

# How to Fake IP on phone with 1111, Touch VPN, Turbo VPN

Want to fake IP on Smartphone phone? WARP 1.1.1.1, Touch VPN and Turbo VPN are available for both Android / IOS operating systems, especially for free.

As you know, recently adult content sites have been blocked by network operators, or the problem of slow Internet status due to [ *AAG optical cable is cut* ]. Even foreign money-making games / apps often block Vietnam's IP address, possibly because many brothers cheat hard or a special reason.

How to fix the problem is fake IP or use VPN software to change the address of the machine you are using. However, many brothers encounter problems when they are only used for a short time, they will require a fee to continue using.

The following article I will show you three free and secure IP fake applications on Android / iOS, which are WARP 1.1.1.1, Touch VPN and Turbo VPN.

## 1. How to fake IP on phone with WARP 1.1.1.1

[ *Warflare* ]'s **Warp 1.1.1.1** application is a fake ip service with a free domain name and server system.

**Cloudflare also asserted** : they will not store any data used to identify you and not unauthorized use of your information.

The VPN version you download on CH Play or the App Store is free by default for the Warp version but is limited in bandwidth. To get more bandwidth you can refer to other users, with each turn will be added 1GB.

For Warp +, there is an additional function that helps speed up and maintain stability when connecting to a VPN, which is good and can be applied when the optical cable is broken. The price is only about 23,000 VND and use for 1 month, so it is quite cheap to help fake ip to increase the bandwidth of the internet.

**Step 1:** Go to **CH Play / App Store** and type keyword **1111** to find, then download or can access the download link directly in the store below.

1. [Download WARP 1.1.1.1 for Android.](#)
2. [WARP Application 1.1.1.1 IOS version.](#)

# 1.1.1.1: Faster & Safer Internet

**Step 2:** Once the download is complete, open the app -> then, Turbo VPN asks to accept the terms of the publisher -> click **I AGREE** to agree.

**Step 3:** This is the main interface of the Turbo VPN application, select **the earth (red arrow)** to show up all locations you can fake ip. If you want to quickly, then click the carrot icon under the words **Click to connect** is the app will automatically connect to the nearest server.

**Step 4:** List of **VPN Locations** appears -> select any country you want to fake ip -> click **OK** to approve the connection request.

**Step 5:** So you have successfully fake ip with Turbo VPN application, now open your browser and surf the web freely.

Holding the dress together, each application has different strengths and weaknesses. It can be seen that, for WARP 1.1.1.1, it just supports Fake IP, speeds up and maintains Internet stability when using the Warp + function. It's free, but there aren't many countries to choose from and a VPN comes.

Touch VPN, Turbo VPN are 2 free applications, there are many different countries to fake ip, but some of them must use the Premium function to use and not increase the network speed as 1111.

## 4. Conclusion

So I have finished instructions on how to fake IP on the phone with WARP 1.1.1.1 application, Touch VPN and Turbo VPN quite detailed and complete. These three applications will be the most useful solution when your favorite games, software and websites are blocked for some reason.

Hope the article above will be useful and do not forget to share to your friends. Good luck!
