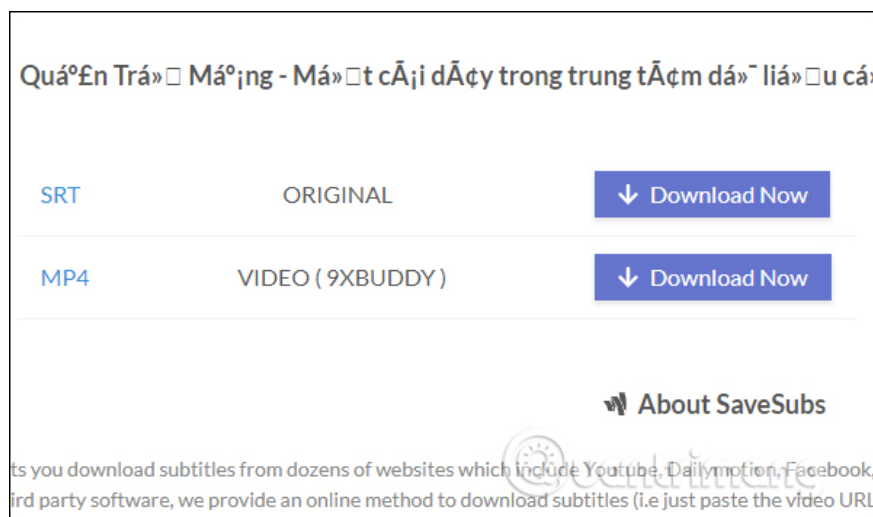

Subtitles after being transferred will automatically be downloaded to the computer so that users can open immediately.

In addition to YouTube we can download video subtitles on Facebook or other websites. You can also paste the video URL into the interface of SaveSubs to download the subtitle file.

Depending on the video as well as the video site, the subtitle file format will be different.
