On iOS 11 and above, Apple has integrated screen recording feature without external applications such as Airshou, Bbrec . Invite you to track how to film your iPhone and iPad screen in the following tutorial!

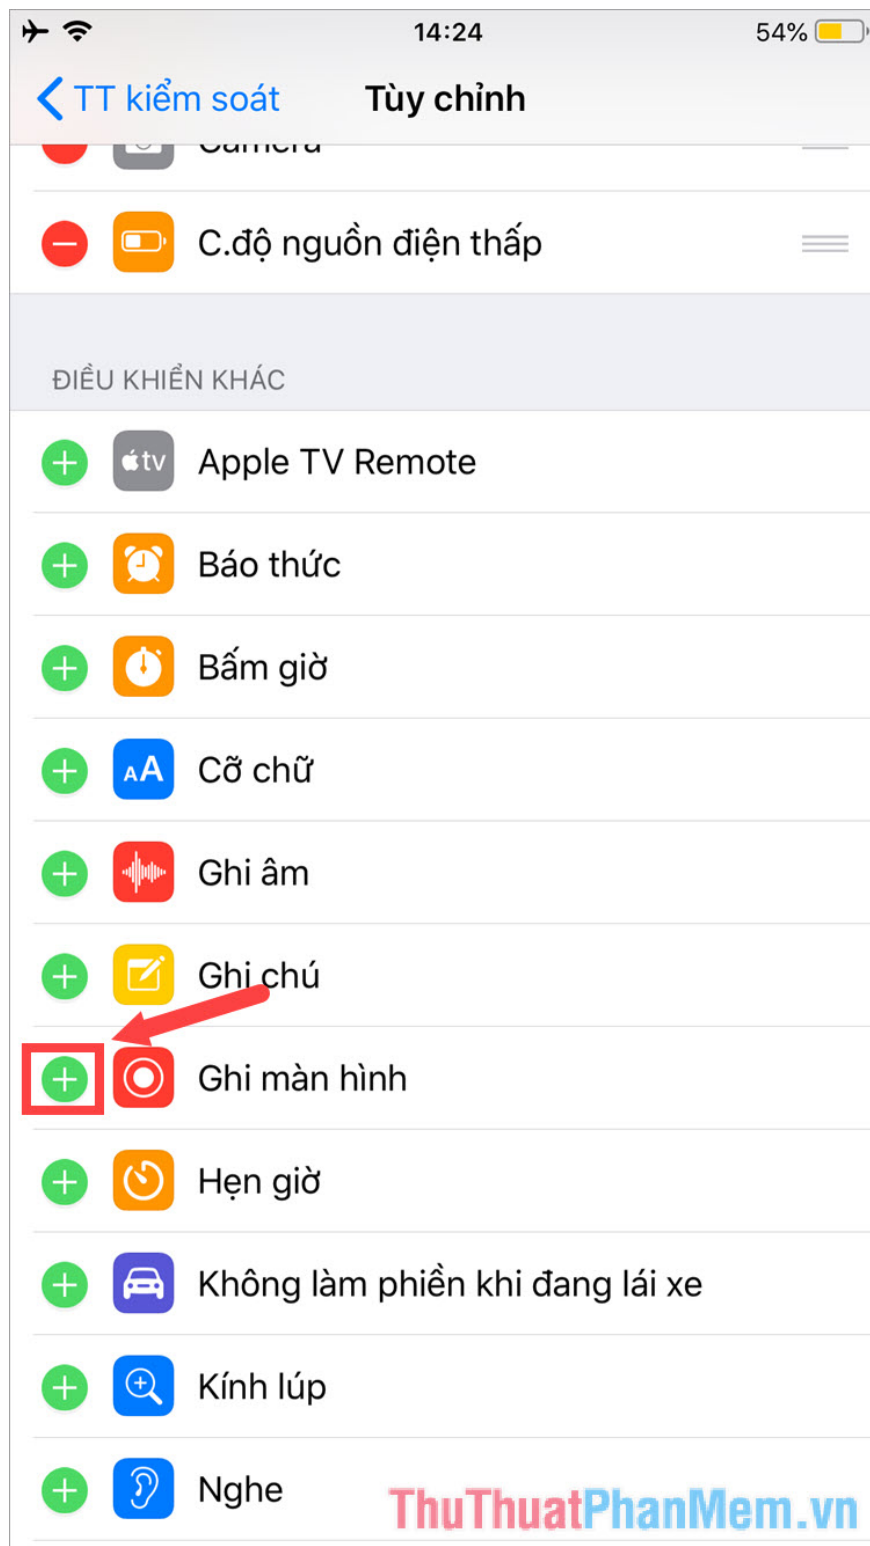

To record screen on iOS 11, 12, we must enable this feature in the control center first.

Step 1: Go to Settings => Control Center .

Step 2: Touch the **Customize controls** and add **Screen Recorder** item .

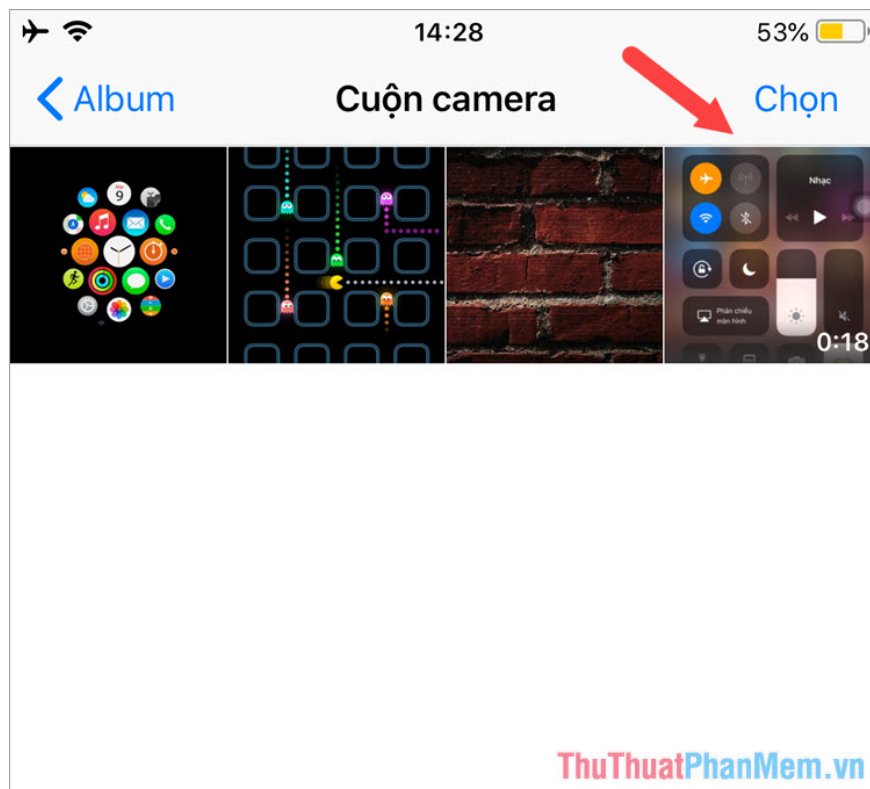

Step 3: You swipe the screen from the bottom up to open the control center, if there is a circular icon as shown below. Click the **Screen Recording** icon to start screen recording.

Step 4: To finish the screen recording process, you swipe the screen from the bottom up to open the control center and touch the screen recording icon again to turn it off. Notice **Video screen recording is saved to the image** is done.

Step 5: To view the video recording screen, you open **Photo Album** and touch the video to record.

Above is a guide to screen recording for iPhone and iPad on iOS 11, 12 is simple and easy to understand. Please follow the instructions above and write down your comments and reviews about the article in the comment section below! Good luck!
