

How to edit photos posted on Twitter

Image posted to Twitter has editing and refreshing options to change the image.

Current social networks offer image customization to change and invite images when we post. With Twitter, users also have a lot of options to change the image from the basic options such as cropping, rotating images or higher custom changing photo color filters, inserting stickers for photos on Twitter.

This photo editing option applies to both the desktop version of Twitter and the Twitter app version. However, the photo editing items in these two versions will not be the same. The following article will guide you how to edit photos on Twitter.

1. What is the standard Twitter image size?
2. How to post multiple photos to Tweet on Twitter
3. How to save photos and create gallery on Instagram
4. How to turn on Night Mode for Twitter

1. Edit photos posted on Twitter Android, iOS

Step 1:

At the Twitter interface on the phone, users click on **the post icon** in the right corner of the screen. Switch to the new interface we click **the image icon** to expand the album on the device.

2. Edit photos posted on Twitter computer

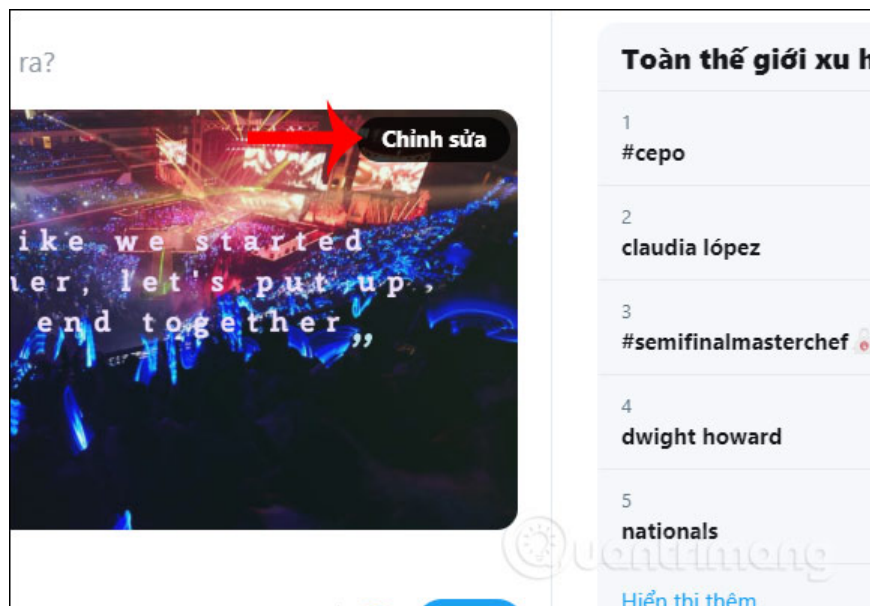

Step 1:

At the Twitter page, we click on **the image icon** to open the image you want to post on your computer.

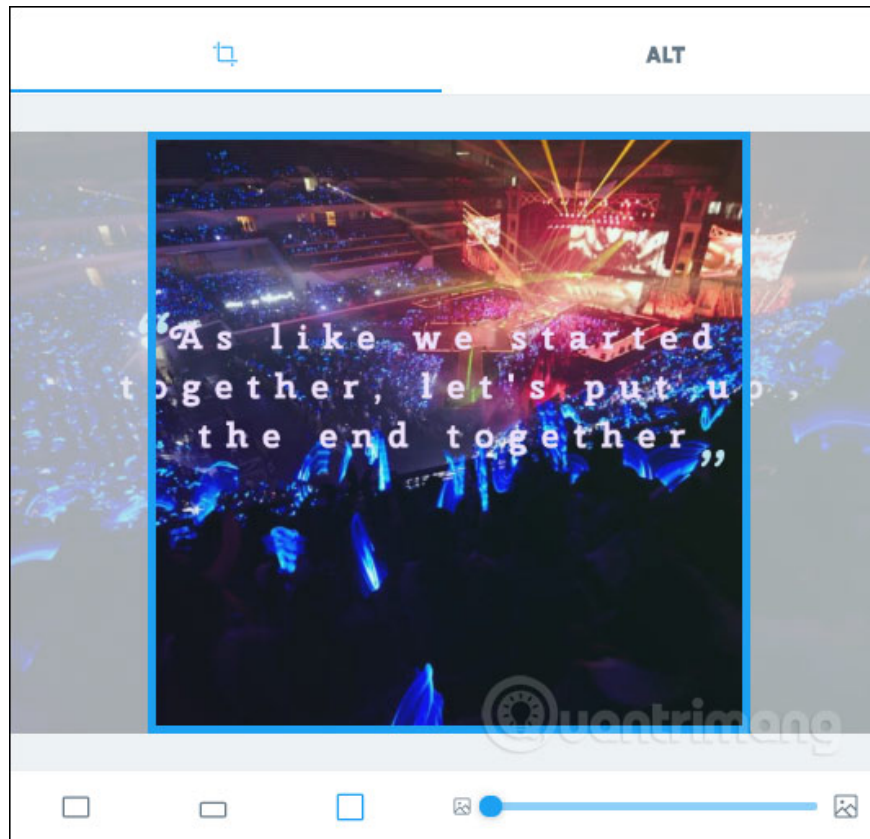

Step 2:

Display interface to post photos on Twitter, we click the **word Edit** in the corner of the screen.

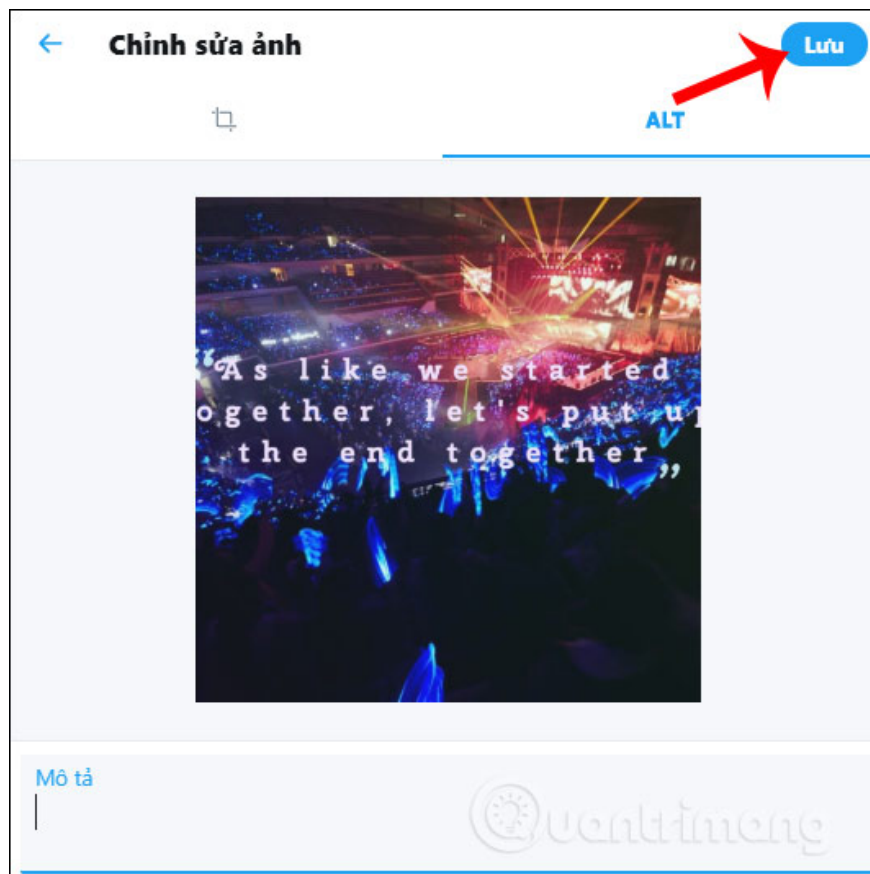

Step 3:

Switch to image editing interface on Twitter. The photo editing interface on the Twitter version of the computer is very simple, just crop the image, rotate the image, enlarge or reduce the image only.

If you want to write a photo description, click the Alt icon in the upper corner. Maximum of 420 characters for the image description. After finishing editing, press **the Save button** in the right corner to save.

Step 4:

Finally, we add other content to the image and then post it on Twitter as usual.

So you know how to edit images when posting on Twitter. Compared to Instagram or Facebook, Twitter's photo editing tools are relatively simple, but will also help you to refresh your photos.

I wish you successful implementation!
