

# How to edit photos online on Doka.Photo

Doka.Photo is an online photo editing tool with basic features.

Besides photo editing software, online photo editing websites help users get the images they want, without having to install it on their computer. Doka.Photo is an online photo editing website, providing basic image editing options such as cropping images, rotating images with angles, and color correction of photos for free. We do not need to register an account to edit the image but do it right away. The Doka.Photo website interface is very simple, the editing options are right on the same interface to choose from. The following article will guide you how to edit photos online on Doka.Photo.

1. Some online resize services
2. How to use Photopea to edit photos online
3. 30 tools for editing photos online without using Photoshop
4. Instructions for resizing photos with Pic Resize online

## Instructions for editing photos on Doka.Photo online

### Step 1:

Users access to the homepage of Doka.Photo follow the link below.

<https://doka.photo/>

At the homepage, click **the Select a picture button** to upload photos to the Doka.Photo homepage.

# doka.photo

Edit images without leaving your browser

...or drop an image on the page  
to get started.

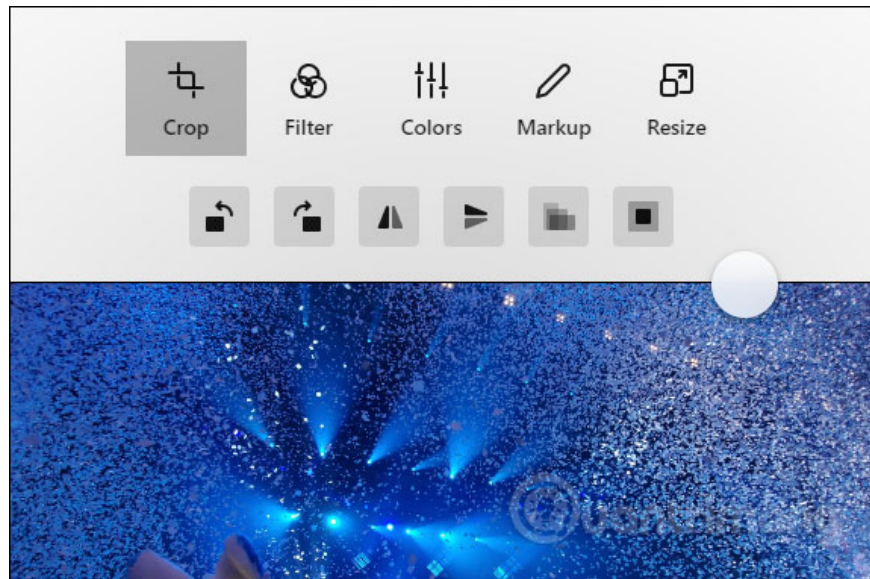

Tap on one of the images below  
for a quick demo.

We don't upload anything,  
everything happens in your browser.

## Step 2:

Display Doka.Photo interface for users to choose image editing tools. The image editing tool is divided into 2 parts, the top 5 main editing tools are Crop, Filter, Colors, Markup, Resize and below are options for each tool.

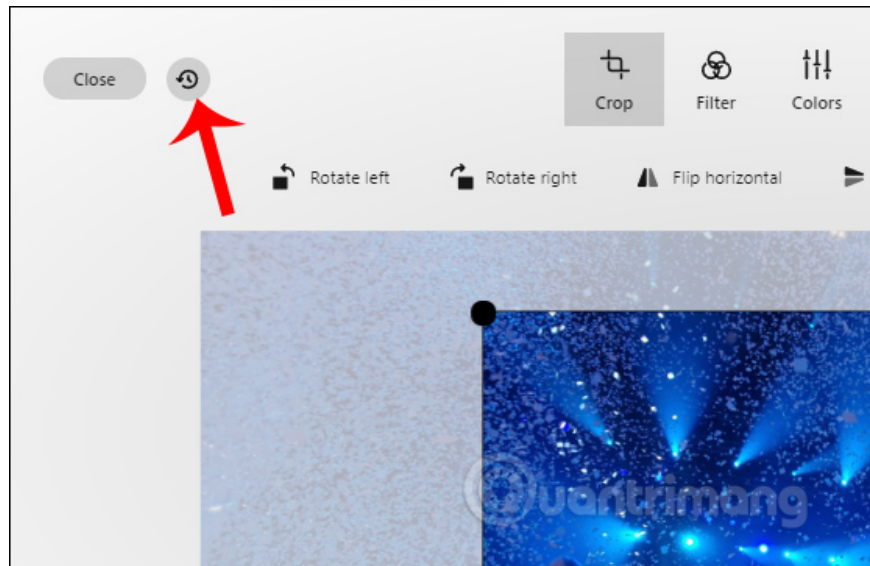

### Step 3:

When clicking on **Crop** we have 4 points at the 4 corners of the image to drag the frame to crop. Additionally users have the option to rotate the image at different angles and directions to crop.

The degree bar below to rotate the image at an optional angle. The image when clicking edit is automatically saved.

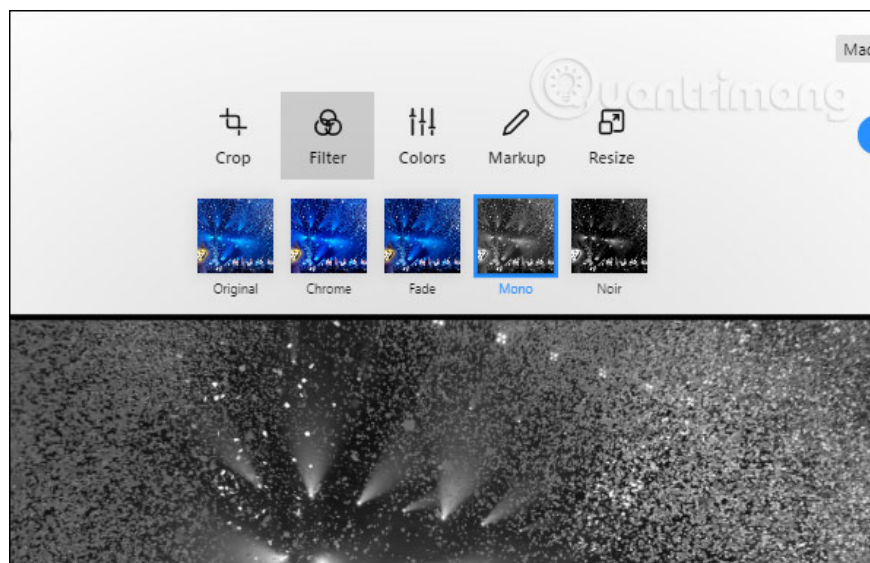

In case the user wants to **return to the original image** , click **the clock icon rotate** next to the word Close.

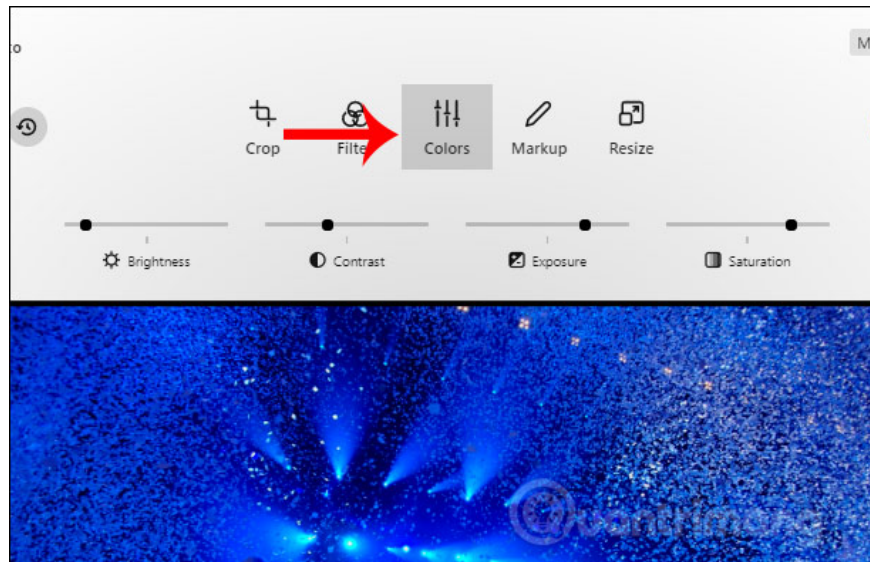

**Step 4:**

Continue to click **Filter** to select a new color filter for the image with 4 new color filters: Chrome, Fade, Mono and Noir.

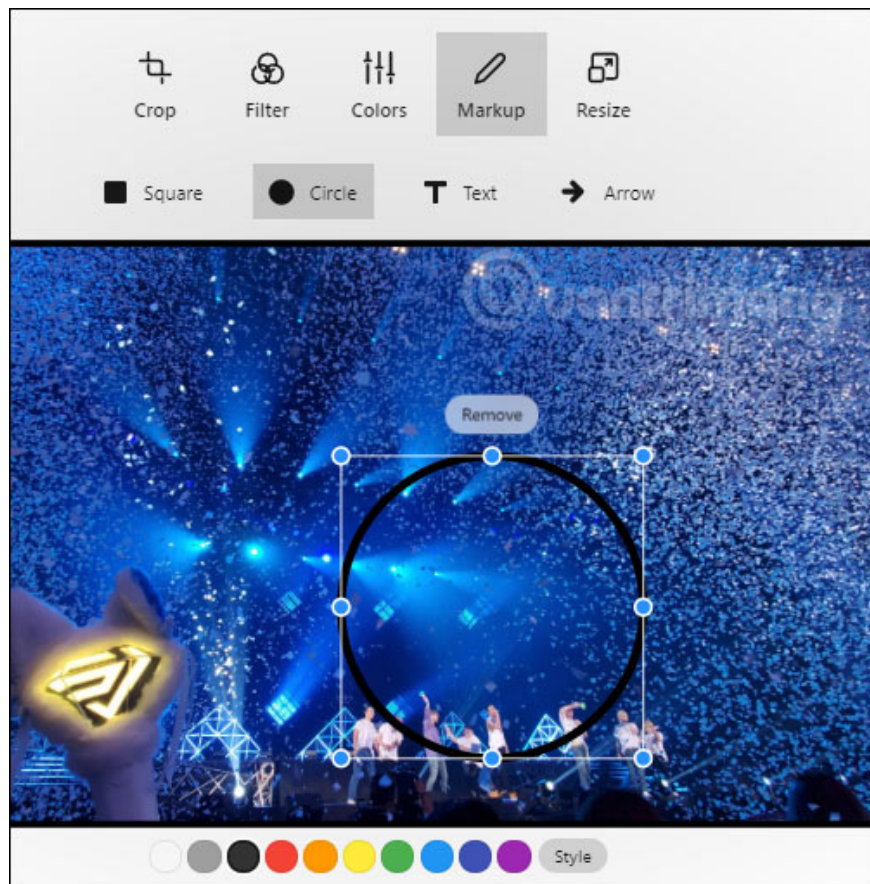

**Step 5:**

At **Colors** , the bars adjust the light level, contrast, exposure for images, color saturation in the image.

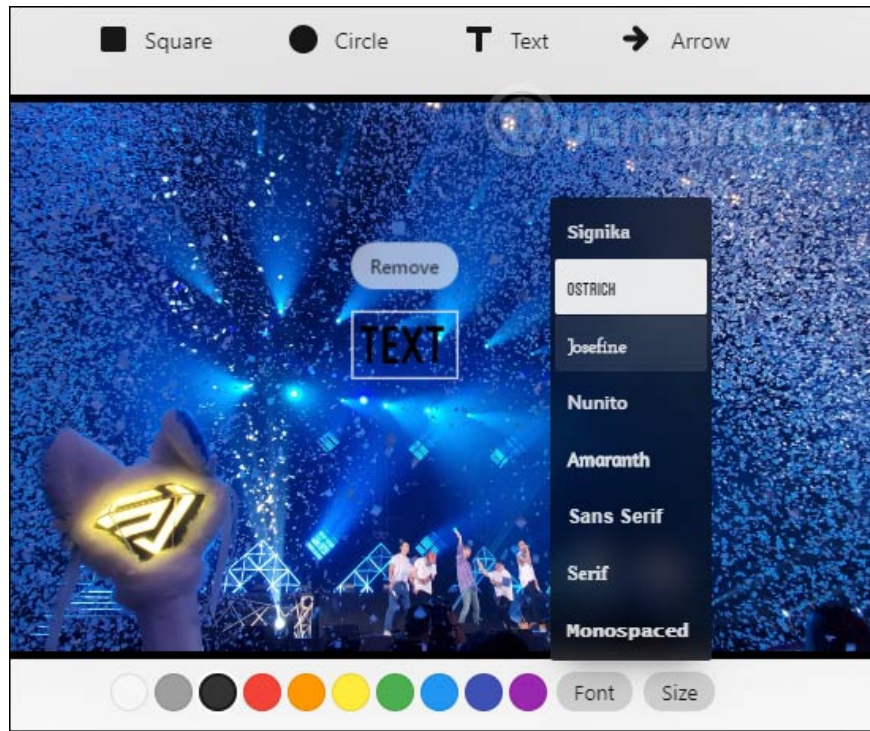

### Step 6:

With **the Markup tool**, you have the options to draw additional shapes on the image or add text to the image. With the icon cubes will have colors and sizes selected. Particularly for words, there is a Font section below the image. Click **Remove** to delete the drawing.

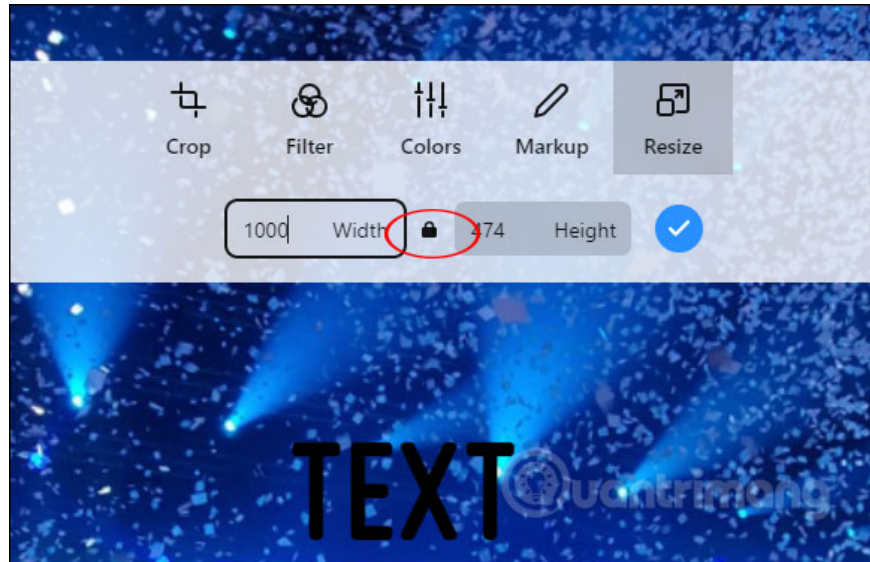

Part Font has relatively few styles to choose, the font size will be from XS to XL.

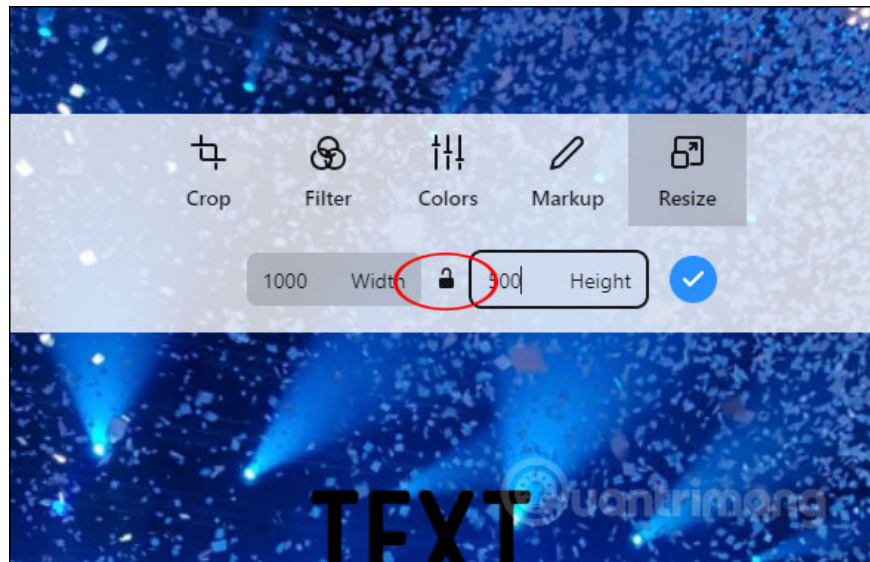

### Step 7:

Finally, the **Resize** option to resize the image. If you want to adjust the **fixed image size** , let Doka.Photo adjust the image itself, then **resize it** . Then the size is adjusted accordingly.

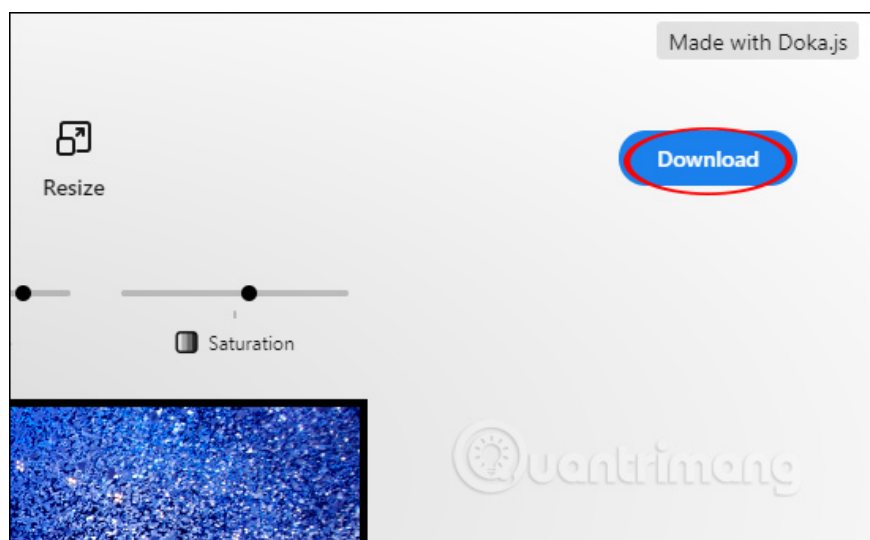

If you want **to fill the size yourself** , we **unlock** and then enter the size for width and width. When you have completed the size, click the checkmark to save the new size.

### Step 8:

If you have completed all changes, **click the Download button** to download the newly edited image.

In general, Doka.Photo doesn't have many advanced photo editing tools, but it is enough for you to change your image to a new one. The repair process is very simple and quick without having to register for an account.

I wish you successful implementation!
