

# How to extract zip file on iPhone

Siri Shortcuts has a shortcut to extract files right on the iPhone, without the need for other tools.

For previous iOS versions, the compressed file as zip file is relatively difficult to use on the device. And since iOS 11 when the Files application appears, the iPhone / iPad has been able to receive the zip file. And if you want to quickly extract any zip file on your iPhone, you can install Siri Shortcuts application.

This Siri Shortcuts application has a shortcut Unzip to iCloud, which supports extracting zip files right on the phone. Thus users do not need to install any additional applications to extract the zip file. The following article will guide you how to use Siri Shortcuts application to extract iPhone zip file file.

### Step 3:

The Siri Shortcuts interface is displayed, click **the Unzip to iCloud shortcut** to proceed to extract the file. Next, the shortcut will ask the user who wants to **save the file** after extracting to any folder. Users can choose On iPhone or iCloud Drive.

Finally, after the compression is finished, click on the folder where the file was saved and will see the file after being extracted.
