How to cut videos with Kinemaster

To cut a video, you will first need to upload it. To add videos, click the + in the middle circle.

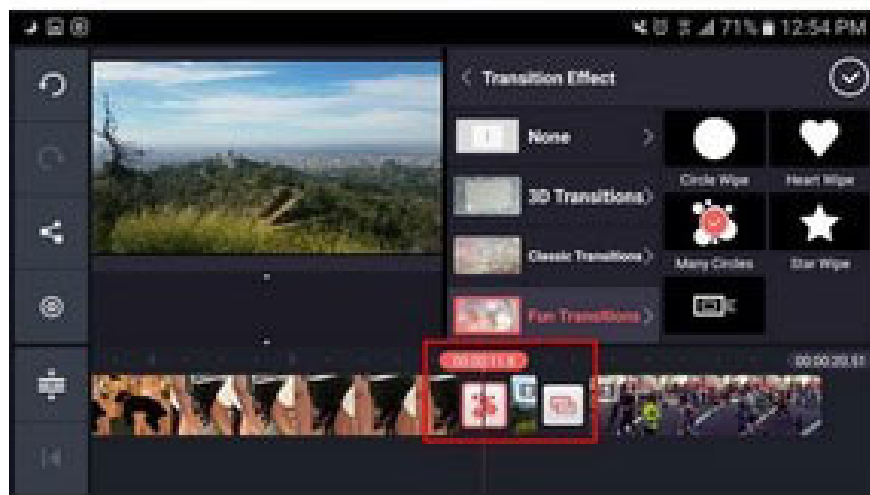

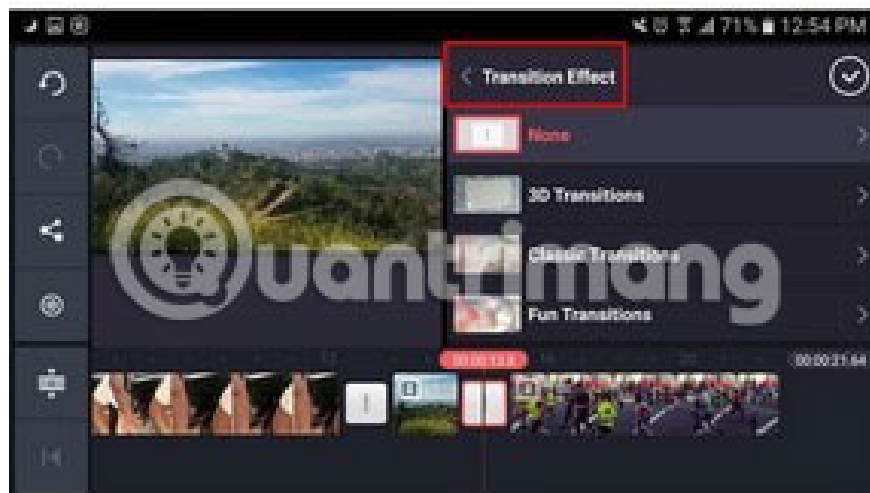

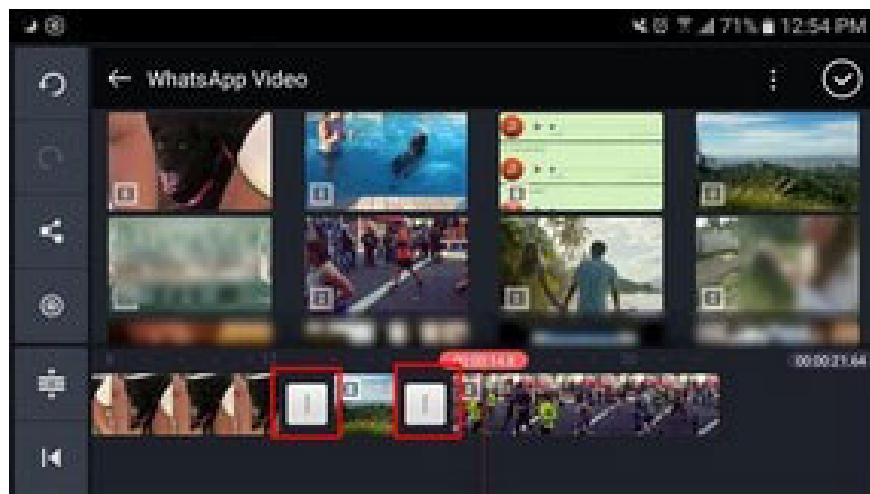

Once the video has been added, click on the check mark at the top right. To cut a video, tap the video at the bottom, after the border turns yellow. On the upper left you will see a scissors icon.

Touch this icon and new cutting options will appear in the same area. If these options are grayed out (not enabled), move the video back and forth to active options. Options include: **Trim to the left / right of the playhead** (Cut video to the left / right of the playhead), **Split at playhead** (Split video into 2 parts in playhead) and **Extract Audio** (**Audio** extract). Please select the option that best suits your needs.

How to use transition effects in Kinemaster

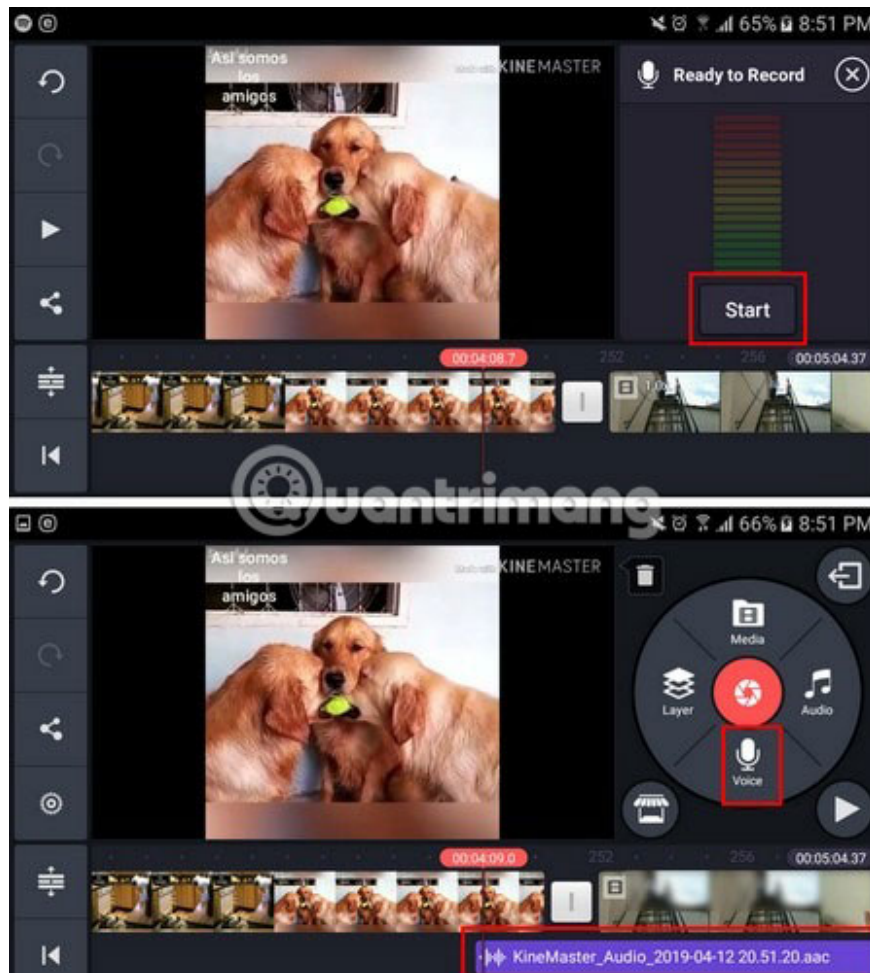

Adding transitions to videos is an easy task. Let's add some videos as usual. You may notice that in the middle of each video there will be a gray square and a line in the middle. To add transitions, touch the square.

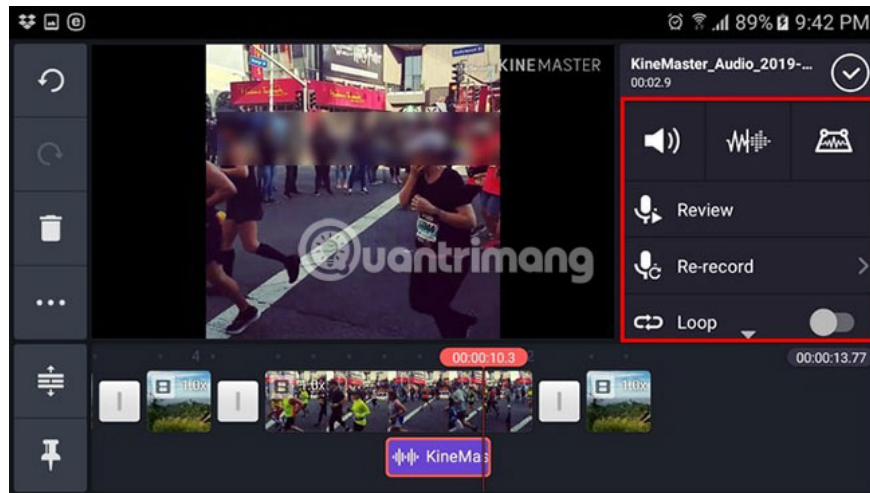

Click on transition options and different options. You can choose options such as **3D Transitions**, **Classic**, **Fun**, **Picture-in-picture**, **Powerful**, **Presentation**, **Text** , etc. When you're done adding transitions, click on the checkmark at the top. To preview transition effects, go to the place you want to start on the video and click the **Play** button .

Voiceover in Kinemaster

After adding videos, you add voice (Voiceover) to it. Click the mic icon. Recording will not start until you press the Start button, but you can specify the mic is on when the green light starts flashing.

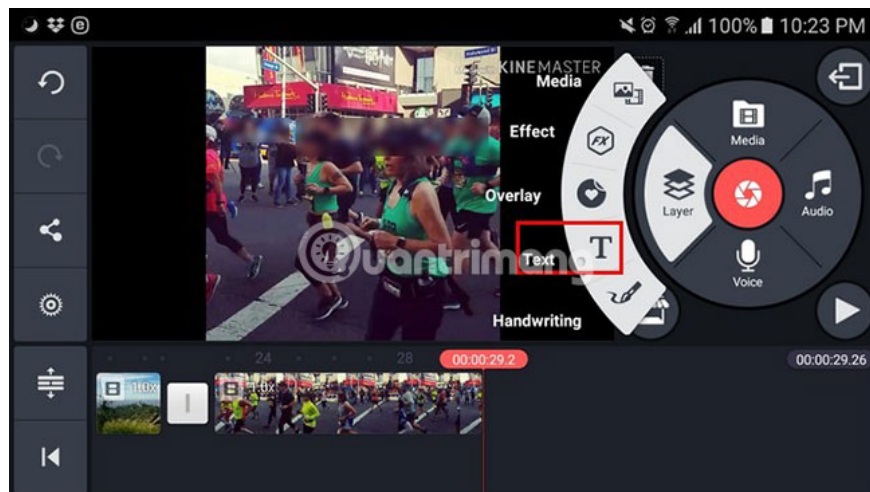

When you click the **Start** button , the parts of the video that are added to the voice will be highlighted in red. When you click the **Stop** button , the video with red color will now have a purple line below. You will also find additional options such as **Review** , **Re-record** , **Loop** (loop), **Voice Filter** (voice filter), **Voice volume** (voice volume) and **Trim** (cut).

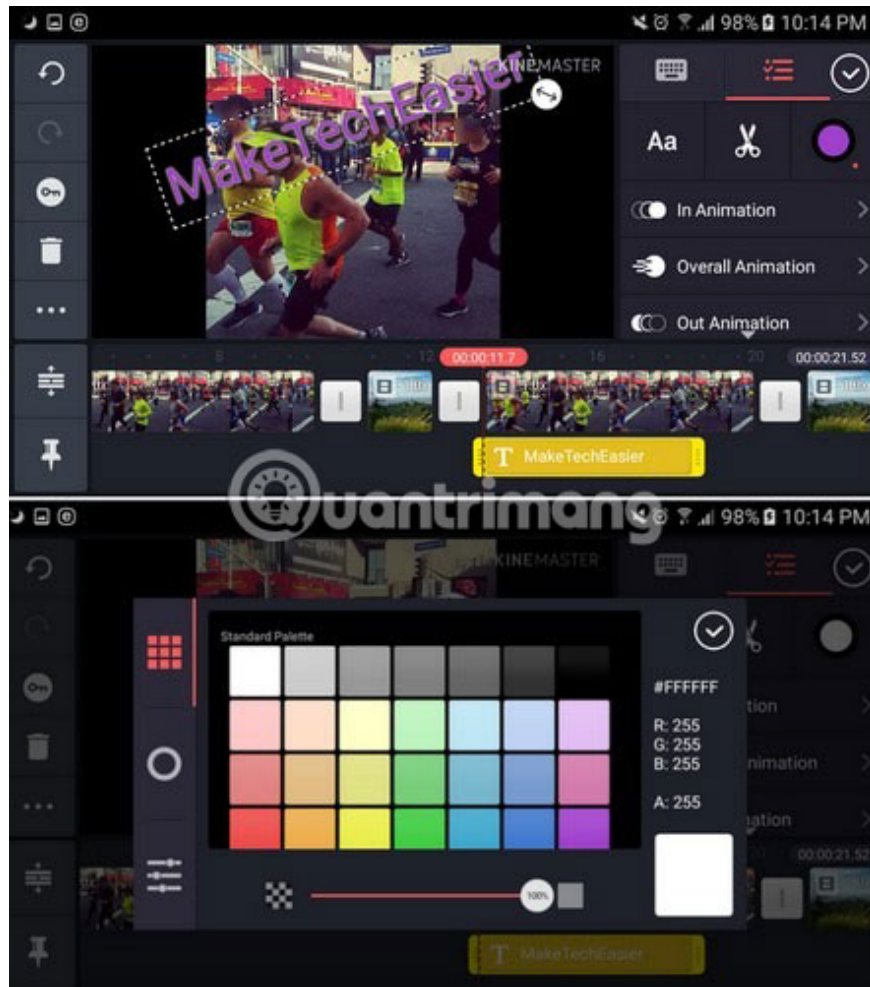

How to add text to Kinemaster videos

Adding text to video is a basic and necessary tool. To add text and personalize it, click the **Layer** button to the left of the red camera button. After that, a new options window will appear. The **Text** option will lie slightly below.

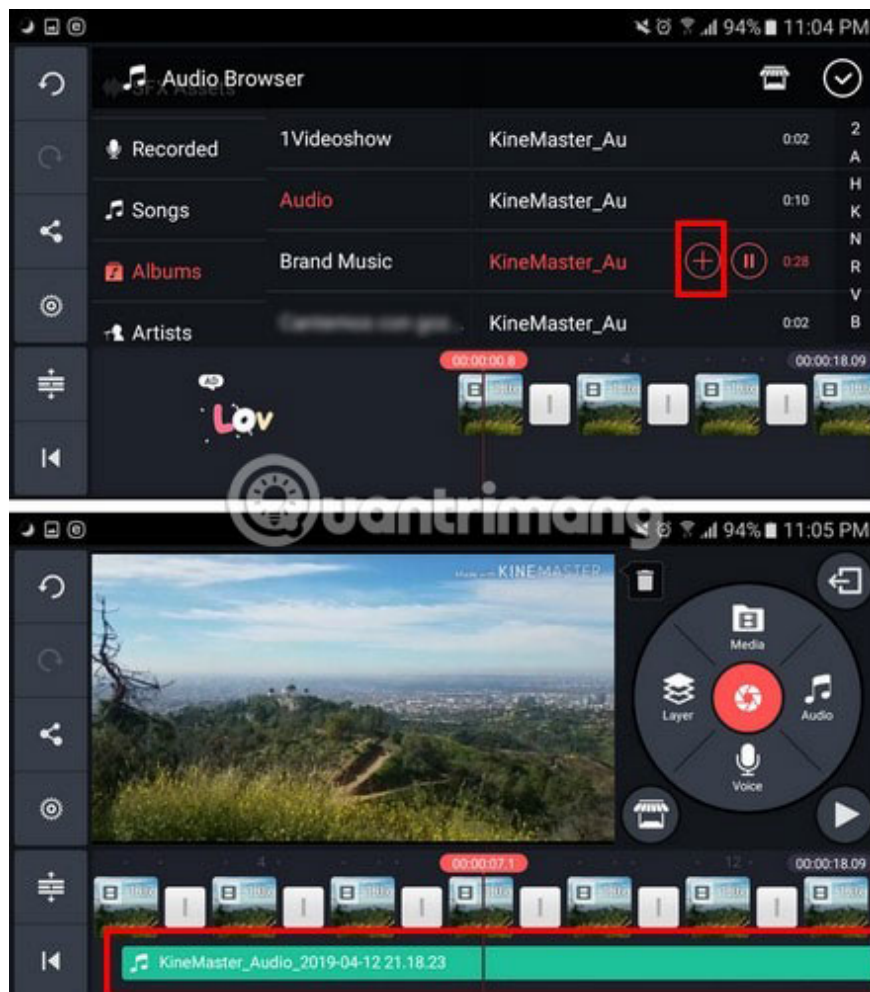

Enter the message and click the **OK** button . The text at first will be small, but you can make it bigger by pulling it out. Click the **Aa** icon to change the font. The animation option will give you ways to make text appear like sliding down, sliding up, clockwise, etc.

Swipe down and you can also add things like drop shadow, glow, add borders to text, etc. To change the color of the text, touch the white circle to the right of the scissors icon.

How to add music to videos

The video will be much better if you add music. For example, you want to add a song on the device. Put the red line at the bottom where you want the song to start. Click the music note icon and select the song.

Once you've selected your favorite song, a red plus sign will appear. The application will start playing audio so you can confirm if it is the song you want to add. After confirming, click on the red plus sign and the title of the song will appear at the bottom.
