Convert from PDF files on LightPDF

Users access the link below to visit LightPDF's homepage.

1. <https://lightpdf.com/>

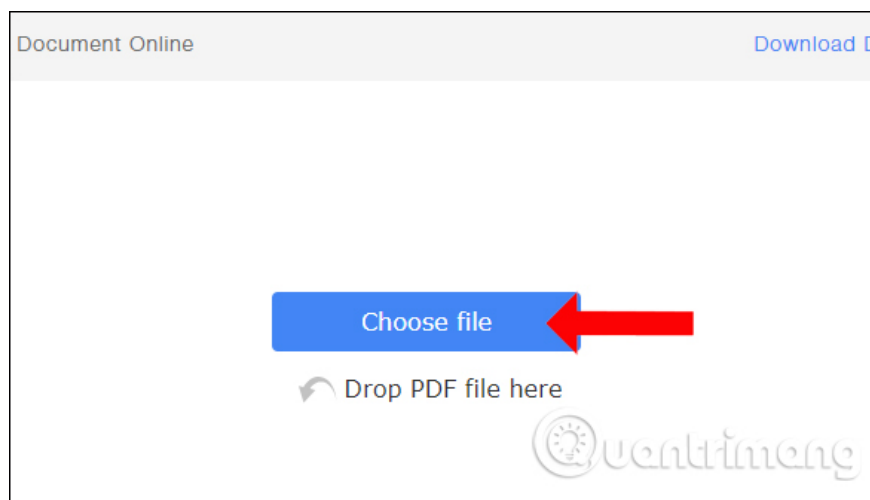

At the main interface of the tool, users will see a lot of different PDF editing features.

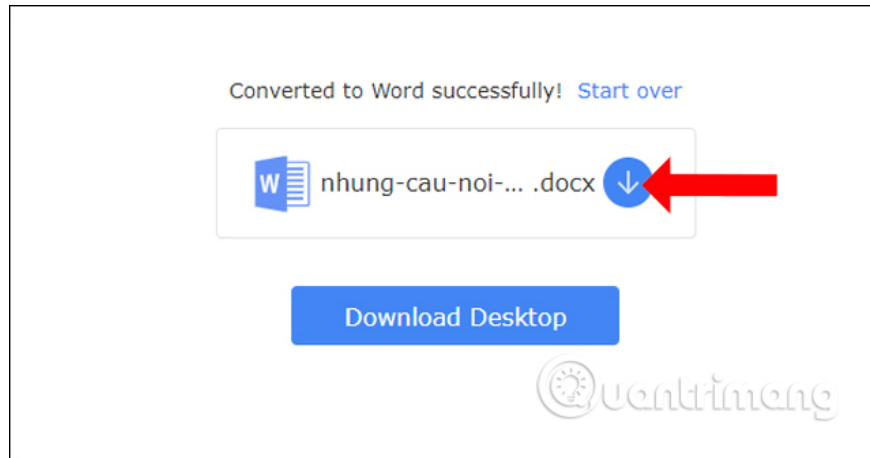

1. Convert PDF to Word

1. How to convert PDF files to Word simply, without font errors

Users simply click **Choose file** to download the PDF file to the interface.

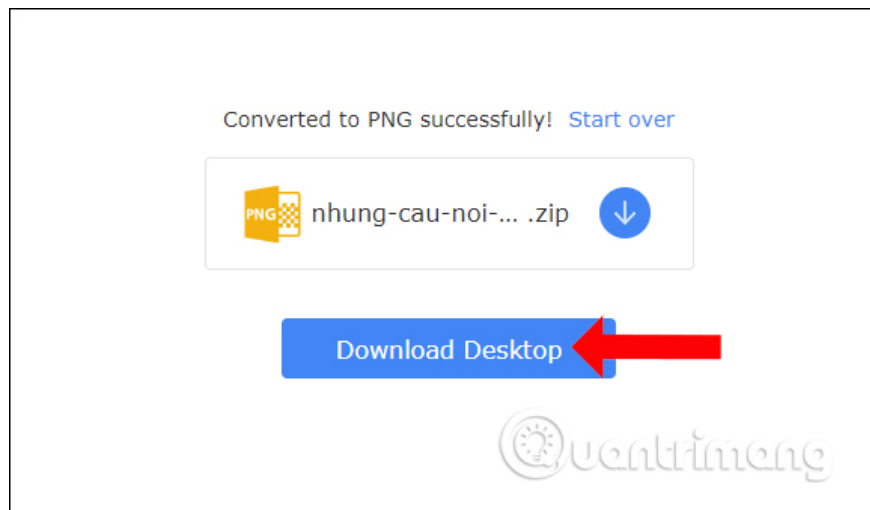

Wait for the file download process to succeed, after that we will see the Word file after transferring. Click **the download icon** to download the text file. The file will be converted to docx format. If you want to convert docx to doc, users can use other conversion tools, or convert right on Word.

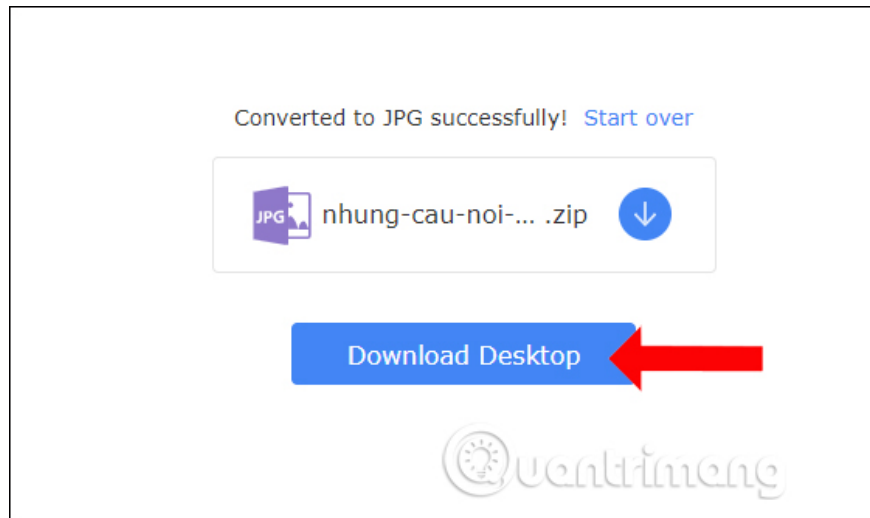

2. Convert PDF to PNG

PDF files converted to PNG will be compressed into zip files. The conversion process is fast or slow depending on the size as well as the number of PDF pages.

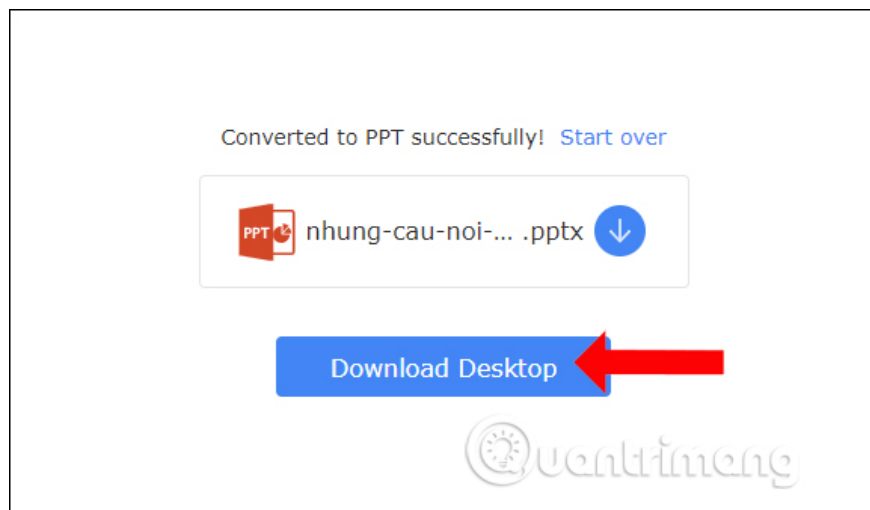

3. Convert PDF to JPG

This conversion process is similar to the above. JPG files will be compressed into zip files.

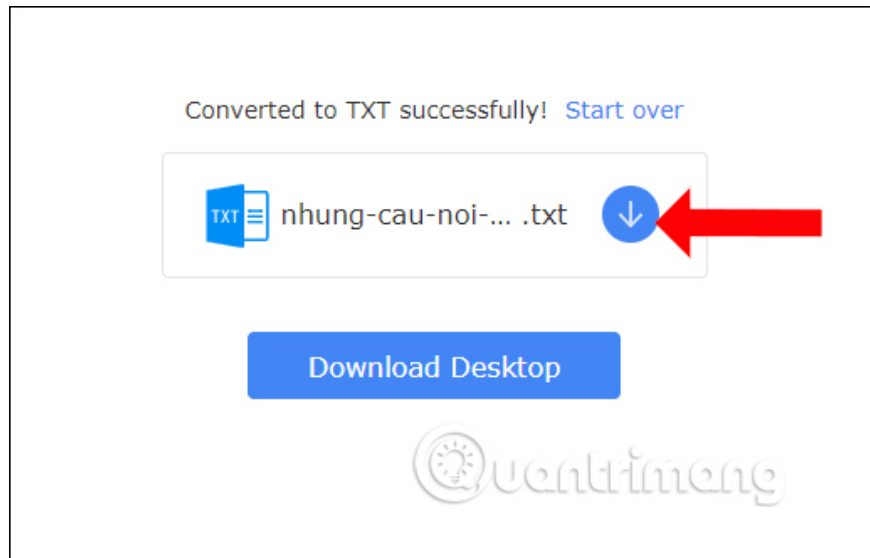

4. Convert PDF to PPT

After uploading the PDF file to LightPDF and conducting the conversion successfully, click the download icon to download the PPT file.

5. Transfer PDF to TXT

Also click the download icon to save the TXT file after successful conversion from PDF.

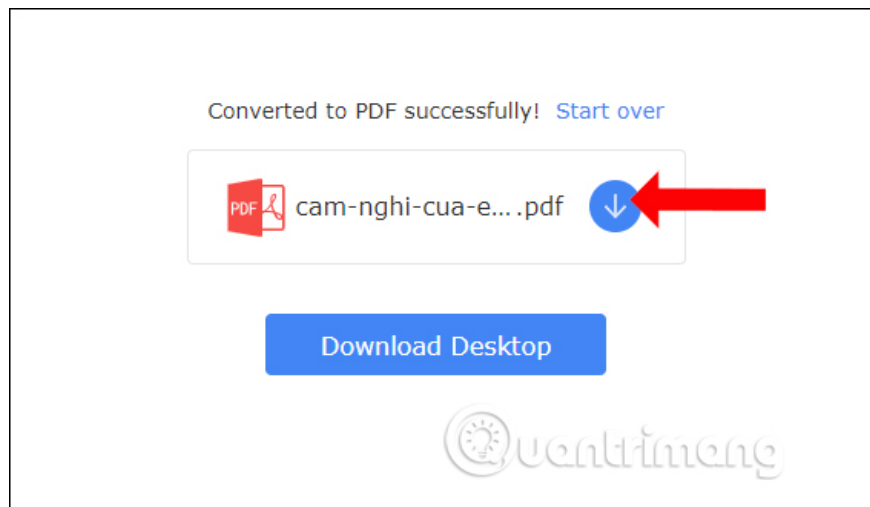

Convert to PDF file

1. Transfer Word to PDF

1. How to reduce the size of PDF files convert from Word files

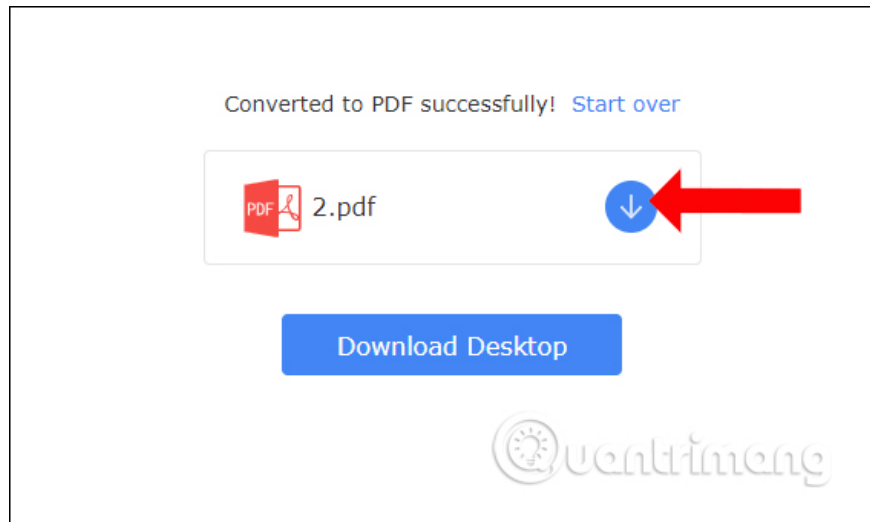

Click Choose file to upload the Word file and then wait for the tool to convert to a PDF file. When the conversion file is successful, the user clicks the download icon.

2. Convert from Excel to PDF

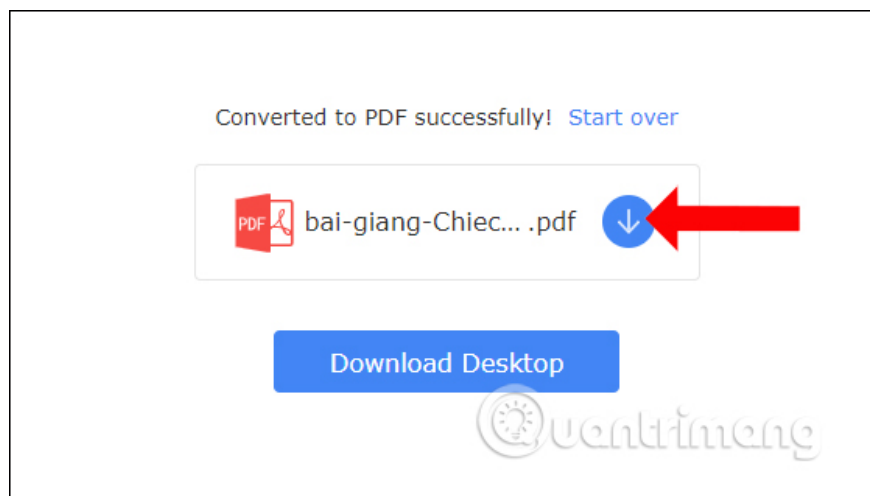

1. Simple way to convert Excel files to PDF
2. 4 steps to convert PDF files to Excel online

After converting from Excel to PDF, users click the download icon to download the file.

You download PowerPoint file with ppt format, pptx to LightPDF. After conversion, click the download icon to download the file.

4. Convert from PNG to PDF

1. How to convert PNG images to PDF files

With PNG image format, users can select 1 or more images to convert to PDF. First, click Choose file to upload a PNG image. Then click on **the plus icon** to download other image files. The tool does not support uploading multiple photos at once.

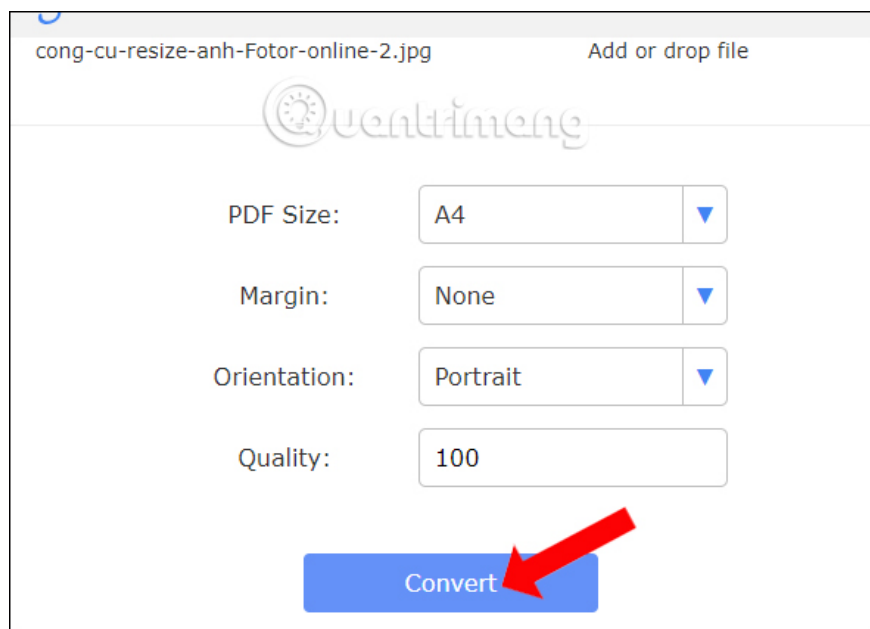

Next to the user set up PDF content including quality, page size, display mode, alignment and click the Convert button.

5. Convert JPG to PDF

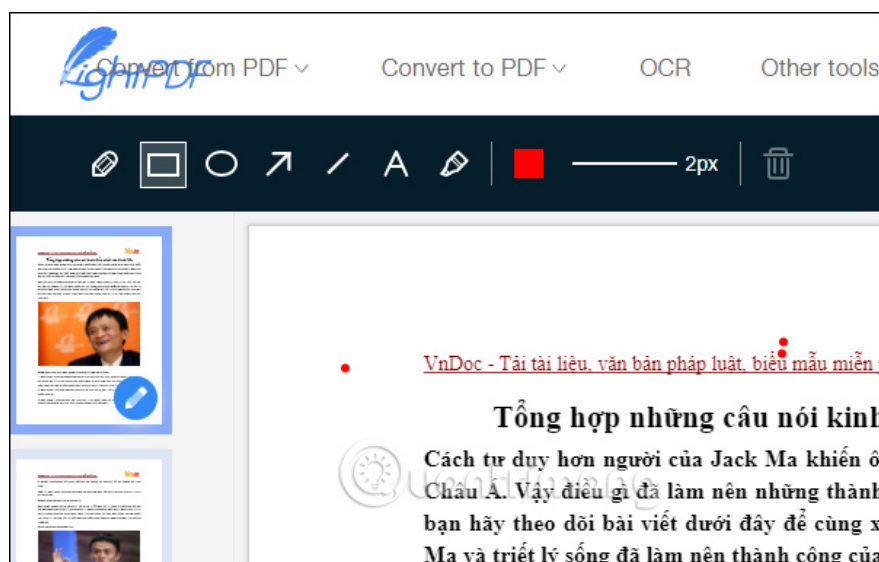

First, upload a JPG image to the page, edit the PDF page and click the Convert button below to convert it.

PDF content editing tool

1. Editing PDF files (Edit PDF)

After uploading the PDF file to LightPDF, you will have the tools to edit content such as adding drawings, text, etc. The editing tools will be on the same interface.

2. ORC

This feature helps to extract text in PDF, images (PNG, JPG) saved to txt text.

Because we are using LightPDF for free, we will use the OCR Basic converter. First click Choose file to upload the PDF file. Select the language in the content. Currently the tool does not support Vietnamese. Finally click the

Convert button below to change.

OCR Basic--Only recognize one language from the document

1 Choose file

 nhung-cau-noi-kinh-dien-cua-jack-ma.pdf
Uploading... 100% ×

2 Language (Select one language)

English ▼

3 Result (Only convert text to TXT)

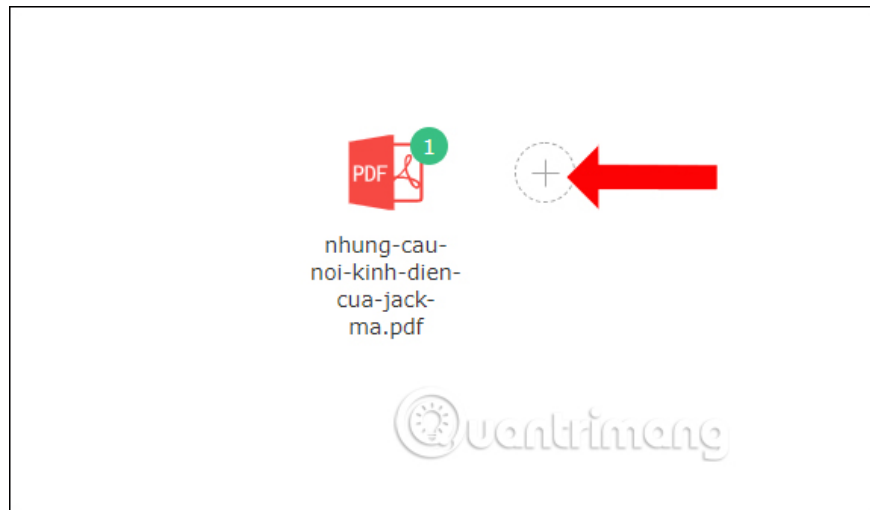

txt

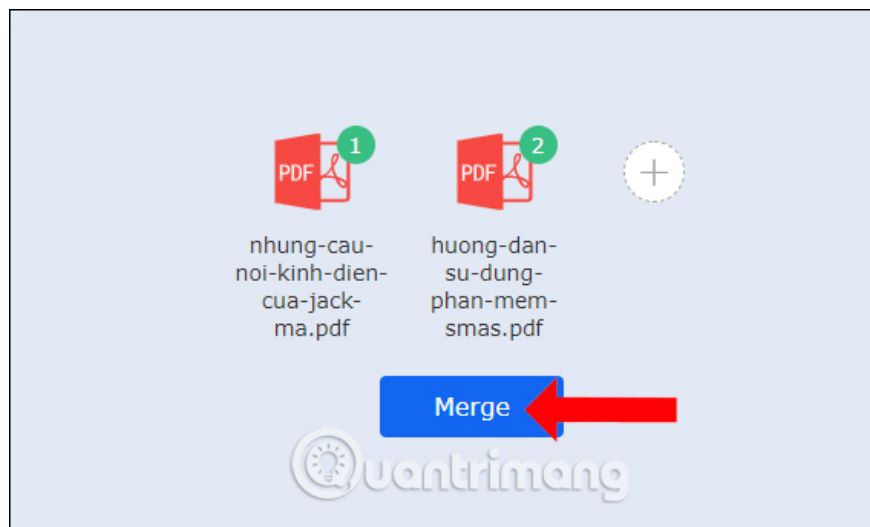

Convert 

3. Merge PDF files (Merge PDF)

After downloading a PDF file to the interface, click on **the plus icon** to download other files.

Next click **the Merge button** to join the files together. You need to note the selection order relative to the location displayed within the join file, and you will not be able to change the order after uploading the file. Wait for the file connection process to complete.

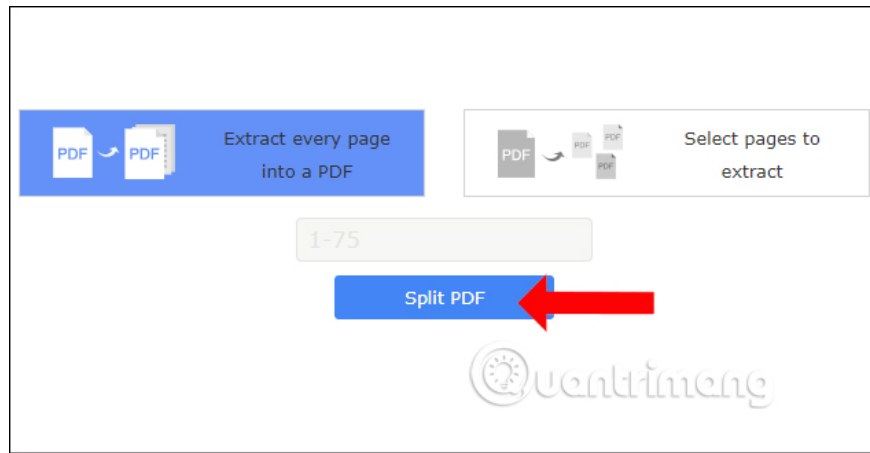

4. Split PDF file (Split PDF)

After downloading the PDF file to the page interface, users will be given the option of separating the file including:

1. Extract every page into a PDF: Separate all pages in PDF.
2. Select pages to extract: Only separate specific pages. You enter the page number in the bar below, if it is the next page, put a dash between those pages.

Finally click **the Split PDF button** to split the PDF file

5. Create a signature in a PDF file (Sign PDF)

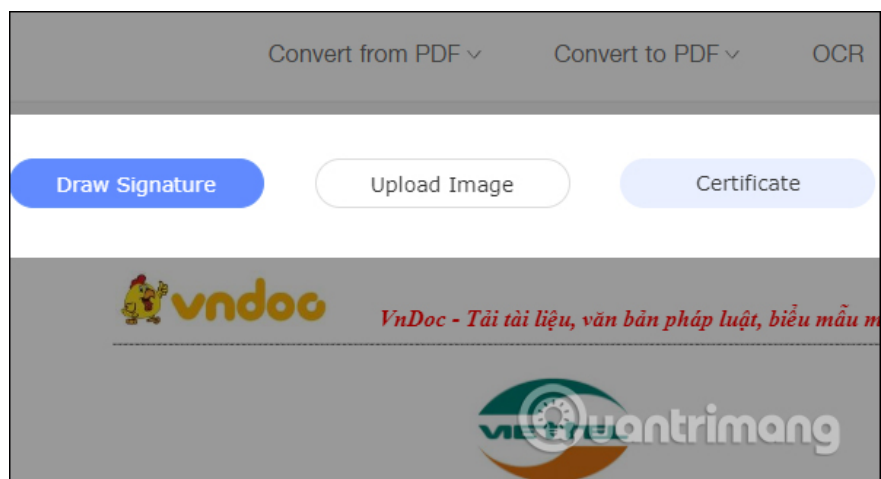

In the signature insert content on the file, click **the brush icon** and select **Create Signature** .

Here you can choose to insert the signature into the content.

1. Draw signature: Signature by drawing pictures.
2. Upload image: Image signature.
3. Certificate: Certificate-type signature, available only on installations.

Finally click **the Save icon** to save.

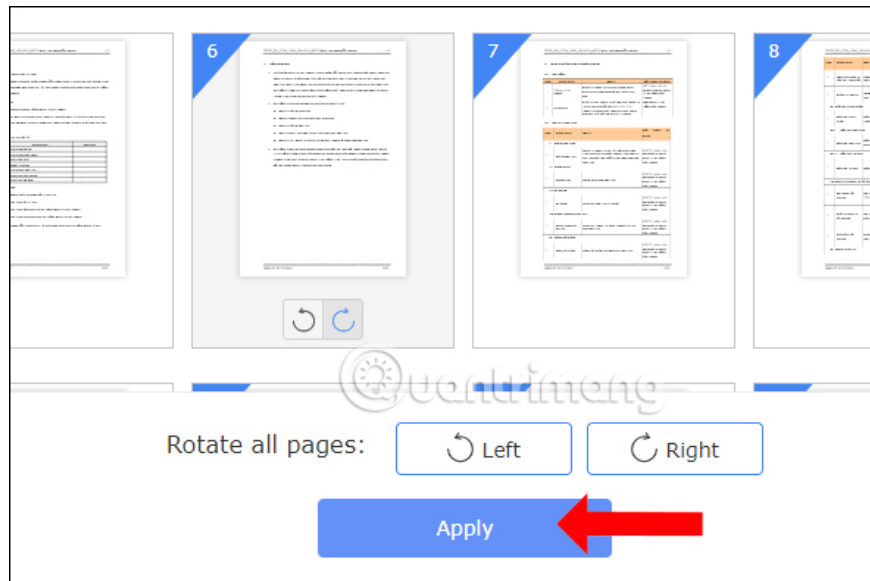

6. Insert logo into PDF file (Watermark PDF)

In the PDF content interface, the user selects the type of logo inserted into the content, image or text. Each type of logo will have different options. Finally click **the Add button** to add a logo.

7. Rotate PDF files (Rotate PDF)

In the PDF rotation interface, users can **choose to rotate all PDF pages** in the same direction, press Right / Left to select the rotation direction.

Or users can **select individual pages and** then select the desired dimension icon. Finally click the Apply button to save.

Above is how to use LightPDF, an online PDF editing service. Currently LightPDF also has a version installed on the computer with full functionality when you use LightPDF online.
