

# How to enable Dark Mode on Youtube

Dark Mode is a new feature updated on Youtube in the web, switching to the dark background interface so users can watch videos in the evening without affecting the eyes.

Enabling some of the user protection features on smartphone devices, especially visually, is of interest to many manufacturers today. We can include the Night Shift feature on iPhone / iPad or macOS, which helps to reduce the light effect of the device to the user. Or Night Mode on Android 7.0 Nougat device has the same feature.

And recently, web-based YouTube has updated the new Dark Mode feature, which allows you to watch videos in the evening without causing too much harm to the eyes, by turning the entire Youtube interface to the black background. So how to enable Dark Mode on Youtube, please follow the article below of Network Administrator.

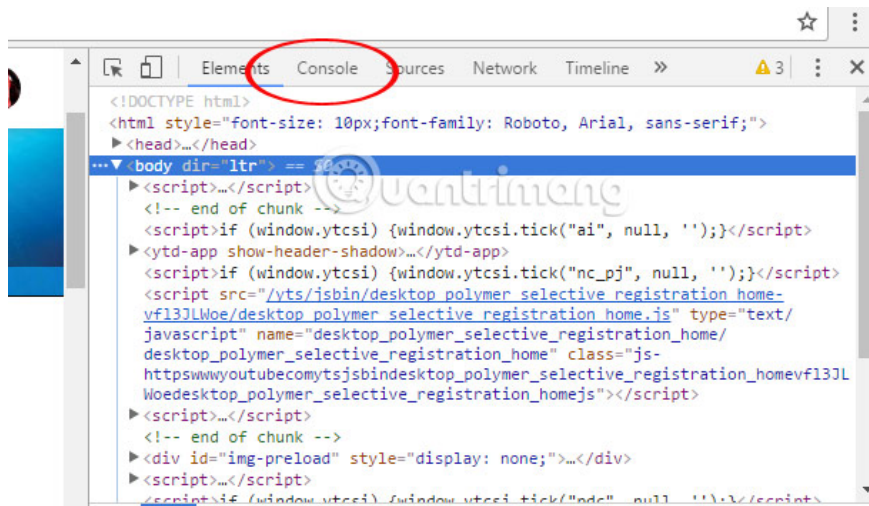

## Step 1:

First of all, users need to access the homepage of Youtube and log into their account.

## Step 2:

To open the Chrome Developer Tools tab, press **Ctrl + Shift + I with Windows** and **Cmd + I** on the Mac.

At this interface, we switch to the **Console tab**.

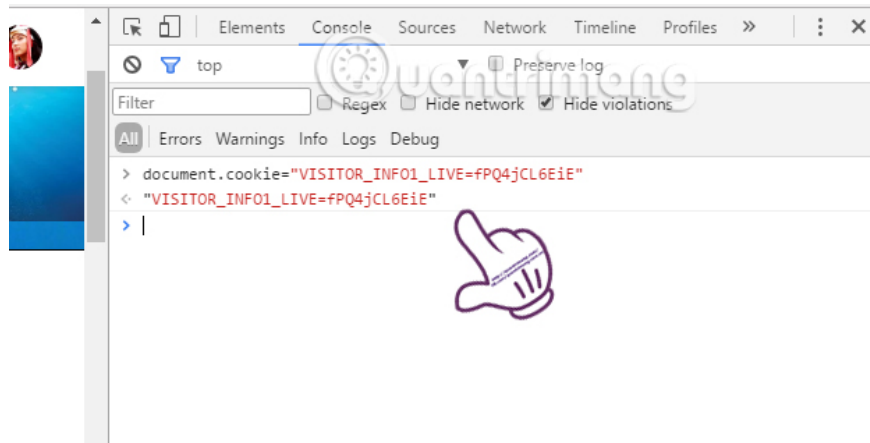

### Step 3:

At the Console tab, we'll enter the command line as shown below and press Enter.

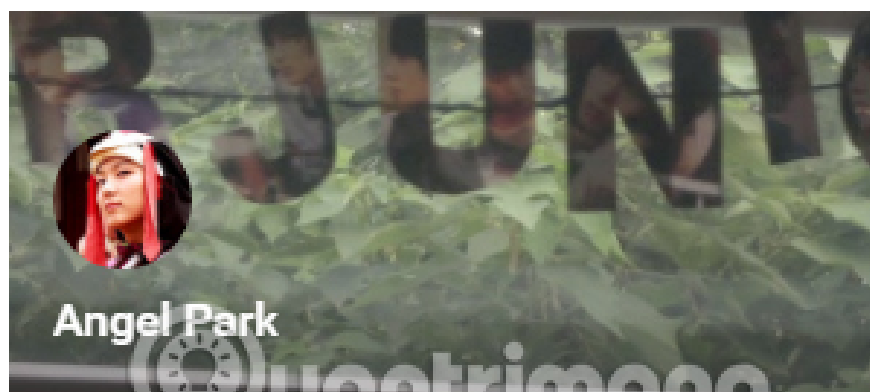

```
document.cookie = "VISITOR_INFO1_LIVE = fPQ4jCL6EiE"
```

If you receive the message as shown below, we have entered the command successfully in the browser.

### Step 4:

After that, users need to **press F5** to proceed to reload the Youtube page. Next, when you click on **the personal account icon** on Youtube, a list of options appears as shown below. We will click on **Dark Mode** in the default setting.

Khôi phục YouTube cổ điển

**Step 5:**

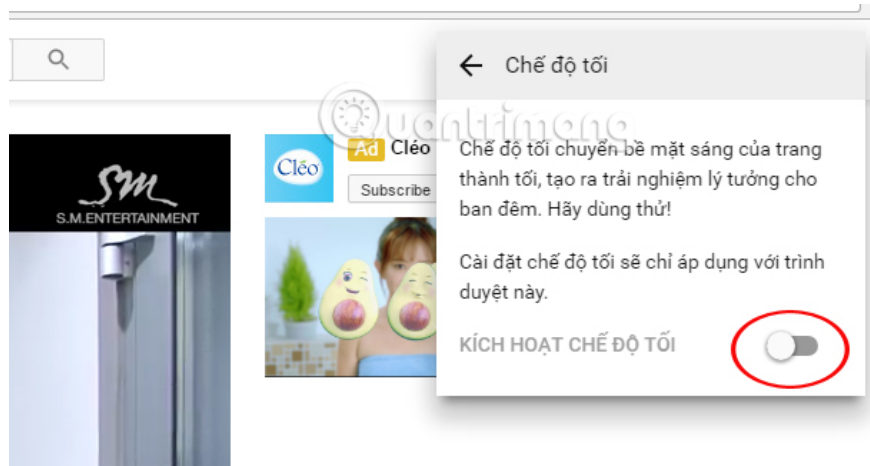

A **Dark Mode custom** dialog appears on Youtube. At this interface, you **push the horizontal bar to the right** at **Activate dark mode** , to start Dark Mode on Youtube.

And the result when we start Dark Mode on Youtube will be as shown below. The traditional white background interface has now been converted to a black background interface. Videos on the Youtube interface are more prominent but bring a more pleasant feeling to users' eyes.

If you want to revert to the old white background, just change the **Dark Mode** to **Off** .

However, the Dark Mode feature on Youtube is still in the testing process. Hopefully in the future, the manufacturer will provide users with a more complete Dark Mode mode, helping you experience the usefulness of this feature.
