

How to enable auto-answer calls on iOS 11

Auto-Answer Calls on iOS 11 is a feature that automatically receives incoming calls from your phone or other VoIP services such as WhatsApp or Skype if you are connected to the Internet.

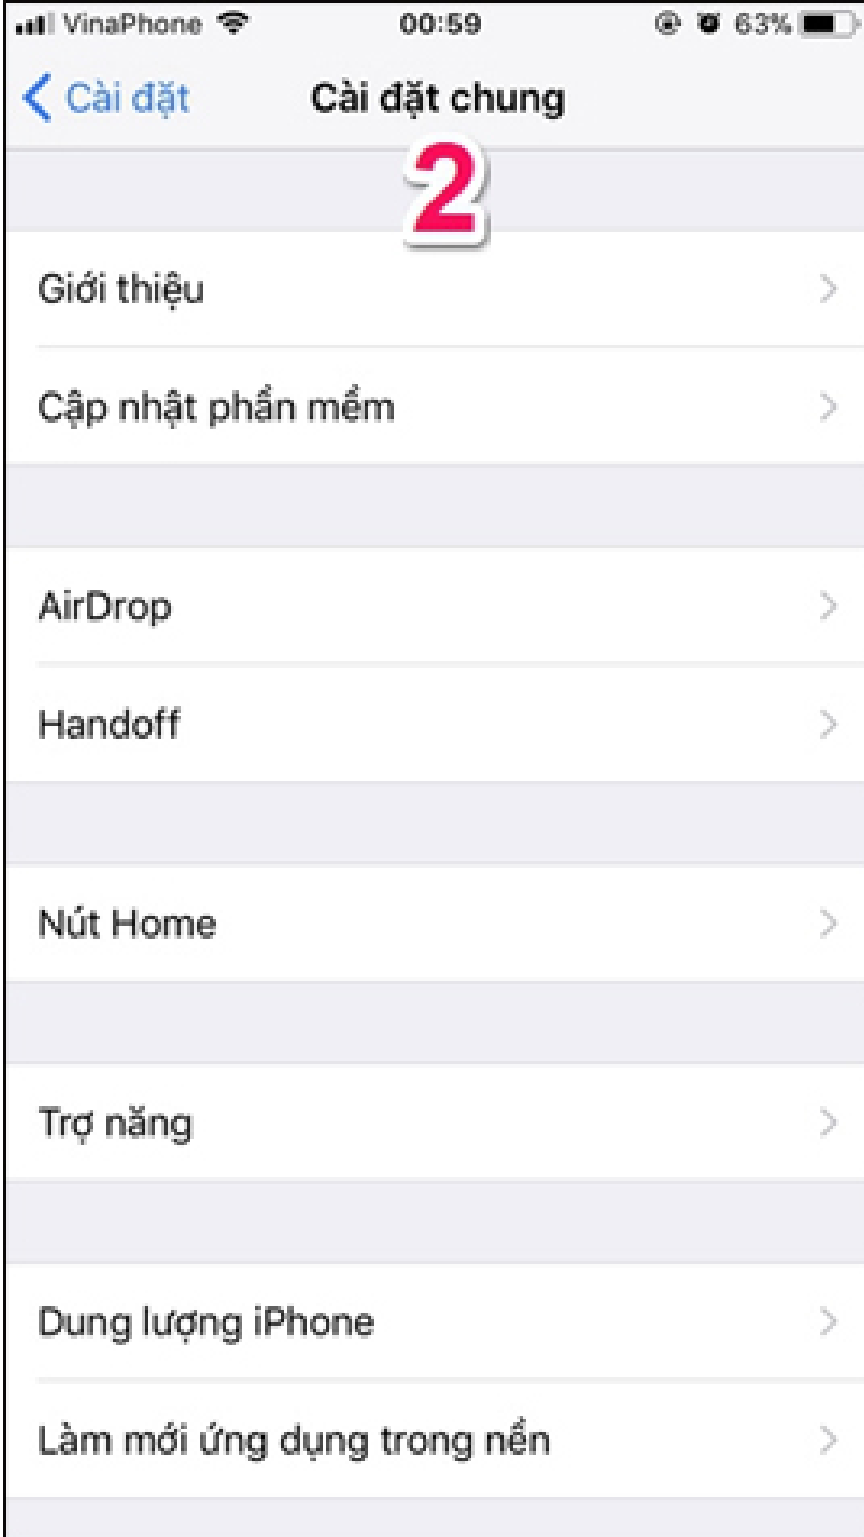

On iOS 11 has quite a lot of features that Apple did not introduce during the WWDC conference or hidden, so there are quite a few users who know those features. This partly limits the user experience on the device, among them the Auto-Answer Calls feature that automatically responds to a call to the device.

This application will allow you to answer normal phone calls automatically, or from call apps like WhatsApp or Skype, in case users connect to WiFi or mobile data network. The following article will guide you how to enable the auto call answering feature on iOS 11.

Step 1:

We access **Settings (Settings)**> **General settings (General)**> **Accessibility (Accessibility)** .

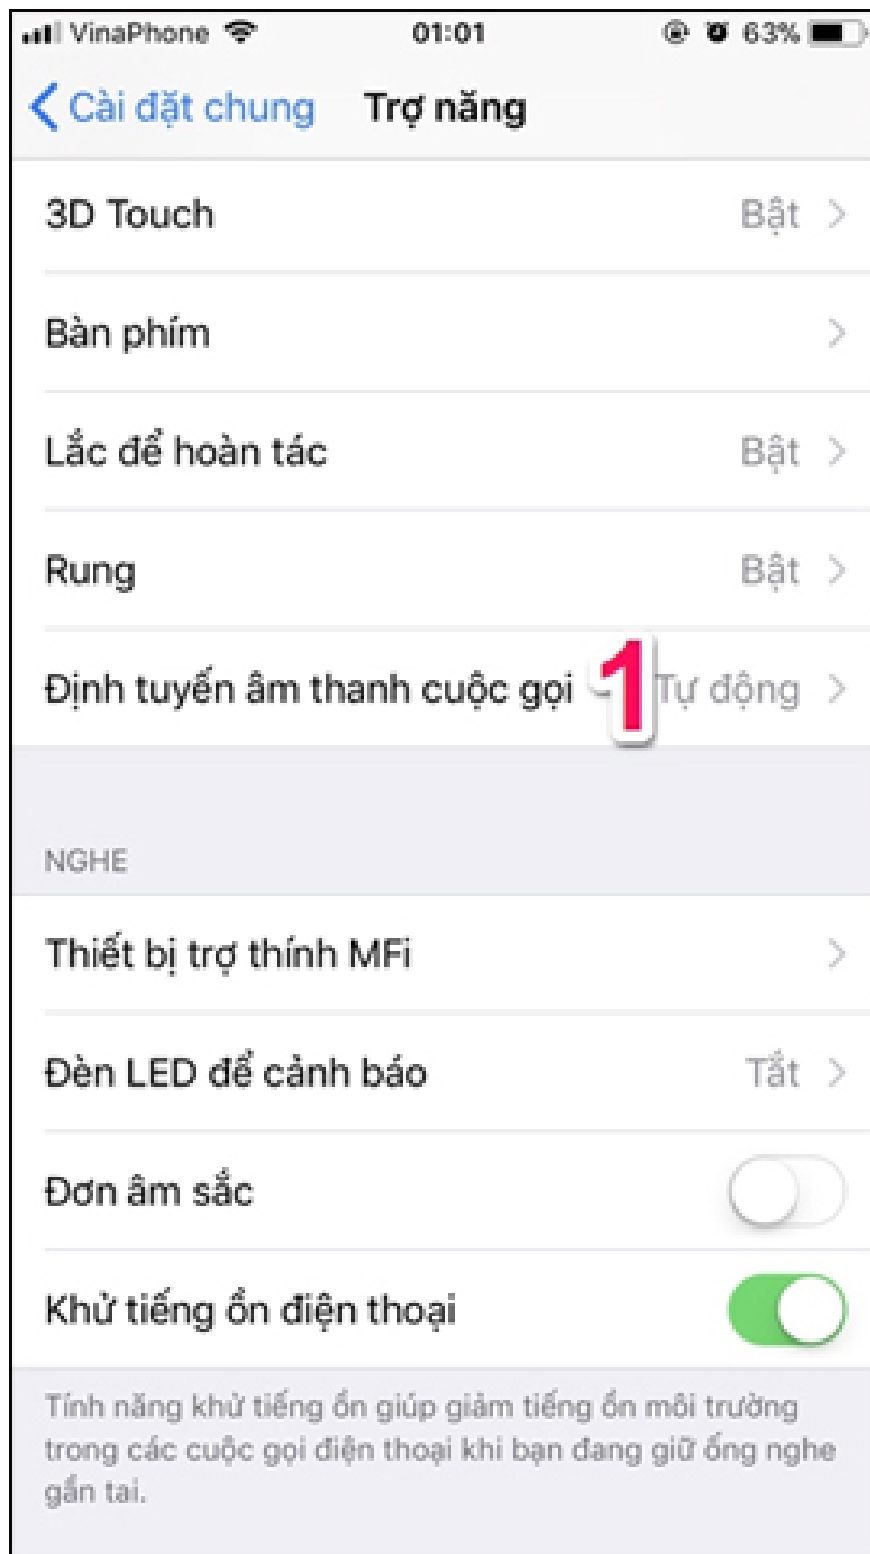

Step 2:

At the Accessibility interface, we click on the **Routing audio call (Call Audio Routing)** , select next to **Automatically answer the call (Auto-Answer Calls)** . By default this feature will be turned off on the device, so users need to activate the Auto answer call feature.

Then set **the autoresponder time for incoming calls** . The default is 3 seconds but you can choose from 0 to 6 seconds, by pressing the button - reducing the time or + to increase the time.

2. Activate the Do Not Disturb Mode feature without disturbing:

When you activate the Auto-Answer Calls auto-reply feature on the device, it means the device will automatically receive incoming calls, including calls from carriers, or even calls made. mind.

In this situation, we will enable the Do Not Disturb Mode feature. With this mode, the user will only receive calls from the numbers in the phonebook, or some specific contact groups.

Step 1:

We open the **Settings link (Settings)** > select and **activate the Do Not Disturb Mode** .

Step 2:

In the Do not disturb interface, you will have some manual settings such as Scheduled Calendar or Allow calls from specific contact numbers or groups.

We click **Allow word calls** and then select **Favorites** . Finally, open Contacts and select your favorite contacts according to your needs.
