If we have installed good games on our own computer, we sometimes encounter errors such as 'd3dx9_43.dll is missing', 'msvcr100.dll is missing'. At that time, we must be very difficult, suffered and bored by the effort of sitting down to download my favorite game for hours, but when reinstalling, there was no known error how to handle it? Let Thuthuatphanmem.vn find ways to solve this problem of you!

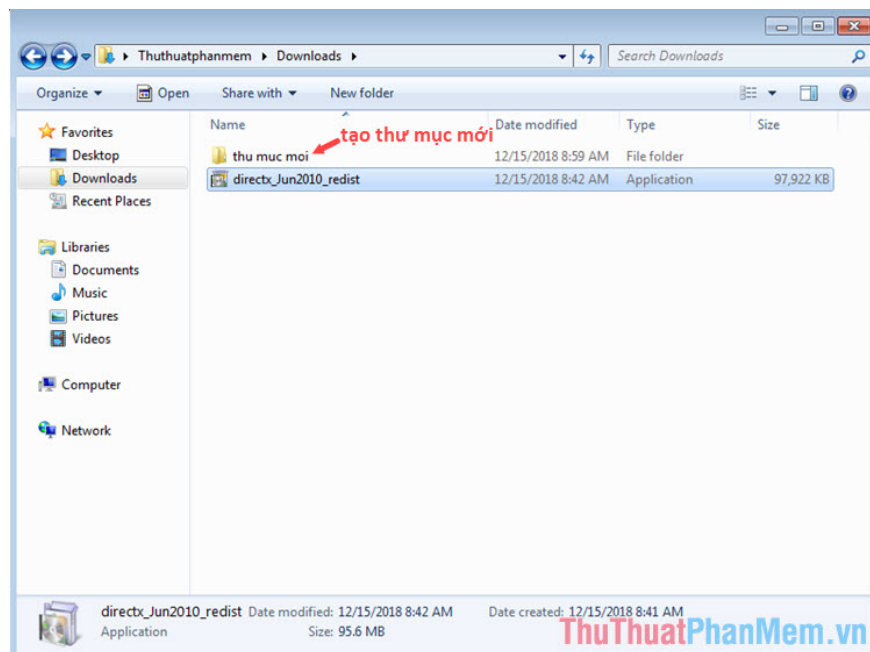

An error of the form 'd3dx9_xx' is mainly caused by a computer that has not installed DirectX 9.0c. Here, I will present 2 common ways to fix this.

Method 1: Download the DirectX 9.0c installer and install it

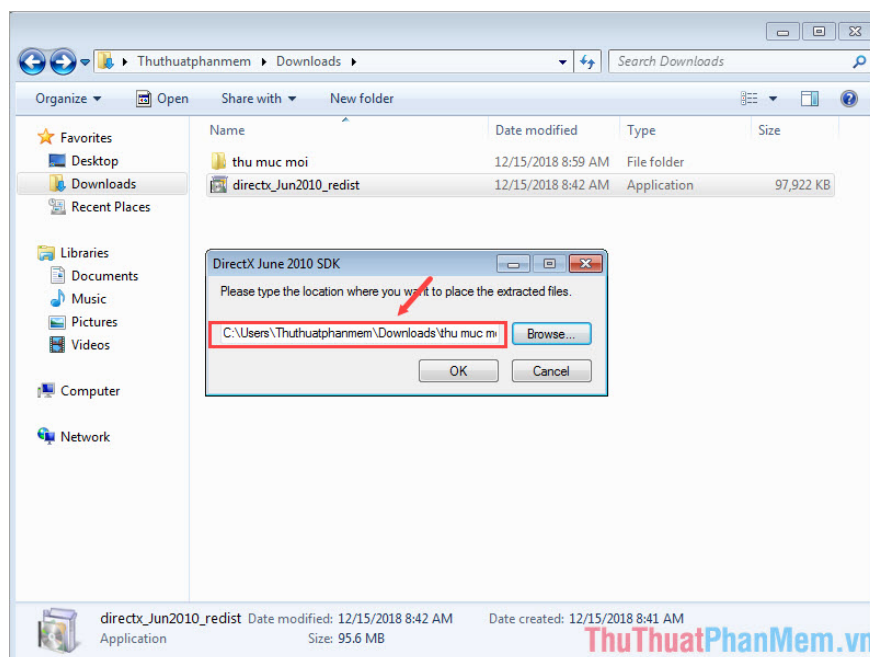

Step 1: Download the DirectX 9.0c installer at the following address:

http://download.microsoft.com/download/8/4/A/84A35BF1-DAFE-4AE8-82AF-AD2AE20B6B14/directx_Jun2010_redist.exe

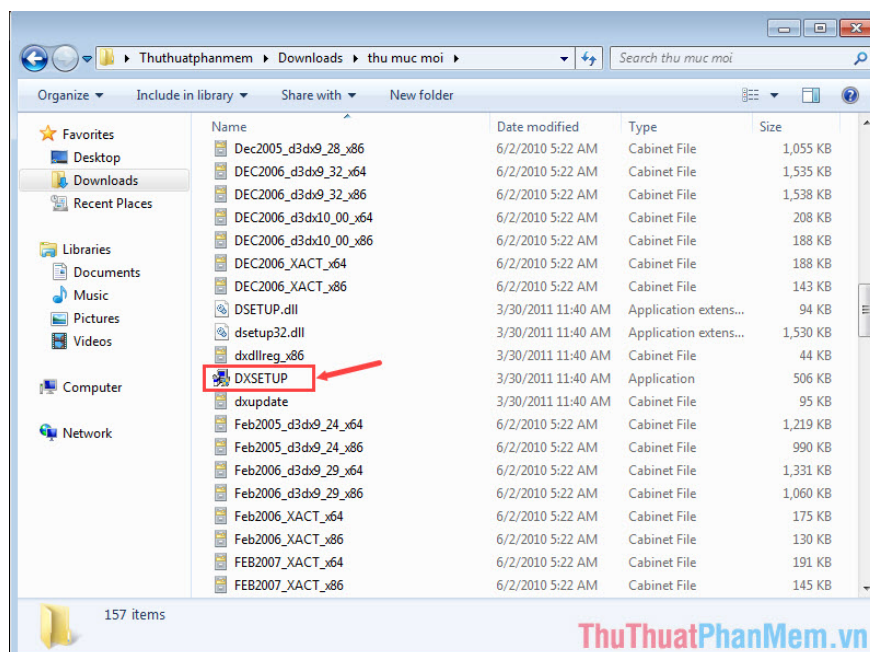

Step 2: After downloading, there will be a file ' **directx_Jun2010_redist** '. Remember to create a new folder to extract that DirectX installer.

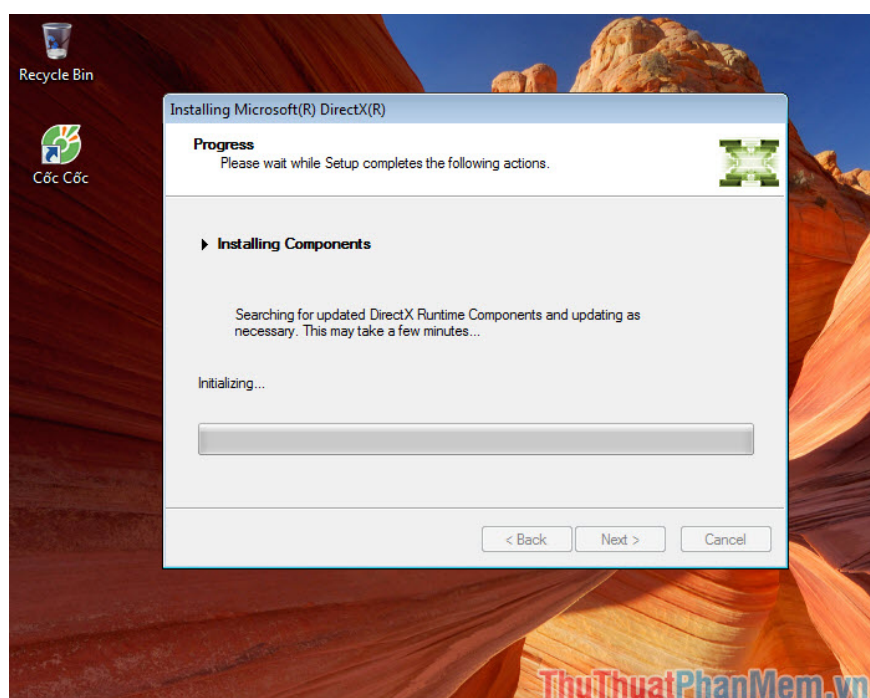

Step 3: After running the file ' `directx_Jun2010_redist` ' to the file extraction step, you select the path to the newly created empty folder.

Step 4: Go to the extracted **folder** , there will be **DXSETUP** file , you run it to install DirectX 9.0c.

Step 5 : After running the **DXSETUP** file, we will install as normal.

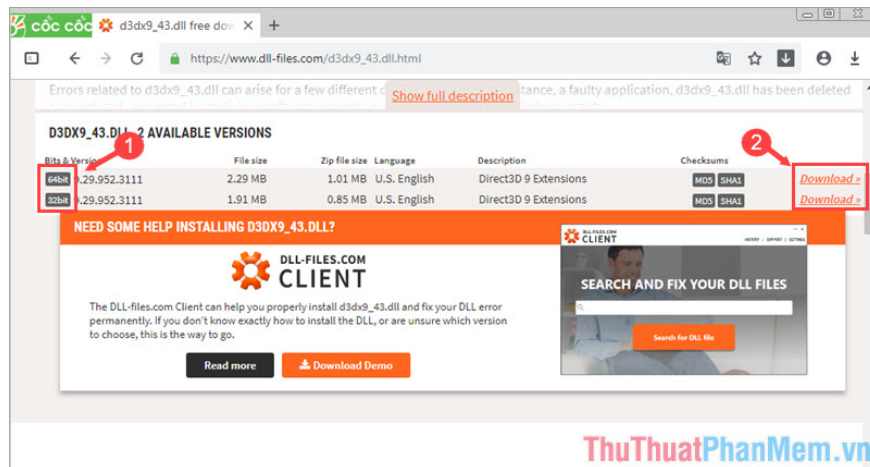

Method 2: Download the d3dx9_43.dll file from the dll-files.com website

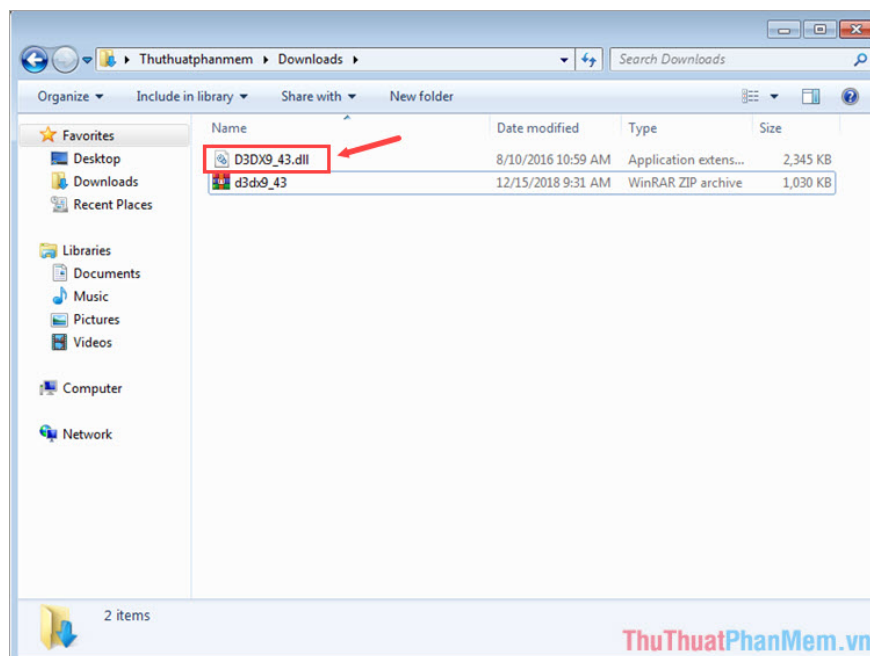

Step 1: Visit the website at the following address

https://www.dll-files.com/d3dx9_43.dll.html

You choose the **32bit** or **64bit** version suitable for your Windows and then click **Download** .

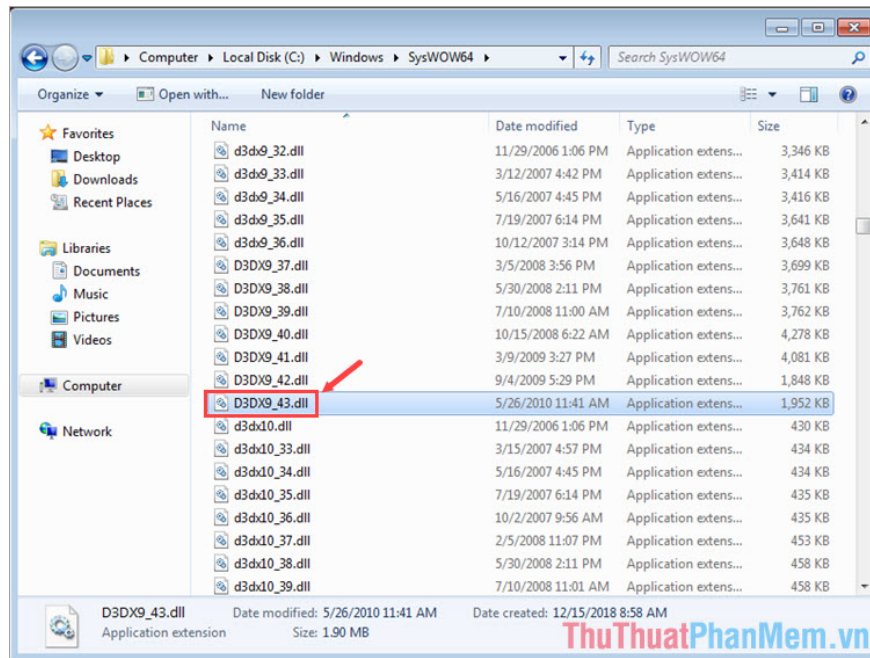

Step 2: After downloading, we will extract the file will be ' **D3DX9_43.dll** '

Step 3: In this step, you proceed to move the file ' **D3DX9_43.dll** ' as follows:

For 32bit Windows version: C: WindowsSystem32

For Windows 64bit version: C: WindowsSysWOW64
