Instructions for using Open Rar Zip All Zip Tar Unrar Unzip

Step 1:

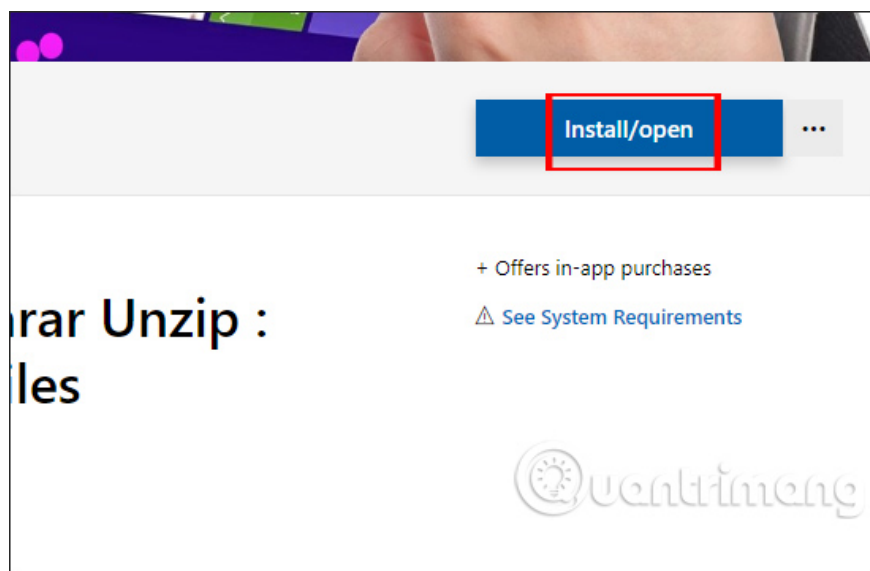

Tar Unrar Unzip Zip Unrar Unzip application is currently free for 3 days. We access the link below and then click **the Get button** and login to the Microsoft account.

1. Download Open Rar Zip All Zip Tar Unrar Unzip

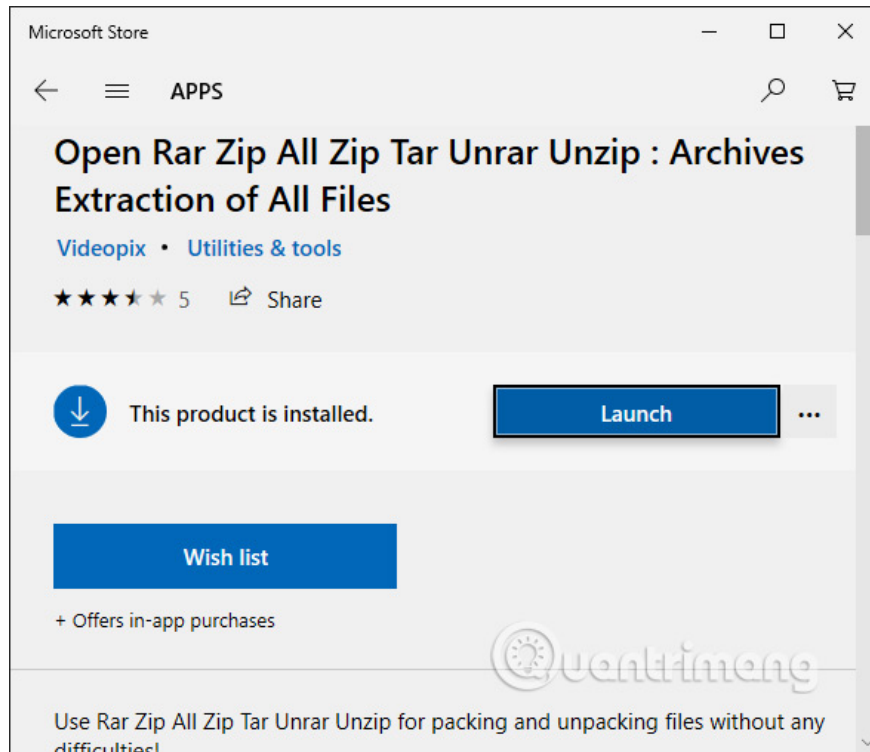

Then the application shows the computer you want to install, click on **the computer name** and then select **Install** to proceed with the installation.

Next, click **the Install / open button** to install the application.

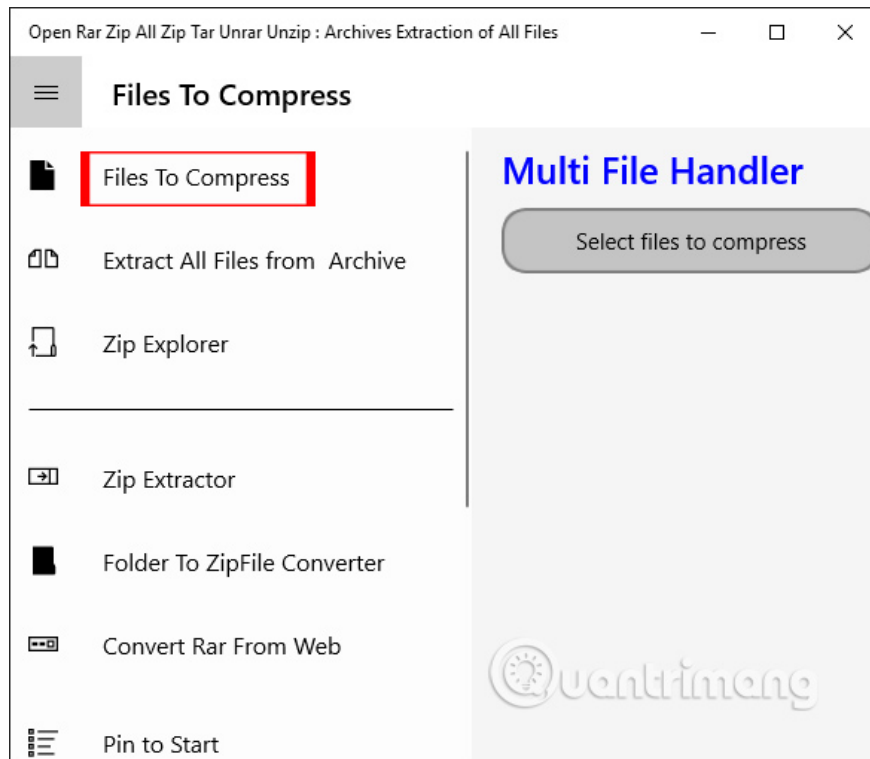

Wait for the installation process to complete, **press Launch** to open the application.

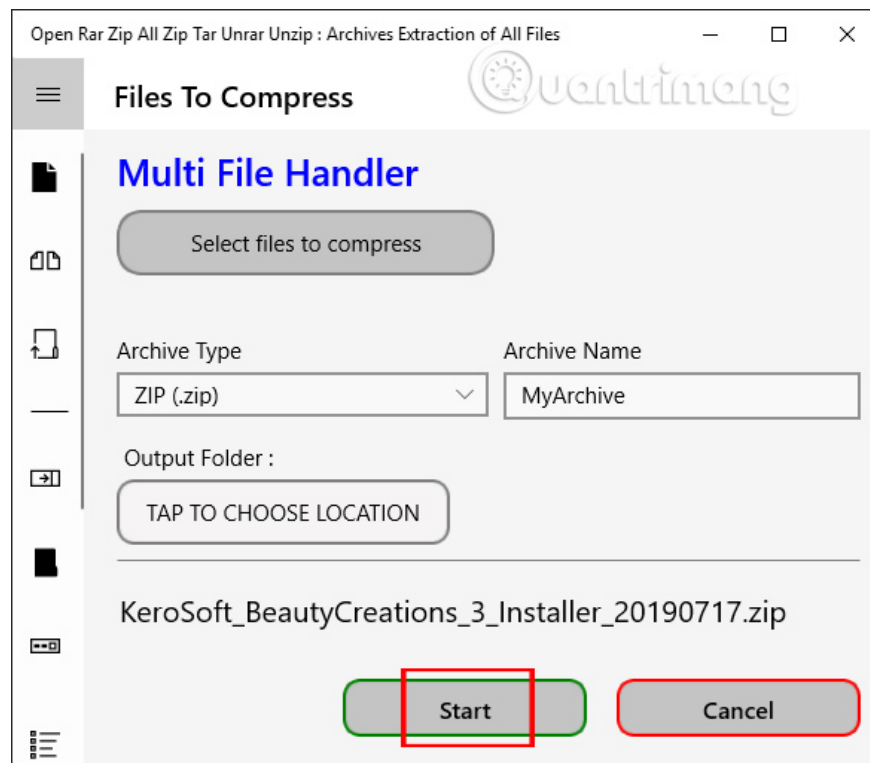

Step 2:

Display the interface of the application with the main functions. At **Files to compress** users click on **Select files to compress** to select the file to compress.

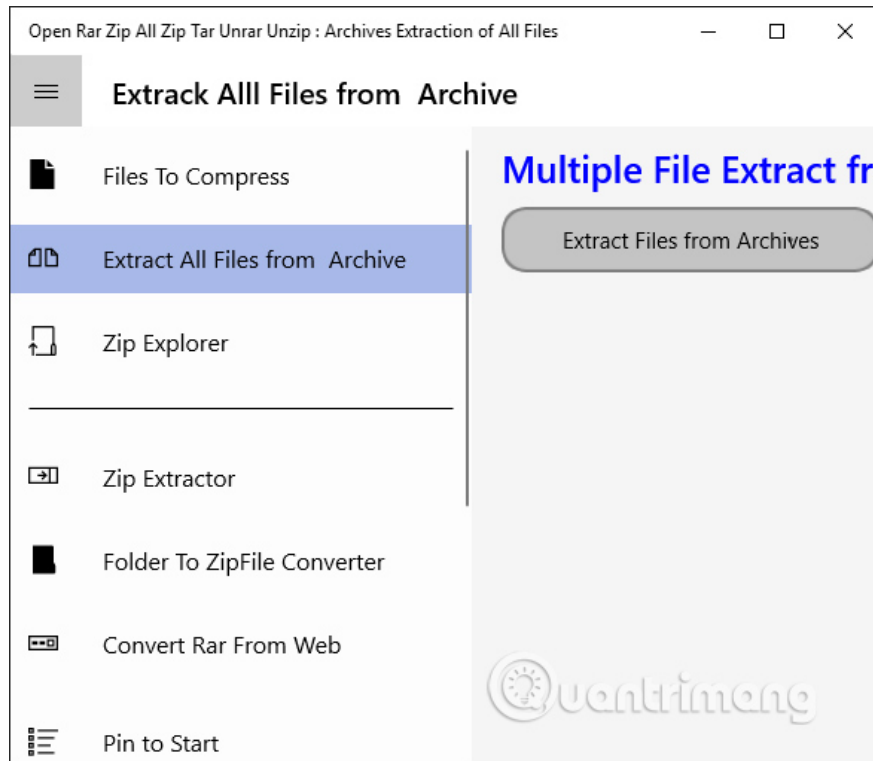

Next, select the output compression format at **Archive Type** , name the file at **Archive Name** , where to save to **Tap to choose location** . Finally press **the Start button** to proceed to extract.

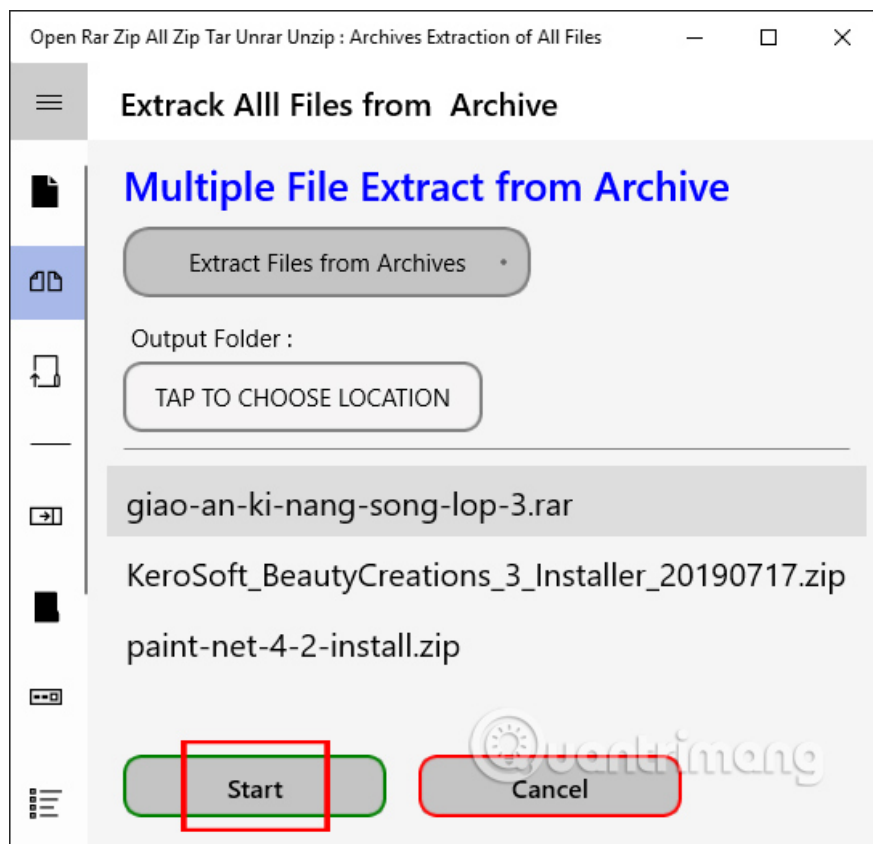

Step 3:

Next click on **Extract all files from archive** to extract multiple files at once. Click **Extract files from archives** to select the files you want to extract.

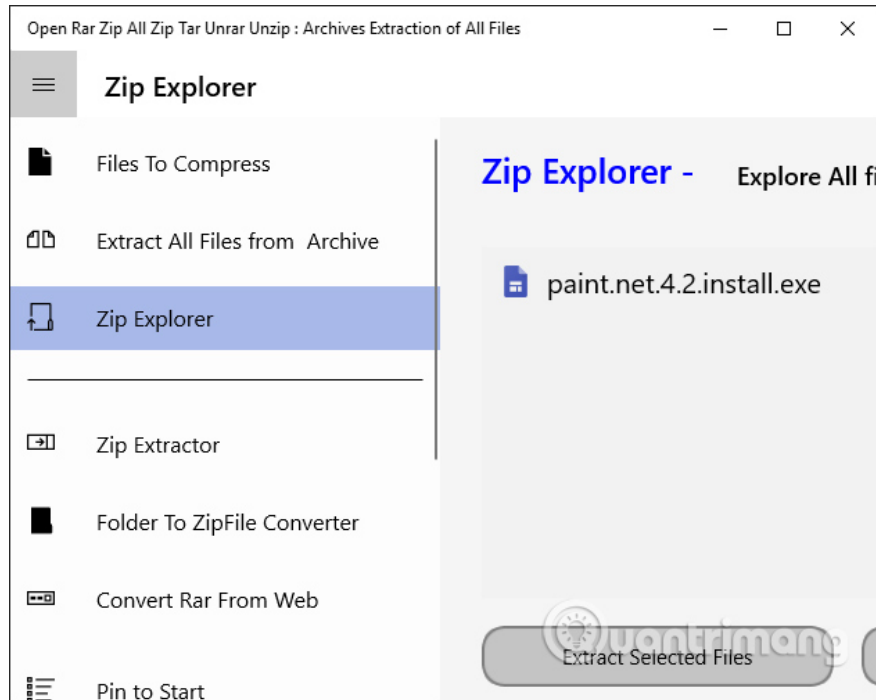

In the next display interface, we select the save location for the files when the decompression is finished. Click on Tap to choose location. Finally **click Start** to perform the decompression.

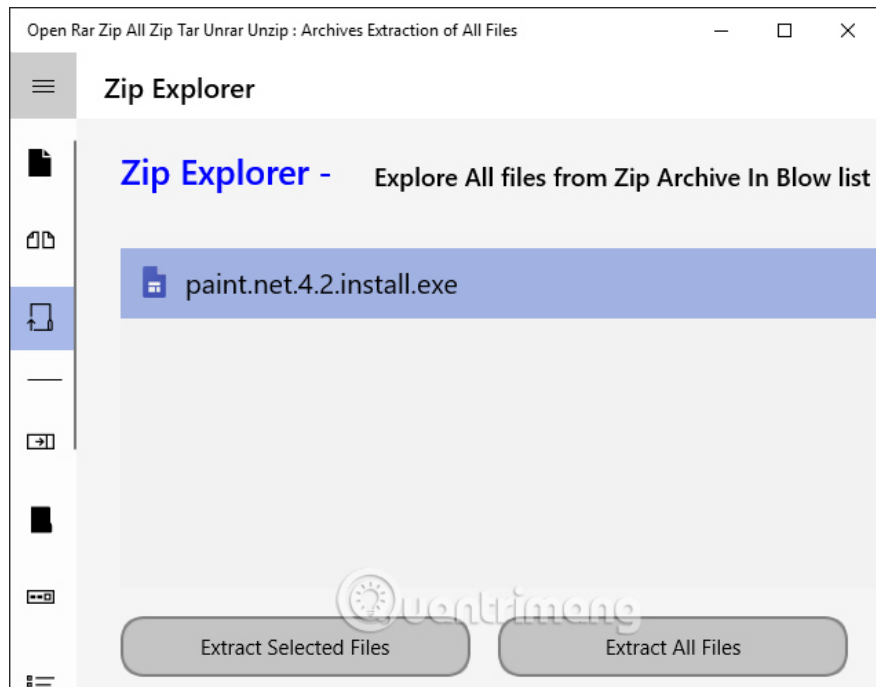

Step 4:

Click on **Zip Explorer** to select **the compressed file to extract the file** . Click the compressed file and immediately display the extracted file as shown below.

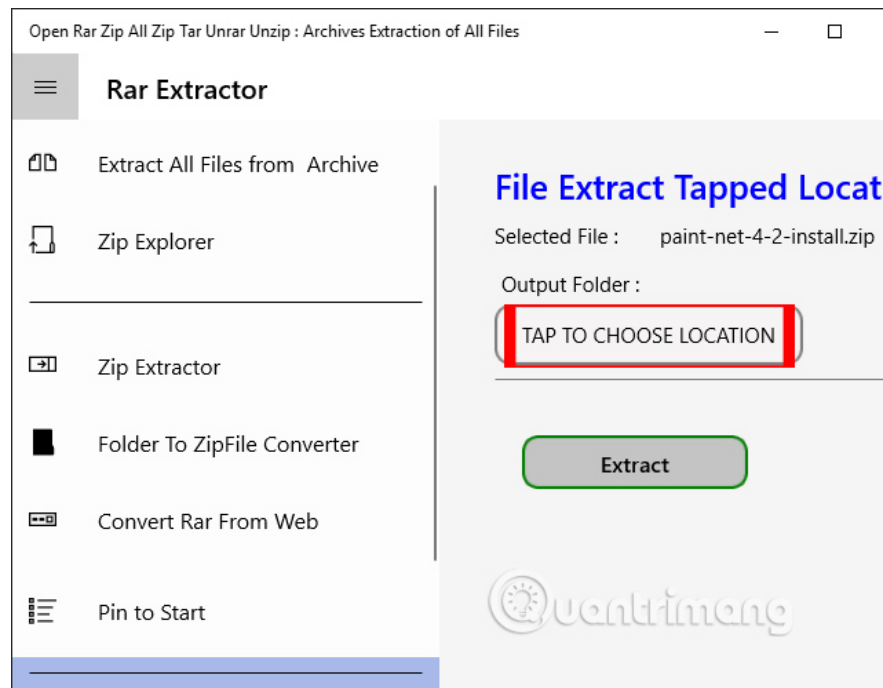

When displaying the file the user will see two options selected Extract files to extract the selected file and Extract all files to extract the entire file.

Step 5:

Click on **Zip Extractor** to **extract the entire file in the compressed file with the previously saved folder** . We select the compressed file we want to extract. Next click **Tap to choose location** to select the location to save to the file after extracting.

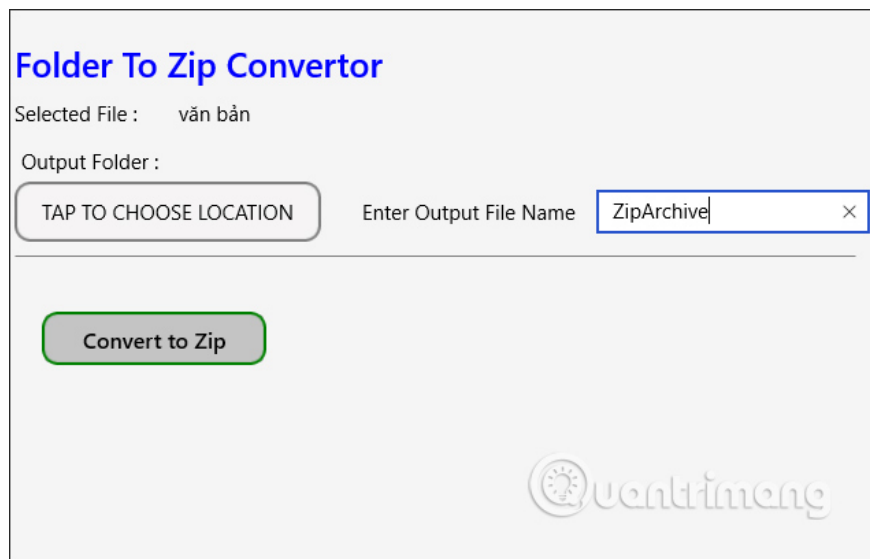

Finally **click Extract** to extract.

Step 6:

Continue to click on **Folder to zip file converter** to **compress the entire file in any folder** . We select the folder we want to compress the entire file in.

Select the save location for the compressed file and select the name. Finally **click Convert to zip** to compress the folder to zip format.

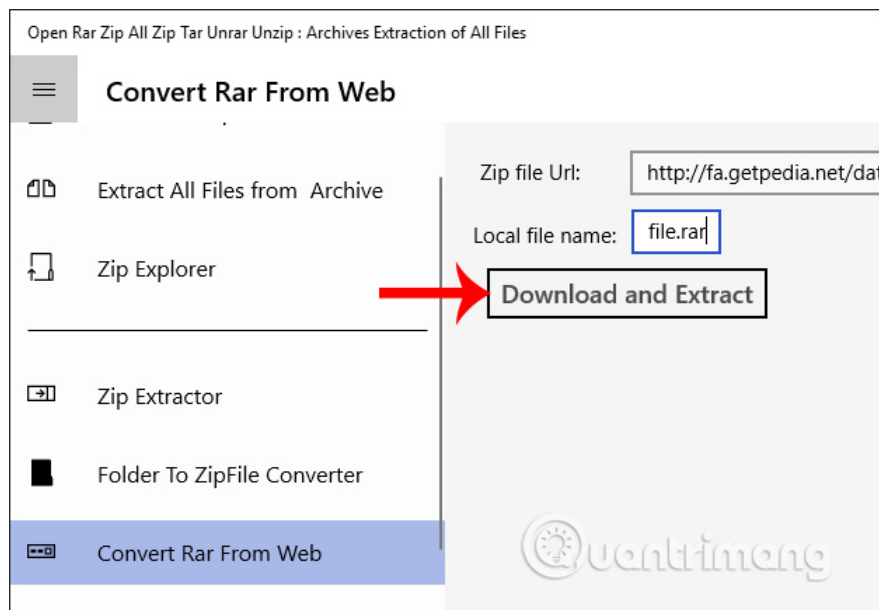

Step 7:

Features **Convert rar from web** allows users to use compressed files on the web to extract through file URLs.

We paste the link of the file into **the Zip file URL frame** . Name the file at Local file name with the zip or rar extension. Then click **Download and Extract** to select the location to save the file after extracting.

The result will display the compressed file and the decompressed folder according to the file name you set at the selected save location.

Open Zip application All Zip Tar Unrar Unzip offers many options for extracting files, supports many file formats to be extracted. Please download the application quickly before ending the program for free.
