

How to draw an equilateral triangle in Excel

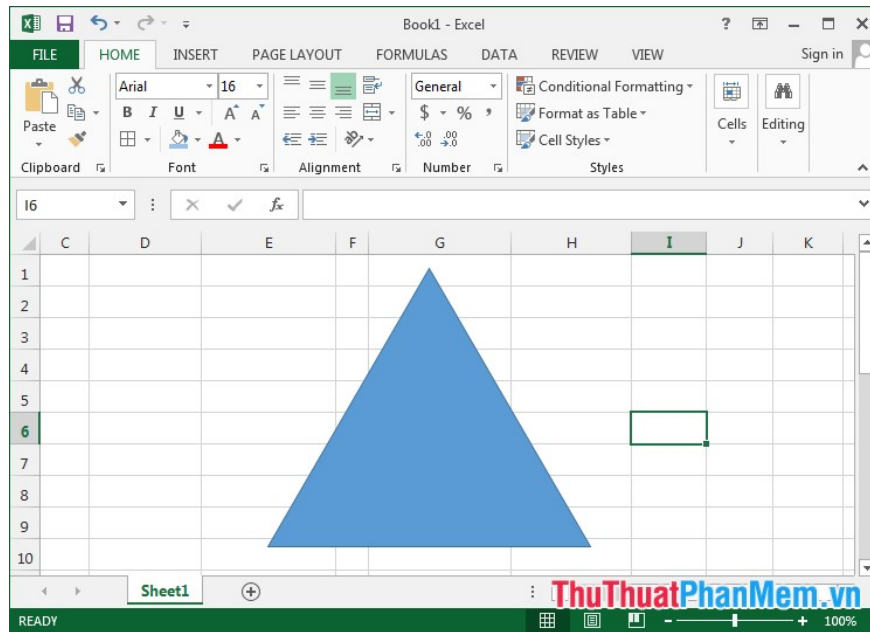

In addition to the ability to support calculations, Excel also has tools to support users with drawing tools easily. In this article I introduce you How to draw equilateral triangles in Excel 2013.

In addition to the ability to support calculations, Excel also has tools to support users with drawing tools easily. In this article I introduce you **How to draw equilateral triangles in Excel 2013** .

Step 1: Select the **Insert** tab -> **Shapes** -> **Flowchart** -> **Basic Shapes** -> Select the triangle.

Step 2: Press and hold the **Shift** key while moving the mouse to customize the size. When it looks like you want to release the mouse button.

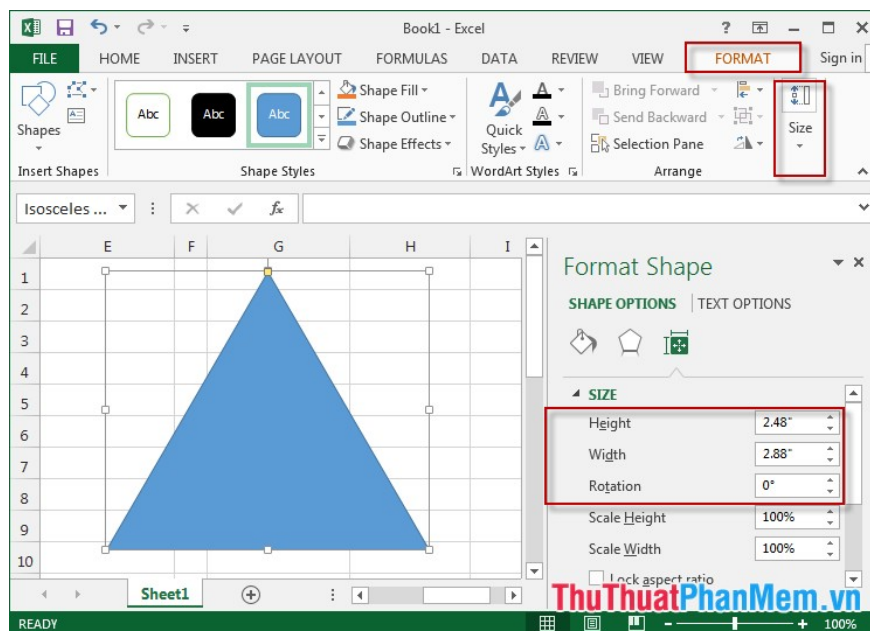

With a simple operation you draw an equilateral triangle.

Basic operations on triangles

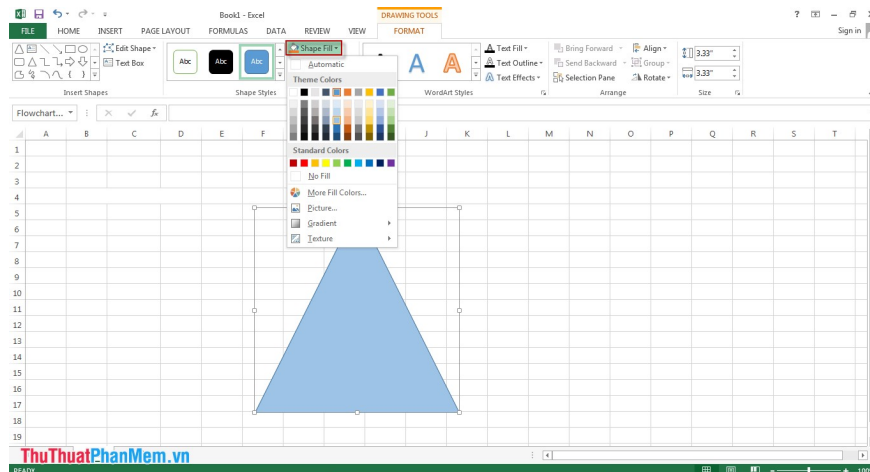

1. Change the size, direction of rotation.

Click the **Format** tab -> **Size**. Dialog appears -> resize in **Width, Height**. Change the direction by entering the number of rotations in the **Rotation** section .

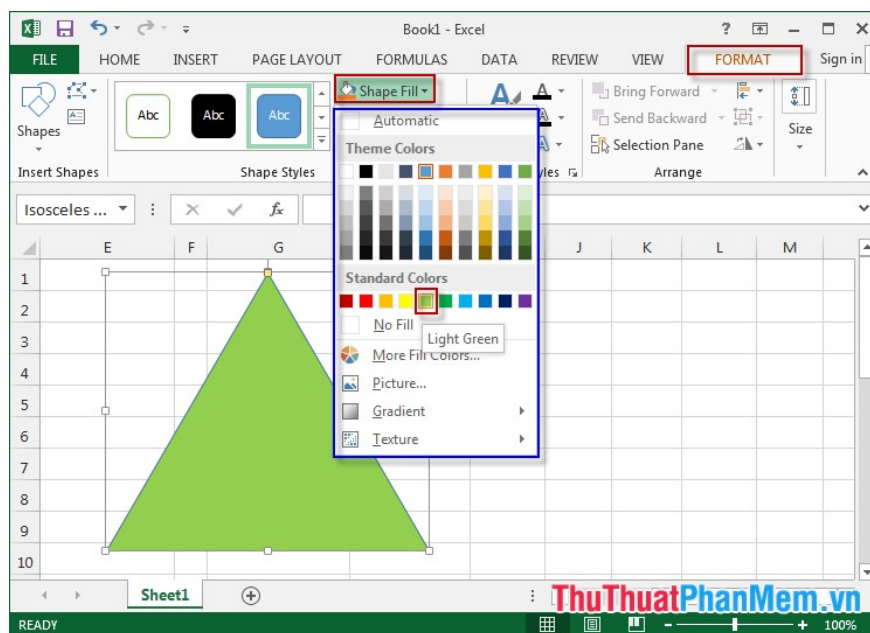

2. Fill the background with triangle

Click the **Format** tab -> **Shape Fill** -> select the appropriate color.

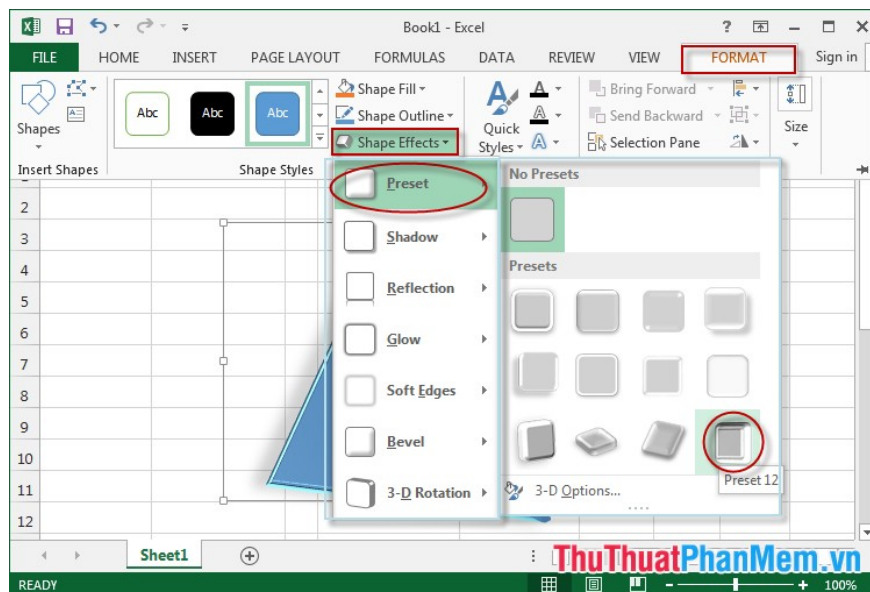

3. Choose the stroke color of the equilateral triangles

Click the **Format** tab -> **Shape Fill** -> choose the appropriate color .

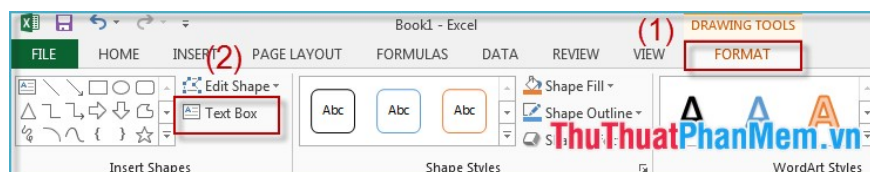

4. Create effects

Click the **Format** tab -> **Shape Effect** -> choose the appropriate effect .

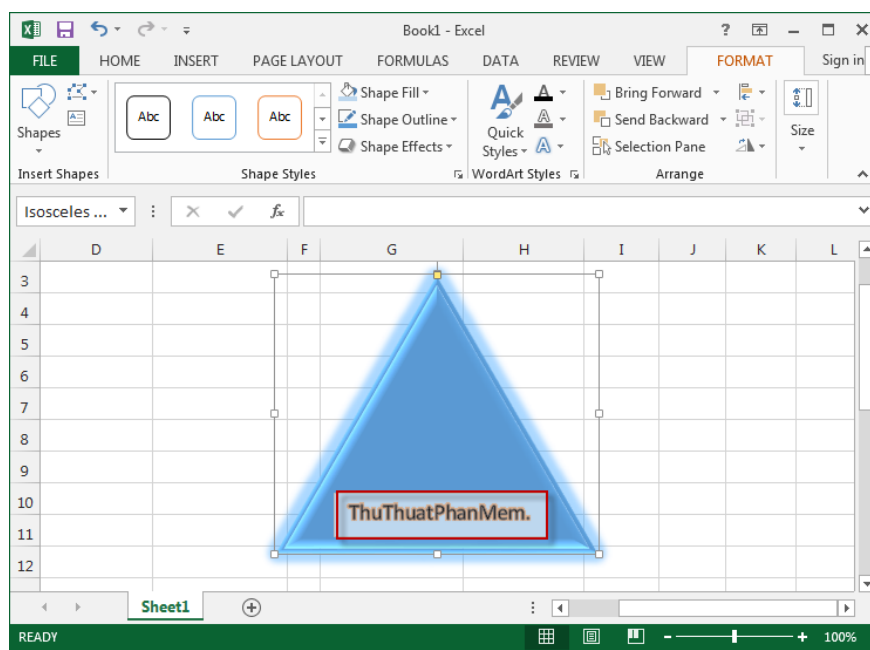

5. Insert Textbox

Click the **Format** tab -> **Text Box**.

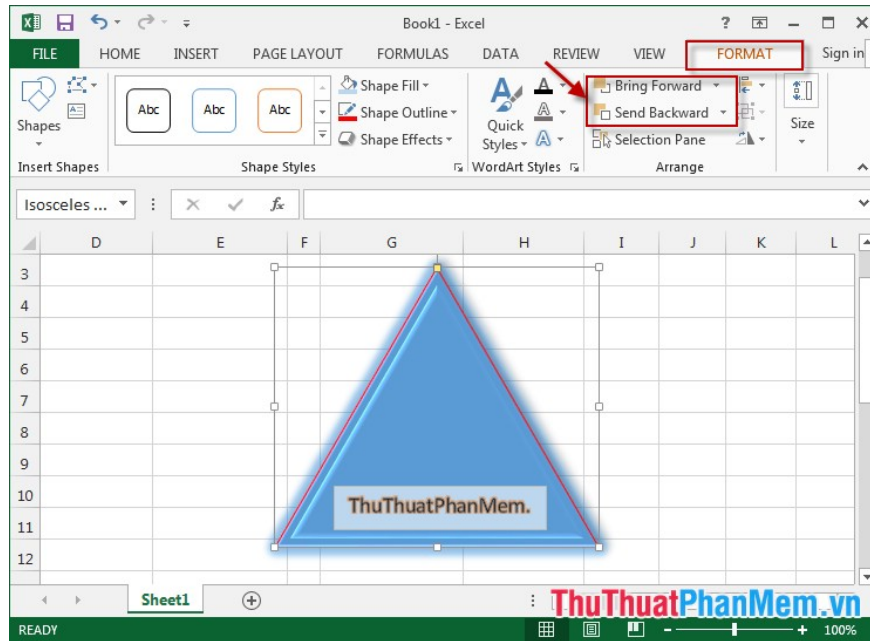

Move the mouse to the position where the text should be inserted.

Select the order of appearance of the triangle and the **Text Box**.

Click the **Format** tab -> **Bring Forward** or **Send Backward**.

Good luck!
