

How to edit photos for WhatsApp status updates using AI.

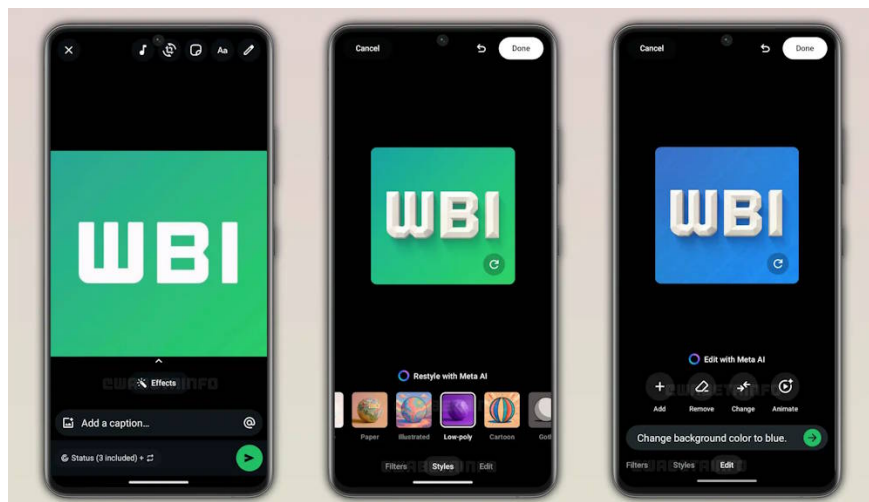

WhatsApp is testing an AI-powered photo editor for status updates, which can enhance photos, add styling to make images more beautiful or artistic.

WhatsApp is testing an AI-powered photo editor for status updates, which enhances photos, adding styles to make images more beautiful or artistic. The AI editor uses the Imagine tool, powered by Meta AI, alongside existing filters, allowing users to perform more complex edits without leaving the app.

Change the style of your WhatsApp status update photos.

Another notable feature is the collection of AI-generated image styles, offering various artistic treatments for photos. Users can choose from styles such as 3D, comic, anime, vintage, etc., depending on their preferences or the image.

In addition to styles, this editor allows users to insert new elements, remove unwanted objects, and make other local adjustments.

Alternatively, you can also use animation effects for images, transforming static photos into short, dynamic videos to create more engaging status updates. These animation effects add movement while maintaining the original context of the photo.
