

How to fix another version version PUBG Mobile

Many PUBG Mobile players when inviting friends to join the group encounter a version error, cannot load the game.

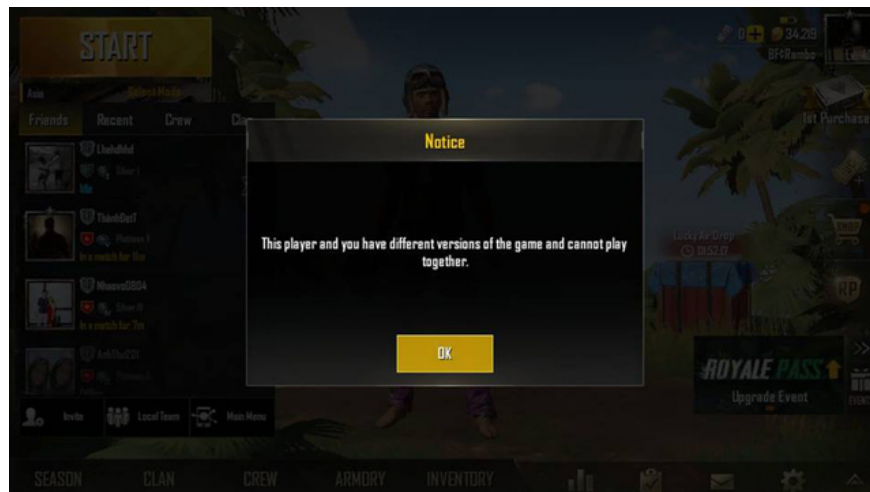

Currently PUBG Mobile version 0.8 has been released on Android and iOS. However, many gamers who invite friends to join PUBG Mobile have a different version of the error. This is because the PUBG Mobile series of friends have not updated the game to the latest version. This way, you only need to update the game to the new version. However, with the updated devices on the new version, it is still impossible to play the game. So how to fix another version error playing PUBG Mobile?
