

# How to edit the Action Center quick button on Windows 10 19H1

Microsoft has taken Action Center and quick action button (quick toggle) from Windows Phone to desktop platform. Here's how to edit quick action buttons on Action Center on Windows 10 19H1.

With the launch of Windows 10, Microsoft brought Action Center and quick action button (quick toggle) from Windows Phone to desktop platform.

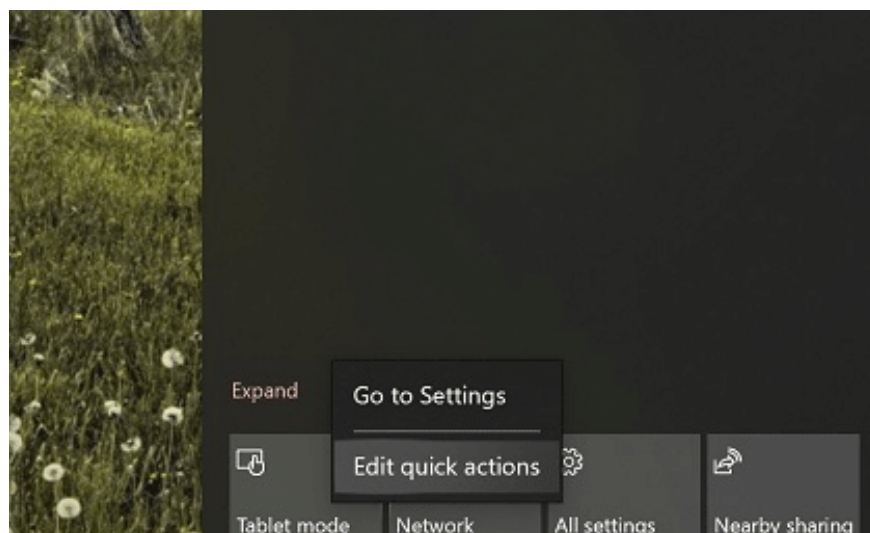

With these quick action buttons, users can easily control settings such as Wifi and Bluetooth without accessing the main **Settings** app. To edit the quick action button in Windows 10 initially, the user must open the **Settings** application to update the quick action button displayed. With update 19H1, this has changed. Along with the new brightness slider, Microsoft has provided an easier way to adjust quick action buttons in the Action Center.

1. How to fix the Settings application does not work on Windows 10
2. How to fix the error of not finding Wifi after updating Windows 10
3. How to restrict access to Settings and Control Panel Windows 10

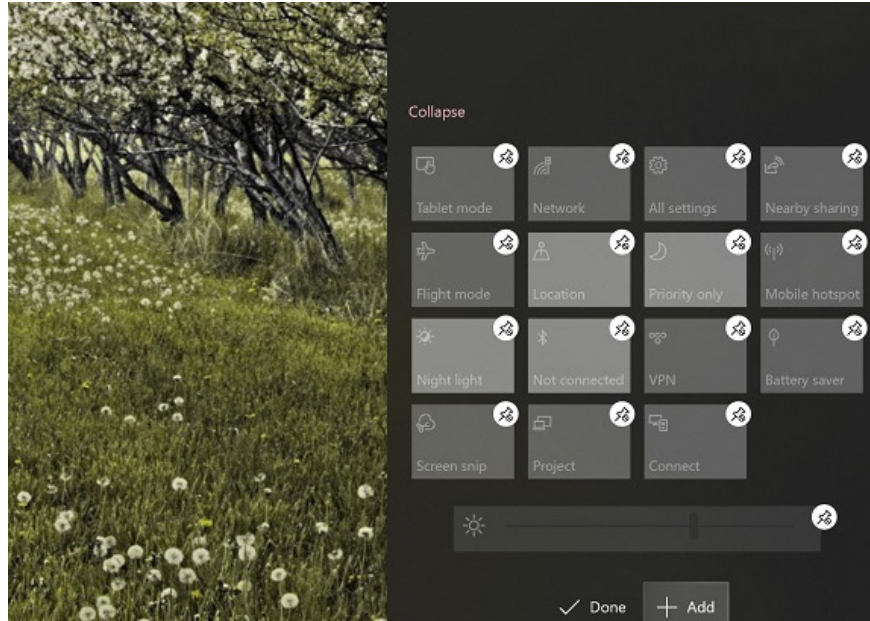

## How to edit the quick action button on Action Center in Windows 10 19H1

**Step 1** . Open Action Center by clicking on its icon.

**Step 2** . Right-click any quick action button to open a new installation option.

### Step 3 . Select **Edit Quick Actions** .

You can now drag, unpin and customize these settings as you would on the Start menu tiles.

I wish you all success!
