

How to enable one-handed keyboard mode on iOS 11

One-handed keyboard is one of the new features offered on iOS 11 version. So how to enable this feature on iPhone / iPad.

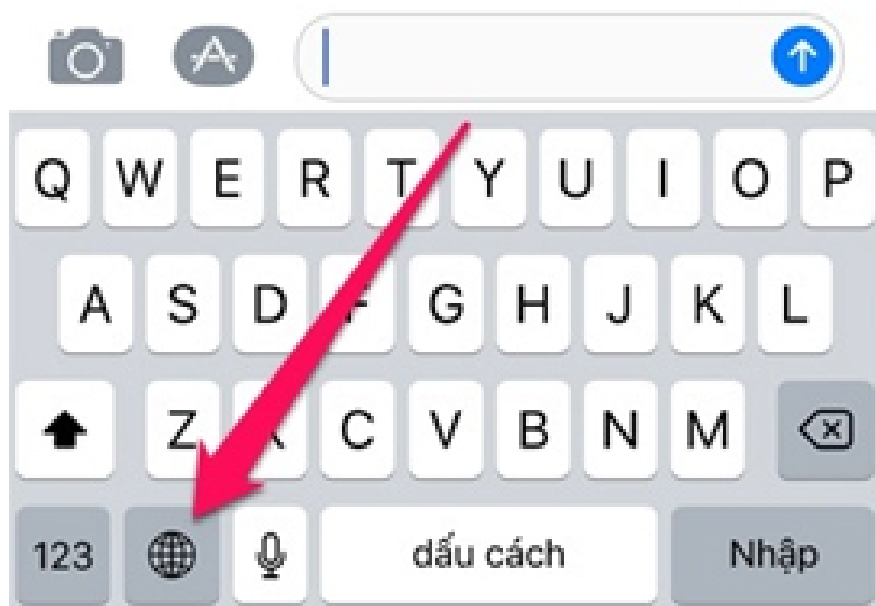

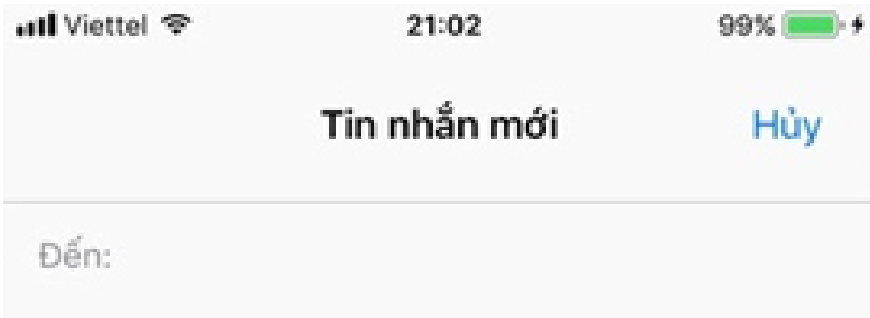

iOS 11 launches not only attention to users by changing the interface of the screen, but also because of the new features extremely attractive. Including some changes such as the function of rotating the screen right on iOS 11 without using the support application, sharing WiFi right on iOS 11 devices and supporting the use of one-handed mode.

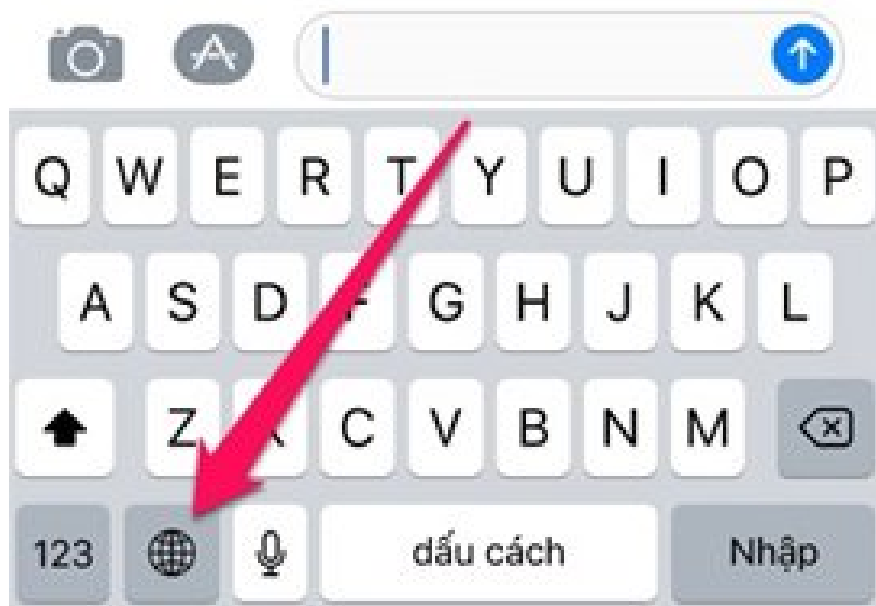

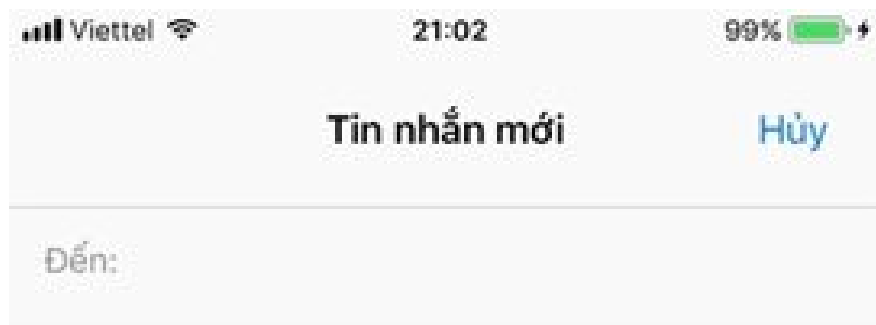

This one-handed mode is not so new to those who are Apple followers, when this mode was once tested on iOS 8 but was soon removed. And until today when the iOS 11 version has been released to users, this one-handed mode has returned and improved a lot. If you are interested and want to experience this mode, then follow the tutorial below to activate 1-handed mode on iOS 11.

Step 1:

You open any content editor. Then type the keyboard to appear the virtual key. Next, users touch and hold on **the globe icon** in the lower right corner of the screen.

You will see a list of options for using the keyboard, including the language used, the icon, and especially the keyboard setting mode, including using the left, center or right-hand keyboard deviation depending on your needs. .

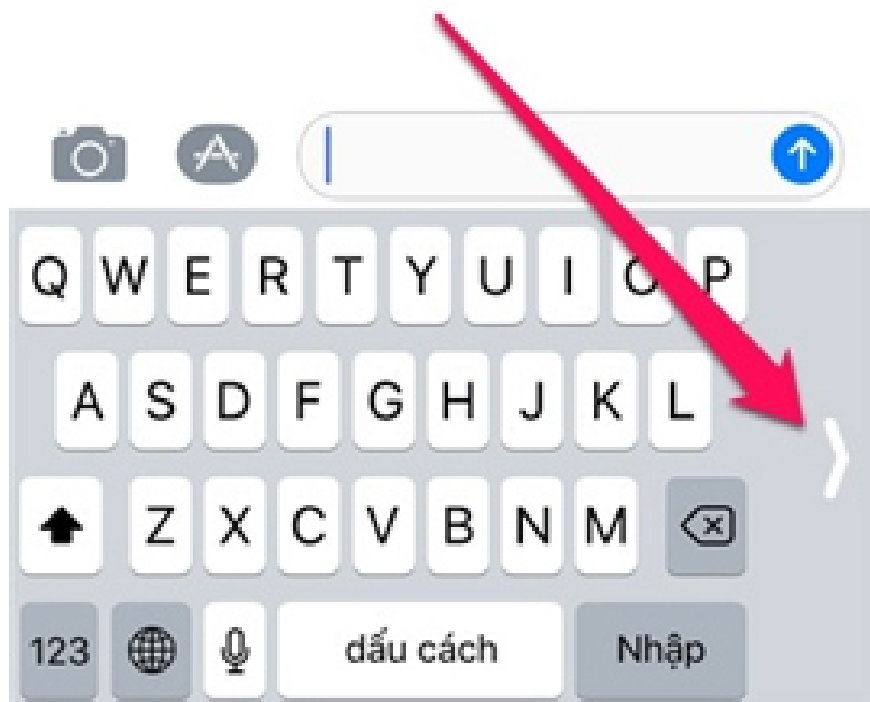

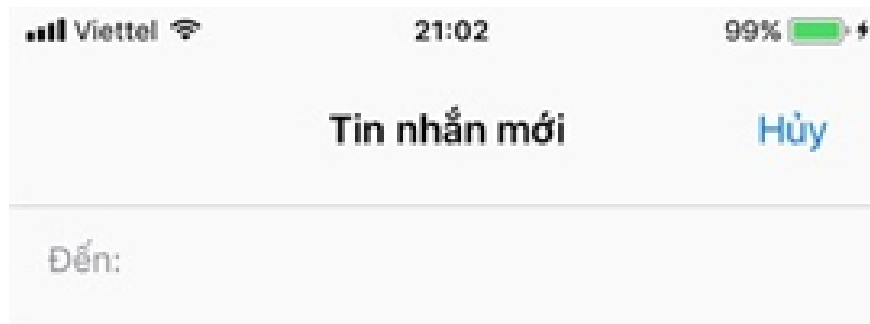

Step 2:

By default the keyboard will be in the middle mode to use both hands. If you want to use 1-handed mode with the left hand on the device, press the keyboard icon to the left, otherwise use the right hand, then select the keyboard to the right.

In case you want to return to **the normal state in the middle of the keyboard** , just drag **the arrow icon** on the side of the screen to finish.

A small change but extremely useful for those who want to use 1-hand device on iPhone / iPad, when installing iOS 11. Switching between modes using just left hand or right hand or back About normal mode, also very simple according to the above article.

I wish you all success!
