

How to edit GIF images using EZGIF tool online

EZGIF is an online tool to support users to create and process animations, with many useful features, enabling you to create unique animations and not touch anyone.

Currently there are many tools to support users to create and edit animations. In particular, the online GIF creation tools are selected by many users. You do not need to download software to your computer, or install any other programs and still be able to edit images completely for free.

In this article, Network Administrator will introduce you to EZGIF tool with lots of rich features and details on how to edit and create animations to get an image.

First of all, you can access the homepage of EZGIF under the link below.

1. <http://ezgif.com/>

The tool provides us with **the following 8 functions to create and edit custom animations** :

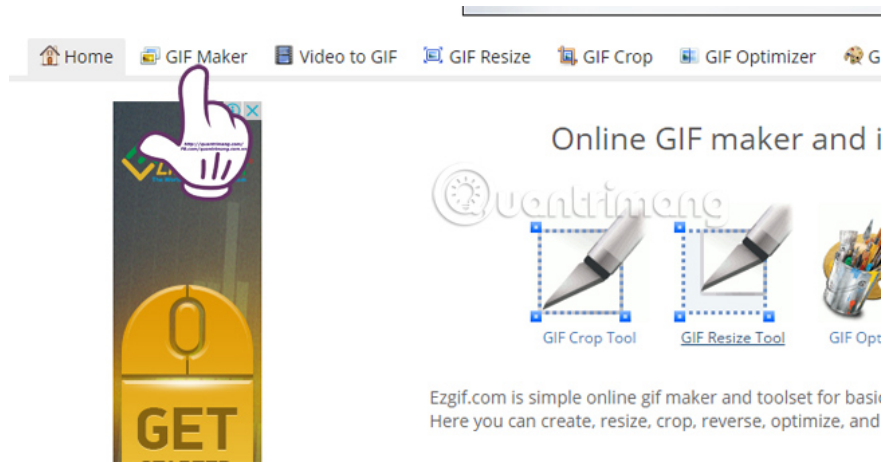

1. **GIF Maker** : Create GIF images.
2. **GIF Resize** : Change GIF size.
3. **GIF Crop** : Cut GIF images.
4. **GIF Optimizer** : Reduce the size of GIF images.
5. **GIF Effects** : Add effects to GIFs.
6. **GIF Split** : Split GIF images.
7. **PNG Optimizer** : Reduce the size of PNG images.
8. **Video to GIF** : Convert Video to GIF.

1. Create GIF images using EZGIF:

After accessing the homepage according to the link above, we proceed to create an animation.

Step 1:

Click on the **GIF Maker** item above to create an animation.

Step 2:

Then, in the new interface, click **Select file** to select the image file to create the animation. The tool supports GIF, JPG and PNG image formats, uploading up to 50 files and a maximum image size of 5MB. Once you've selected the image, click **Upload**.

Step 3:

Next, we will proceed with the **animation editing**. Fill in the delay time in the **Delay time** box and then press **Animate it!** to create an animation.

Step 4:

Wait for the animation to finish. In the **Animated gif** section, you will see the animation created and more options below. Select **Save** to save the animation.

2. Create GIF images from Videos:

EZGIF supports users to create animated images from videos available on the computer.

Step 1:

Click the **Video to GIF section** above to proceed with the animation from the video. Next, click **Select file** to download the video from the computer and finally click **Upload**.

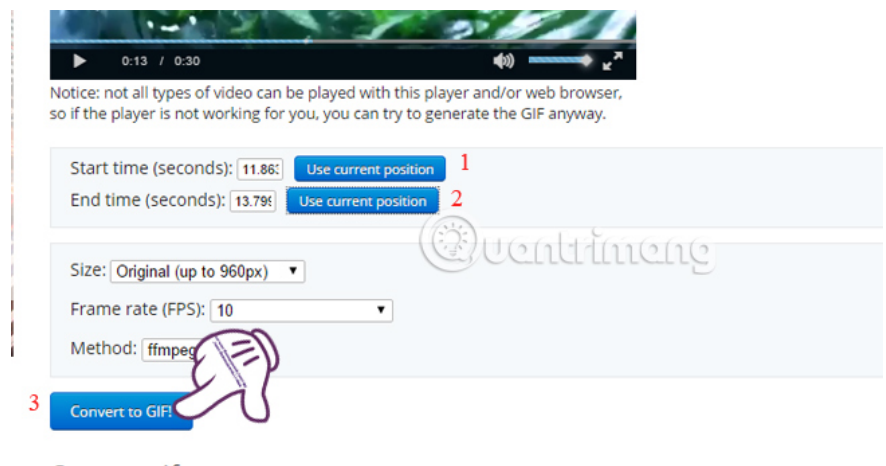

Ezgif supports downloading a lot of MP4, AVI, WEBM, FLV, MOV video formats . and a maximum capacity of 60mb.

Step 2:

The video will run immediately below, along with **the time for you to choose as the start and end point of the GIF** . Click the **Use current video position** button at the **Start time** and **End time** items .

In addition, you can select **the size of the animation** in the **Size** section, the **speed of motion** of the GIF image in **Frame rate** . After you've selected the time, click **Convert to GIF** to convert the video into an animated image.

Step 3:

In the **Output** section, you will see the animation created from the video. Click **save** to save.

Output gif:

(Please be patient, video conversion may take a while, especially for long gifs with high frame rate)

3. How to change GIF image size:

If you already have a computer animation or any GIF image on a web page, but want to change the size, you can use EZGIF.

Step 1:

Click on the **GIF Resize** item above to edit the animation.

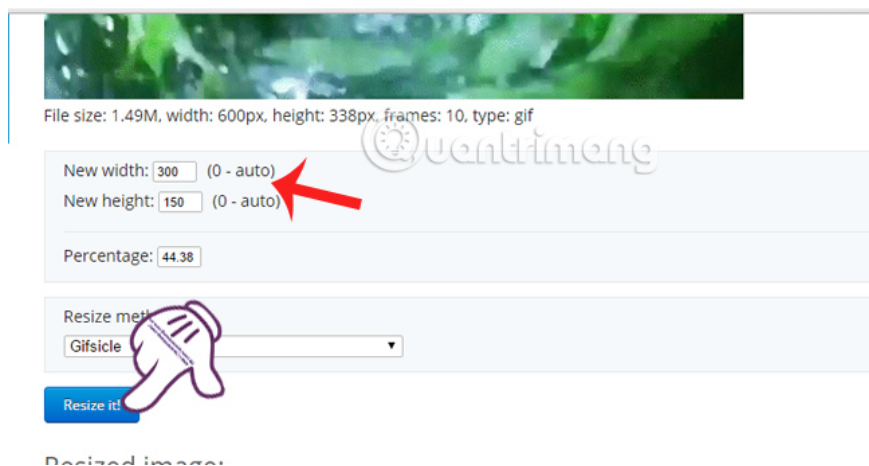

Click **Select file** to download the file from your computer, or use **the URL link** available with a maximum capacity of 16mb. Finally click **Upload** to upload photos.

Step 2:

Immediately after that, you will see the uploaded animation with the image size, height and width (pixels) of the image.

Now, you proceed to **enter a new size for the image** in the box **New width** and **New height** , then click **Resize it!** to EZGIF handling animation.

Step 3:

Shortly thereafter, the **Resized image** will see a new size image. Click **save** to save the new image to the device.

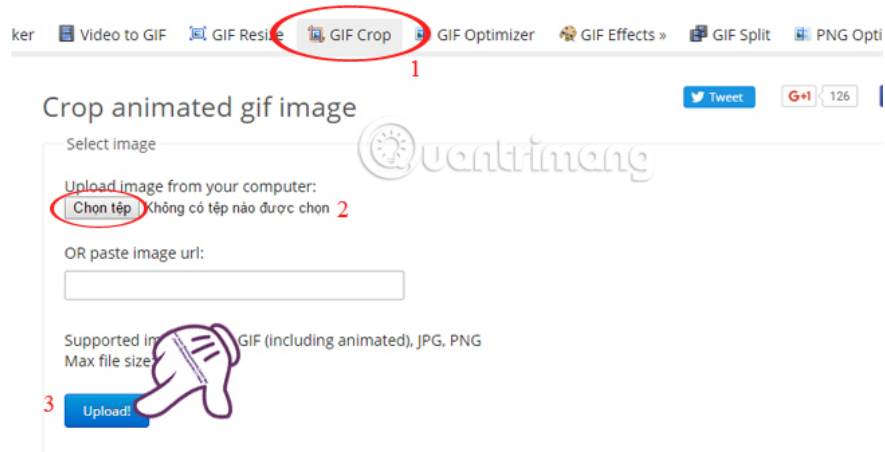

4. How to cut the animation:

In addition to supporting the size of the animation, EZGIF can also cut the animation according to the user 's custom frame.

Step 1:

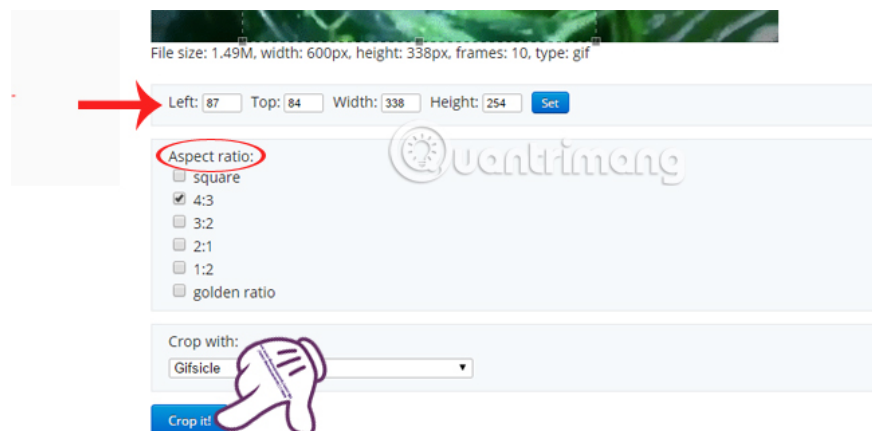

Select the **GIF Crop** item above to crop the animation. Then, click on the **Choose file** button to download the file from the computer or, use the dynamic URL link with a maximum capacity of 16mb.

Finally click **Upload** to upload photos.

Step 2:

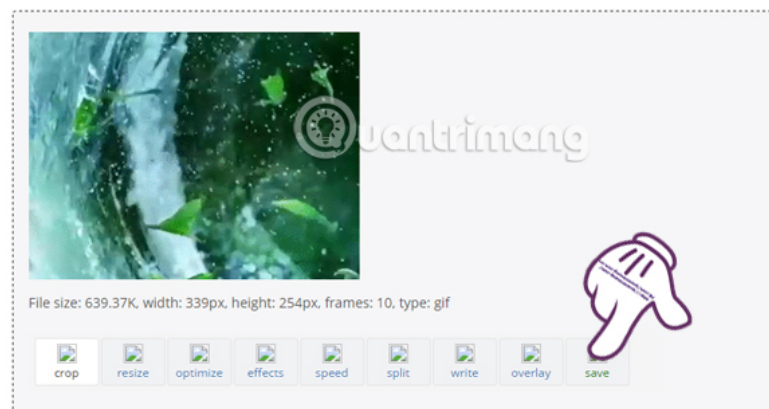

Next, we will proceed to **resize** . You can use the mouse to **drag the frame on the animation to crop the image** , **fill in the image size** or **select 6 size ratios** . Once you've selected the size of the animation, click **Crop it** to crop it .

Step 3:

At the **Cropped image** below, the animation after cutting will appear. Click **save** to save the new image.

Cropped image:

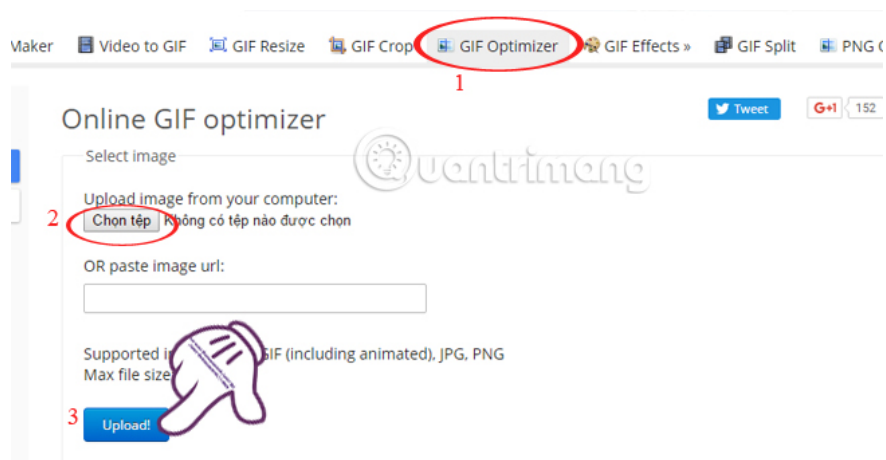

5. How to reduce the size of GIF images:

If your animation has a large capacity, then EZGIF will reduce the size so it can be conveniently shared or sent.

Step 1:

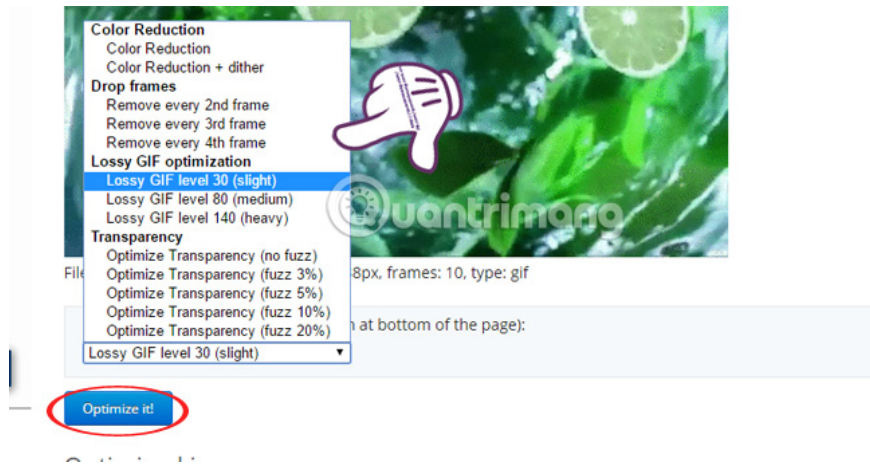

Click the **GIF Optimizer** item to reduce the image size. Click **Select file** to select the image available in the computer, or download the image via the URL link with the image not exceeding 16mb. Finally click **Upload** to upload photos.

Step 2:

Next in the **Optimization method** section, we will select the item to reduce the image size depending on the needs of the user. EZGIF will help us reduce the image file size by 30-50% compared to the original.

Then click **Optimize it!** to increase the image size.

Step 3:

The **Optimized image** section will be the animation after reducing the size. Click **Save** to save the image.

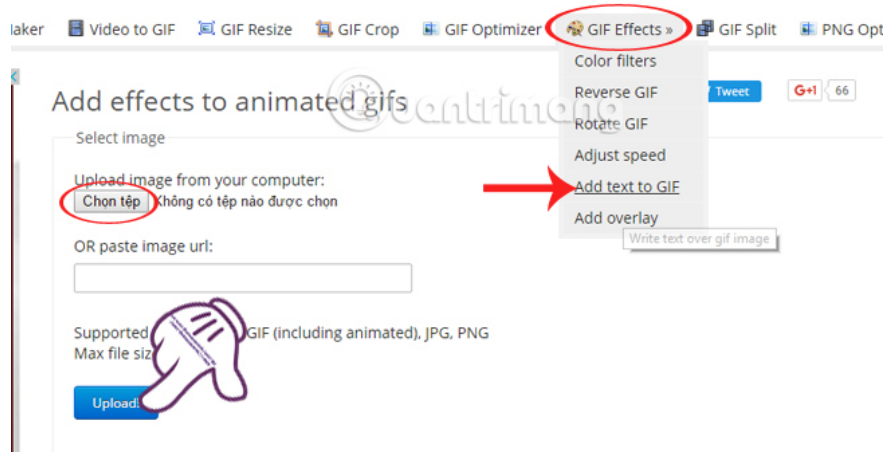

6. How to add effects to GIFs:

In addition to adjusting the size or size of the image, if the user wants to create additional effects for the image, it is also simple.

Step 1:

Click the **GIF Effects** item. Here you will find **6 types of animation effects** , you select an effect such as **Add text to GIF** .

Click **Choose file** to download photos from your computer, or use the URL link with images up to 16mb. Then, click **Upload** to proceed with adding effects.

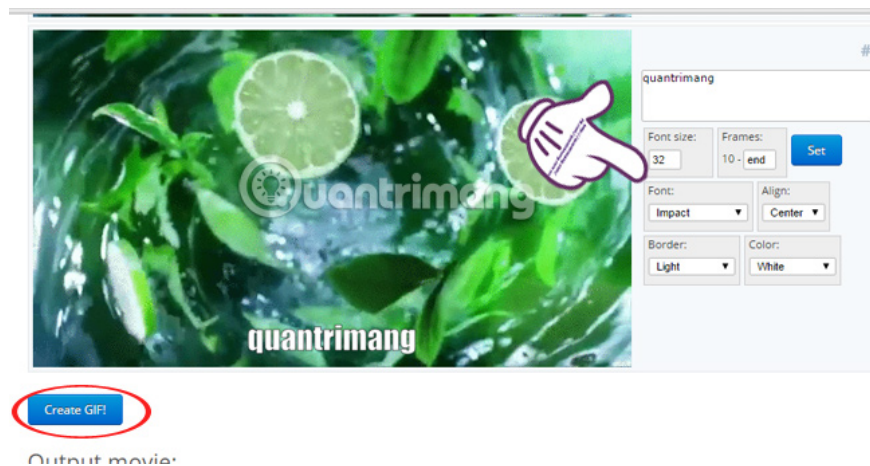

Step 2:

Next, the tool will cut your animation into segments, followed by an extra text box for the animation for each segment.

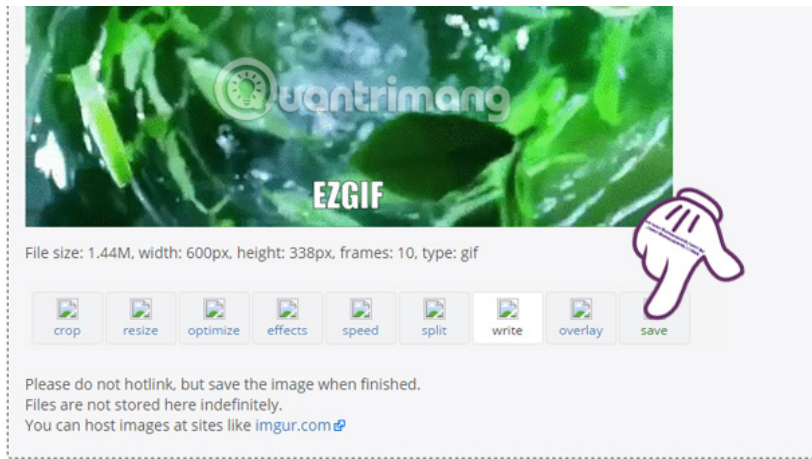

1. **Text** : add text to your animation.
2. **Font size** : Edit the **font size** when adding images.
3. **Frames** : frames for animations.
4. **Align** : Customize the text in the middle or left, right as you like.
5. **Font** : Choose the font you like.
6. **Border** : border for text.
7. **Color** : select the color for the text.

Click **Set** to enter the text in the image and then choose **Create GIF** to create the animation with the effect.

Step 3:

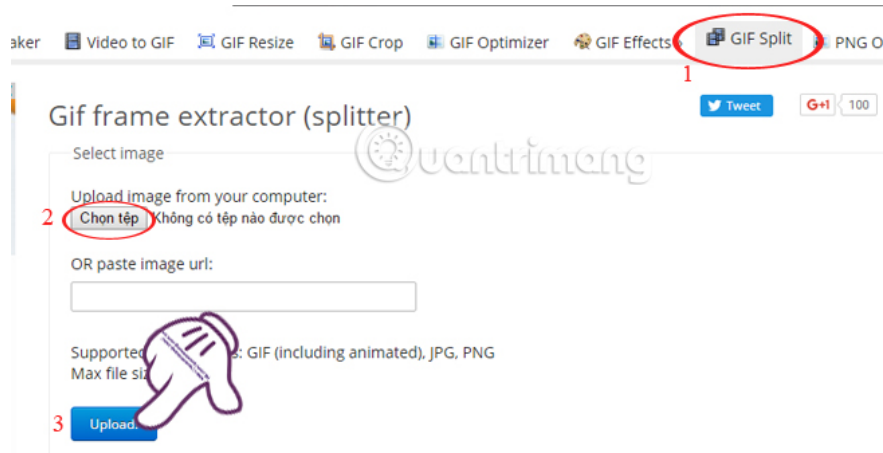

In the **Output movie** section the animation will appear with the added effect. Click **save** to download the image to your computer.

7. How to split GIF images:

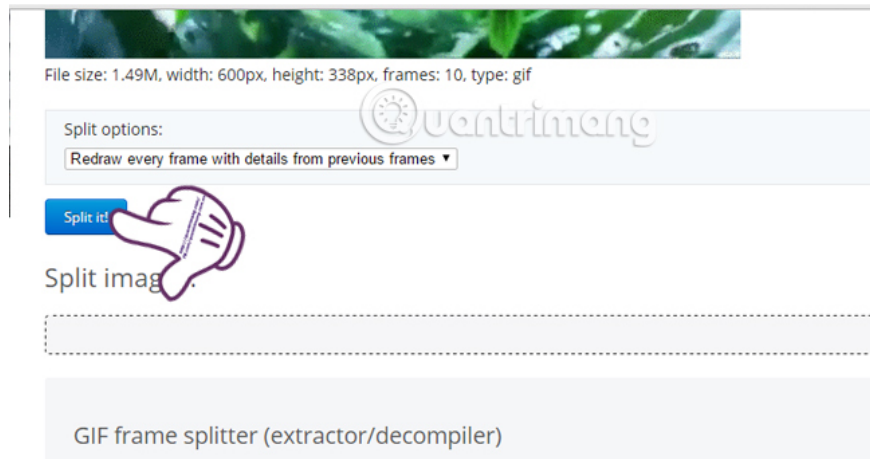

Step 1:

Click the **GIF Split** item to split the animation. Click **Select file** to download photos from your computer or via the URL link. Then, select **Upload** to upload the image.

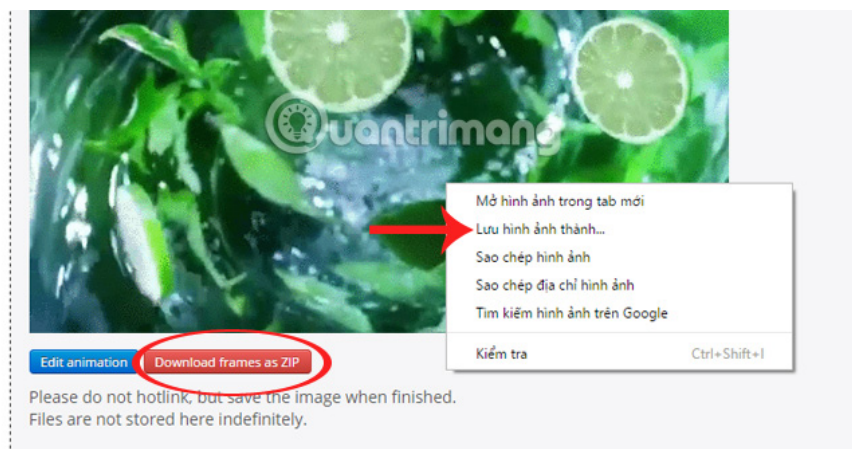

Step 2:

EZGIF will automatically switch to **split and resize frames for animations in Split options**, so you don't need to press another item. Click **Split it!** to split GIFs.

Step 3:

The results show that the animation will be divided into many different small animations. Click **Download frames as ZIP** to download the entire image. If you want to **download 1 of those small animations**, **right-click on the image** and select **Save image as**.

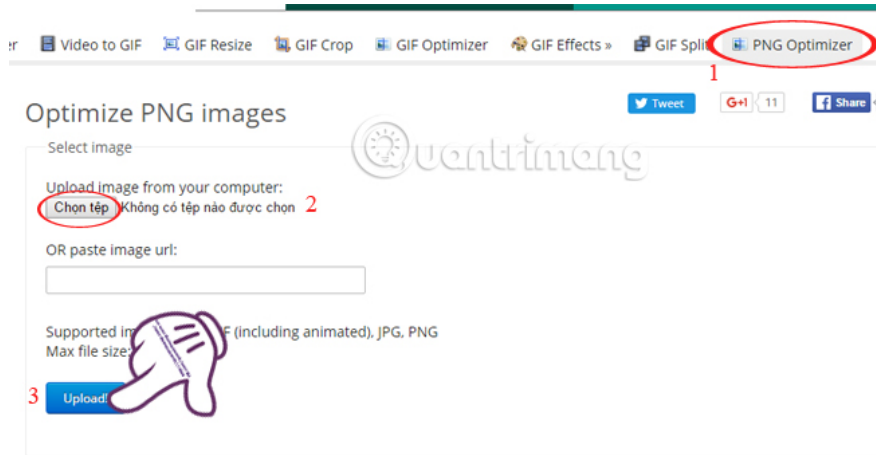

8. How to reduce the size of PNG images:

In addition to supporting animation editing, EZGIF can reduce PNG image size with simple operations.

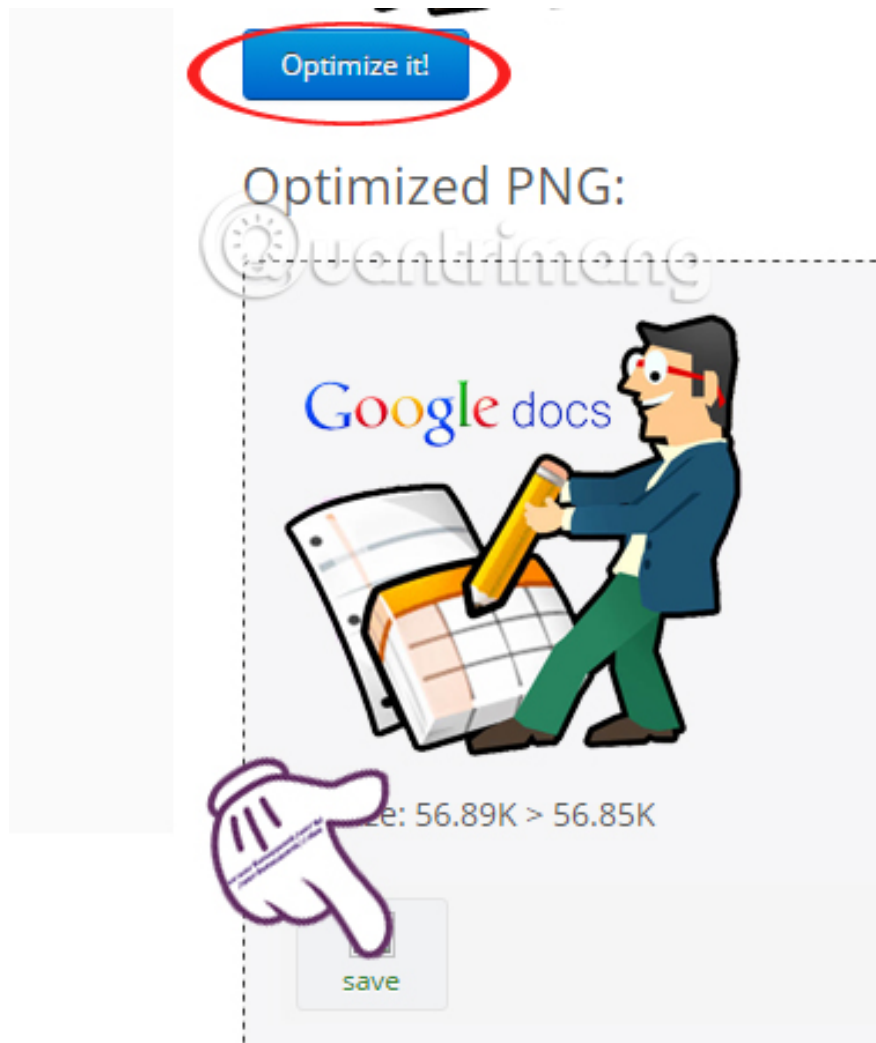

Step 1:

You select the PNG Optimizer item, click **Select file** to upload the PNG image. Then, click **Upload** to proceed with editing.

Step 2:

Click **Optimized** to reduce the size of PNG images . Finally click **Save** to download the image to your computer.

As such, we showed you how to use the online EZGIF tool to create and edit animations. The facility features 8 rich functions, allowing users to freely customize the animation according to their way.
