

How to drop WhatsApp message emoji

Just like the popular messaging apps today, WhatsApp allows you to drop message emoticons with the many different emoticons found in WhatsApp.

With this feature, you can easily express your feelings to the other person's message or to the message in the WhatsApp chat group, creating a much more interesting conversation. The following article will guide you to drop WhatsApp message emoticons.

Instructions to drop WhatsApp message emoticons

Step 1:

At the WhatsApp message interface where the user wants to drop the emoticon, we **press and hold on the message** . Now display the **emoji** bar with several emoticons for you to choose from.

To **add another emoji selection** , click **the plus icon** at the bottom.
