

How to enable download acceleration on Chrome

Google Chrome 63 has added Parallel Download, which speeds up downloads without Internet Download Manager (IDM).

If you have upgraded Google Chrome 63, you can use Parallel Download, download speed without Internet Download Manager (IDM) software.

IDM has long been a tool to support downloading videos, popular file formats today, because of the ability to catch links and download videos quickly. However, you will not need to use IDM to speed up data downloads because Google Chrome 63 has provided Parallel Download to speed up downloading files.

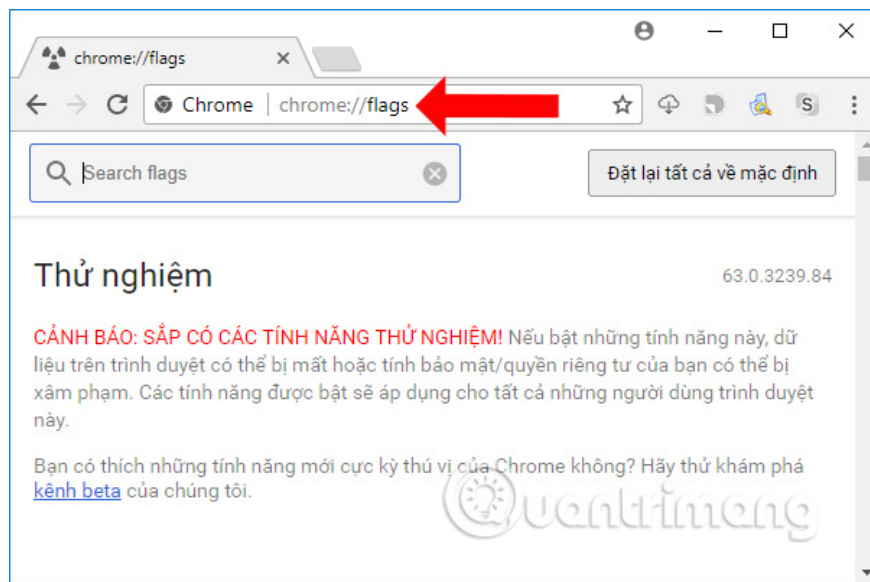

Accordingly, when users download large amounts of data, Google Chrome will create 3 streams to speed up data downloading. This is considered a major change for Google to meet the needs of users. However, to use Parallel Download feature on Google Chrome, you need to enable the feature under the article below.

1. To speed up Chrome browser, apply these tricks
2. How to block Flash from accelerating Chrome browser
3. This is how to reduce Internet traffic on Google Chrome

How to turn on Parallel Download to accelerate download on Chrome

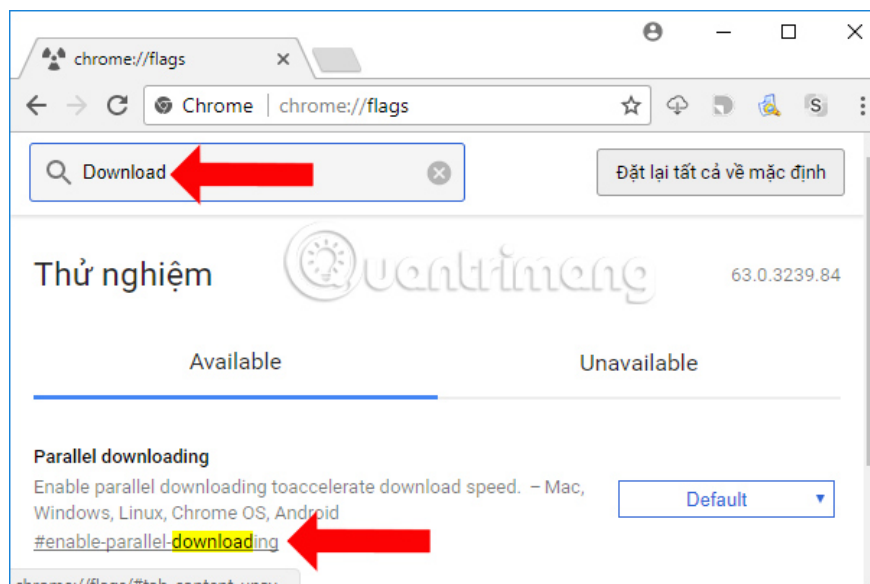

Step 1:

First open the Google Chrome browser and enter the **keywords chrome: // flags** into the address bar, press Enter. Appears the Test interface of the browser.

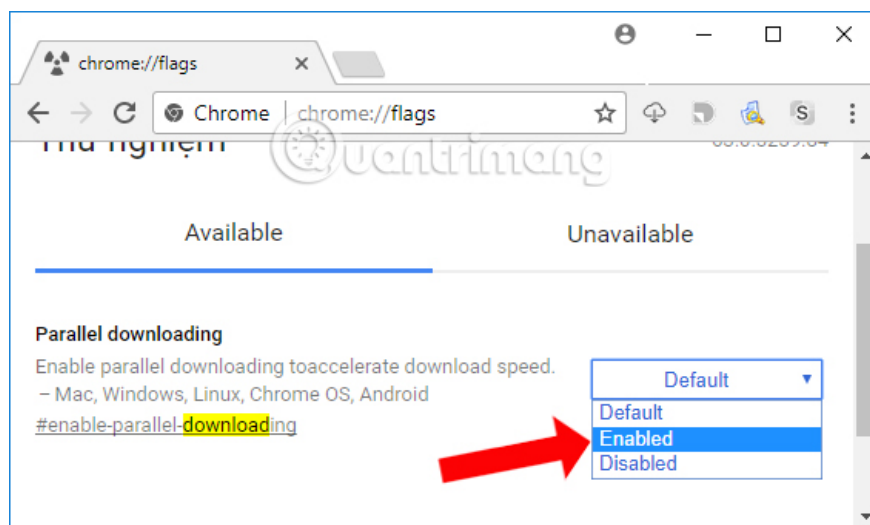

Step 2:

In the search bar below you enter **the Download keyword** as shown. The result will appear **Parallel Download feature** .

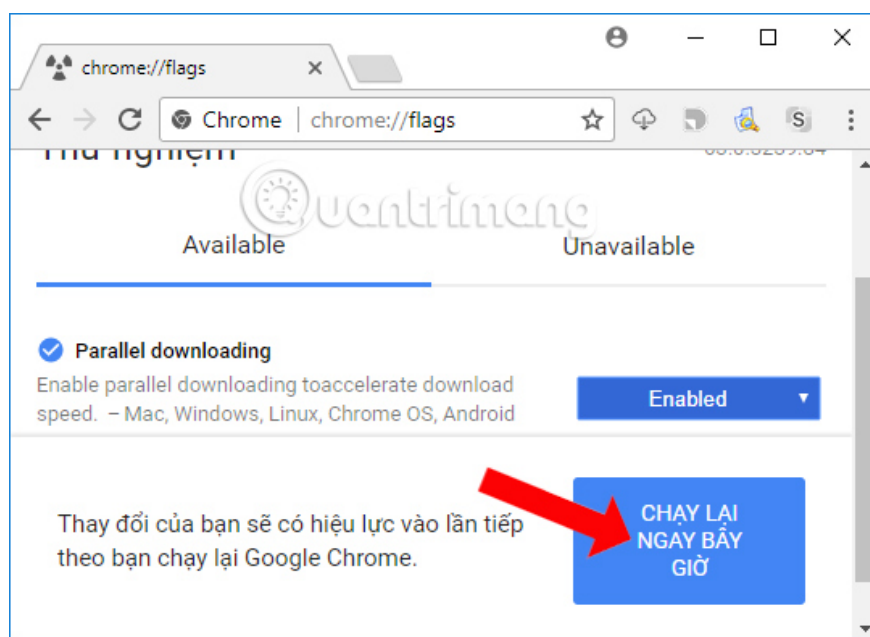

Step 3:

At Default frame, click to select the customized list and **select Enable** to activate.

We will be asked to restart the browser for the change to take effect. Click Select **Rerun now** to restart Chrome browser.

Finally you try to download certain videos or data with a large download time of over 2 seconds and will see a change in the download speed of the browser.

Compared to 32 streams of IDM, currently Google Chrome 63 will only have 3 downloads because of Parallel Download feature. But that also shows the upgrade, remarkable changes of Chrome to improve the download speed of data in the browser.
