How to uninstall and reinstall Microsoft Store fix error 0x80080005

The interface informs error 0x80080005 on Microsoft Store as shown below.

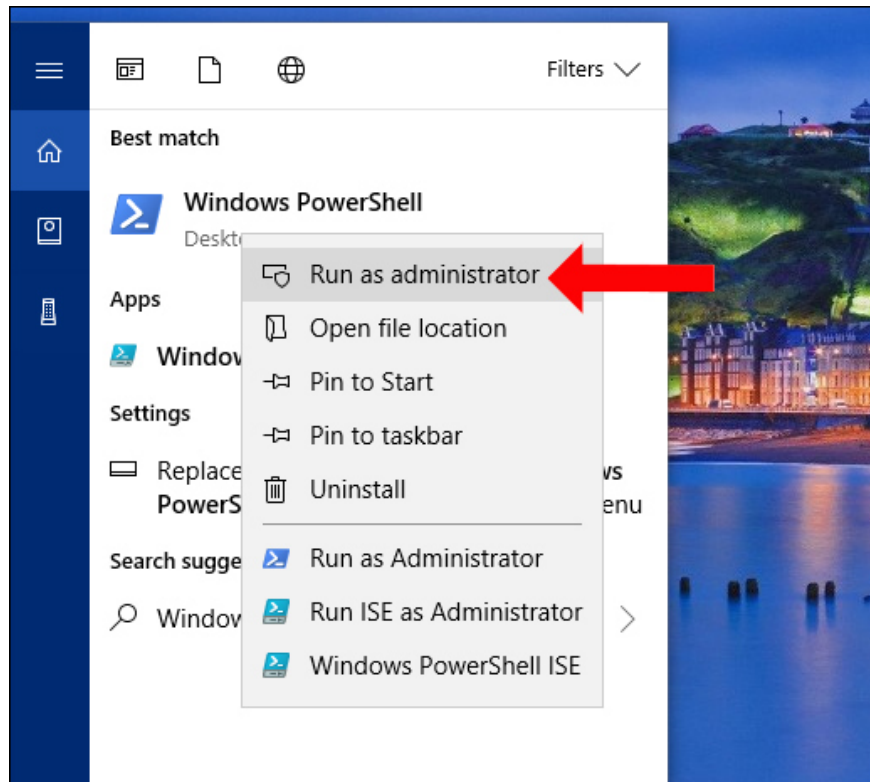

Step 1:

In the Windows search bar, type the **keyword Windows PowerShell** , then click on the result found above.

Next right-click Windows PowerShell and select **Run as administrator** to run the application with system administrator rights.

Step 2:

Switch to the new interface. Here, we need to enter **the Get-AppxPackage -name * store *** command and **press Enter** to execute the command. After executing the command, the Microsoft Store system identification name will appear.

Step 3:

Next, the user finds the Name line Microsoft.Windows Store. Then **copy the Microsoft Store application package name** at the **Install lineLocation** .

For example, in the InstallLocation line, the content is C: Program FilesWindowsAppsMicrosoft.WindowsStore_11711.1001.5.0_x86__8wekyb3d8bbwe as shown below.

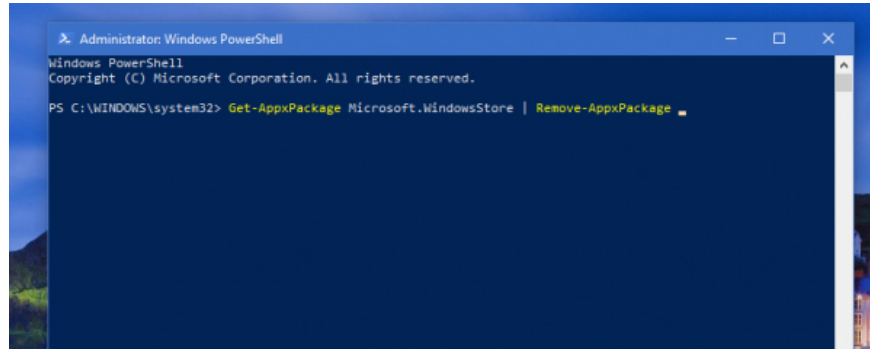

So we will proceed to copy Microsoft.WindowsStore_11711.1001.5.0_x86__8wekyb3d8bbwe on that content.

Step 4:

Once you have identified the Microsoft Store system name, you continue to **enter the Get-AppxPackage Microsoft.WindowsStore command | Remove-AppxPackage** .

Then **press Enter** to proceed to remove Microsoft Store.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

PS C:\WINDOWS\system32> Get-AppxPackage Microsoft.WindowsStore | Remove-AppxPackage
```

Step 5:

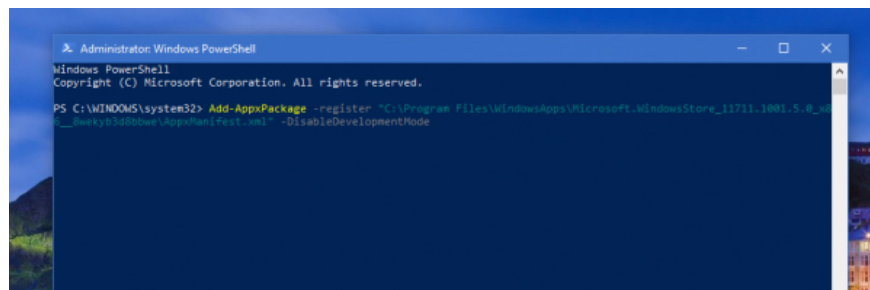

Next, re-open **Windows Powershell with administrative rights** if you have closed the window.

We will enter the **Add-AppxPackage -register command 'C: Program FilesWindowsAppsYourStorePackageNameAppxManifest.xml' -DisableDevelopmentMode** into the interface.

Where **YourStorePackageName** will replace with the Microsoft Store system name just copied above. So I will have the link as below.

C: Program FilesWindowsAppsMicrosoft.WindowsStore_11711.1001.5.0_x86__8wekyb3d8bbweAppxManifest.xml -DisableDevelopmentMode

Press **Enter** to execute the above command. The entry of the Microsoft Store system name is quite complicated, so please do it correctly.

```
Administrator: Windows PowerShell
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

PS C:\WINDOWS\system32> Add-AppxPackage -register "C:\Program Files\WindowsApps\Microsoft.WindowsStore_11711.1001.5.0_x86__8wekyb3d8bbwe\AppxManifest.xml" -DisableDevelopmentMode
```

Finally we wait for the installation process to complete and check in the Start section. Restart the computer and then go to Microsoft Store to install and upgrade the UWP application.

When downloading applications or upgrading on Microsoft Store, users sometimes encounter some errors such as the error message 0x80080005 above. In this case, the user is forced to remove the Microsoft Store, then proceed to reinstall according to the above method.
