

# How to filter malicious comments on social networks

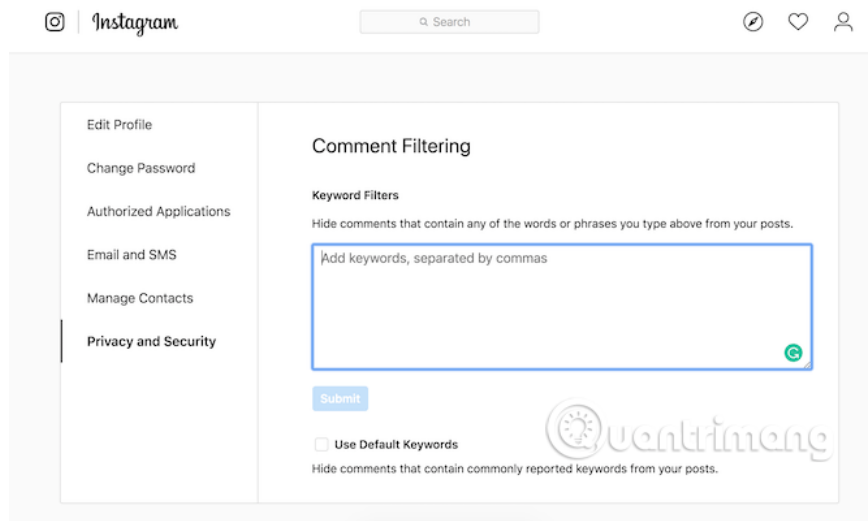

Today on the Internet especially on social networks, we often encounter malicious users, with negative thoughts, hatred. They often write 'malicious' comments that affect other social network users.

Today on the Internet especially on social networks, we often encounter malicious users, with negative thoughts, hatred. They often write 'malicious' comments that affect other social network users.

Such comments may adversely affect the use of social networks and affect your mental health. However, you can easily filter these malicious comments on different social networks.

1. How to censor, block comments, unblock comments on Facebook Fanpage
2. Great way to deal with objects who like to 'stoned' on social networks
3. Things you should not share on social networks

## How to filter malicious comments on Instagram

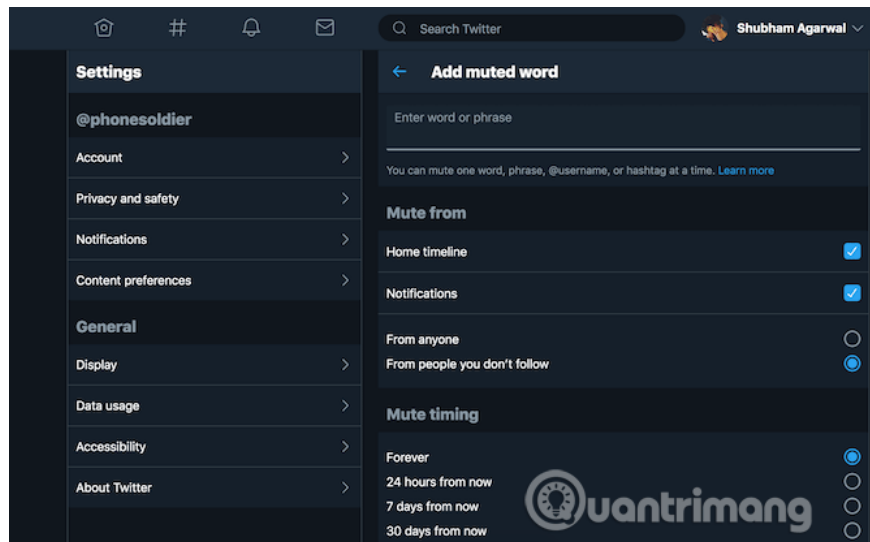

Instagram allows you to remove specific keywords in comments. In addition, you can also enable automatic hide option of vulgar words reported. Comments containing these words will be removed from your post and people will not see these comments. In addition, Instagram uses an algorithm to detect and block malicious comments.

To access this tool on your phone, you need to install it on the Instagram app. Visit **Privacy and Settings**> **Comment Controls** to find all automatic and manual filters.

In **Manual Filter** , you can add as many words and phrases as you want as long as they are separated by commas. You can also adjust who is allowed to comment on your post and limit only followers to comment. If someone regularly comments on obscene, obscene words, you can also block that particular account.

On your computer, launch the Instagram web application, open **Settings** , click **Privacy and Settings**, and then click **Edit Comment Settings** .

## How to filter malicious comments on Twitter

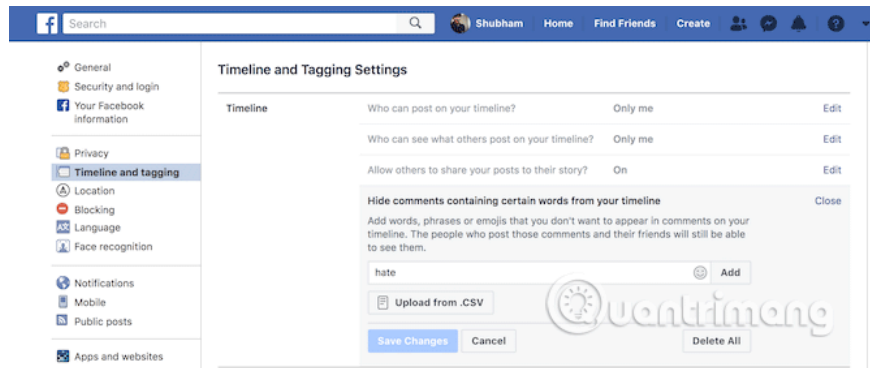

Twitter allows you to remove specific words in a comment but it does not delete related comments from your post. On Twitter, you can hide tweets on the timeline or in a notification when you find a word, phrase with words or even hashtag specific.

In addition, you can determine the expiry date after the phrase is automatically removed from your block list. To access Twitter's blocking settings on the mobile app, tap the **Settings and Privacy option** from the left navigation. Then, visit **Privacy and Safety> Muted Words** . To add a new item, click the plus sign icon, type the word or phrase, choose where you don't want the phrase to appear and set the time.

On your computer, open the Twitter website, access **Settings and Privacy** from your profile> **Content Preferences> Muted> Muted Words** and add filters.

## How to filter malicious comments on Facebook

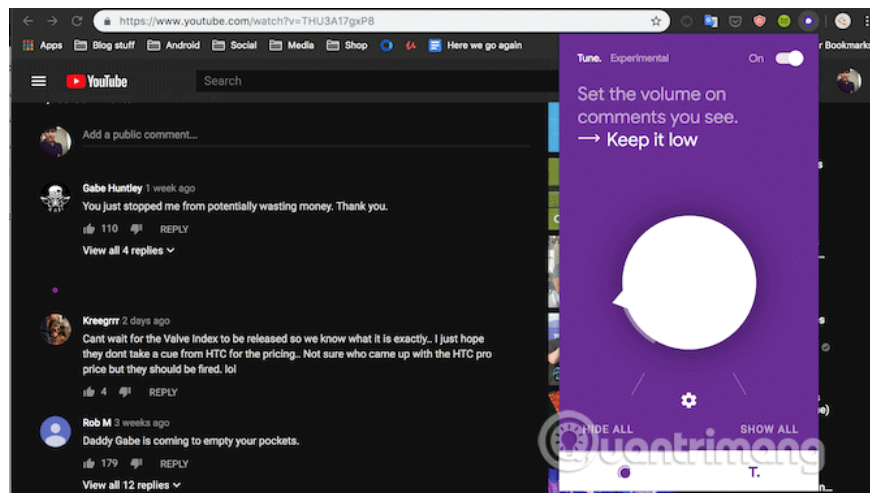

Facebook also offers some simple comment filtering options. You will have to manually set the list of words you want to block. Like Twitter, Facebook will hide comments that match the conditions you set out on the timeline instead of just hiding your posts.

However, you can only filter comments on Facebook's site, this feature is not available on the app version. To block certain words, log in to your account, tap the down arrow in the top right corner, click **Settings**. Visit the **Timeline and Tagging** page, click the **Edit** button next to the **Hide comments containing certain words from your timeline**.

Now add the words, phrases or even emoticons you want to hide from the comments section of each post. Facebook also allows you to upload a CSV file in case you have a long list of words to block. When finished, click the **Save Changes** button to save the changes.

## How to filter malicious comments on other social networks

These are malicious commenting methods on major social networking sites, but they are still full on the Internet. So how to not see these comments? That's why you need to use Google Tune extension on Chrome.

Google Tune uses a variety of machine learning frameworks and allows you to adjust the level of malicious comments. It works on a variety of top platforms like Disqus, YouTube, Reddit, Facebook and Twitter. Because Google Tune supports Disqus, it is also available on most websites.

You can turn it on to read each comment or turn it off to block all malicious comments. This extension allows you to ignore comments of all kinds such as personal threats, insults, profanity and sexual harassment.

Currently, the Google Tune extension can only be installed on the Google Chrome desktop application. However, it is free and despite being in beta, Google Tune delivers quite accurate results.

To get started, you'll have to download Google Tune from the Chrome Web store. Once installed, sign in with your Google account and activate it for the websites you visit. Google claims that Tune does not store any of your personal data so you can be assured of privacy.

## How to turn off online comment completely?

If you want to completely turn off online comments, try Shut Up. This is a browser extension that can block comments on platforms like YouTube with one click.

This utility will remember your preferences so that you will not need to reset it next time. Shut Up is available as an extension for Chrome, Firefox and Safari and apps for iOS.
