

How to download YouTube videos on a MacBook quickly

Looking for a way to download YouTube videos to your MacBook for offline viewing? In this article, Free Download will guide you through simple methods, from using the Safari browser to supporting software, to help you download videos quickly and easily.

Below, Free Download will guide you on how to download YouTube videos on your MacBook using simple tools, suitable for all needs, from casual users to content creators.

How to download YouTube videos on a Macbook

Method 1: Using iTubeDownloader

Download and install the software here:

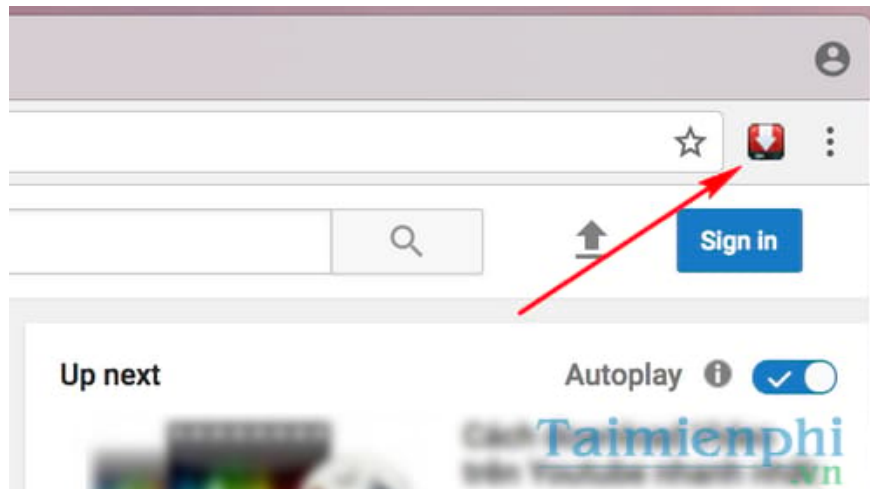

iTubeDownloader works similarly to a web browser, automatically redirecting to the YouTube homepage. Here you can search for and open the videos you want to download, then click the **Download button** icon in the browser's address bar (as shown below), select the desired video quality, and you're done.

Method 2: Using Chrome

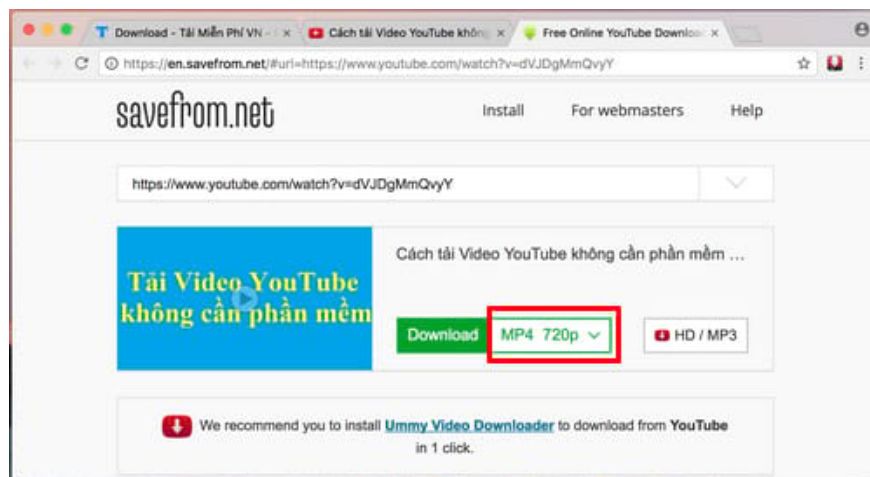

Step 1: Download the software to your computer

- Link to download Youtube Downloader Video

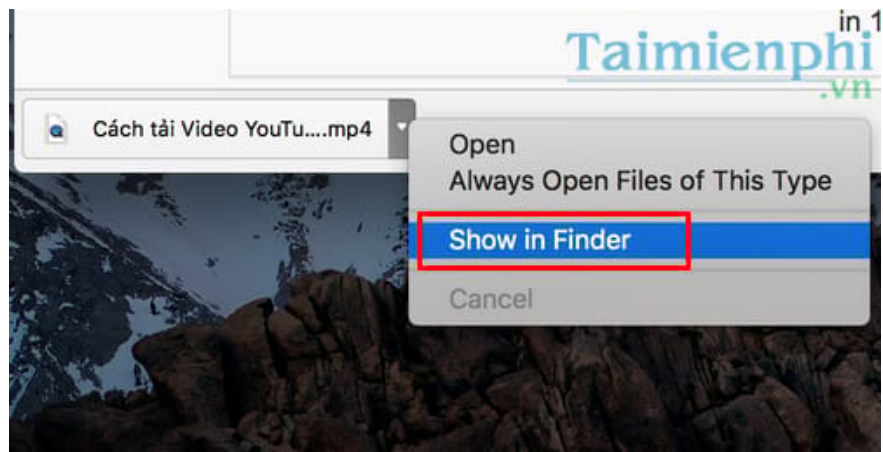

Step 2: Open the YouTube video you want to download, then click on the YouTube Video Downloader plugin icon in the upper right corner of your browser.

Step 3: The website interface will appear. Here, click on the red circled area as shown below to select the appropriate video format you need, then click **Download** to download the YouTube video to your computer.

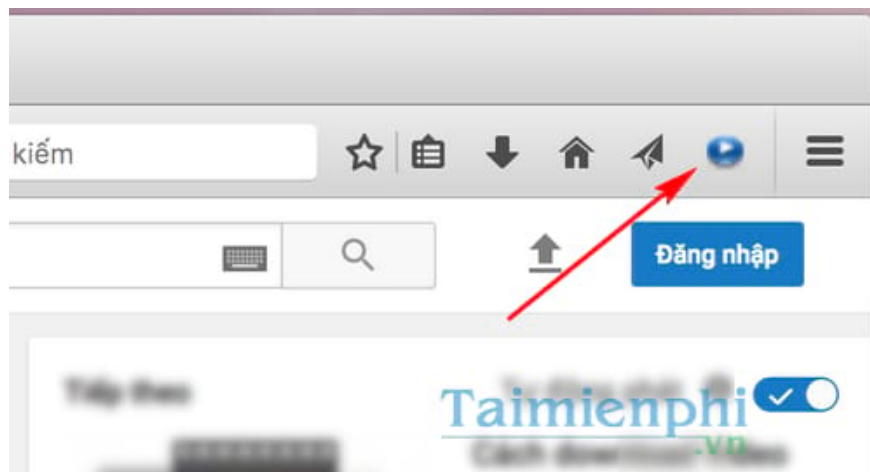

Step 4: After the video download is complete, double-click the downloaded file and select "**Show in Finder**" to see the location of the downloaded video file. Double-click to play and watch the video.

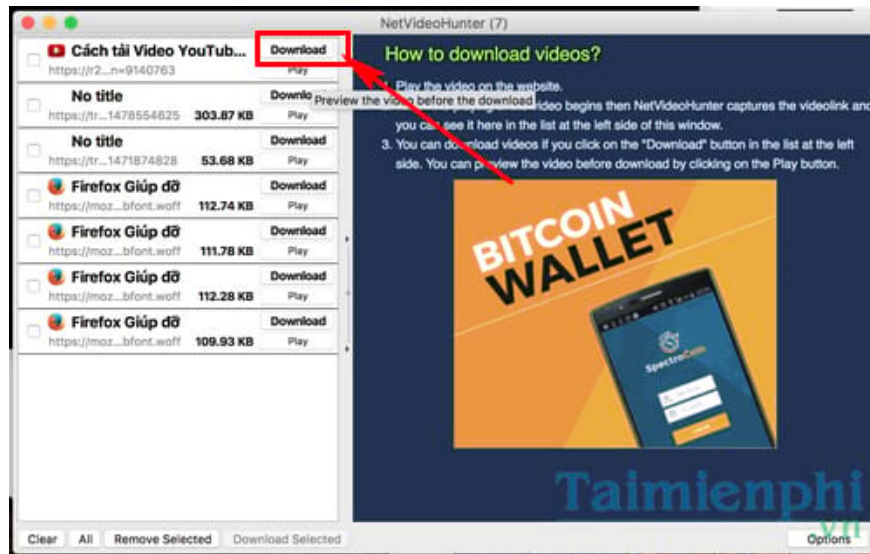

Method 3: Using Firefox

Step 1: Download NetvideoHunter

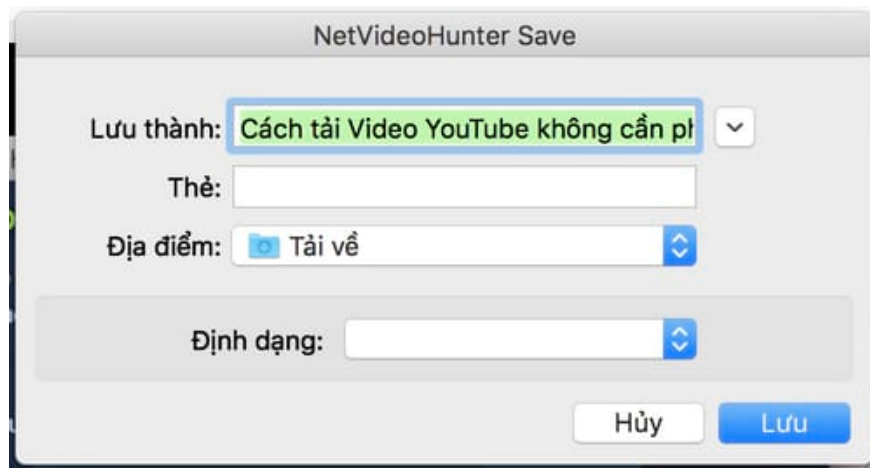

Step 2: Open the YouTube video you want to download, then click the NetvideoHunter add-on icon in the upper right corner of your browser.

Step 3: Click on the Download button to download it to your device. To be sure, you can click the Play button to preview it.

Step 4: A small dialog box will appear where you can rename the YouTube video file, change its save location, and click **Save** to save the settings.

Step 5: Once the video download is complete, click the download arrow icon in your browser, double-click the video file, and select "**Show in Finder**" when the menu appears to open the folder containing the video file and the downloaded video.

Above are the simplest ways to **download YouTube videos on your Macbook** . Hopefully, with these simple tips, you will be able to quickly download your favorite videos to your computer.
