

# How to enable Mouse Keys Windows 10

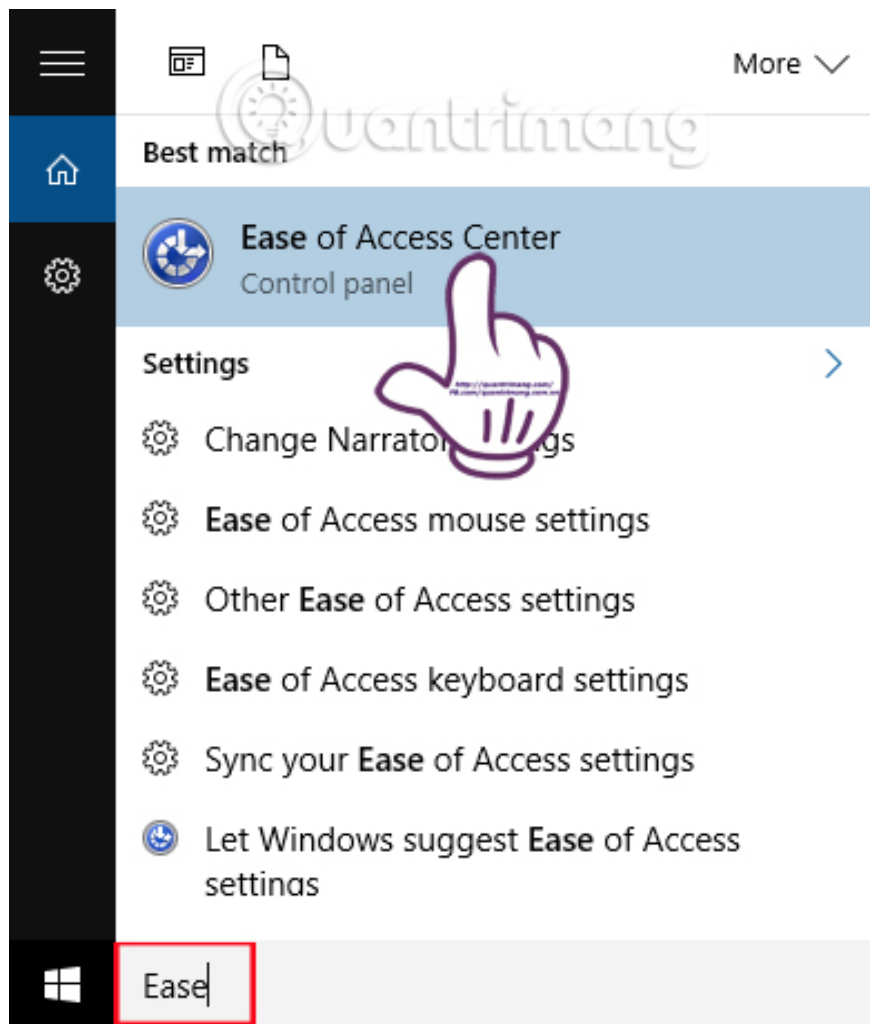

Mouse Keys on Windows 10 is a feature that activates the mouse control keyboard, when your mouse has a problem and cannot be used.

To facilitate all operations on the computer, usually we will use the mouse and keyboard in parallel. However, when using the computer mouse is not correct, the computer does not receive or has no signal, how to do it? If you have not purchased a new mouse instead, you can use the keyboard on Windows 10 to become a mouse.

In essence, it is the Mouse Keys feature available on Windows 10. When the computer mouse has a problem, it is possible to use the keyboard to replace and control the mouse to use. So how to enable Mouse Keys on Windows 10? Readers can refer to the following tutorial of Network Administrator.

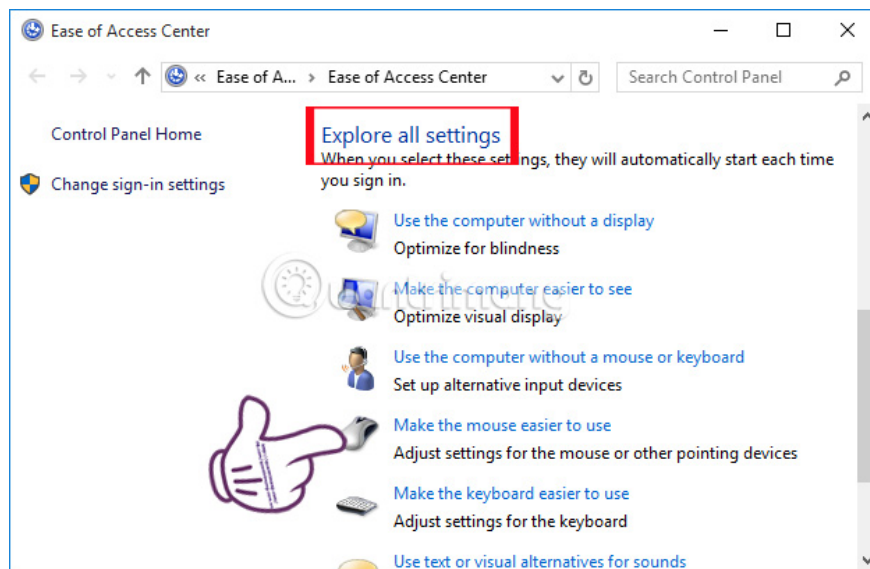

## Step 1:

At the search bar on Windows, we enter the **keyword Ease** and then select **Ease of Access Center** .

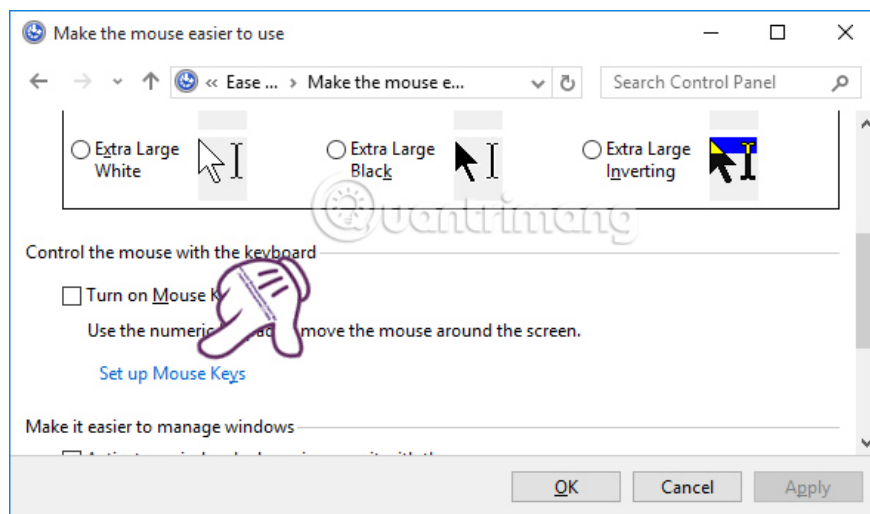

## Step 2:

Next comes the Ease of Access Center interface, we scroll down to **Explore all settings** , then select **Make the mouse easier to use** .

### Step 3:

In the new interface Make the mouse easier to use, the **Control the mouse with the keyboard section** will have 2 different options. Turn on Mouse Keys used to use mouse key settings by default. Set up Mouse Keys to manually adjust the Mouse Keys as you like. Here, we will select the **Set up Mouse Keys section** .

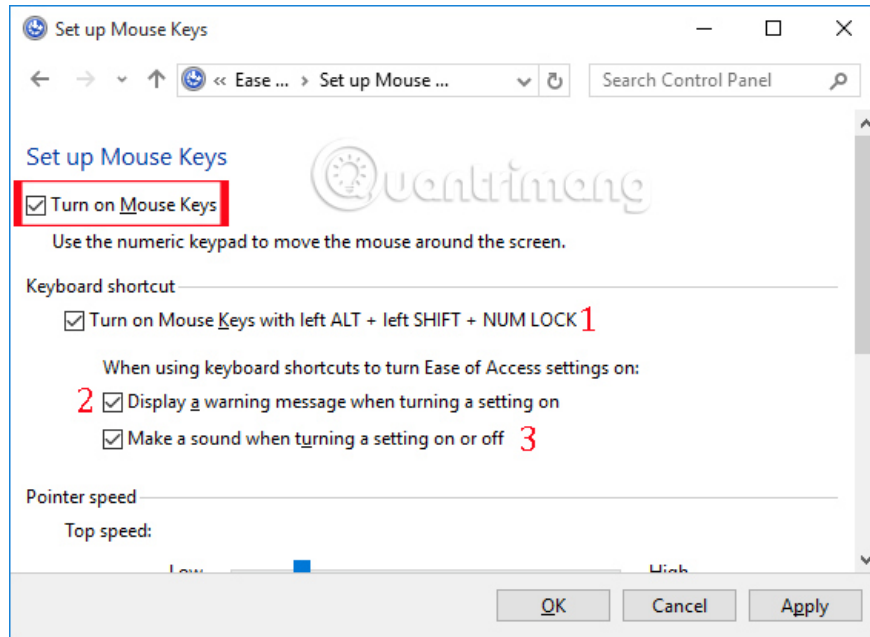

### Step 4:

Go to the Mouse Keys setup interface, **select Turn on Mouse Keys** .

If you want to use the shortcut to quickly activate the Mouse Key feature, you can select 3 options, including:

1. Turn on Mouse Keys with left ALT + left SHIFT + NUM LOCK: activate Mouse Keys with shortcut Alt + Shift + Num lock.
2. Hi?n th? m?t c?nh báo thông báo khi chuy?n ??i m?t trên thi?t l?p: there is a notification when using the feature on a computer

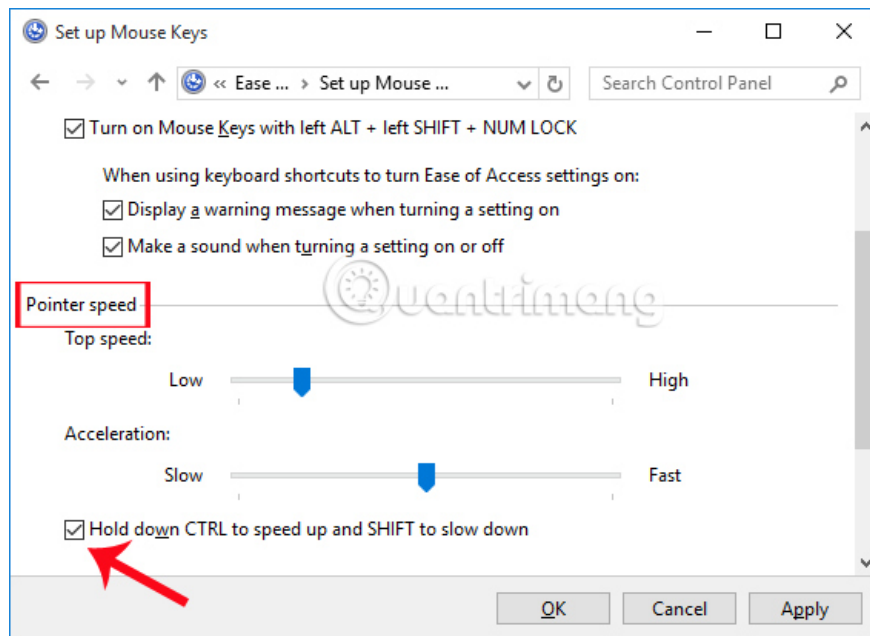

3. Hãy t?o m?t âm nh?c khi chuy?n ??i m?t ho?c t?t thi?t l?p: Notification sound when using this feature.

## Step 5:

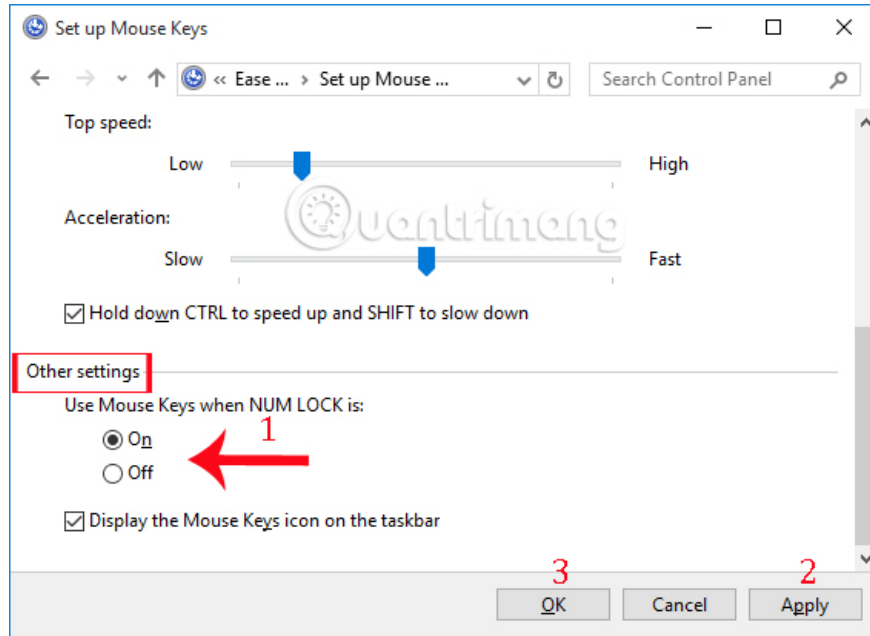

Also at that interface you scroll down to **Pointer Speed** . Here you will **adjust the cursor** speed at the Top speed bar and Acceleration.

**Select the box to hold down CTRL to speed up and SHIFT to slow down** to use the Shift and Ctrl keys to increase or decrease the speed of the mouse pointer.

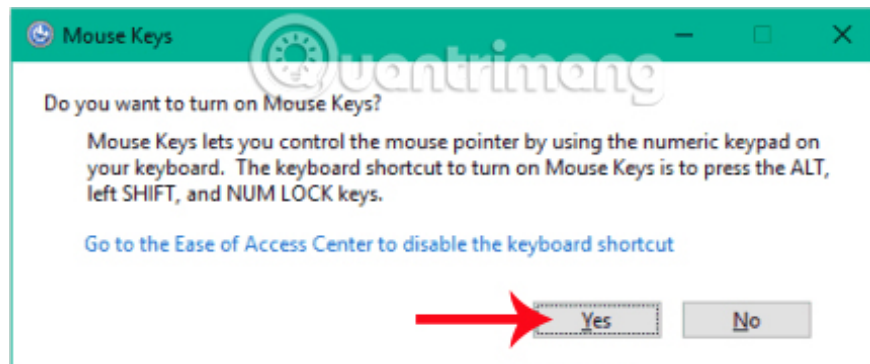

## Step 6:

At the end of the **Other Settings** section, we can choose to use Mouse Keys with the number keys when opening or turning off Num Lock. After you have completed all adjustments, set the Mouse Keys feature, click **Apply** and **OK** to save.

## Step 7:

So whenever we enable Mouse Keys on Windows 10, we will receive the message as shown below. **Yes**, it is OK to use **Yes**.

So we have activated the Mouse Keys feature on Windows 10 already. When the mouse on your computer has problems, you can use Mouse Keys, use the keyboard to control the mouse on the computer.
