

# How to fix 100% disk error on Windows 10 Creator Updates

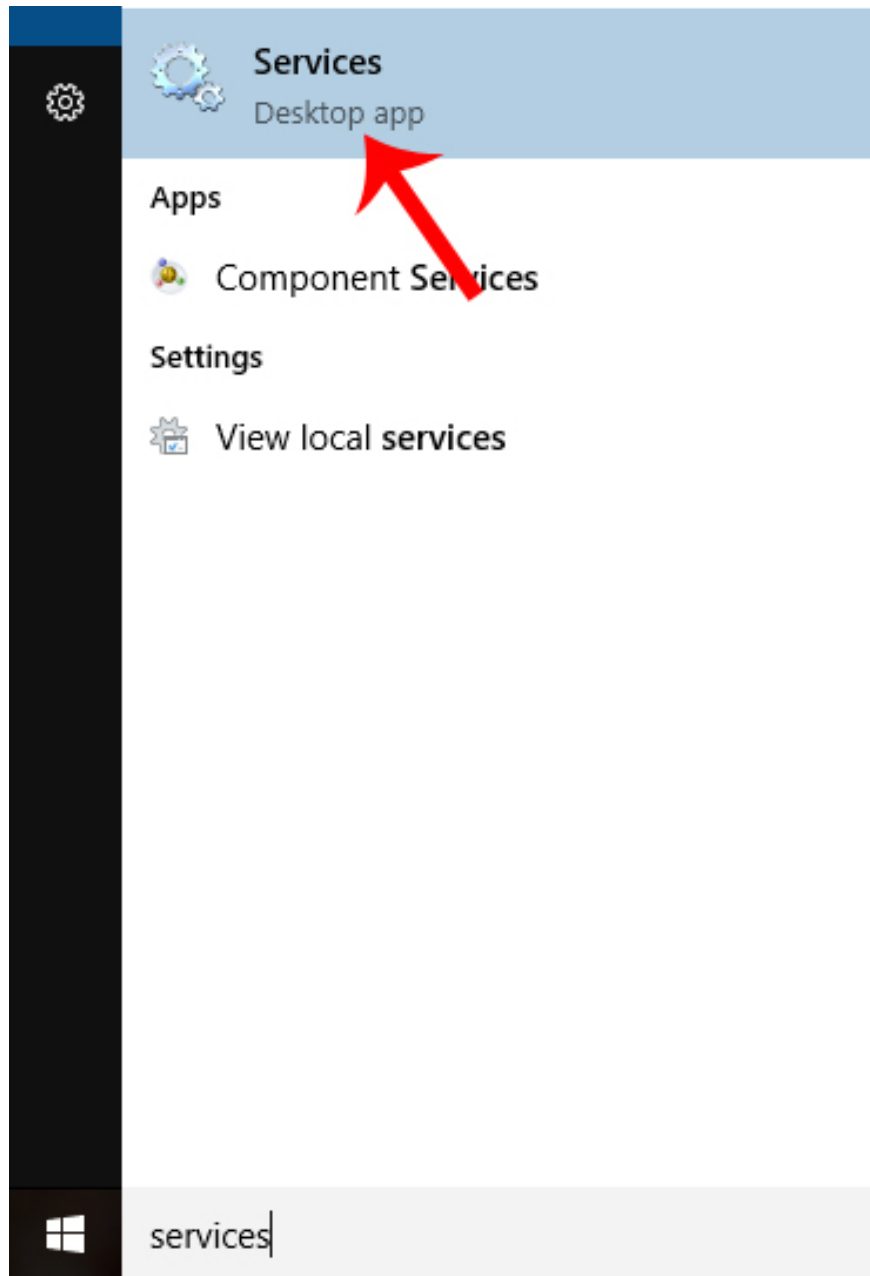

Windows 10 OS version Creator Updates upgrade with many new features, such as reading Ebook documents right on Edge browser, scheduling off or opening WiFi, ... However, the process of installing and upgrading Windows 10 Creator Updates encountered a full disk error which resulted in slow configuration of low-end machines.

Before downloading and installing the official Windows 10 Creator Updates release from Microsoft, users can upgrade this version by using Windows 10 Update Assistant, which we have guided you to read in the article. write How to download and upgrade Windows 10 Creators Update. However, in Windows 10 Creator Updates version 1703, many users reflected that there was a full disk error. For low-end computers, when upgrading Windows 10 Creator Updates, there is a slow, slow, and slow-running process that affects usage. This error is caused by Win defaulting to launch many programs right after turning on the computer, the unreadable HDD will result in a 100% full error. If you can not afford to change to an SSD, please refer to the article on how to fix full disk error on Windows 10 Creator Updates version 1703.

## Method 1: Turn off Connected User Experiences and Telemetry and Superfetch service

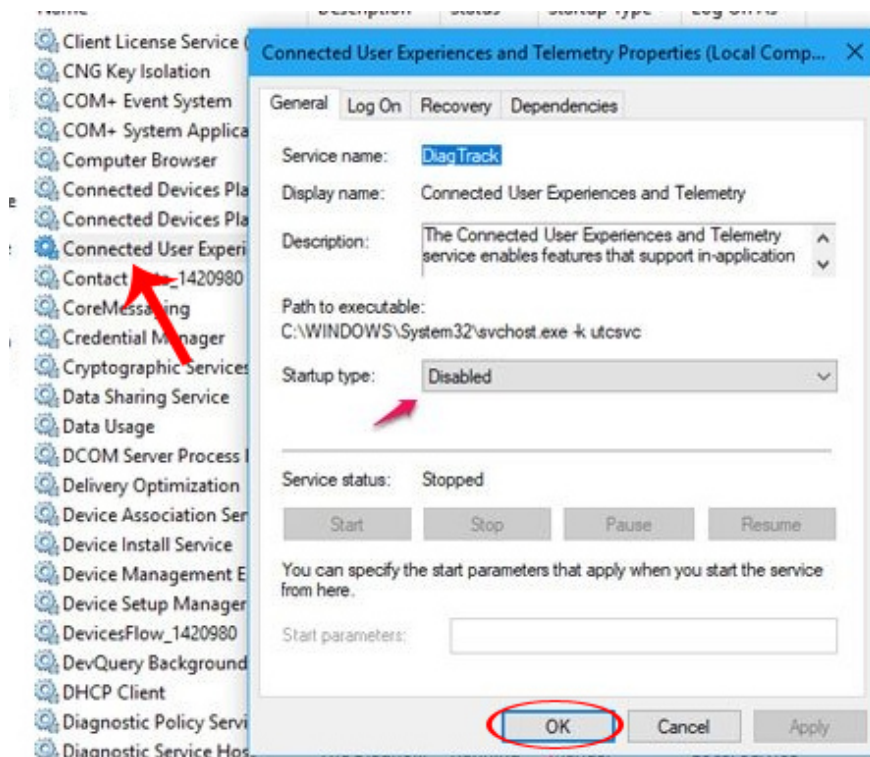

### Step 1:

In the search bar, users type the **keywords services** and then click on the search results.

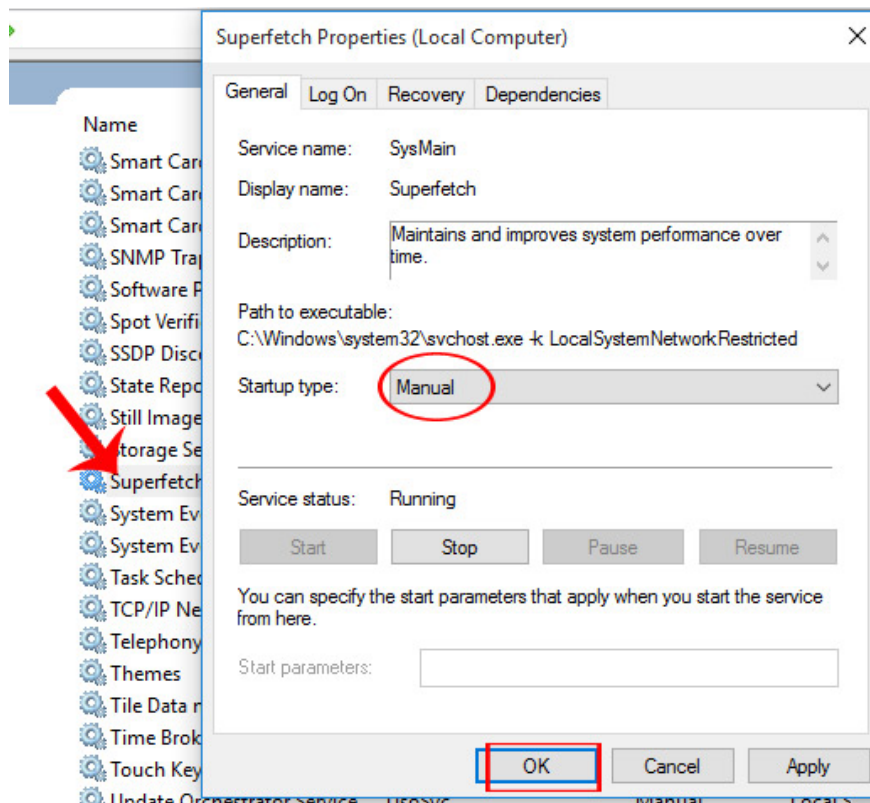

## Step 2:

In the next interface, you find and click on the **Connected User Experiences and Telemetry service** . A new dialog box appears, here, click on the **General tab** and look at the **Startup type** section and then turn **Disabled** . Click **OK** to save the changes.

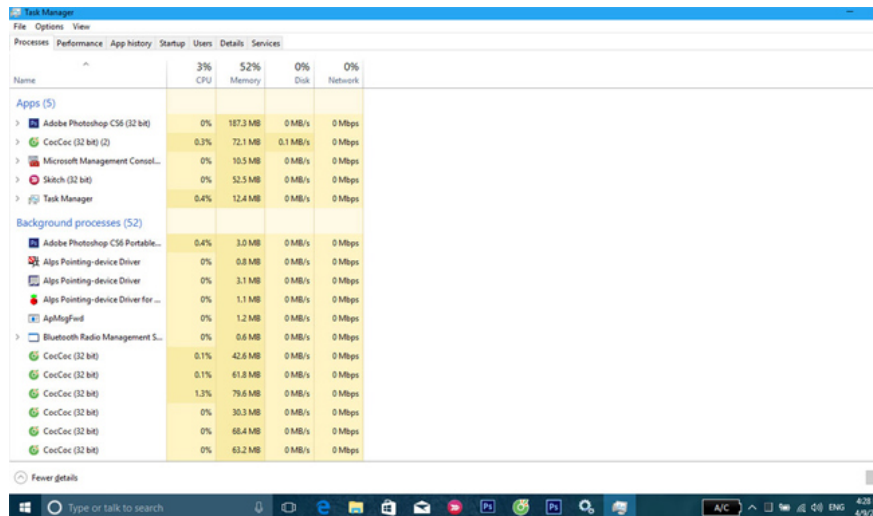

### Step 3:

Next, we find the **Superfetch** service . When you click on the service and the new dialog box appears, on the **General** tab, look under the **Startup type**, we will switch to **manual** mode. Also click **OK** to save the changes.

## Step 4:

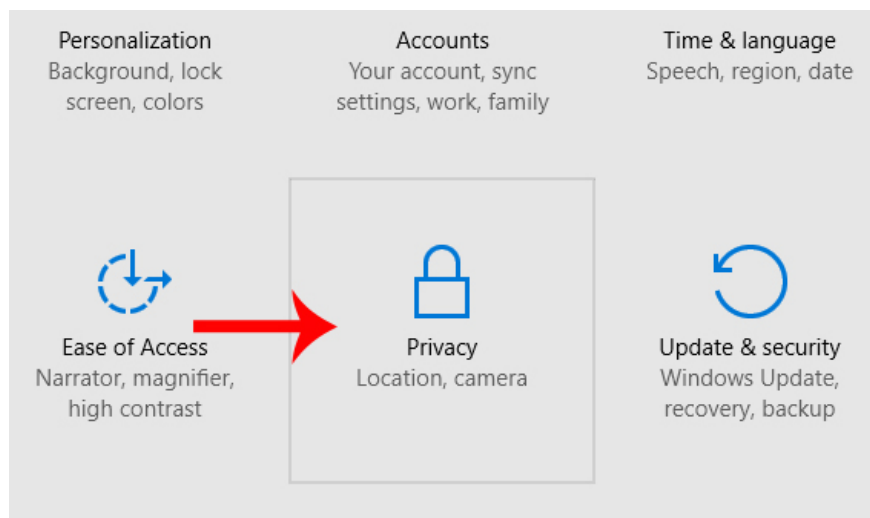

Finally, users press **Ctrl + Shift + Esc** to open **Task Manager** and see the full disk error message will not appear.

## Method 2: Turn off the application running in the background on Windows 10 Creator Updates version 1703

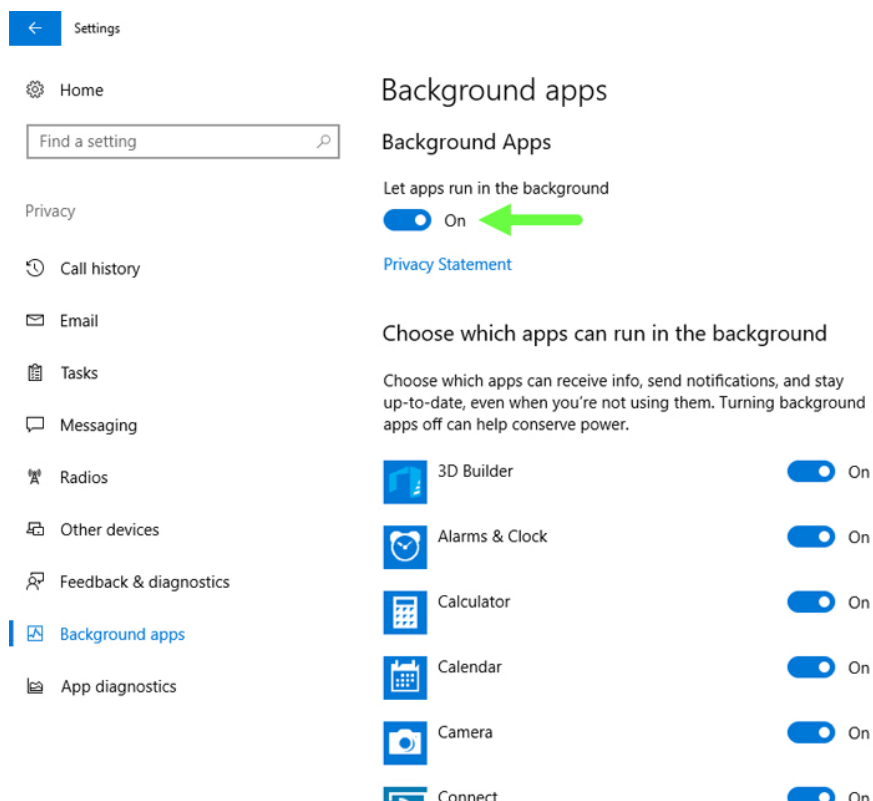

### Step 1:

First, press the **Windows + I** key combination on the device to open Settings and then select **Privacy**.

### Step 2:

In the next interface in the menu list on the left of the interface, click the **Background apps** item. Look to the right of the interface, let **Let apps run in the background** section turn on **On mode on the** button below.

These are two ways to fix the full disk notification error when installing and upgrading Windows 10 Creator Updates. Upgrading your computer to an SSD is not possible for everyone, so try this way to fix the full disk error message.
