Instructions for editing PDF files online

1. Edit PDF content

Step 1:

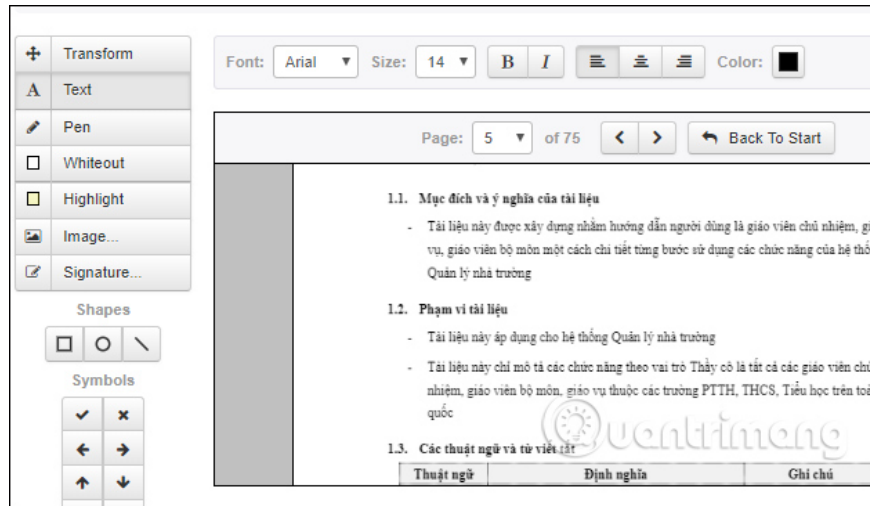

Click on the link below to access the homepage of PDF Buddy to conduct file editing. Click **Choose PDF to Edit** or drag and drop the file into the Drag your PDF here box.

1. <https://www.pdfbuddy.com/>

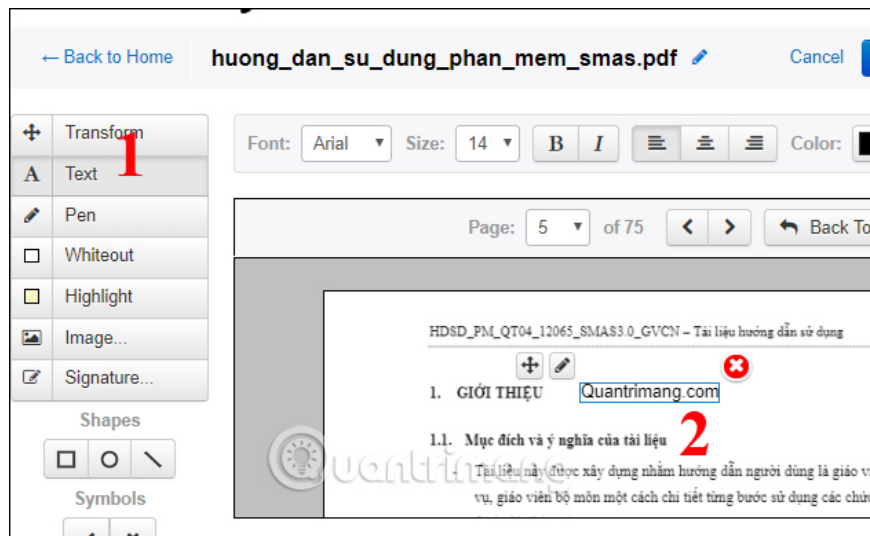

Step 2:

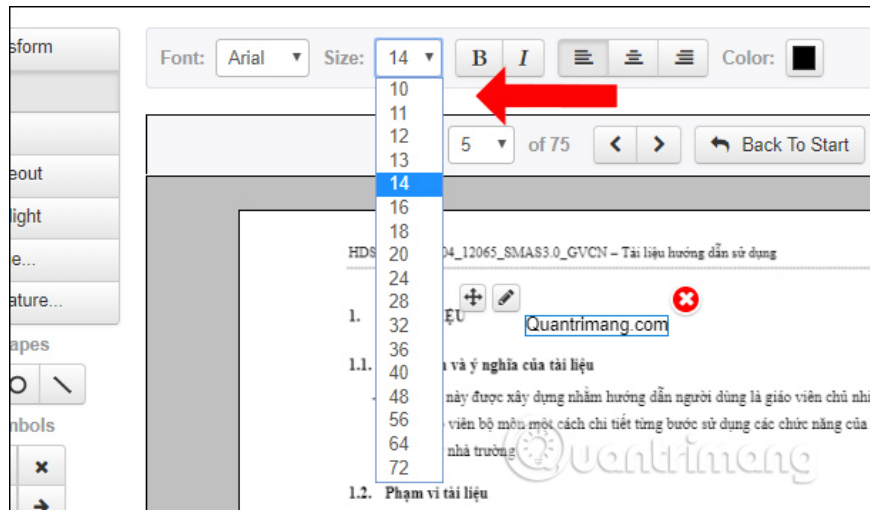

In this new interface, users will see the PDF content. On the left will be options for editing content.

First of all to insert content click on **the Text icon** in the left menu. Then select the location you want to add content and then click to enter the content. The plus bar to move the position of the writing and the pen icon to enter more content if desired, red x to delete the written content.

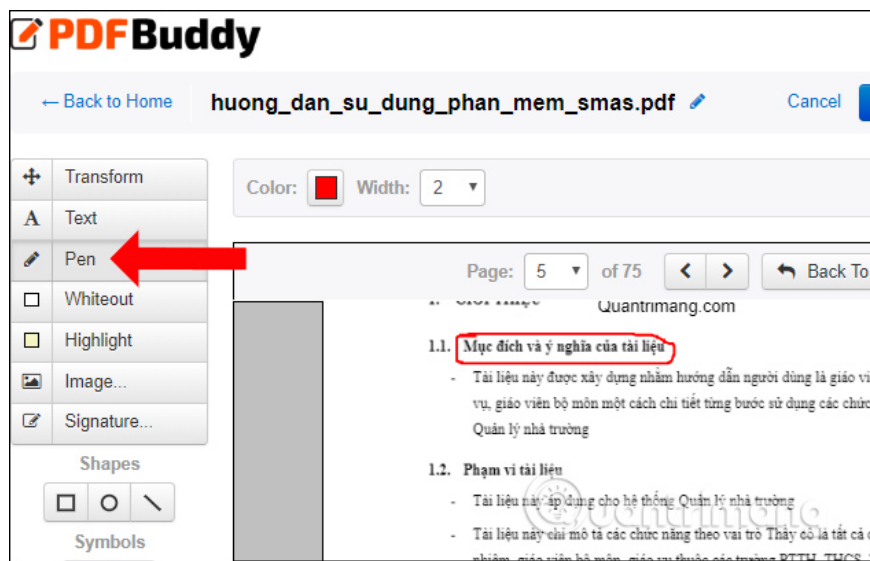

Then the toolbar above will edit the font and font size, sharpening tool, tilting text, font color, aligning position .

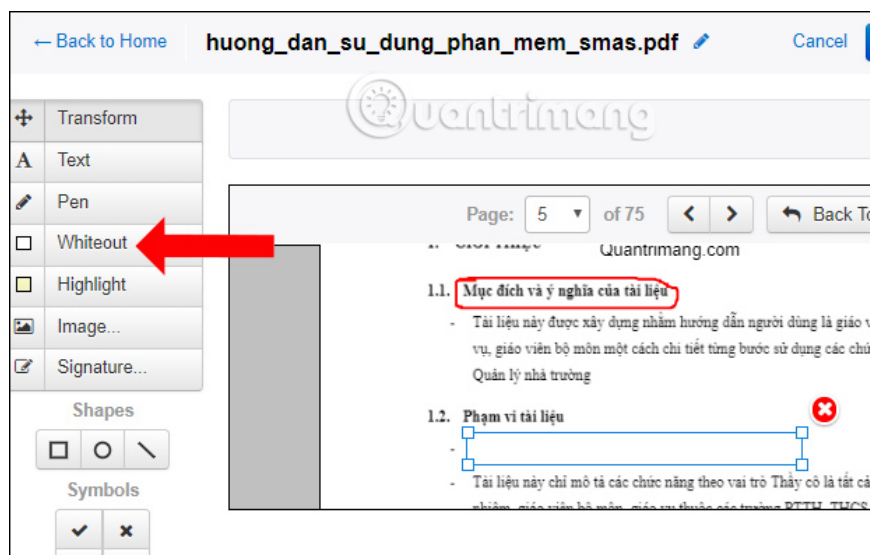

Step 3:

Next when you press **the Pen button** at the menu, users will have more tools to write more details into the file content such as underlined, circle certain content. It is possible to edit the stroke color as well as the thickness of the paint.

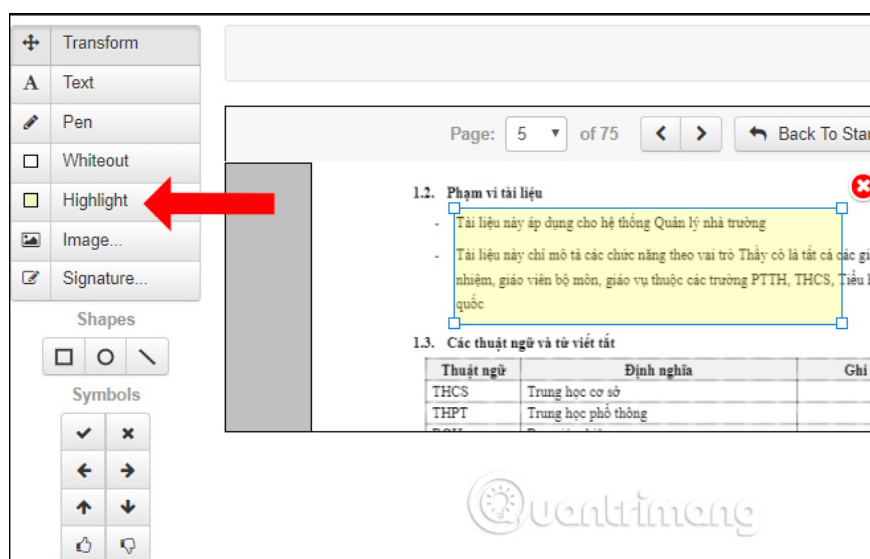

Step 4:

Click on **the Whiteout button**, we can delete any content in the document file. Drag the frame around the content you want to delete. If you want to retrieve the content, click the red x icon.

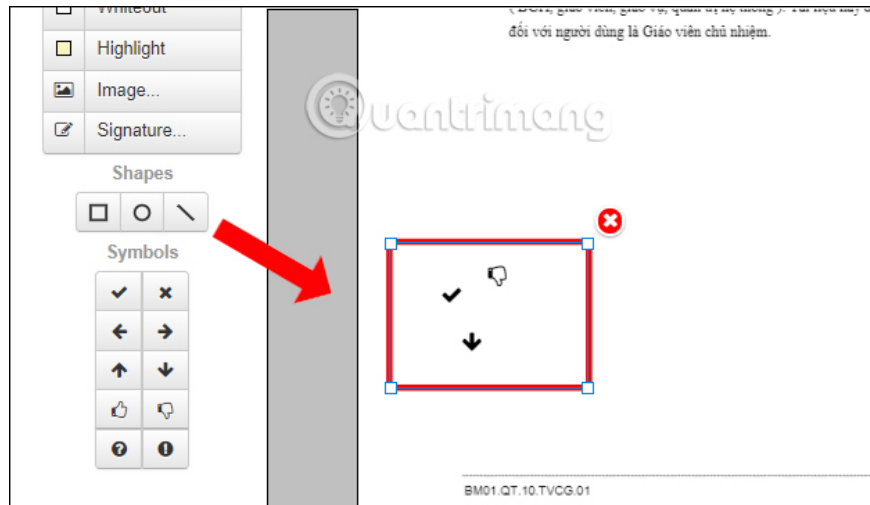

Step 5:

Highlight is a tool to mark important content by localizing it. Can collect or expand the circled area. Click the x sign icon to remove the selected area.

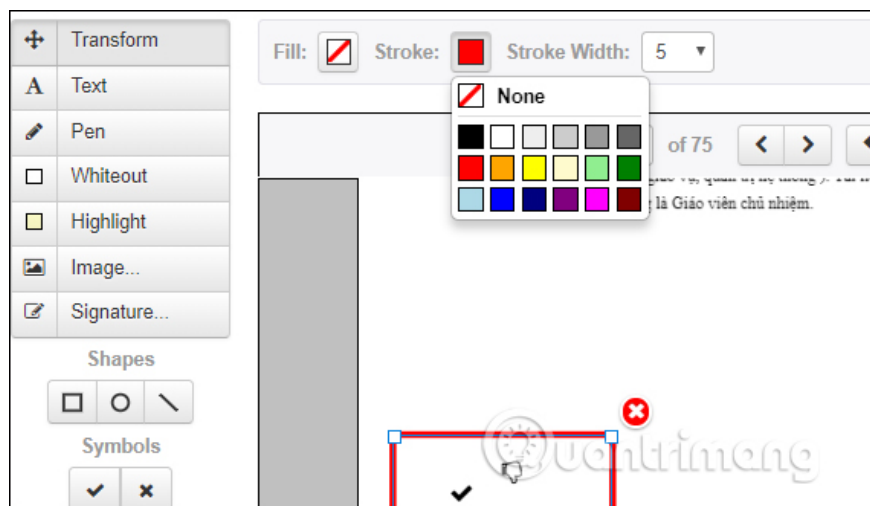

Step 6:

Next click on **Shapes**, users can insert different shapes, or other icons such as traces, x, arrows, . in the content. Click on the image you want to insert, select the position and drag the frame to create the shape.

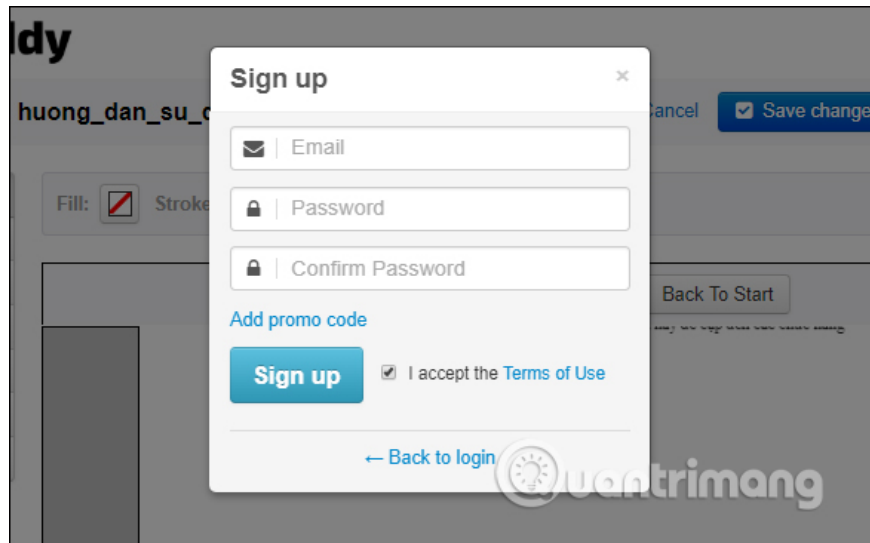

Above will be the toolbar with No Fill in the Fill section to create a transparent frame, Stroke select the border color, Stroke Width the width of the border.

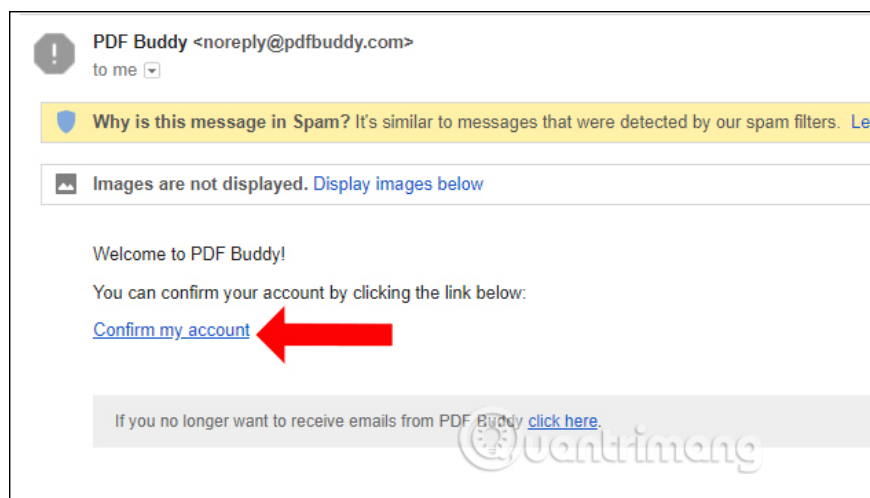

2. Insert images and signature PDF files

Step 7:

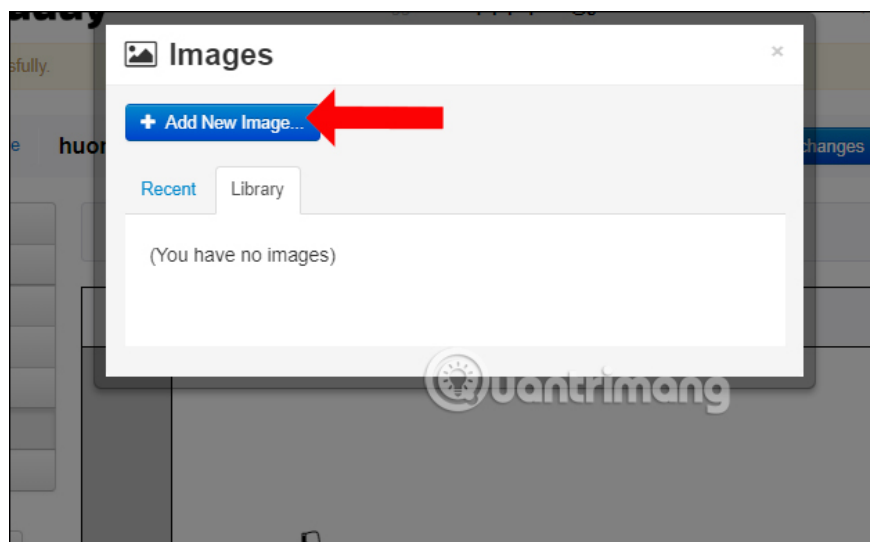

When clicking on the Image button . users will be able to insert images into the content. But first you need to **create an account** to use the PDF Buddy website. Enter the required account registration information.

Then verify the account in the registered email address.

Back to the content, if you want to insert an image click the **Add New Image** button . to download the new image. The images will be saved in the account and will appear on the Recent and Library entries for reuse.

Click OK and then press Use to insert the image into the selected page. You can zoom in or zoom out the image, change the location team to insert the image.

Step 8:

To insert a signature click on **the Signatures tool** . This tool will also require users to create an account to use. In the signature input box, you will see the Draw New Signature option to manually write a new signature and Add Signature as Image to add an existing signature template.

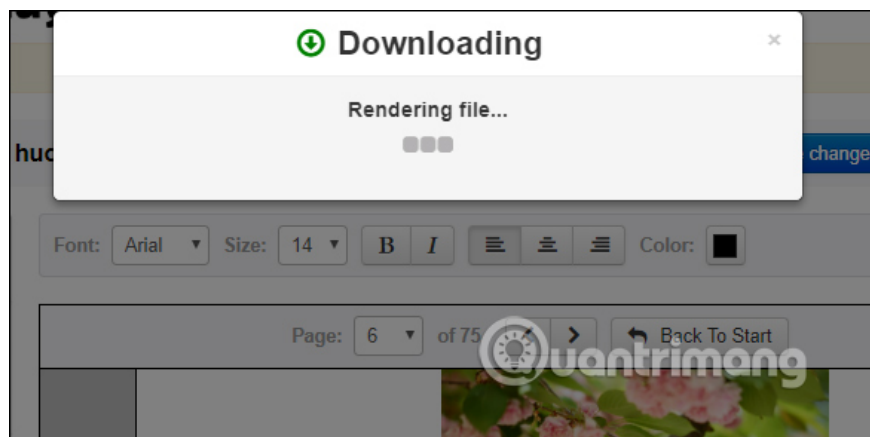

If using a signature available, just insert the image. For a new signature, you need to write that signature. A signature writing table will appear with the pen, then click OK to insert the completed script.

Step 9:

Finally, when you have finished editing, click **the Download button** to download the edited file content.

With PDF Buddy website, you can edit PDF content with a simple and easy way. The editing options are all displayed on the interface, not too complicated or require specialized techniques such as when editing PDFs on software.
