

# How to enable security notifications on WhatsApp

WhatsApp security notifications will notify you when the security code for an end-to-end encrypted chat changes when logging in on a new device.

The end-to-end encryption feature on WhatsApp will secure the message content on WhatsApp, so that only you and the other person can read the content. And with end-to-end encrypted chats with a security code, when accessing on a new device, a new security code will be generated. Then the application will send a notification to the user that the security code has changed. This makes it possible for users to test chat encryption on WhatsApp. The article below will guide you to enable security notifications on WhatsApp.

## Instructions for turning on security notifications on WhatsApp

### Step 1:

At the interface on the WhatsApp application, click on **Settings** to adjust the settings for the WhatsApp application.

Next, switch to the new interface, users click on **Account** to make adjustments.
