

How to draw a pie chart in Excel 2016

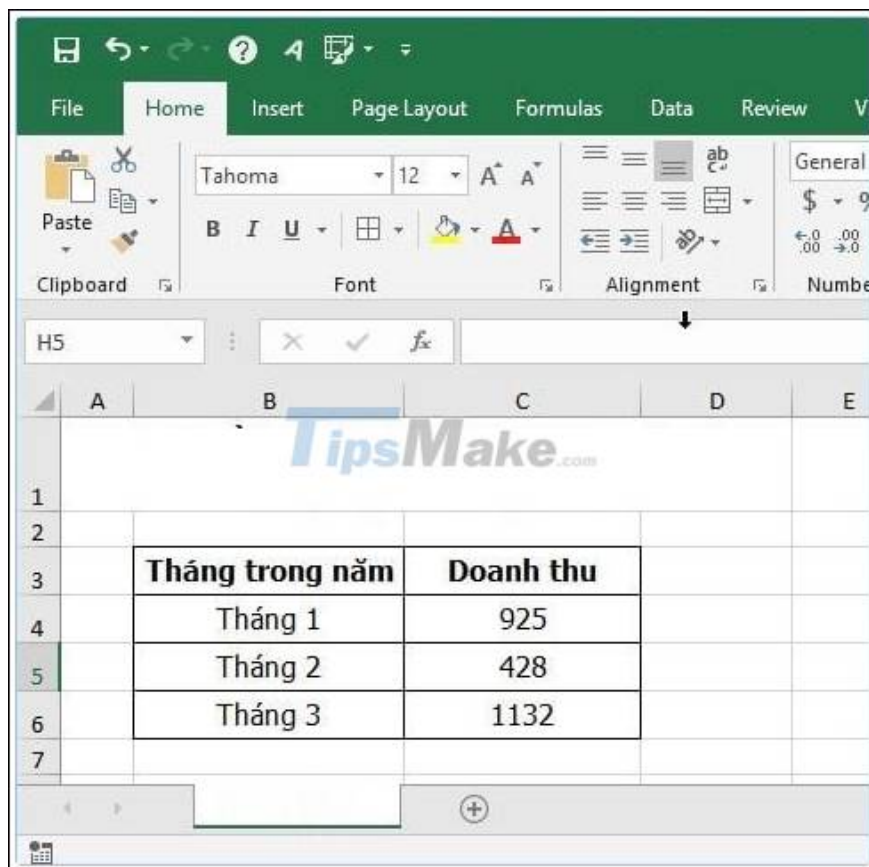

Pie charts are the best way to show data, making your reports and summary sheets more scientific and logical, in today's article, TipsMake will help you write how to draw pie charts in Excel. 2016 with quite simple steps.

If you already know how to draw a column chart in Excel that makes illustrating the data on the spreadsheet more intuitive, the following content, we will show you how to create or **draw a pie chart in Excel**.

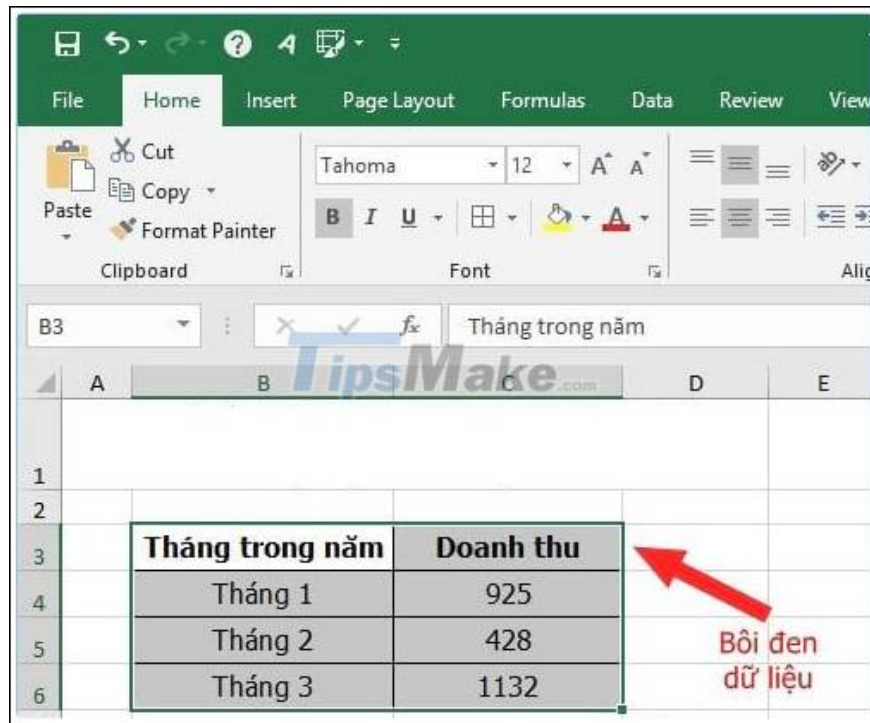

How to draw pie charts in Excel

In this article, TipsMake will use **Excel 2016** to demonstrate how to draw pie chart in Excel.

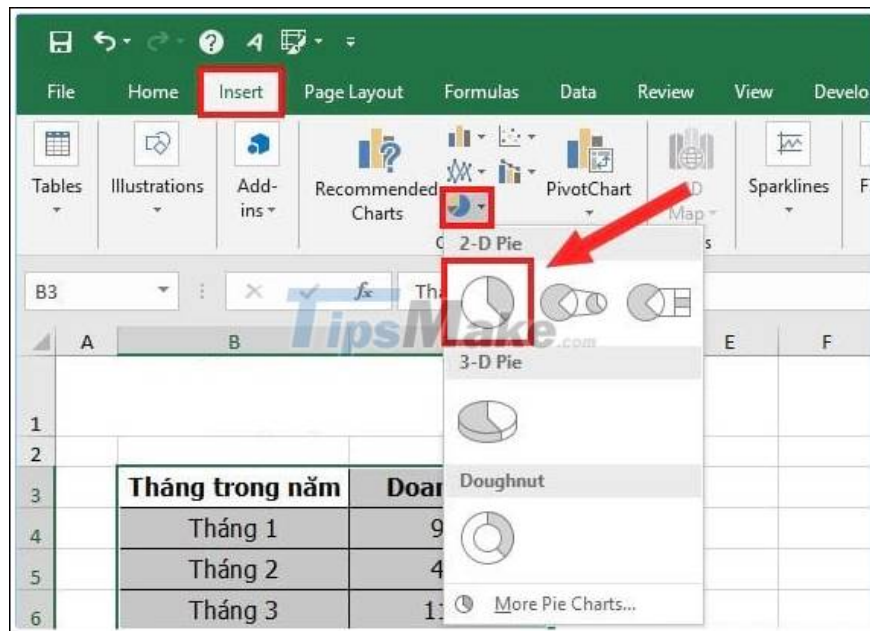

Suppose you have a data table as shown below, need to insert pie chart.

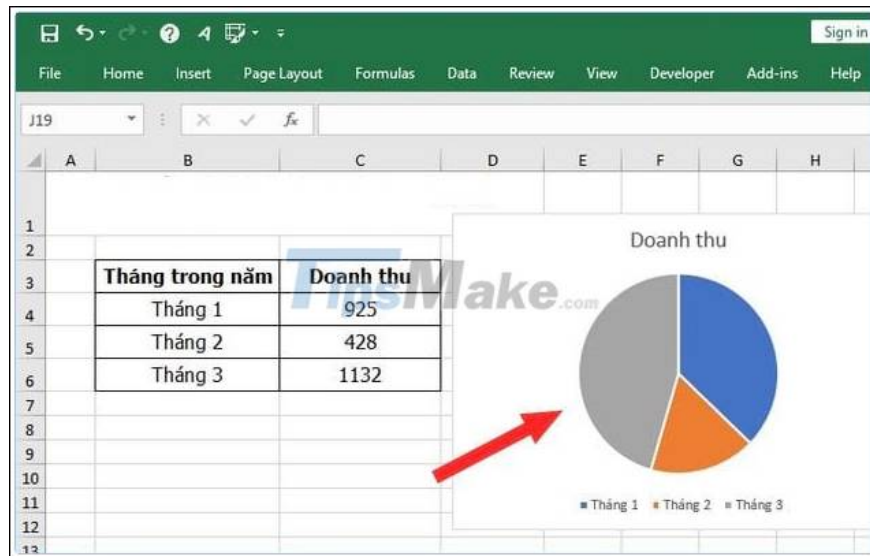

Step 1: You perform the highlighting of the data you need to draw a pie chart.

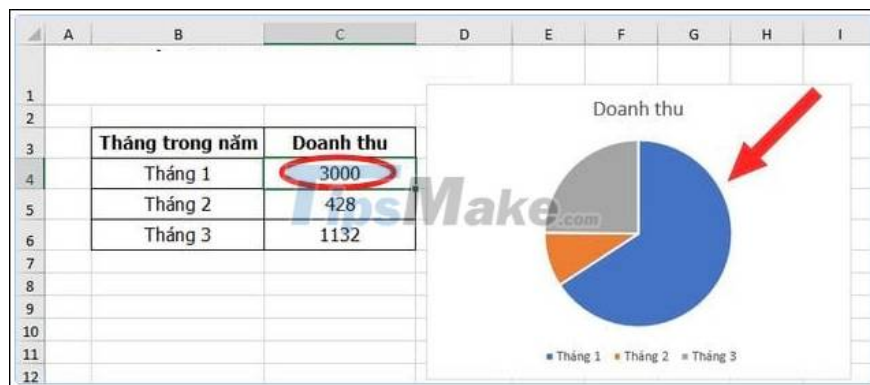

Step 2: Then go to the **Insert** tab-> select the icon of the pie chart, you can choose the type of chart to draw, for example, you choose the **2 - D Pie** pie chart.

Step 3: After you make your selection -> the pie chart style will appear in the Excel spreadsheet.

If you want to change the data in the spreadsheet -> when there is a change in the data, the chart will update automatically according to that change. For example, in January I entered the data to increase -> then you can see immediately the pie chart also changes.

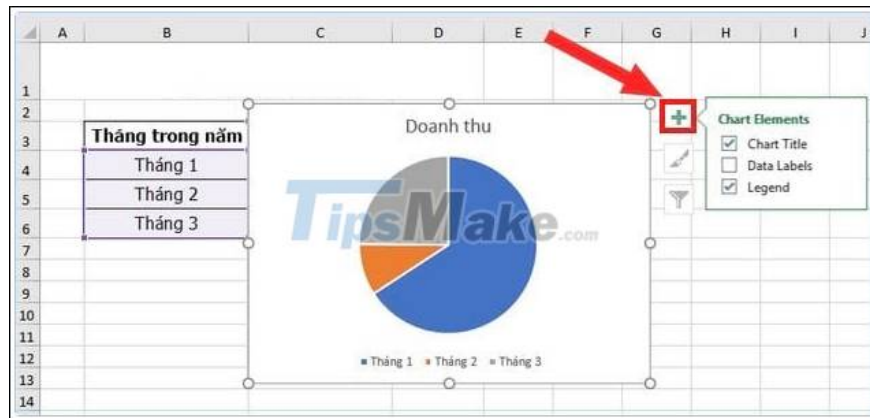

So, with the 3 steps above, you can successfully draw a pie chart in Excel. Once the chart is created, you can also edit it like:

- Add other components to the chart:

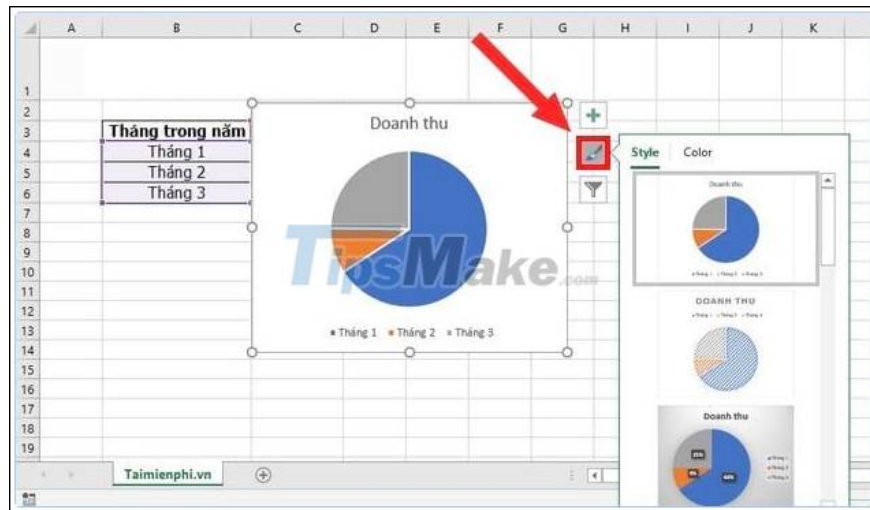

Click on **Chart Elements** to see more small features:

- + **Chart Title** : Add a title for the chart.
- + **Data Labels** : Add data labels for the chart.
- + **Legend** : Add notes to the chart.

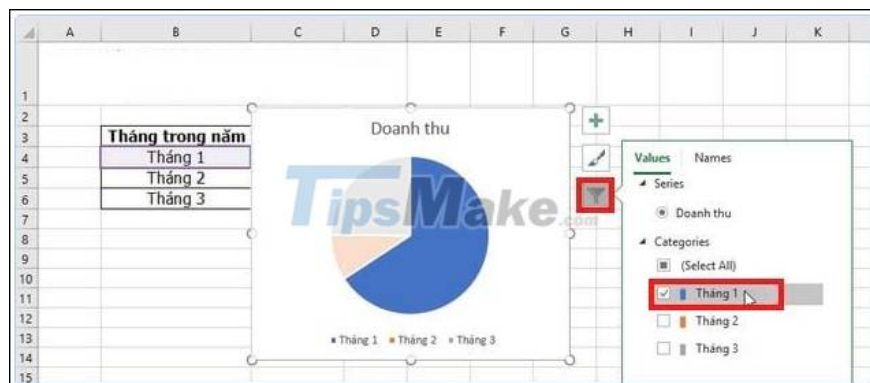

- Change color and chart style in Excel

To change the color and shape of the pie chart -> click on the **Chart Styles** icon as shown below, you can choose the style and color of the chart to best suit.

- Use the feature to filter or display data

For example, if you want to obscure the data of the 2 months of February and March, and if you want to show the data of January, you click on **Chart Filters** -> select the data you want to display. success.
