**Step 2:**

You access iCloud on Windows 10 computer by following the link below and **enter the Apple ID to login** .

<https://www.icloud.com/>

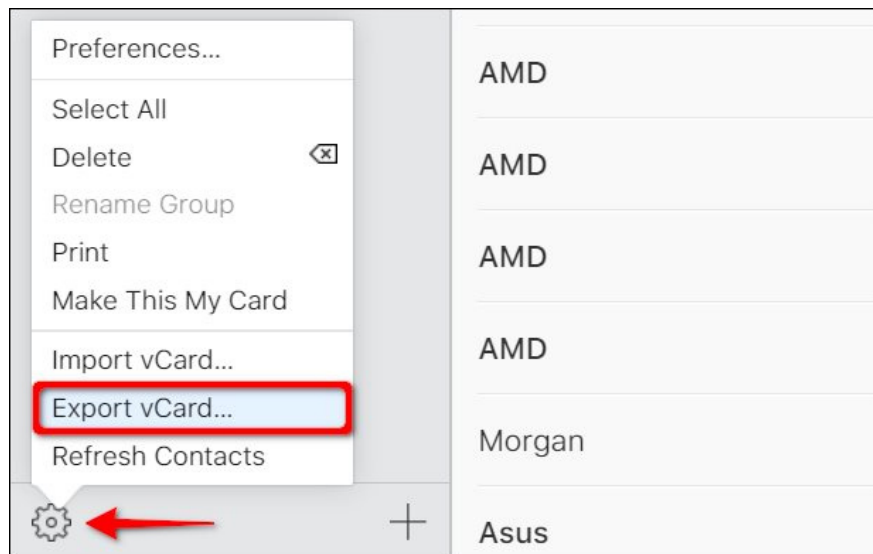

Next, click on **Contacts** to view the contacts list that has been synchronized before.

**Step 3:**

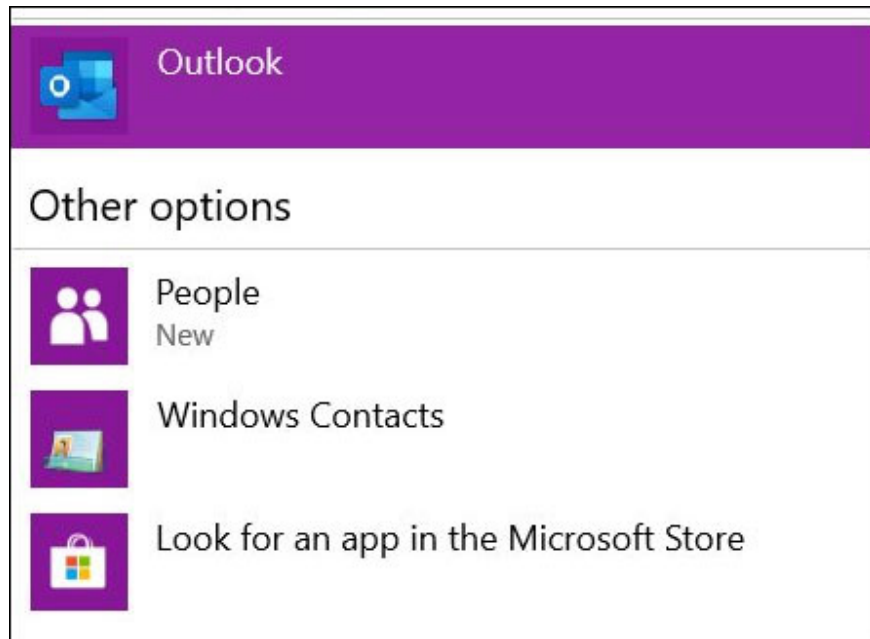

In the screen showing contact names, if you want to export a phone number, click **the gear icon** and select **Export vCard** in the menu that appears.

If you want to select multiple phone numbers we click on a contact, then hover over the last phone number you want to export, press and hold the Shift key and click on the last phone number name. Click the gear icon and choose Export vCard.

**Step 4:**

VCF file directory is downloaded and we right click on the file and select Open to open. Display the list to select Outlook, People application or Windows Contact to open the contact file.
