

How to enable dark mode on Zalo computer, phone

In the latest version of Zalo on the computer, the dark background interface has also been updated so you can activate it without any other method.

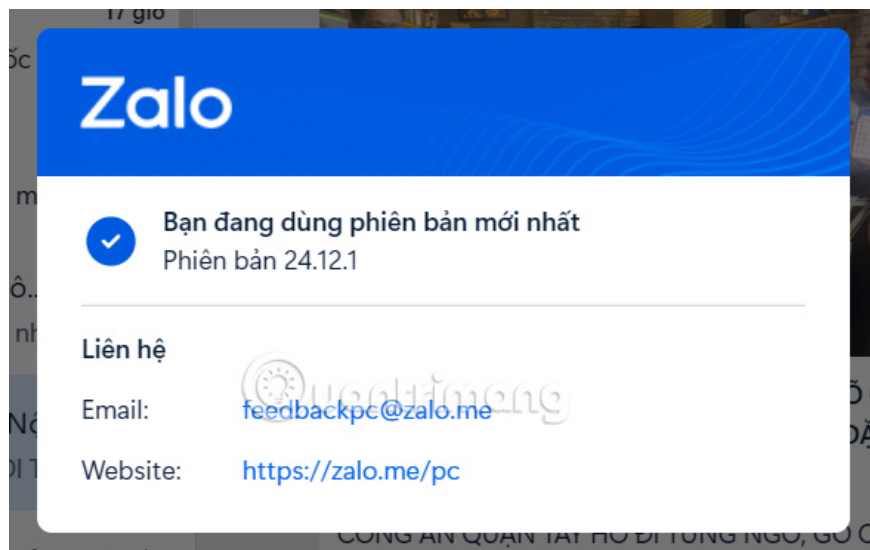

In addition, Zalo PC also has the option to change the interface according to the system interface on the computer, automatically changing the interface according to the user's wishes. Below are instructions for turning on dark mode on Zalo computer and phone.

Instructions to enable dark mode on Zalo computer

Note , you need to update Zalo computer to the latest version. We click on **the gear icon** and select **Version information** .

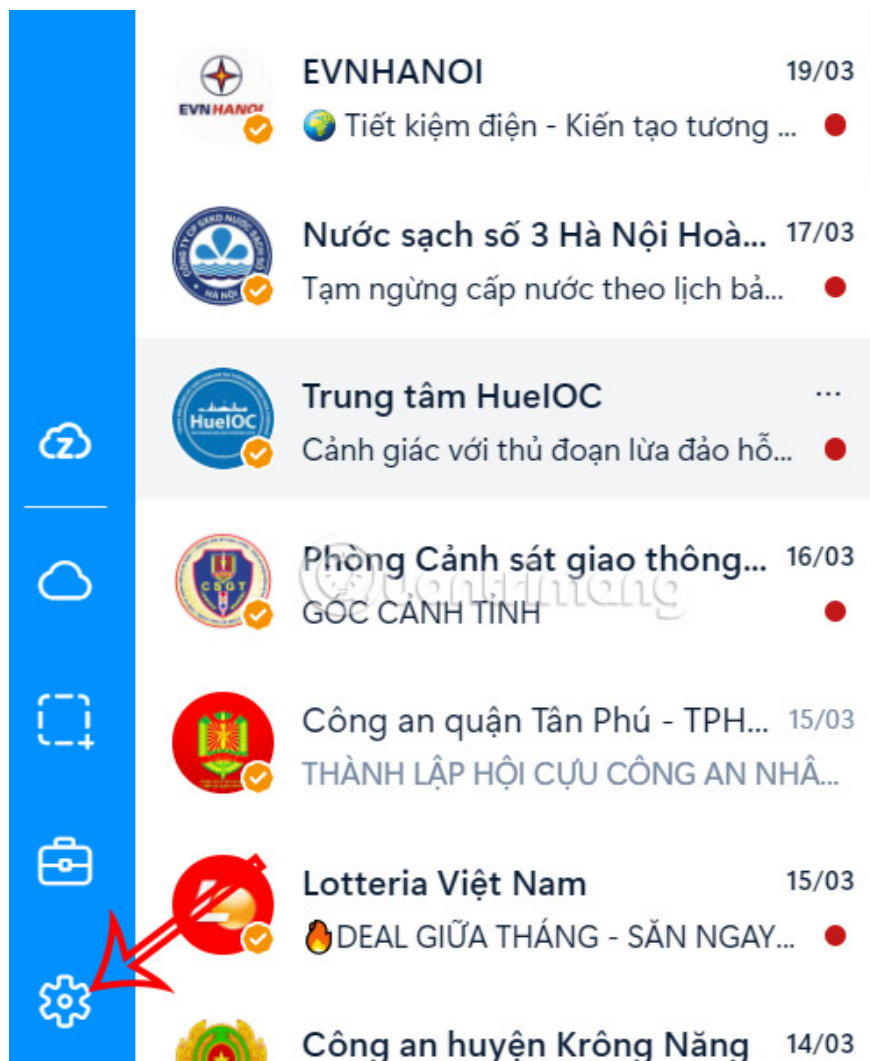

If in **version 24.12.1**, the **dark background Zalo feature** is **already available** , or you need to update.

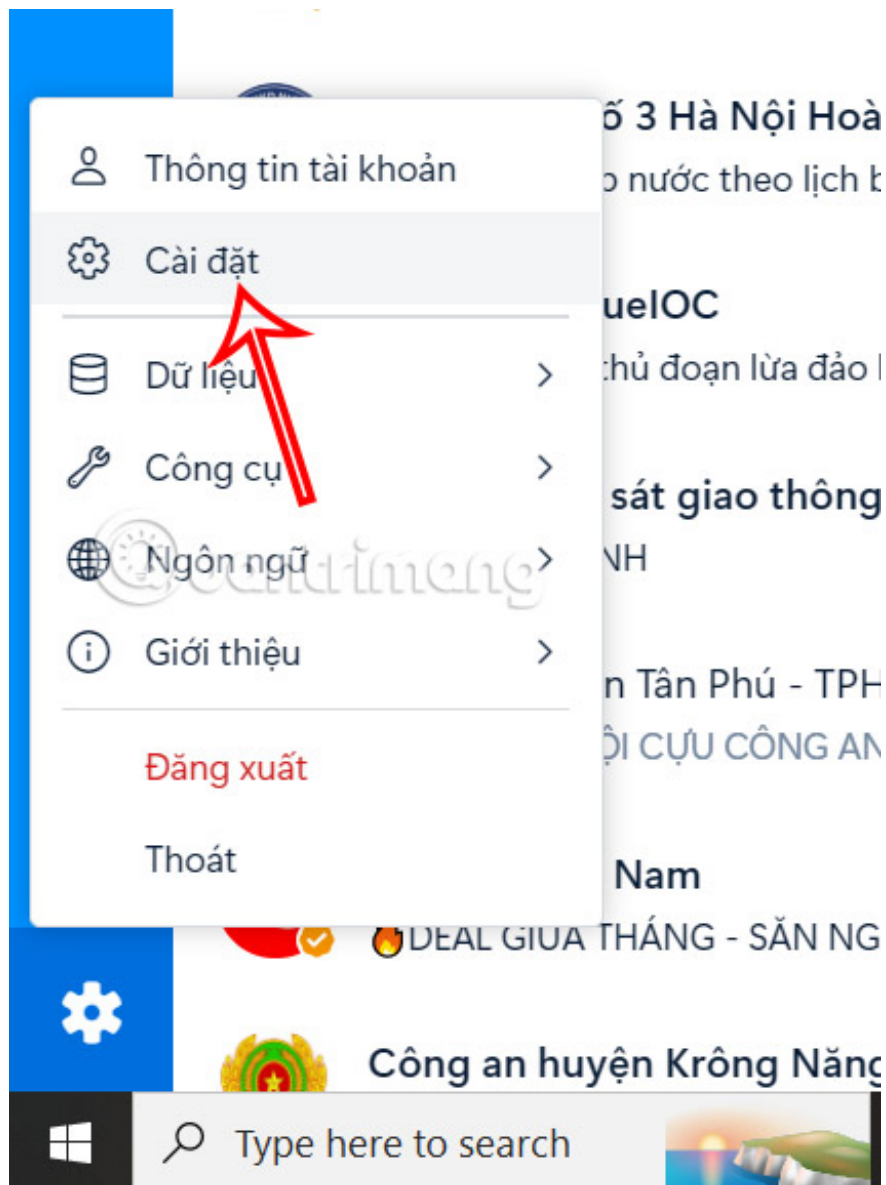

Step 1:

We click on **the gear icon** on the Zalo computer interface.

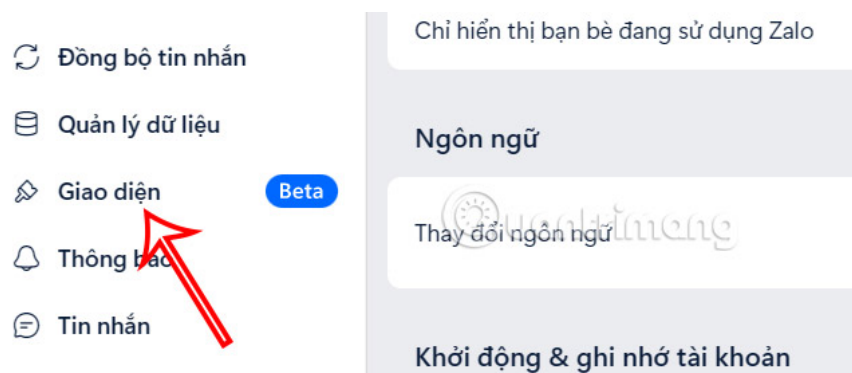

Next, click **Settings** to adjust.

Step 2:

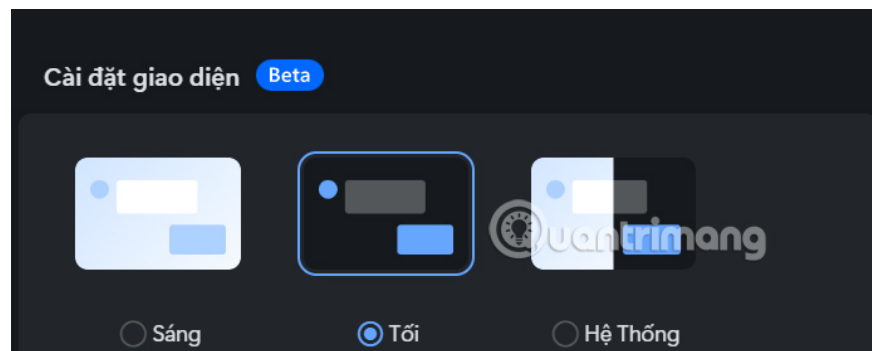

Go to the settings interface for Zalo on your computer, click on **the Interface section** to adjust.

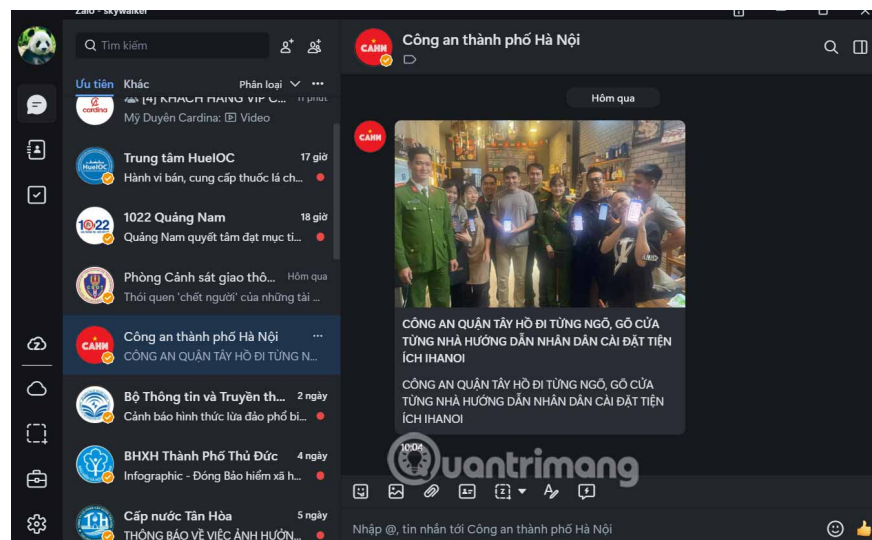

Then the user will see options for the Zalo interface, **click on Dark** i to install the Zalo computer dark background interface.

Immediately after that, users will see that the Zalo interface has been switched to a dark background.

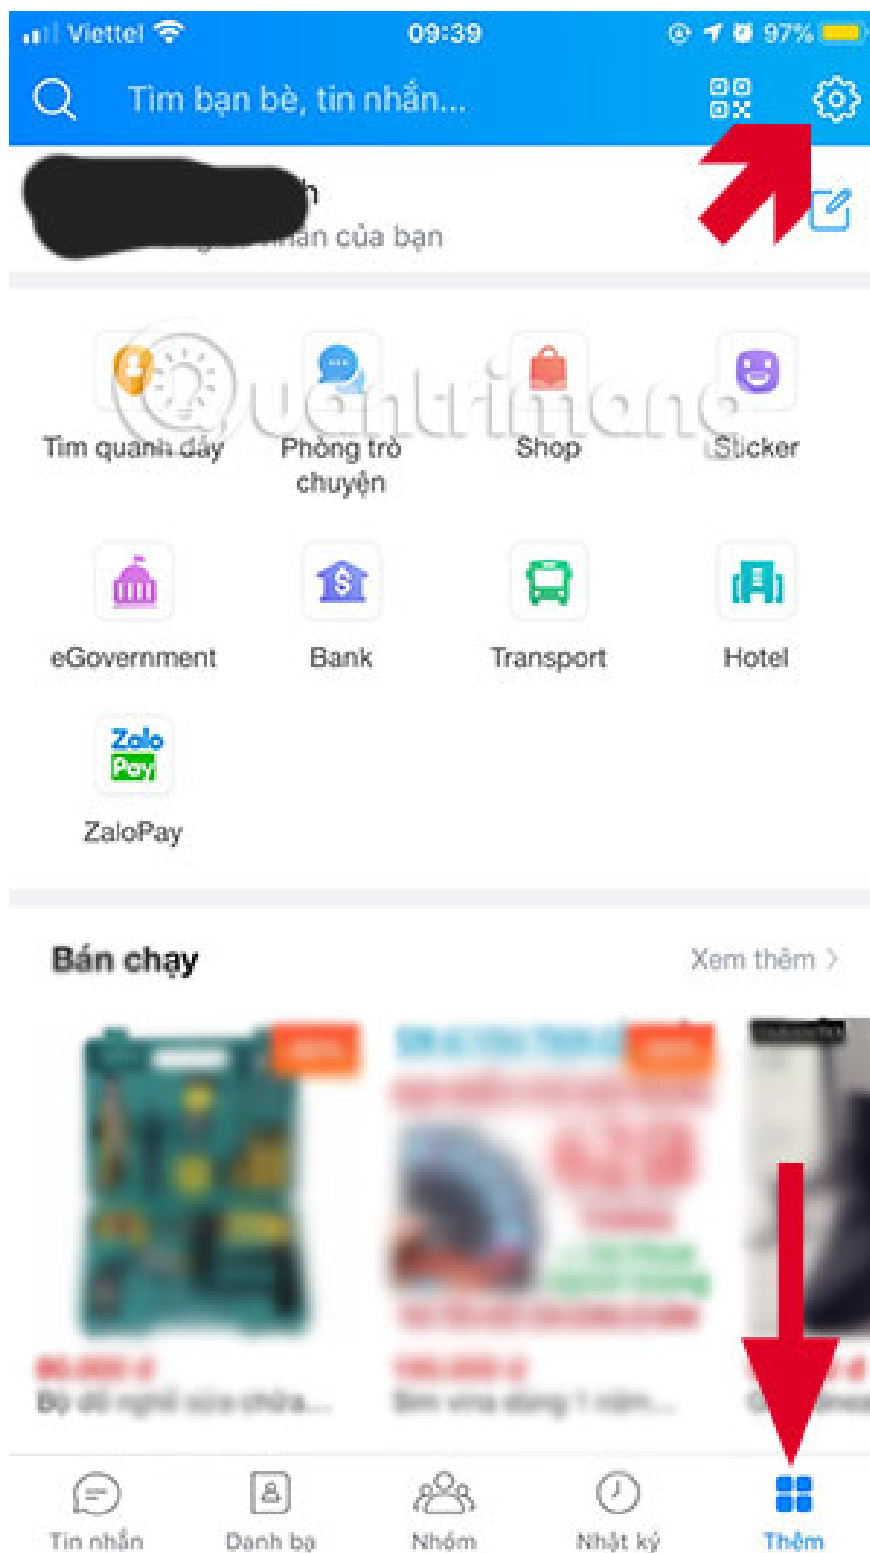

Zalo's interface is switched to a dark background in all sections, with a black background and white text so we can see and manipulate the content more easily.

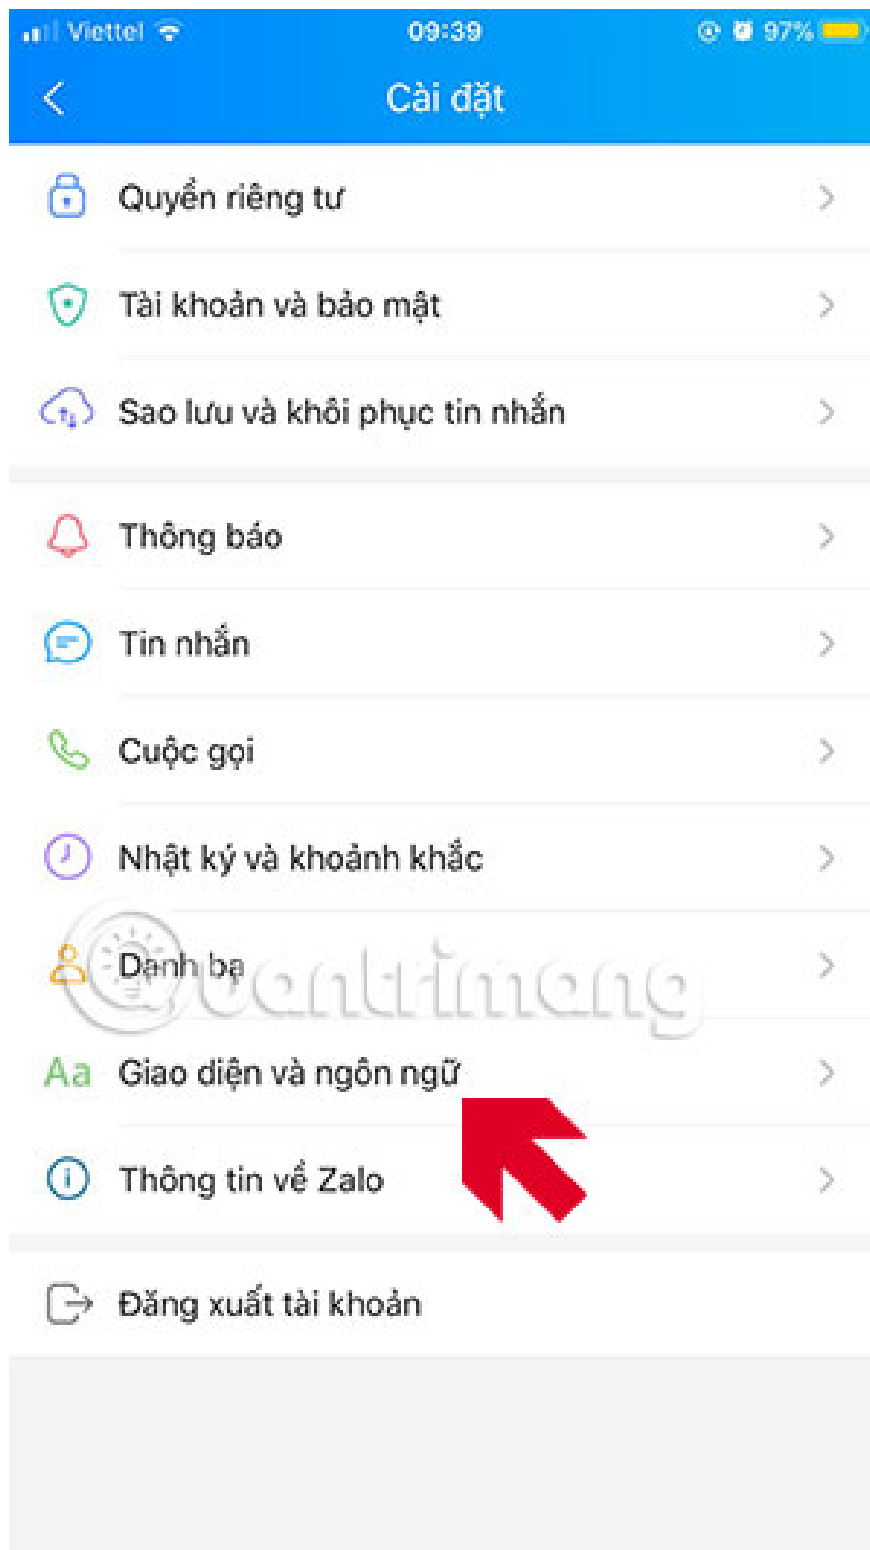

If you don't like the black background of Zalo anymore, you can switch it to light or switch to System to automatically change the Zalo background according to the interface on the computer.

2. How to enable Zalo dark background on phone

Step 1: Update the latest Zalo application on your iPhone, then go to **Zalo** application > select **More** > select **Settings** icon > select **Interface and Language** .

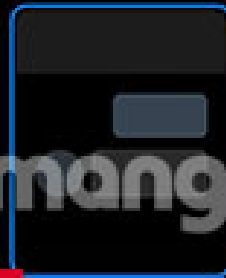

Step 2: In Interface and language, select **Dark** , Zalo interface will immediately be changed to dark. Now go out and view items such as personal page, chat, contacts.
