How to fight Ender Dragon in Minecraft. There is a way to win the Minecraft game, which is conquering the dragon Ender (Ender Dragon). And of course this is the most difficult challenge built in the game. Your task is to go to The End

There is a way to win the Minecraft game, which is conquering the dragon Ender (Ender Dragon). And of course this is the most difficult challenge built in the game. Your mission is to go to The End and hit your Ender Dragon.

Here, ThuTh ThuatPhucSoft.vn will guide you step by step to go and conquer this last boss dragon. Invite you to follow!

## Prepare

Since this is a real and difficult adventure, your preparation needs to be sure, bring the following:

1. Bring a chest and a bed near the End gate so that when you die, you can return to the fight quickly, take a nap and put a few items in the chest. Note that you should not bring the bed to The End because it will explode when sleeping.
2. Armor: Wearing the best type of armor you have, should be a diamond enchantment.
3. Shoes: The Feather Falling shoe should be used to reduce damage when dropped from above.
4. Sword: Best is a diamond sword with Sharpness charm.
5. Pickaxe: Nobody leaves home without it.
6. Bows and arrows: Bring a lot of arrows, at least fill 2 cells equivalent to 128 arrows.
7. Food: Bring along cooked meat dishes to be able to recover quickly.
8. Thang: Bring multiple ladders, at least 3 full cells.

9. Ender Pearls: Has the effect of teleporting a short distance, very useful in combat.
10. Block: A compartment filled with any block, be it rock or soil.
11. Healing Medicine, Regeneration and Night Vision.
12. Pumpkin Heads: There are many Enderman so you may want to avoid fighting with them, but the pumpkin will limit the visibility.
13. A plunger or source of red rock (red stone torch, lever or button) to collect Dragon Eggs after you win.
14. Glass jar if you want to collect the dragon's breath (Dragon's Breath) to make medicine.

## Find the underground dungeon

To reach The End, you first need to find the End gate in the underground dungeon. The dungeon is built with honed moss stone, you can find libraries and a horde of silver fish suddenly appear here.

If you cannot find this dungeon, you need to make several Eye of Ender, prepare about 15-20 if possible. Then prepare the necessary items for a long trip and start on the road.

Go outside and throw Ender's Eye in the air, it will always fly towards the nearest dungeon, then it will fall to the ground and you can pick it up, sometimes it breaks right in the air, that is why I want you to have lots of eyes prepared.

Keep going in the direction that the Eye flew, go one at a time to release an eye to determine the direction you need to go. Remember to plug a torch to mark the way to avoid getting lost in case you want to go home.

Once the dungeon is located, Ender's Eye will immediately fall to the ground at this location instead of flying into the sky.

You proceed to dig down, apply the technique of digging 2 blocks for safety: Dig 1 block next to determine if there is lava below and then dig the block below your feet.

Just like that and will definitely reach the dungeon.

When digging down, you will find the room as follows, containing an Ender gate and a gamblers, you need to quickly use the hoe to break the furnace and destroy all the Silver Fish.

## Activate the End Portal

Place Ender's Eye in the open cells, the gate will be opened for you. Jump in there and you'll get to The End.

## Go to The End

When you come here, you will find yourself standing on an End stone platform and surrounded Enderman. Look for the place with 8 Obsidian Towers (End Spike) surrounded. This will be where you see the Dragon Ender and fight it.

If you find yourself in a small cave, dig the stairs up to the surface. In case you are in a small dig, far from the main island, throw the Ender Pearl to teleport or use blocks to build bridges.

## The dangers

### Enderman

Don't look them in the eye and move quickly, if you find it difficult to avoid, put the pumpkin heads on and head over to the arena.

### Dragon Ender

The Dragon will attack you in many ways from above with fireballs or breaths, both leaving a toxic area on the ground that you should stay away from. The dragon will also deal damage to you if you hit its head and wings.

If you bring a glass jar, you can exploit the Dragon's Breath to serve later modulation.

The biggest risk is that the Dragon can throw you into the air or when you turn off a Spike End.

When the Dragon attacks you, hitting its head with a sword or arrow can cause it to cancel the attack. The Ender Dragon is healed when it comes near the Ender Crystals, so the first thing you need to do is destroy the Crystals first.

## Destroy the Crystal End

The Crystal End is located on the top of the End Spike. You need to destroy all 8 Crystals corresponding to 8 End Spike before attacking the Dragon. Normally you will have to climb the stairs to the top of the tower and use the hoe to destroy it, if "high-handed" then you can shoot arrows on it.

When destroyed, Crystal End will explode equivalent to a TNT, so you should use the trick is to stand on a ladder and destroy it from afar. You will not be harmed. With this location, you can also easily use arrows to shoot the crystals in the other towers. However, do everything quickly, if you are hit from such a height, it will be a great loss.

## Kill dragons

After all of the Crystal Ends have been destroyed, the Dragon Ender will tend to fly to the socket with Bedrock in the center.

Wait here, when it flies down, use your sword to attack it from behind. Avoid attacking the head and its way, or it will knock you out. After a short time the Dragon will fly in the sky again but it will soon return.

Continue to do so until the Dragon is destroyed.

## End

The Dragon Egg will appear at the top of the nest, and the End Gate will start working so you can return to your world, the experience will drop a lot.

To get the Dragon Egg, you place the Plunger next to it, then use the engine to push the Egg out.

If you want to restart the fight, put the 4 Crystals back in a symmetrical position around the Dragon's Drive, and the Ender Dragon will quickly return.

Above is the method to defeat Ender Dragon in Minecraft, wish you happy gaming!
