

# How to fake iPhone messages, create fake Messenger messages.

Creating fake messages to troll people is very simple, as we can use fake message creation apps or even some websites that generate fake messages completely free of charge.

Creating fake messages to troll people is very simple, as we can use fake message creation apps or even some websites that generate fake messages completely free of charge.

With websites or apps that create fake messages, you can change the message content to anything you want, and enter the name of the person you want to troll as you wish. This article will introduce you to some ways to create fake messages on iPhone.

## Create fake messages on iPhone

### 1. fakeimess

#### Step 1:

First, access the link below to go to the fake message creation page on FakeiMessage.

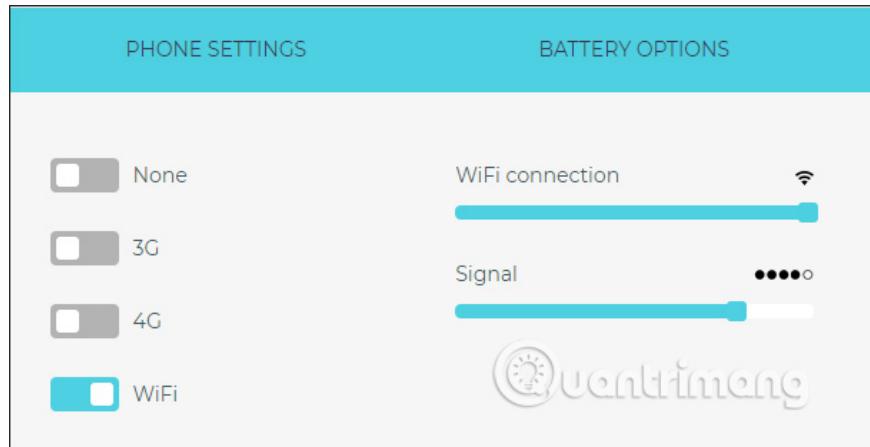

<https://www.fakeimess.com/generator/>

In this interface, we fill in all the information in each field to create a fake messaging screen interface on an iPhone. Below, there will be images showing each content on the screen so you can visualize what the messaging screen will look like. The Messages section is where you enter the message you want to send.

CONNECTION	MESSAGES
Name	Phone Clock
Trần Hà	9:41 AM
Operator	"Messages"
Viettel	Tin nhắn
"Contact"	"Send"
Danh bạ	Gửi
"Text Message"	
Hôm trước hẹn đi chơi mấy giờ nhì	

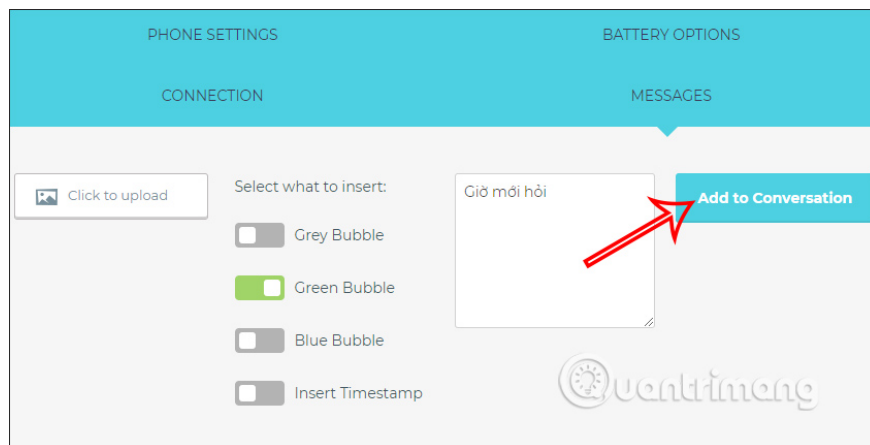

## Step 2:

Next, tap on **Battery options** to adjust the battery percentage display if desired. Then, tap on **Connections** to adjust your phone's internet and network connection settings.

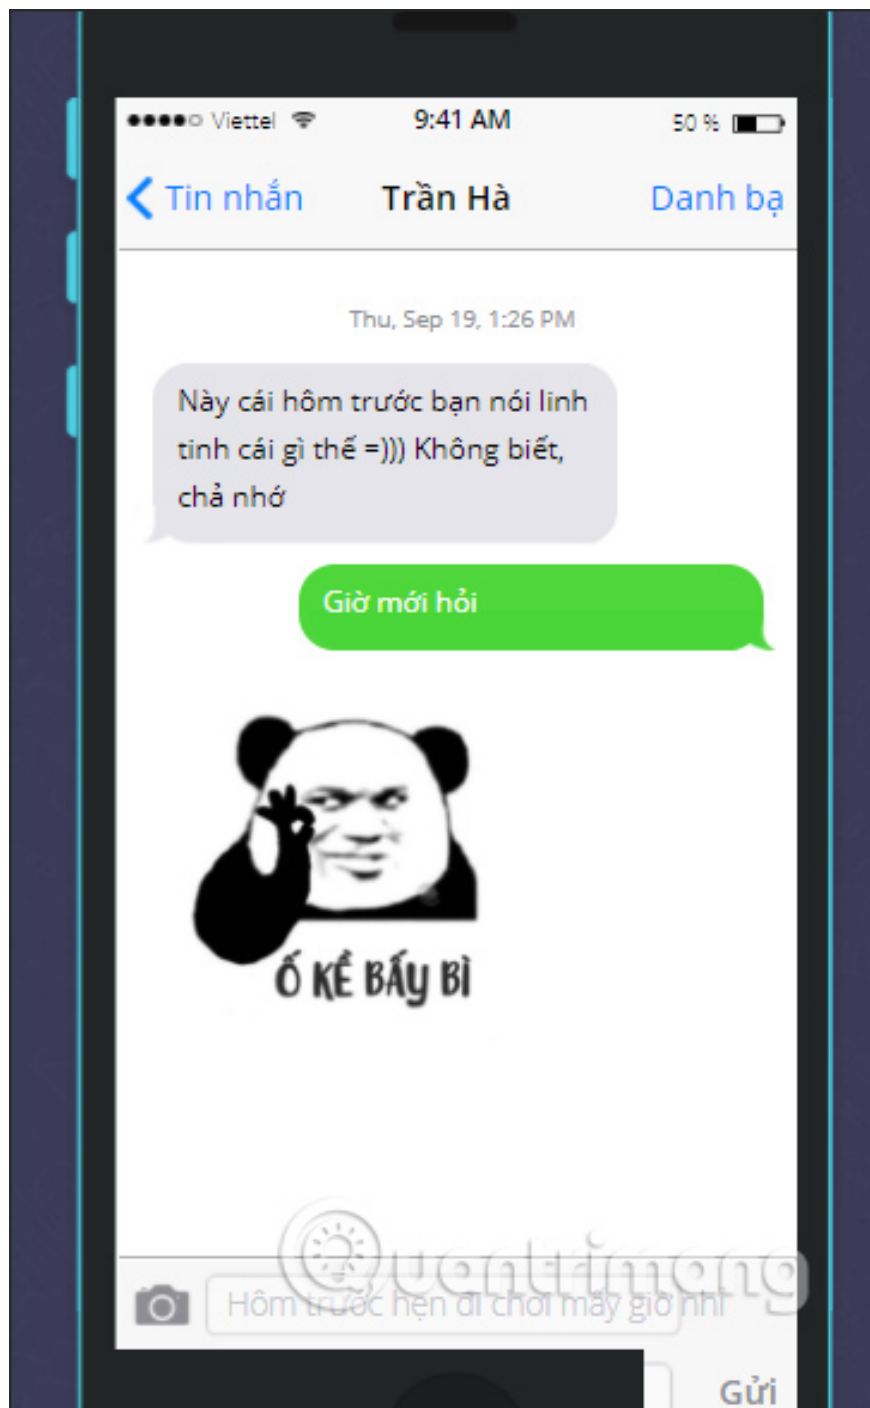

## Step 3:

Next, tap on **the Messages section** to **enter the message content** you want to customize. Here you can upload images if you wish. **Each color** represents **a received message and a reply**. Enable each color and then enter each message. After entering the reply or received message, **tap Add to Conversation** to add it.

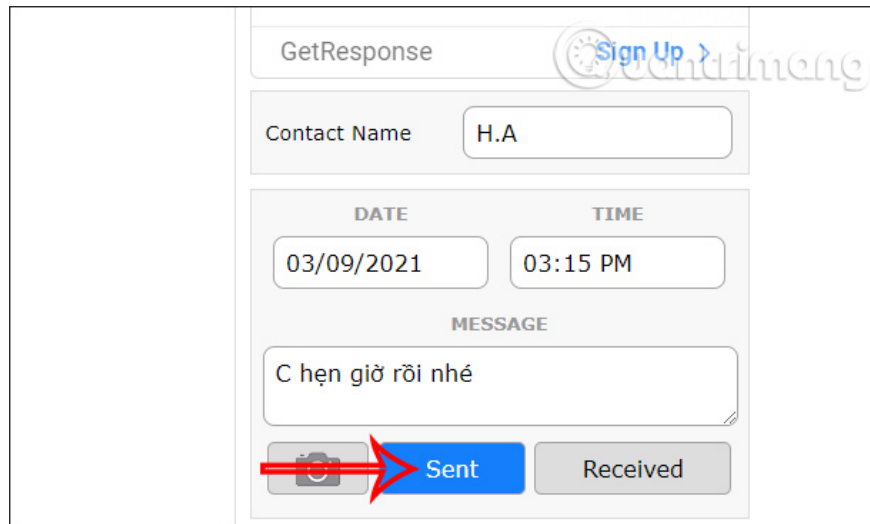

We can move the messages and images to different positions by changing the position of the message image below. Or click on each item to delete it. The messages will be displayed like this. Finally, **click Download Image** to download the message image. The image will be saved in PNG format.

## 2. iphonefaketext

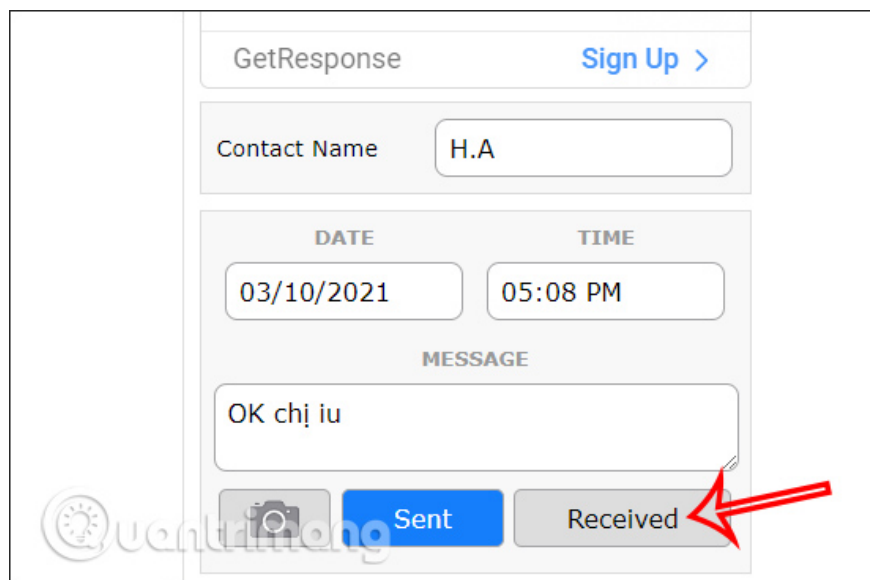

<http://iphonefaketext.com/>

On the iphonefaketext website interface, you'll immediately see the section for entering the message screen design from your iPhone. First, enter the message content for **the Send field** .

Click on the **"Received"** option to enter your message. If you prefer, you can click the camera icon to upload a photo instead of a message.

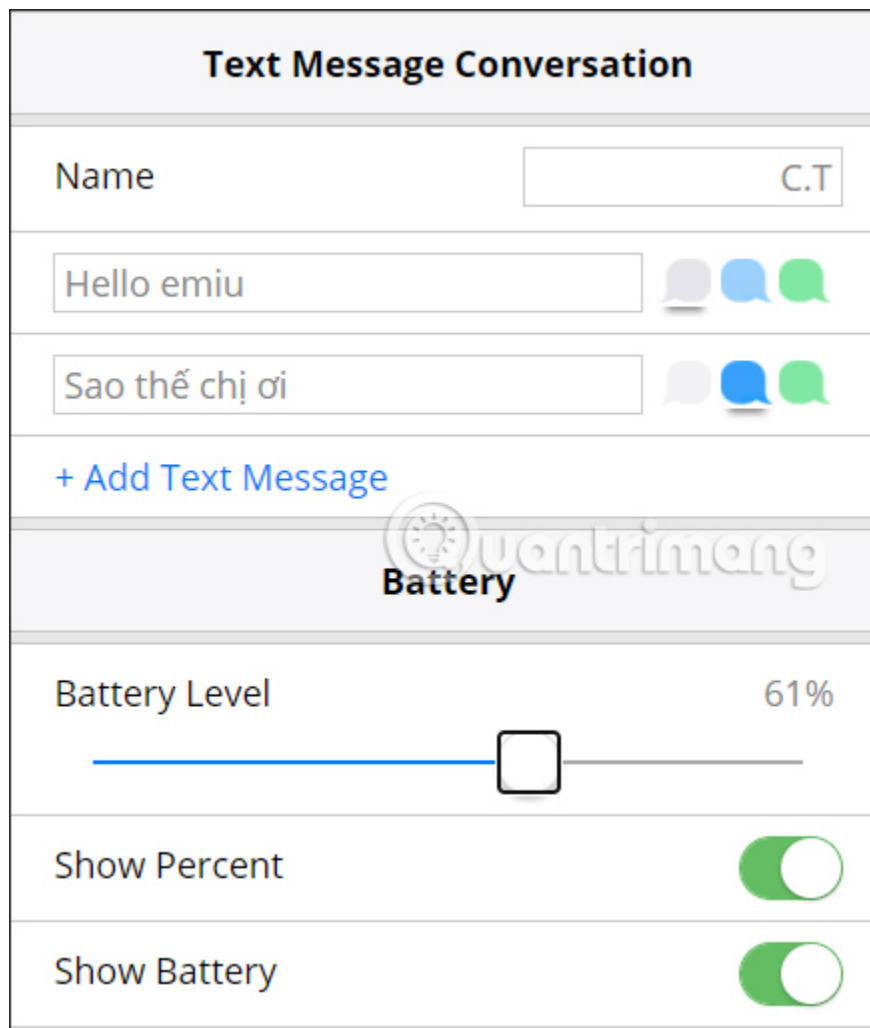

Finally, click Download Image or Download Action to download the GIF image.

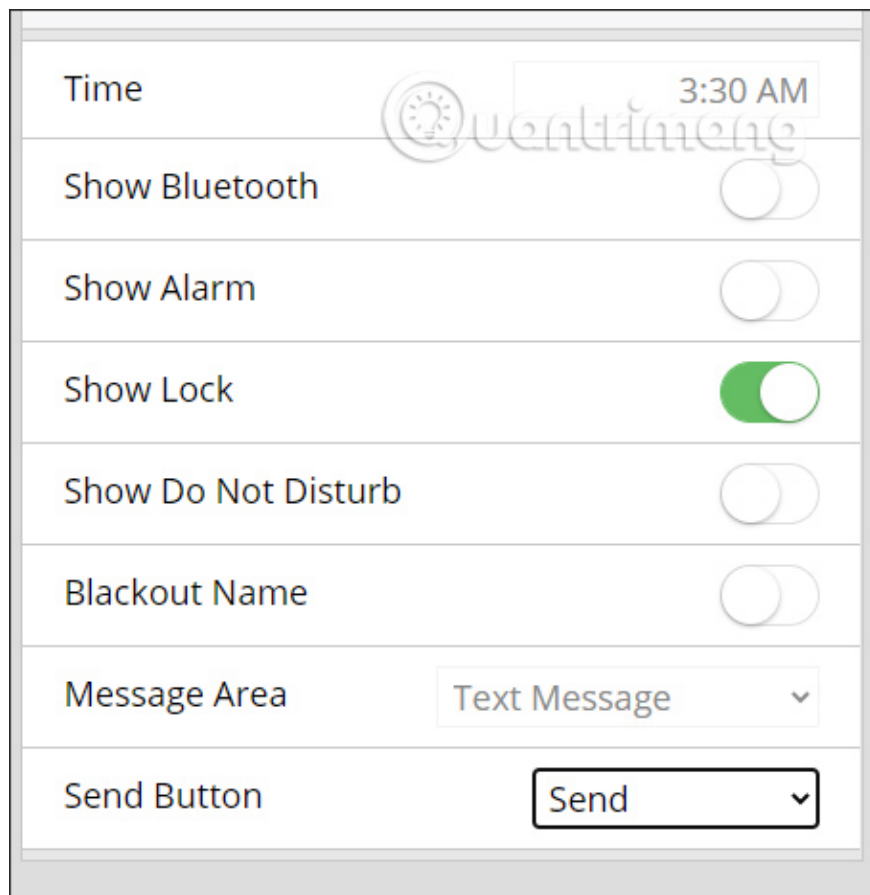

### 3. ifaketextmessage

<https://ifaketextmessage.com/>

We access the website link above and then you will see sections for entering content. First, you **enter the name** , then **choose a color for the message to represent the received and replied messages** . Click **Add Text Message to add a new message** . The **Battery** section adjusts the battery display.

**In the Connection** section , you adjust the displayed carrier information and can change the carrier name. Next, in the Settings section, you can enable or disable other display options. Finally, **tap Create Image** to create a message image, and then you can download the image.

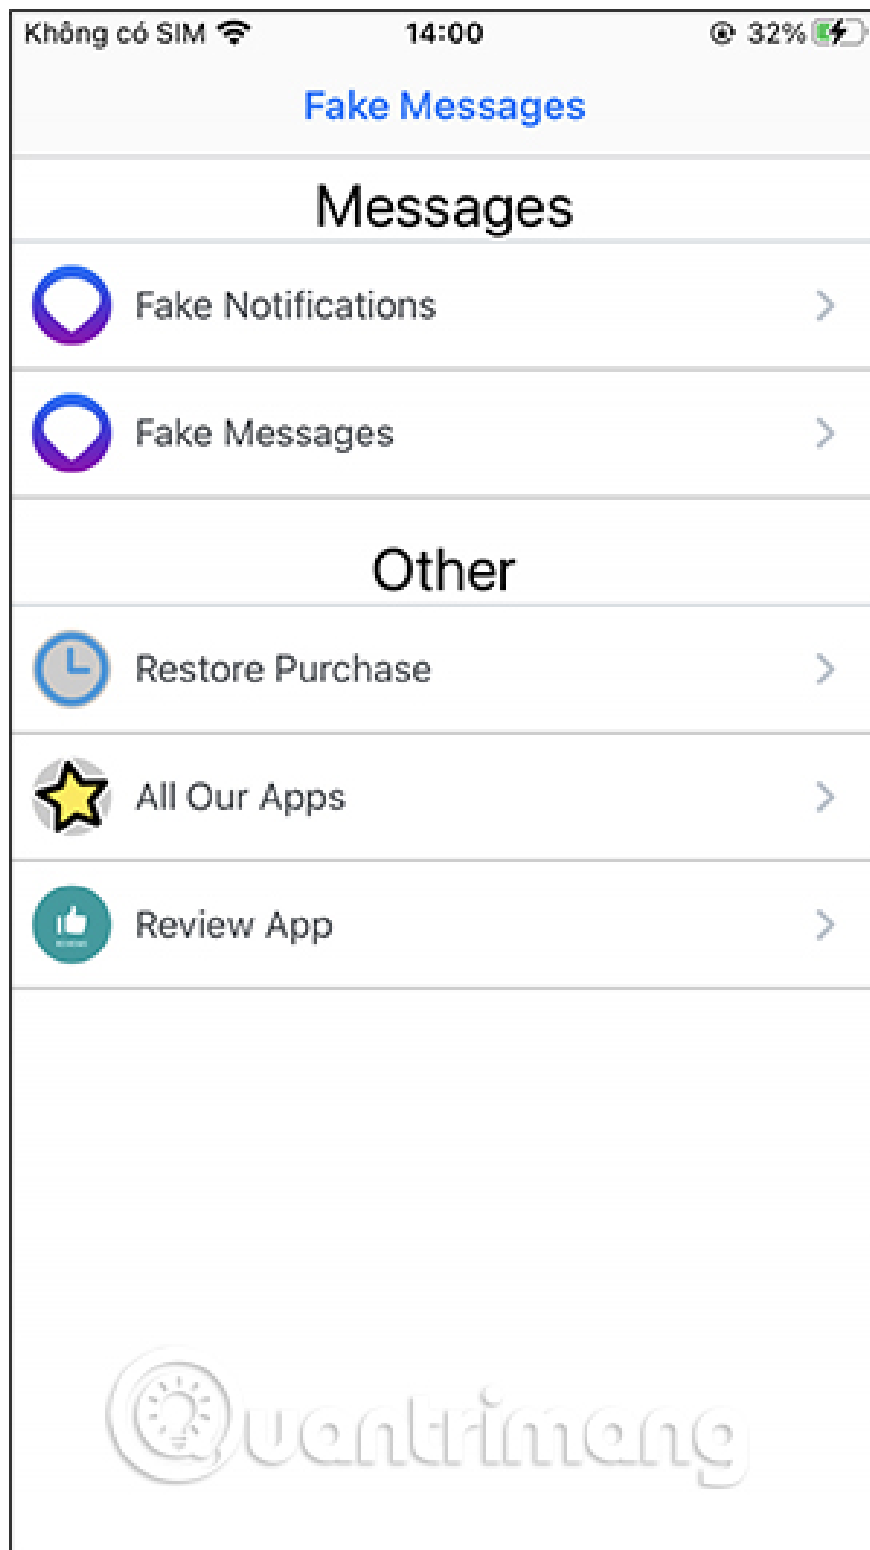

#### 4. Fake Messages app

##### Step 1:

You can download the Fake Messages app for iOS using the link below.

Download Fake Messages iOS

In the app interface, you'll see two options: fake message content and fake notifications. Note that one of these features is paid.

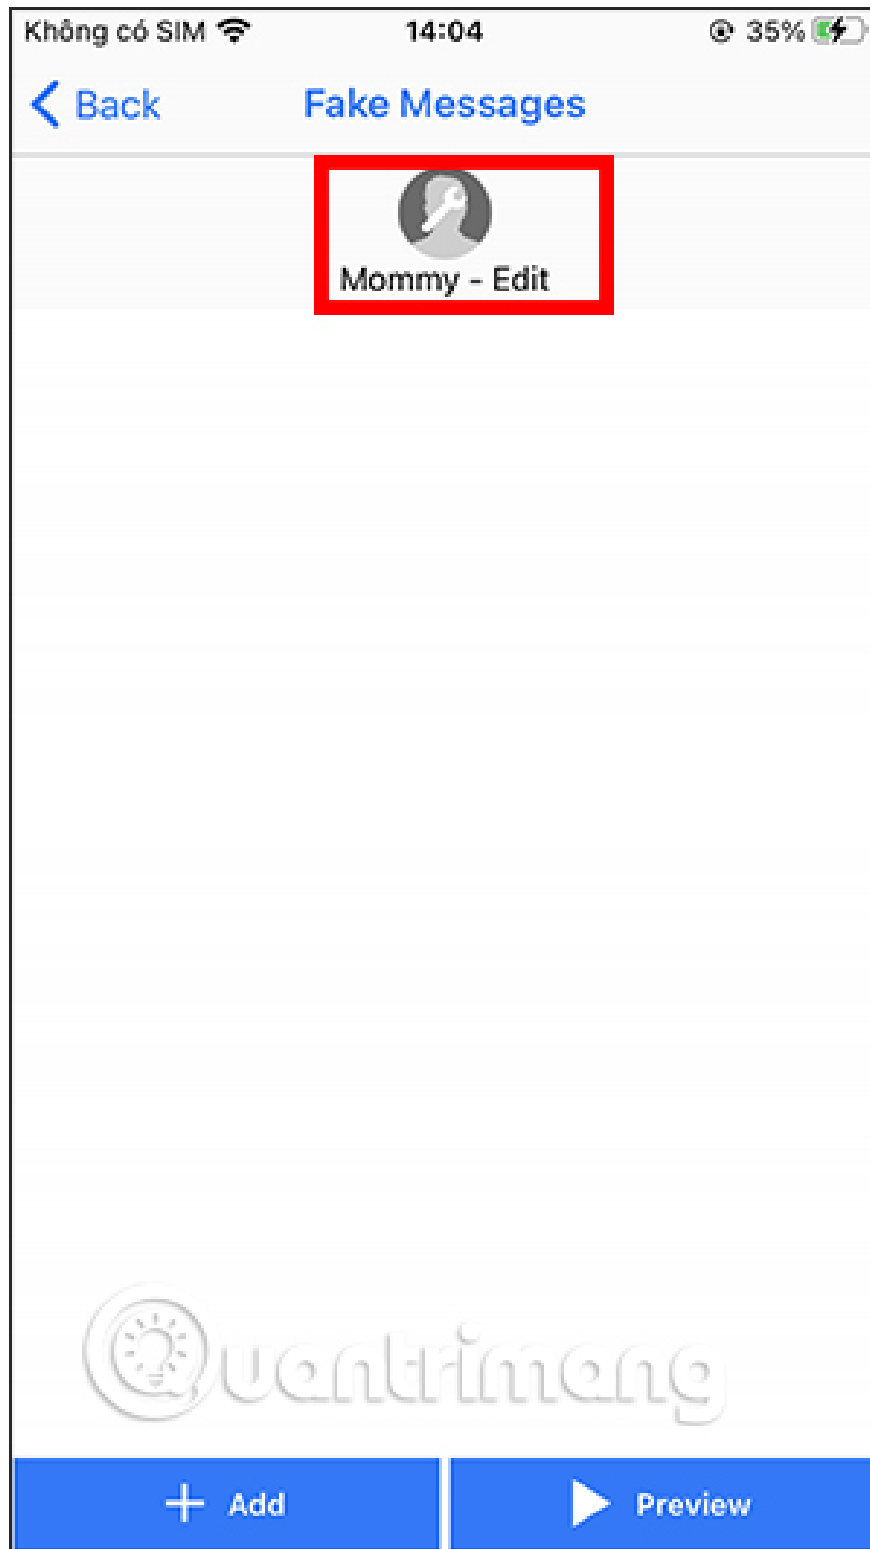

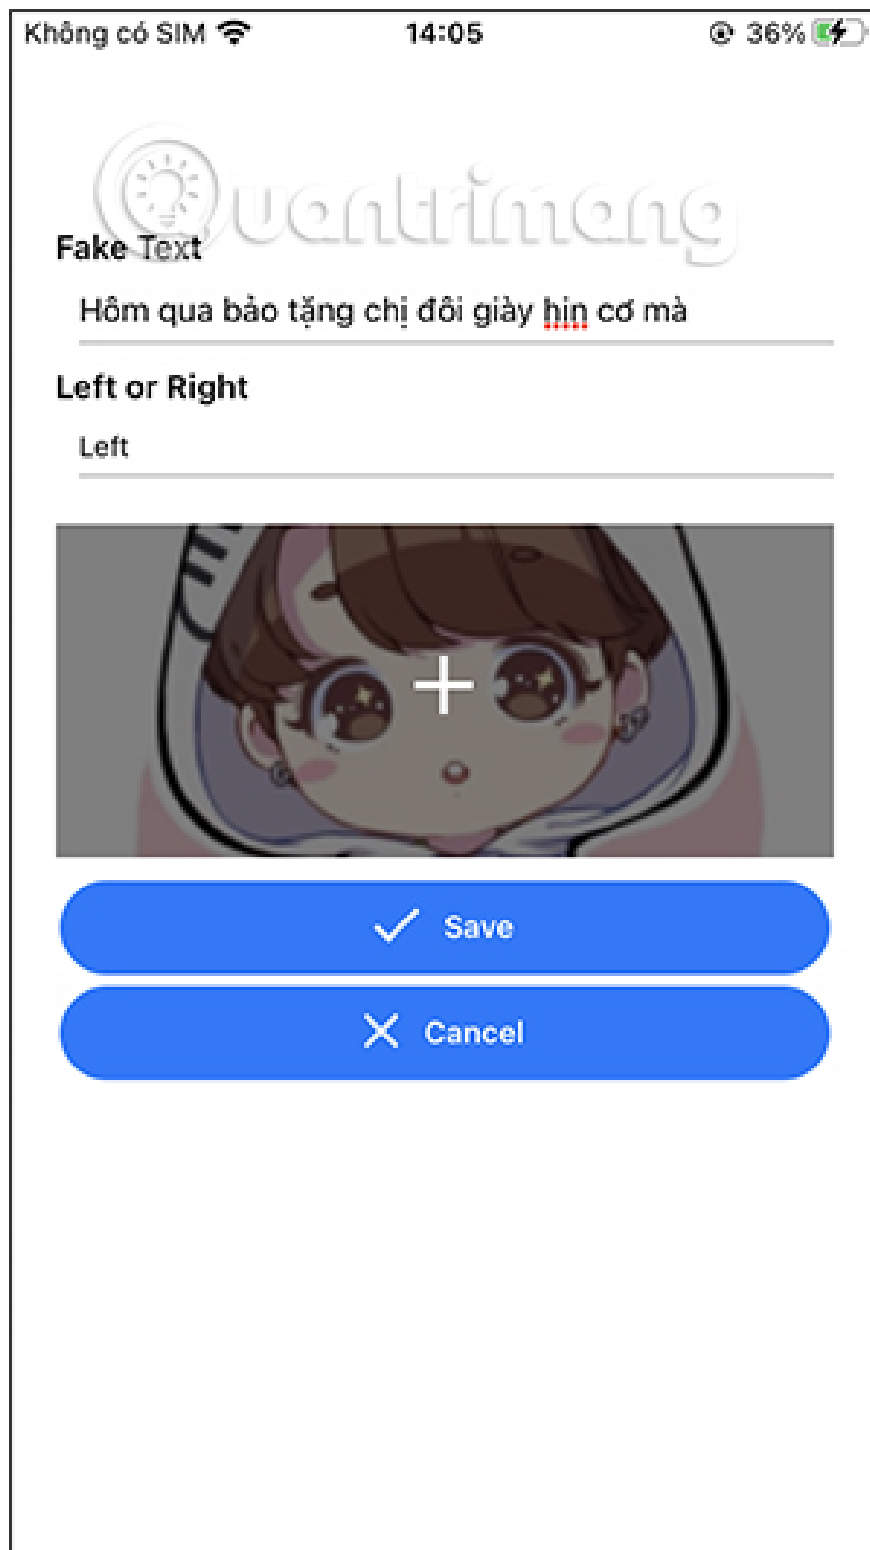

## Step 2:

In the fake message image creation interface, enter the sender's name, then **press the Add button** below to enter the message content.

The message input interface will appear. We will **write the message content** , then **select the message to display on the right (Right) or left (Left)** to represent the incoming and outgoing messages, creating a

complete message. Additionally, you can add images to the chat if desired. **Press Save** to save.

**Step 3:**

Finally, you will see the message sent and replied to as shown below. Continue by pressing Add to add more messages if desired. Press Preview to see how the message will look. Finally, tap **on the message image** and select **Save to Camera Roll**.

## How to create fake messages on Messenger

### Step 1:

You can download the Make It – The chat maker app for iOS devices to create fake messages on Messenger.

Download Make It iOS

This app helps you fake messages on Messenger, WhatsApp, Instagram, Snapchat, Telegram, and TikTok. **Choose Messenger** to create a fake message.

**Step 2:**

On the new interface, tap **the plus icon** to add fake message content. First, **enter the name of the person you want to fake the message for**, then tap **Create contact** to create the contact.

## Select a contact

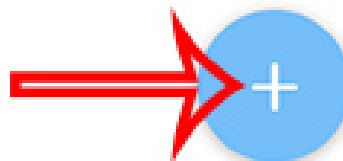

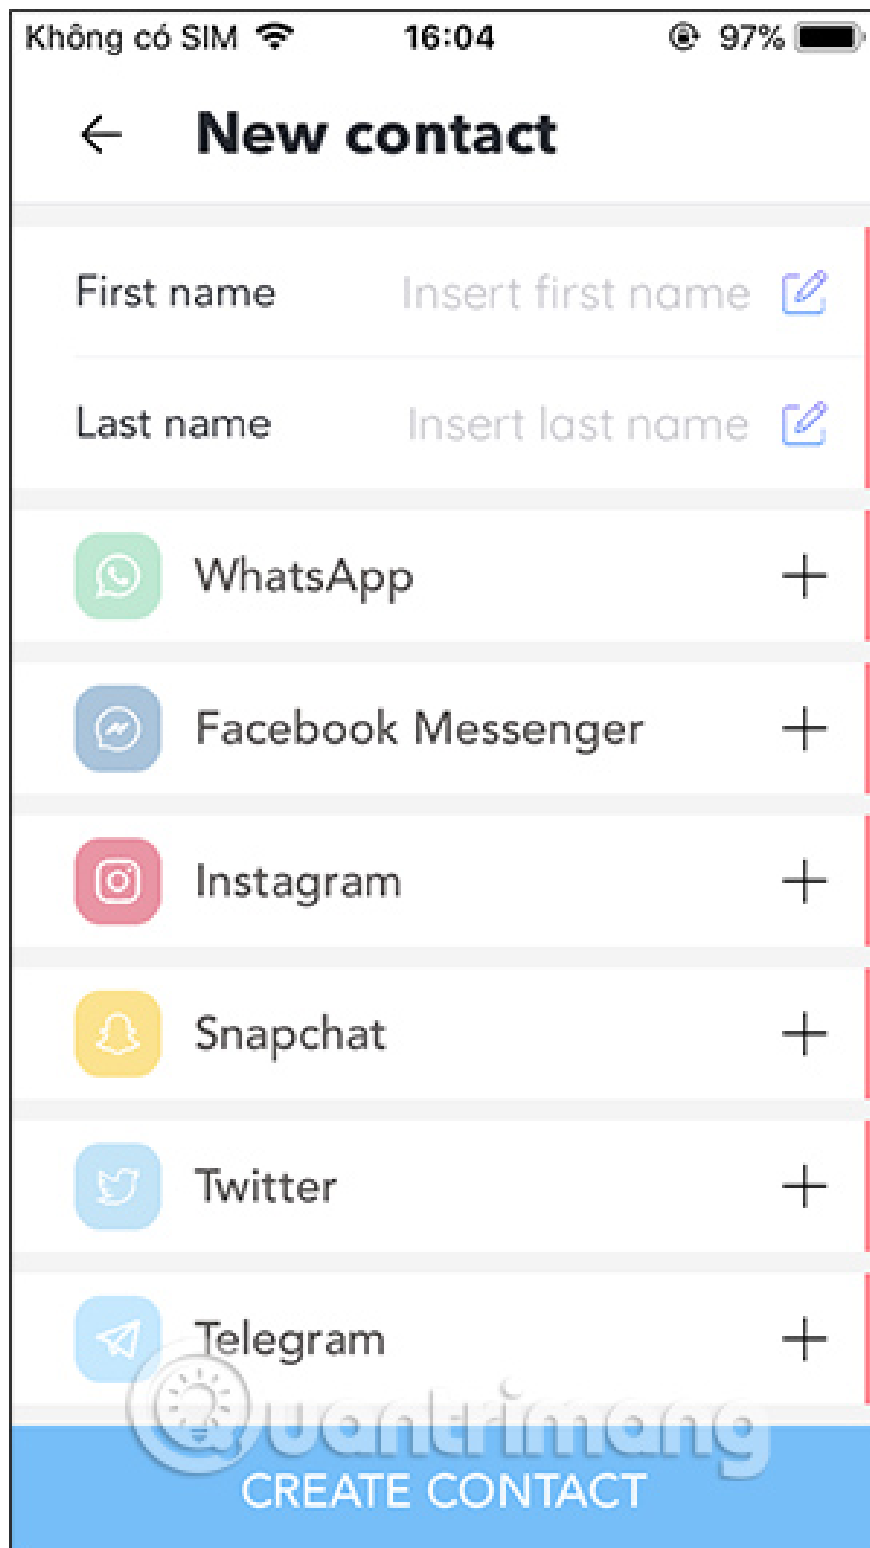

Select a contact in order to start a new chat, or create a new one by clicking "+" button

### No contact saved

Tap PLUS button in order to create your first one.

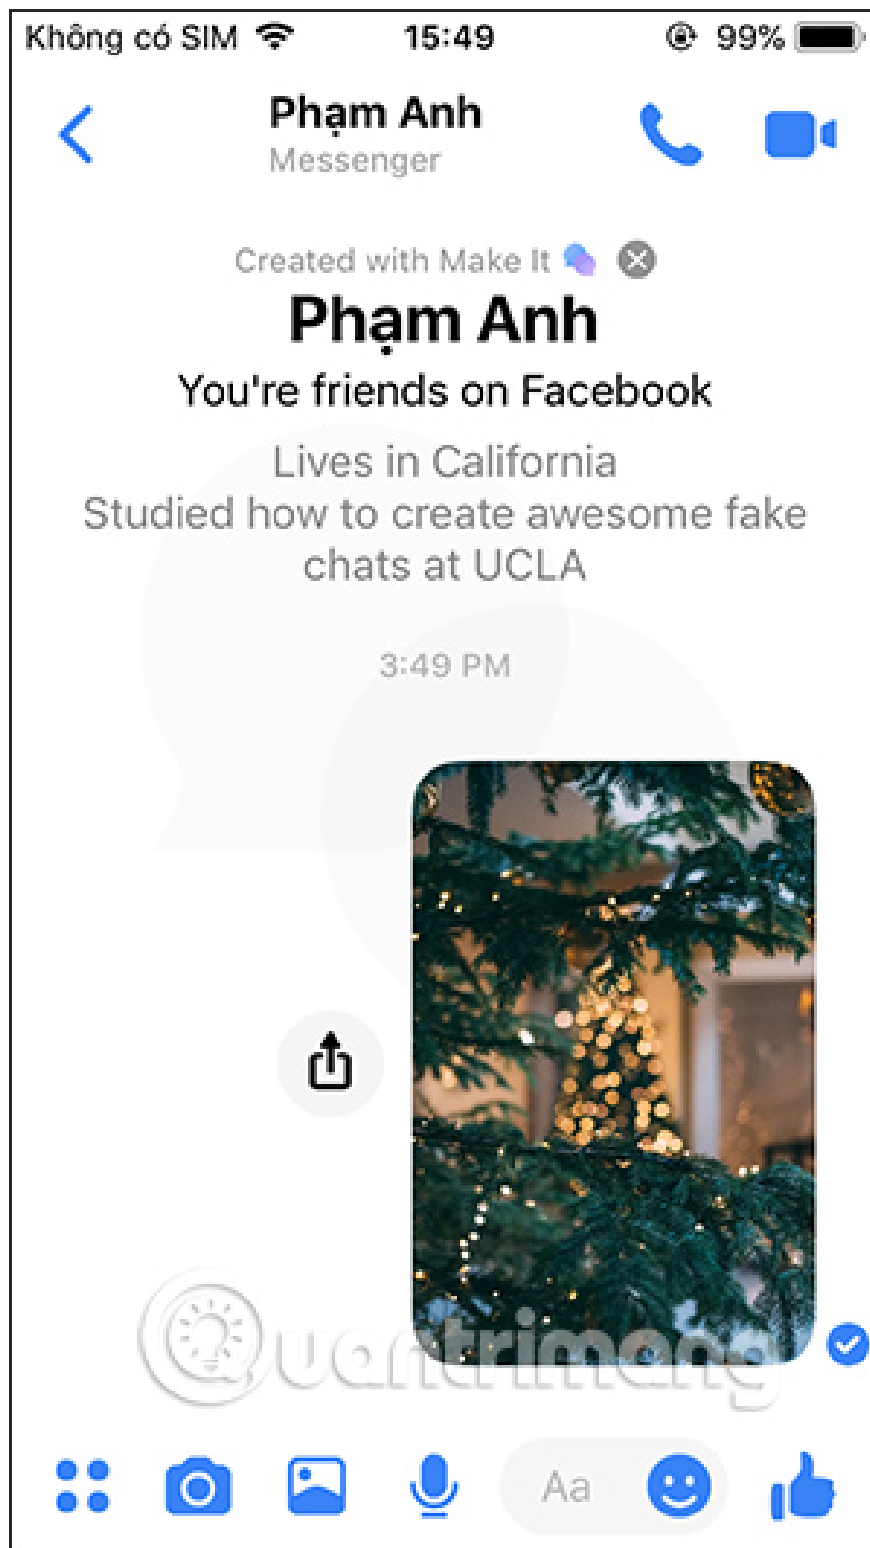

Contacts will be saved inside Make It for you to use them anytime you need to!

**Step 3:**

So you've now created the contact to generate the fake message. Now you'll see **the Messenger messaging interface** with all the messaging tools as shown below.

Tap the message input box, and you can **enter the recipient's message content** , or **the message you want to send by activating "Send by you"** . Then tap the send icon to send the message.

The fake Messenger message result is shown in the image below. You just need to take a screenshot and send it to your friends.

# Text message

Text:

Hehe

Sent by you

Did you send this message?

If you did not, just turn the switch off.

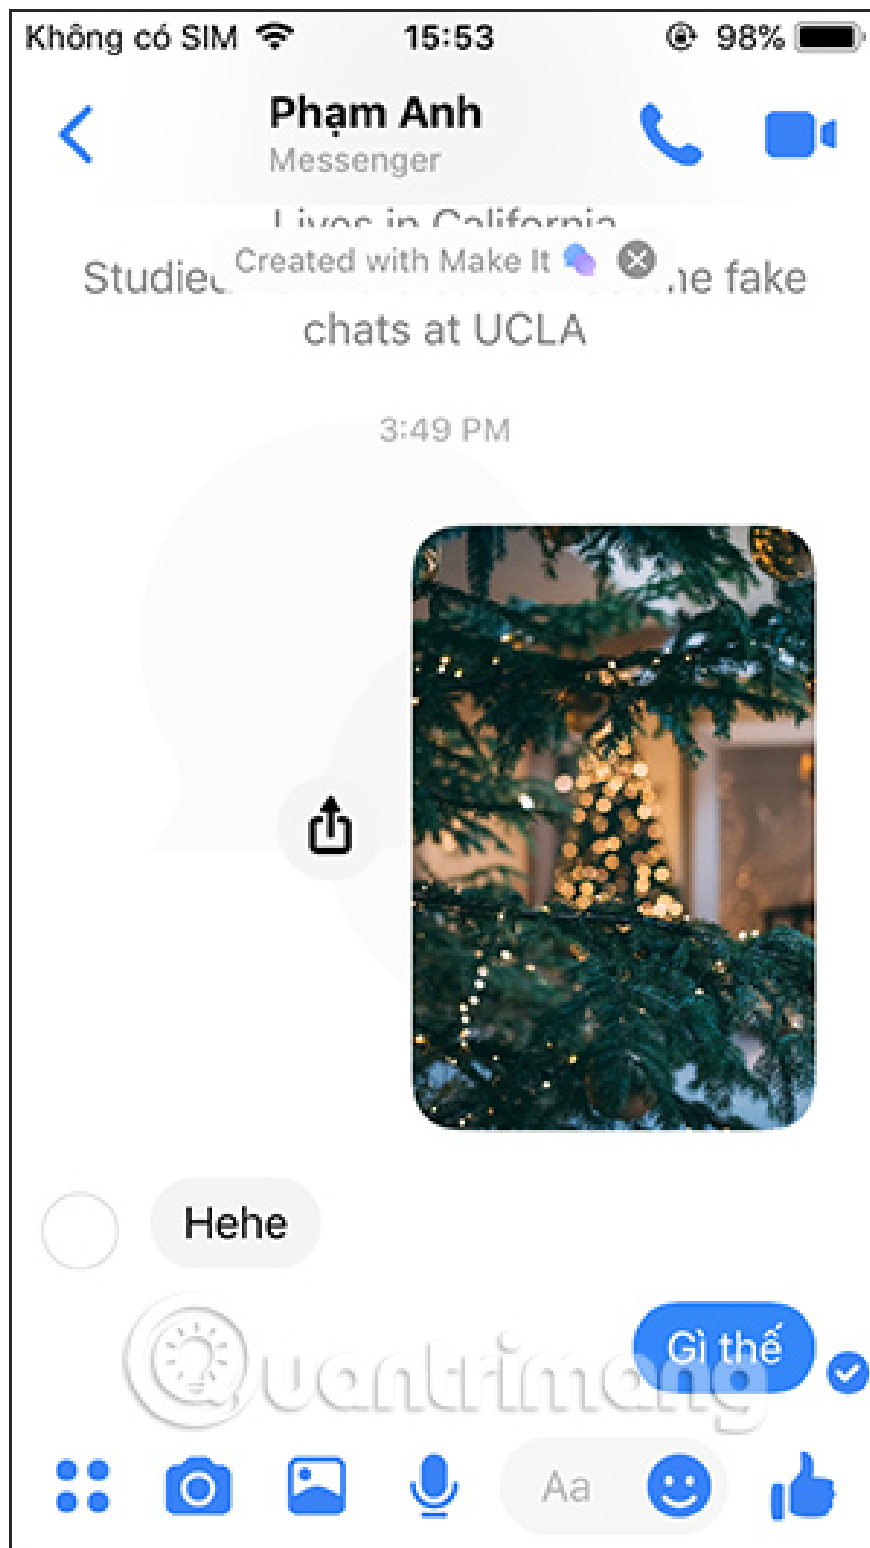

Remember that all received messages have 'Read' status.
