Instructions for separating audio from videos on Android

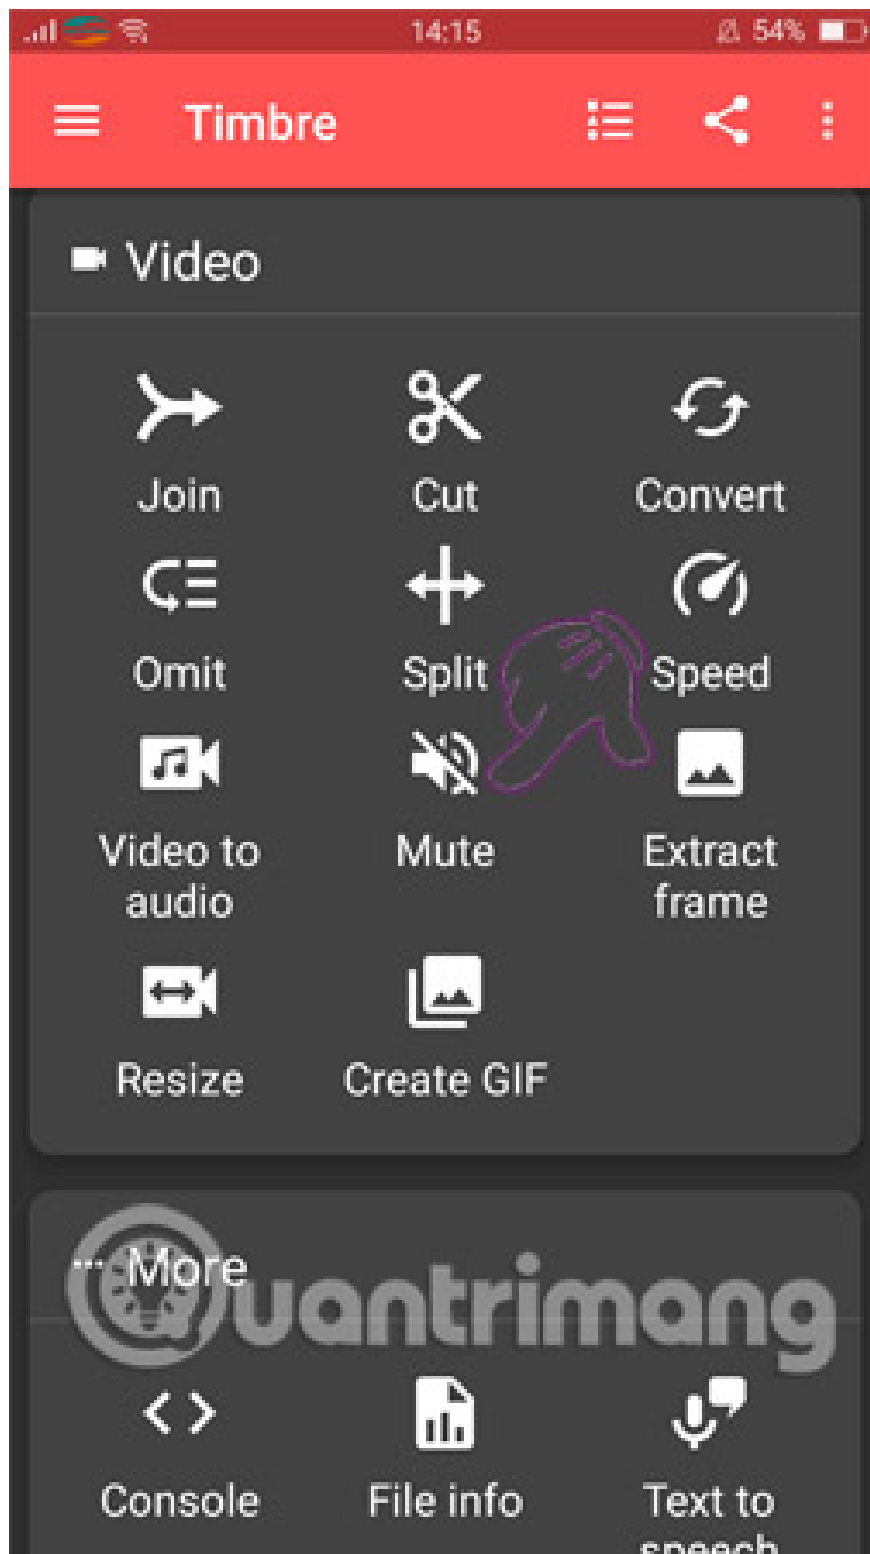

Step 1:

Perform audio splitting out of the video on Android, first download the Timbre application device via the link below.

1. Download the Timbre app for Android

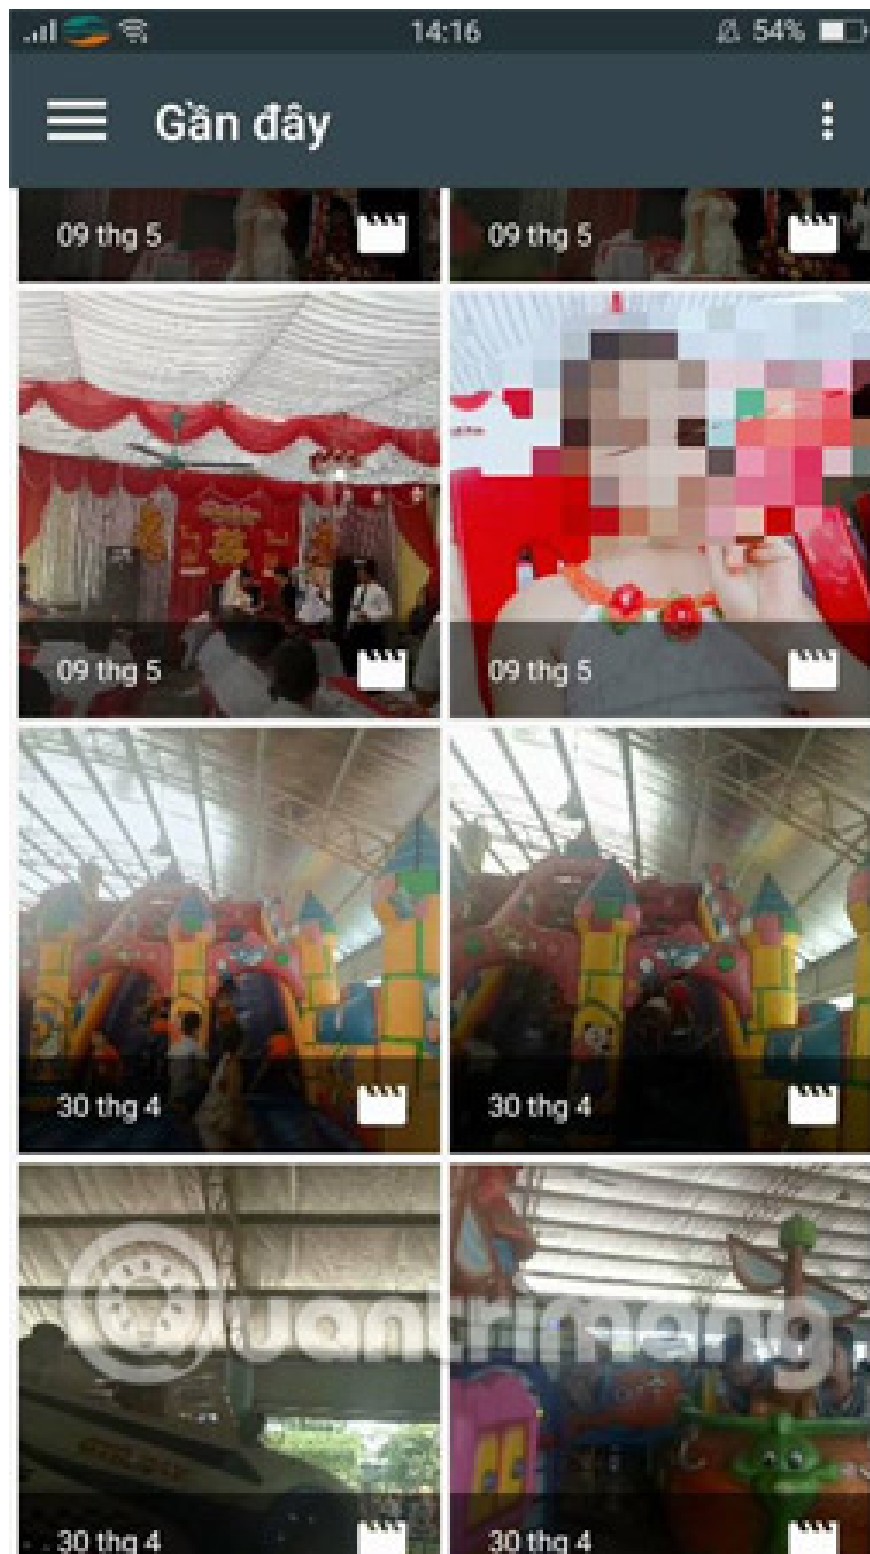

Step 2:

Installation process is complete, you open the application. At the main interface of Timbre, scroll down to the **Video** section and touch the **Mute** option.

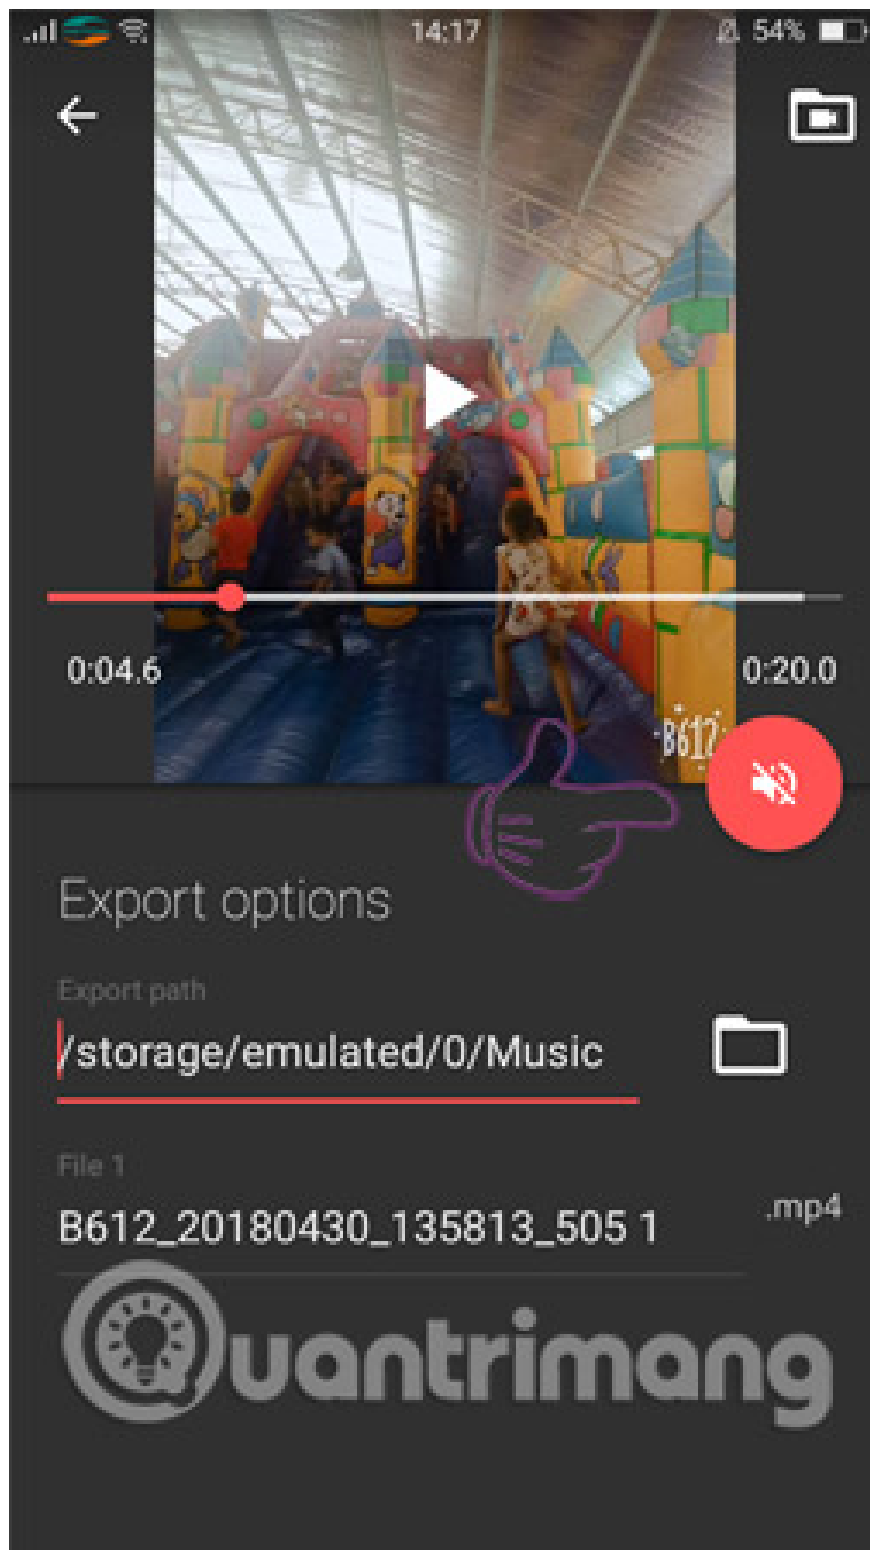

Step 3:

Now, the system will take you to the folder containing the video, click on any video you want to remove the audio on Android.

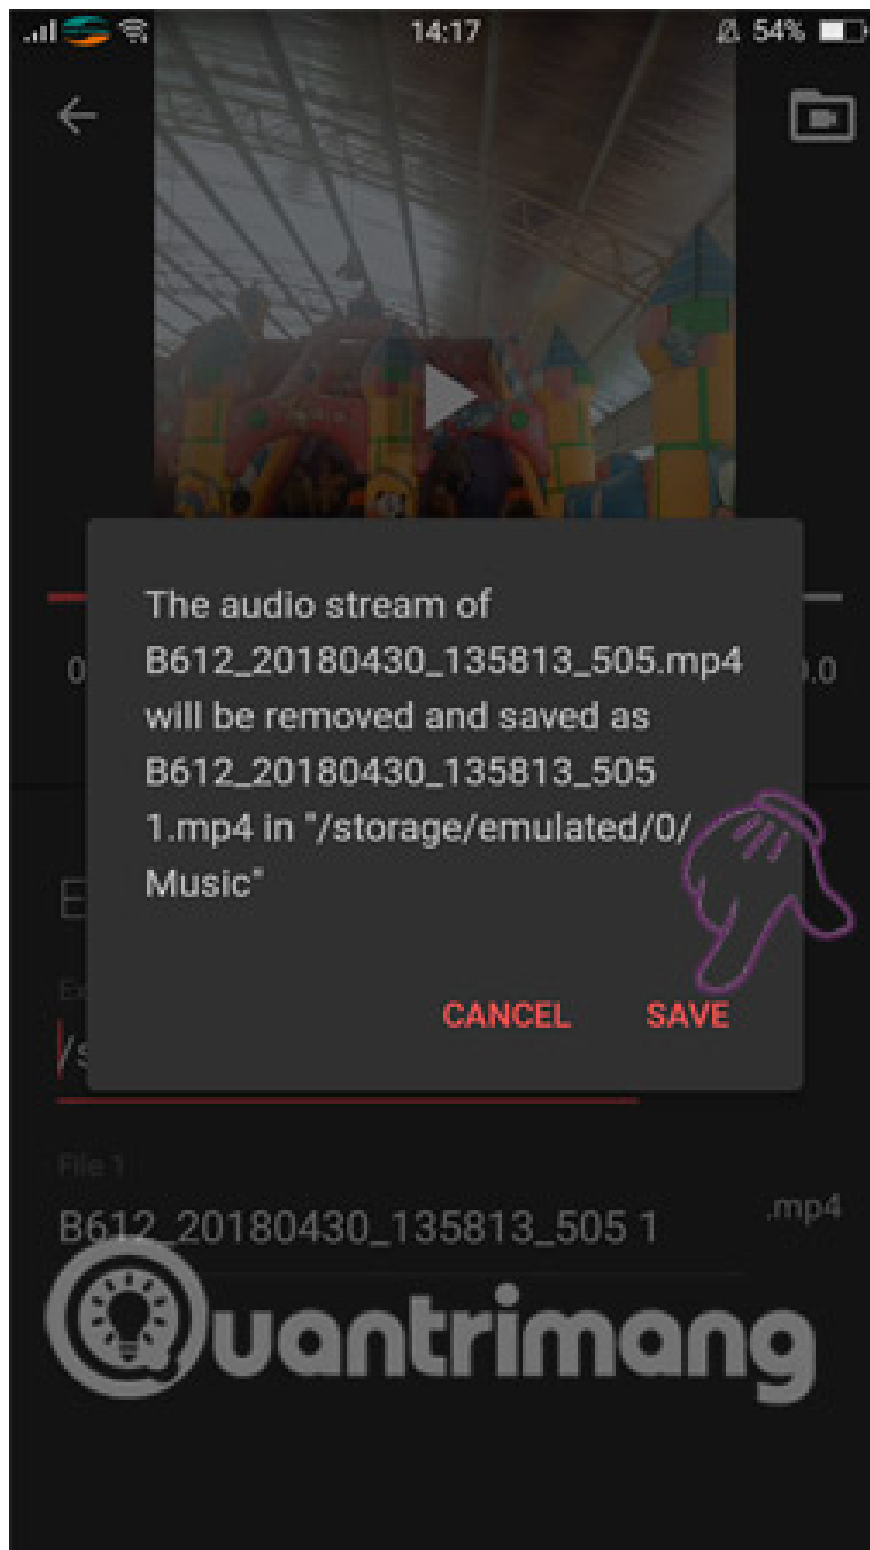

Step 4:

When you touch the video, the application will import the video and let you preview the draft. If you like, just touch **the sound off icon** like the image below.

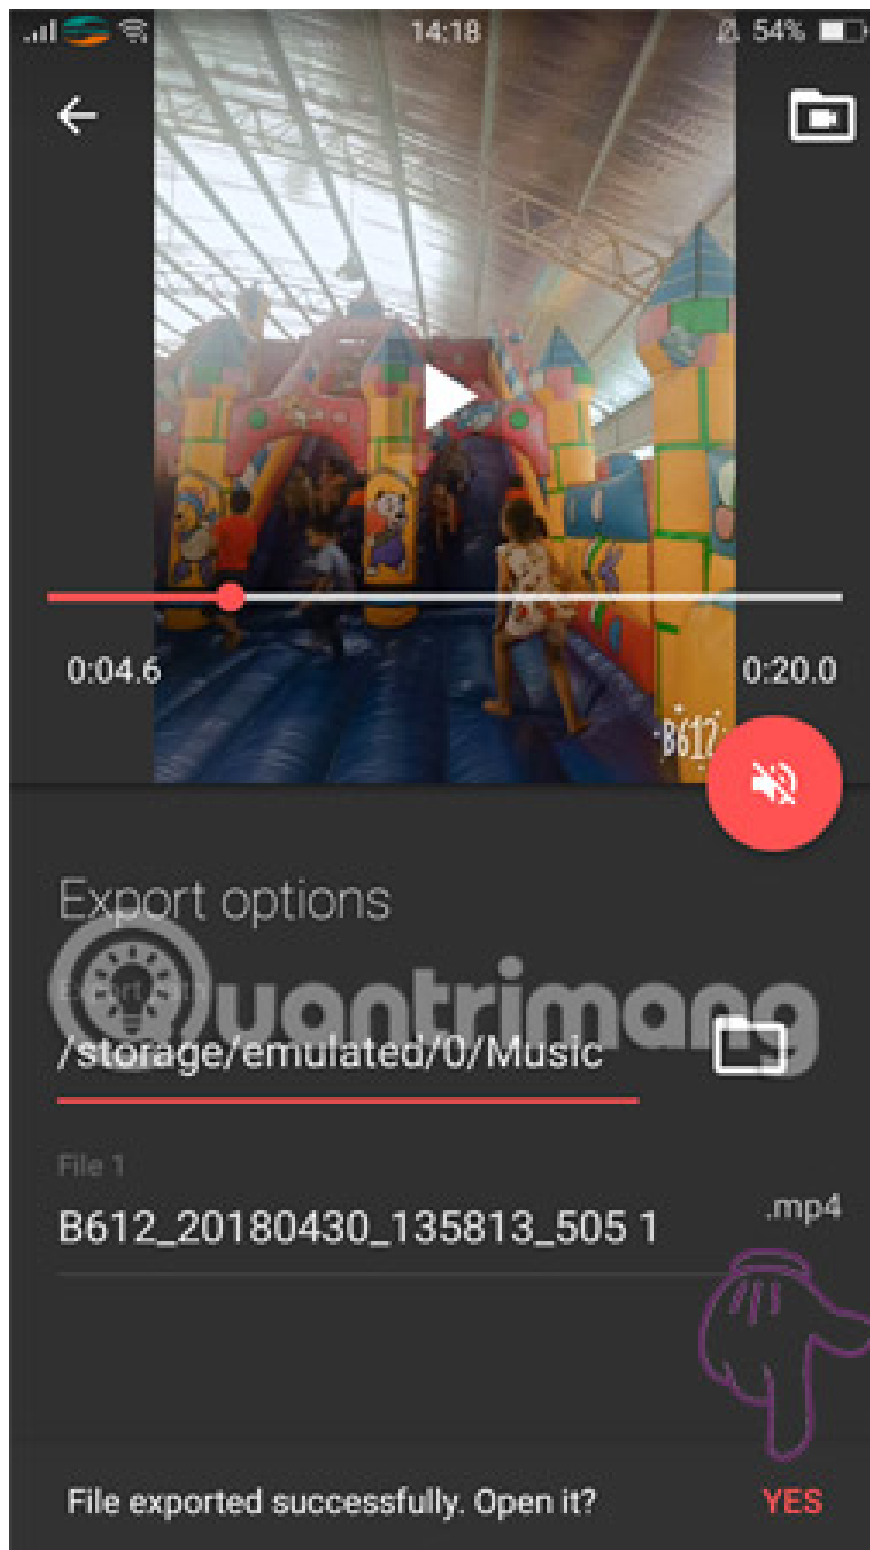

A new bulletin board appears indicating that the audio will be removed, select **Save** to save the video.

Step 5:

Save the audio-split video, you can open the file by selecting **Yes** from the notification dialog or finding the saved video in **the Gallery app** .

Is it simple to extract audio from the video on your phone with the Timbre application? Please apply this trick immediately to get your own attractive videos.

Hope you are successful.
